## INTRODUCTION

1. The Conference of the Parties (COP), by its decisions 9/CP.2 and 3/CP.5, requested Parties included in Annex I to the Convention (Annex I Parties) to submit national inventory data on emissions from sources and removals by sinks by 15 April of each year. Decision 19/CP.8 requested the secretariat to prepare an annual report on the greenhouse gas (GHG) inventory data submitted by Annex I Parties for consideration by the Subsidiary Body for Scientific and Technological Advice (SBSTA) and the COP.<sup>1</sup>

2. This note presents the latest available data on GHG emissions and removals from Annex I Parties for the period 1990–2002, as reported by 30 June 2004.<sup>2</sup> Summary information, including on the status of reporting, has been published separately.<sup>3</sup> Tables A.1–B.17 that follow are based on the latest GHG inventory information from Annex I Parties for those Parties that have already submitted inventories this year or on earlier submissions or national communications for those Parties that have not yet submitted their inventories in 2004. The table "Sources of GHG emissions data", below provides an indication of which inventory submissions or national communications were the source of data for the relevant years.

---

<sup>1</sup> For the full text of the technical review guidelines adopted by decision 19/CP.8, see document FCCC/CP/2002/8.

<sup>2</sup> The latest inventory data from the European Community, Japan (version 2), Norway (version 3), Poland (version 1) and Slovakia (version 3) are not included in the tables and figures of chapters IV and V because they were received after 30 June 2004.

<sup>3</sup> See FCCC/CP/2004/5 for information on the status of reporting of annual GHG inventories by Annex I Parties.

Note: This table indicates the source of GHG emissions data and whether data were available for specific years. It does not indicate whether the submission for a year covers all gases, categories or Common Reporting Format tables (i.e. some Parties did not report all the sectoral or background data tables of the CRF in their most recent submissions, but did report the CRF trend tables covering all years; in these instances the most recent submission is indicated in this table as the data source for the period).

<sup>a</sup> Minor revisions to emissions as reflected in the indepth review (FCCC/IDR.3/RUS) are used in this document.

### **Explanatory notes**

The tables below contain numerical data on GHG inventories for 40 Annex I Parties for the period 1990–2002, as submitted in annual GHG emission inventories or national communications. As some Annex I Parties have not provided recent submissions, and some did not include data for all years in their most recent submissions, data have been compiled from various sources, and hence trends in emissions presented may not be consistent in all instances. As well, data were not always available for all gases or source and sink categories required in the guidelines.<sup>4</sup> Where data were not available, the tables contain blank spaces.

The tables provide inventory data on carbon dioxide (CO<sub>2</sub>), methane (CH<sub>4</sub>), nitrous oxide (N<sub>2</sub>O), hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), sulphur hexafluoride (SF<sub>6</sub>), ozone precursors and sulphur dioxide (SO<sub>2</sub>), and include information on international bunkers. Information on land-use change and forestry is included in aggregate estimates, and separately from other CO<sub>2</sub> estimates, recognizing the ongoing methodological work by the Intergovernmental Panel on Climate Change (IPCC) in this sector. To present information on HFCs, PFCs, SF<sub>6</sub> and aggregate greenhouse gases in a comparable manner, the secretariat has used IPCC 1995 global warming potentials (GWPs) to present information in terms of CO<sub>2</sub> equivalents. The footnotes to the tables should be treated as an integral part of the tables.

Tables A.1 and A.2 contain information on aggregate emissions of all greenhouse gases combined (expressed as CO<sub>2</sub> equivalent) for the major source categories. Inventory data on the individual greenhouse gases are presented in tables A.3–A.19. As not all Annex I Parties provided data for 2002 (the most recent year included in this document), no totals or percentage contribution by sector are given for that year in tables A.2–A.12. The trends in total greenhouse gases and in emissions of the various gases, and for the most important source categories for the period 1990–2002, are given in tables B.1–B.17. Emission estimates of the European Community are presented at the bottom of the tables as these estimates are reported by the European Community separately from those reported individually by the Annex I Parties that are member States of the European Community.

Values may differ slightly from those submitted to the secretariat as a result of rounding or corrections of typographical and calculation errors or omissions, and the presentation (for consistency and comparability) of subtotals and totals not provided in the annual inventory submissions, communications or other submissions.

The *Revised 1996 IPCC Guidelines for National Greenhouse Gas Inventories* are referred to in this document as the IPCC Guidelines, and the "Guidelines for the preparation of national communications by Parties included in Annex I to the Convention, Part I: UNFCCC reporting guidelines on annual inventories" (FCCC/CP/1999/7) as the UNFCCC guidelines. Categories of sources of GHG emissions or their sinks corresponding to the IPCC Guidelines or UNFCCC guidelines nomenclature are given in *italics*.

---

<sup>4</sup> For the full text of the UNFCCC guidelines on reporting GHG inventories adopted by decision 3/CP.5 and 18/CP.8, see documents FCCC/CP/1999/7 and FCCC/CP/2002/.

