The United Nations Framework Convention on Climate Change (UNFCCC) is the focus of the political process to address Climate Change. The UNFCCC secretariat supports the Convention, its Kyoto Protocol and the historic Paris Agreement through a range of activities, including substantive and organizational support to meetings of the Parties and the implementation of commitments. It is a dynamic organization working in a politically challenging environment to help resolve one of the defining environmental issues of our time.

The Adaptation programme of the UNFCCC secretariat supports the intergovernmental process in relation to adaptation. This process includes activities relating to national adaptation plans, national adaptation programmes of action, the Nairobi work programme (NWP), the work programme on loss and damage, the Adaptation Committee, research and systematic observation under the Subsidiary Body for Scientific and Technological Advice (SBSTA), coordinating the global stocktake under the Paris Agreement, adaptation action under the Subsidiary Body for Implementation (SBI) and the work of the Ad Hoc Working Group on the Paris Agreement (APA) adaptation and the global stocktake.

The Adaptation Programme also engages Parties and stakeholders including national, regional, multilateral and international organizations, across public and private sectors, civil society and other relevant stakeholders. The Programme coordinates the global stocktake under the Paris Agreement and addresses the process of reviewing the adequacy of the long term global goal and the consideration of various matters related to climate science.
