

The background is a vibrant green with a pattern of stylized leaves and circular bokeh effects. The leaves are in various shades of green and are scattered across the frame. The bokeh consists of soft, out-of-focus circles in lighter green and yellow tones, creating a sense of depth and light.

Green List of official side events
at UNFCCC COP 21/ CMP 11
Paris – Le Bourget

With a view to reinforcing the greening of the UNFCCC COP 21/CMP11 in Paris, the organizers of all official side events were strongly encouraged by the UNFCCC secretariat to disseminate their side event materials through electronic means only.

In order to track the sustainability level of each side event, a 3-level rating was introduced:

- ❖ **green** electronic dissemination of materials only
- ❖ **orange** limited number of printed materials combined with electronic dissemination
- ❖ **red** a lot of leftover printed materials

Thanks to the exemplary commitment and cooperation of many side event organizers, **78 side events** (39% of the total of 202) were rated **green***. Only those events have been included in this list. In addition, those **green** side events for which electronic materials have been also disseminated through the UNFCCC website and which used Skype to connect speakers remotely are highlighted with additional special ‘badges’ (see the legend below):

-  100% electronic dissemination of materials
-  Uploading of side event materials on [the UNFCCC website](#)
-  Usage of Skype to connect speaker(s) remotely

The **green** side events are listed in alphabetical order according to the name of the lead organizer (in bold), which is followed by the co-organizer(s) name(s). The **green** side events organized by UN and related organizations, including UNFCCC, are listed on a separate page at the end of the document.

* The evaluation of the sustainability level of each side event was implemented by side events liaison staff onsite. If you have any question or remark about the rating, please contact see@unfccc.int.