The following chemical symbols and abbreviations have been used:

<b>CF<sub>4</sub></b>	perfluoromethane
<b>C<sub>2</sub>F<sub>6</sub></b>	perfluoroethane
<b>C<sub>3</sub>F<sub>8</sub></b>	perfluoropropane
<b>C<sub>4</sub>F<sub>10</sub></b>	perfluorobutane
<b>C<sub>6</sub>F<sub>14</sub></b>	perfluorohexane
<b>CH<sub>4</sub></b>	methane
<b>CO</b>	carbon monoxide
<b>CO<sub>2</sub></b>	carbon dioxide
<b>HFCs</b>	hydrofluorocarbons
<b>N<sub>2</sub>O</b>	nitrous oxide
<b>NO<sub>x</sub></b>	nitrogen oxides
<b>NMVOCs</b>	non-methane volatile organic compounds
<b>PFCs</b>	perfluorocarbons
<b>SF<sub>6</sub></b>	sulphur hexafluoride
<b>SO<sub>2</sub></b>	sulphur dioxide

The following units of mass have been used:

**Gg gigagram** (10<sup>9</sup> grams)  
**Mg megagram** (10<sup>6</sup> grams)

The following other abbreviations have been used:

<b>CRF</b>	common reporting format
<b>GHG</b>	greenhouse gas
<b>GWP</b>	global warming potential
<b>NC1</b>	first national communication
<b>NC2</b>	second national communication
<b>NC3</b>	third national communication
<b>INV99</b>	inventory submission 1999
<b>INV00</b>	inventory submission 2000
<b>INV01</b>	inventory submission 2001
<b>INV02</b>	inventory submission 2002
<b>INV03</b>	inventory submission 2003
<b>INV04</b>	inventory submission 2004
<b>no data</b>	data have not been provided

<sup>a</sup> Aggregate emissions of CO<sub>2</sub>, CH<sub>4</sub>, N<sub>2</sub>O, HFCs, PFCs and SF<sub>6</sub>, using 1995 IPCC global warming potentials.

<sup>b</sup> Includes *solvent use, waste, other* and CH<sub>4</sub> and N<sub>2</sub>O from *land-use change and forestry*.

<sup>c</sup> Aggregate emissions of all greenhouse gases excluding CO<sub>2</sub> emissions and removals from *land-use change and forestry*.

<sup>d</sup> CO<sub>2</sub> estimates for *land-use change and forestry* as reported in accordance with the present *Revised 1996 IPCC Guidelines for National Greenhouse Gas Inventories* (see table B.8).

<sup>e</sup> Aggregate emissions of all greenhouse gases including CO<sub>2</sub> emissions from *land-use change and forestry*.

<sup>f</sup> Total emissions for energy (fuel combustion and fugitive fuel) are given under fuel combustion because emissions were not further disaggregated by the Party.

<sup>g</sup> In accordance with decision 9/CP.2, some Parties with economies in transition use base years other than 1990: Bulgaria (1988); Hungary (average of 1985-1987); Poland (1988); Romania (1989); and Slovenia (1986).

**Table A.2. Aggregate emissions and removals of all greenhouse gases<sup>a</sup> (CO<sub>2</sub> equivalent) by source/sink category, including and excluding land-use change and forestry, 2002 (Gigagrams and percentage of total by Party)**

	Energy												Percentage increase or decrease in emissions with the inclusion of land-use change and forestry	
	Fuel combustion		Fugitive fuel		Industrial processes		Agriculture		Other <sup>b</sup>		Total (excluding land-use change and forestry) <sup>c</sup>	Land-use change and forestry (CO <sub>2</sub> ) <sup>d</sup>	Total (including land-use change and forestry) <sup>e</sup>

<sup>a</sup> All remaining emissions from non-specific fuel combustion including emissions from military fuel use.

<sup>b</sup> In accordance with decision 9/ CP. 2, some Parties with economies in transition use base years other than 1990: Bulgaria (1988); Hungary (average of 1985-1987); Poland (1988); Romania (1989); and Slovenia (1986).

<sup>c</sup> Fuel combustion emissions from territories of the United States of America are included under other .

<sup>d</sup> The percentage of the total accounted for by each category has been calculated on the basis of the overall total excluding the Russian Federation and Ukraine (10,920,720 Gg) because data for the individual categories were not provided. However, the total for all the Parties given in the last column (13,891,695 Gg) does include the Russian Federation and Ukraine.

<sup>a</sup> Negative values indicate net removal of CO<sub>2</sub> from the respective category.

<sup>b</sup> *Other* includes removals from revegetation.

<sup>c</sup> *Other* includes emissions from changes in crop biomass and peat extraction.

<sup>d</sup> *Other* includes landfilled yard trimmings.

<sup>a</sup> See tables B.3, B.4, B.8, B.9, and B.13 for gases separately.

<sup>b</sup> Estimates for *land-use change and forestry* are as reported in accordance with the *Revised 1996 IPCC Guidelines for National Greenhouse Gas Inventories* (see table B.8).

<sup>c</sup> In accordance with decision 9/ CP.2, some Parties with economies in transition use base years other than 1990: Bulgaria (1988); Hungary (average of 1985-1987); Poland (1988); Romania (1989) and Slovenia (1986).

<sup>d</sup> The Party did not provide estimates from the *land-use change and forestry* sector for 1996-2002.

<sup>e</sup> The Party did not provide estimates from the *land-use change and forestry* sector.

<sup>a</sup> Negative values in Gg indicate net removals of CO<sub>2</sub> from the *land-use change and forestry* sector. In the change column negative values indicate a decrease in removals or an increase in emissions relative to 1990 and positive values indicate an increase in removals or a decrease in emissions.

<sup>b</sup> In accordance with decision 9/CP.2, some Parties with economies in transition use base years other than 1990: Bulgaria (1988); Hungary (average of 1985-1987); Poland (1988); Romania (1989); and Slovenia (1986).
