The Convention secretariat supports the Convention and its Kyoto Protocol through a range of activities, including substantive and organizational support to meetings of the Parties.

**Global Climate Action** supports implementation of the Paris Agreement by enabling collaboration between governments and the cities, regions, businesses and investors that must act on climate change. Its mission is to step up collaboration between governments and key stakeholders to immediately lower emissions and increase resilience against climate impacts. These actions will be guided by the long-term goals of the Paris Agreement and undertaken in the context of the 2030 Agenda for Sustainable Development. Global Climate Action has a particular focus on immediate climate action between now and 2020 to support the success and overachievement of the Nationally Determined Contributions (NDCs) and National Adaptation Plans (NAPs). It aims to take ambition to new heights and will also look to spur new climate action in areas of untapped potential.
