“Touch-to-collect” technology (Poken)

In line with the sustainability efforts for COP 22/CMP 12/CMA 1, innovative “touch-to-collect” technology (Poken) is deployed by the host country. Poken is a platform for collecting digital information and networking in a user-friendly way.

Participants can receive a personal Poken device, at no charge, at the Poken distribution counters located inside the side events and exhibits hall (Area E) and in the Moroccan Pavilion (Area D). Poken, once registered with personal login information, allows collecting digital information from the official exhibits, the side events and the Moroccan Pavilion, as well as recent secretariat's publications and daily reports by observer organizations.

The registration of personal login information also allows an exchange of digital business cards among participants holding a personal Poken device. Once collected information is loaded on participants' computer and the conference is over, Poken devices are no longer needed. Participants are invited to contribute to sustainability by recycling their Poken device on the last day.
