SUBSIDIARY BODY FOR SCIENTIFIC AND TECHNOLOGICAL ADVICE

Twenty-seventh session

Bali, 3–11 December 2007

Agenda item 9 (b)

Methodological issues under the Kyoto Protocol

Implications of possible changes to the limit for small-scale afforestation and reforestation clean development mechanism project activities

**Implications of possible changes to the limit for small-scale
afforestation and reforestation clean development mechanism
project activities**

Draft conclusions proposed by the Chair

Addendum

**Recommendation of the Subsidiary Body for Scientific and
Technological Advice**

The Subsidiary Body for Scientific and Technological Advice, at its twenty-seventh session, decided to recommend the following draft decision for adoption by the Conference of the Parties serving as the meeting of the Parties to the Kyoto Protocol at its third session:

Draft decision -/CMP.3

**Implications of possible changes to the limit for small-scale
afforestation and reforestation clean development mechanism
project activities**

The Conference of the Parties serving as the meeting of the Parties to the Kyoto Protocol,

Recalling decisions 5/CMP.1 and 6/CMP.1,

Recalling paragraph 27 of decision 1/CMP.2,

Decides to revise the limit for small-scale afforestation and reforestation project activities under the clean development mechanism referred to in paragraph 1 (i) of the annex to decision 5/CMP.1 as follows:

“Small-scale afforestation and reforestation project activities under the CDM” are those that are expected to result in net anthropogenic greenhouse gas removals by sinks of less than 16 kilotonnes of CO₂ per year and are developed or implemented by low-income communities and individuals as determined by the host Party. If a small-scale afforestation or reforestation project activity under the CDM results in net anthropogenic greenhouse gas removals by sinks greater than 16 kilotonnes of CO₂ per year, the excess removals will not be eligible for the issuance of tCERs or ICERs.
