

NDC INVEST

Act for the planet. Act for change.

We know that the transition to a

low-carbon
climate-resilient
economy

entails difficult challenges, but we also know that effective planning and implementation will enable opportunities for sustainable development, improving lives for all.

Key challenges to translate NDCs into concrete projects/programs

Alignment with National agendas

- SDGs
- Sustainable Infra

Cross-Sectorial Engagement

- Full government buy in, active role of Finance/Planning ministers **& private sector**

Institutional Capacity

- In a range of technical, policy & financial skills

Portfolio of Quality projects

- Upstream policies & Planning

Budget Constraints

- Effective leverage of finance

The time to act is now.

That's why we have created:

NDC INVEST

One-stop shop for countries to access resources for transforming their national commitments into achievable investment plans. It is comprised of four main elements:

NDC Invest - Components

NDC Programmer

Identification of sectoral priorities and support the enabling environment for NDC implementation in LAC.

- *Assess NDCs' institutional capacity, financing and investment requirements.*
- *Engage Government stakeholders and the private sector.*

NDC Pipeline Accelerator

Support the pre-investment activities required for transformational impact

- *Upstream support to **develop pipeline on sustainable infrastructure.***
- *Support for **integration of sustainability** considerations into Infrastructure PPPs project planning, design and reporting systems.*
- *Create a positive influence in the markets.*
- *Initially funded with **EUR10 million** from the NDF*

NDC Invest - Components

NDC Finance Mobilizer

Increase attractiveness of NDC related investments

- **Increase access to concessional resources** and blend with IDB and IIC capital to increase attractiveness of public sector investments,
- and to enhance the **economic feasibility and/or provide risk-sharing** for private sector operations

NDC Market Booster

Overcoming market and other non financial barriers

- **Non reimbursable and reimbursable grants for design and promotion of innovative financial instruments** and prototyping of new technology
- **Capital grants for new low-carbon and resilient business models** and market facilitation services

NDC Invest in Action

The Case of Mexico

→ A combination of coordinated interventions led by SEMARNAT and HACIENDA to effectively advance NDC implementation at different levels.

NDC Programmer: Technical assistance to strengthen MRV capacity.

NDC Market Booster: Financial support to identified Project pipeline under the *Fondo Verde of Mexico*.

NDC Finance Mobilizer: Potential mobilization of concessional resources

We need to work together towards a sustainable development paradigm.

Act for the planet,
act for change.
