## EDUCATION, UNIVERSITIES AND TRAINING BASIC EDUCATION

# USAID

You are here > [Home](#) > [Our Work](#) > [Education, Universities and Training](#) > [Basic Education](#)

Through its basic education program, USAID's Office of Education in the Bureau for Economic Growth, Agriculture and Trade (EGAT/ED) works with USAID Missions to assist developing countries to improve their respective pre-primary, primary, and secondary levels of education. Teacher training for these levels, as well as adult literacy, are important elements of EGAT/ED's program.

Specifically USAID's basic education activities are targeted to:

- Improving policies and resource allocation by governments to basic education indicating their commitment to the goals of Education for All;
- Increasing the number of children receiving quality educational programming, in both in and out of school settings;
- Increasing the number of teachers with improved pedagogical techniques and skills;
- Having a larger number of communities involved in their schools;
- Raising the quality and relevancy of curricula and teaching materials;
- Providing education policy makers with access to more education data and indicators; and
- Helping more children and teachers use education technology for improved learning.

A special emphasis of all basic education activities is improving opportunities for girls, women and other underserved and disadvantaged populations.

EGAT/ED's Basic Education and Policy Support Activity (BEPS) is USAID's mechanism for providing much of the above support worldwide. [Click here to learn more.](#)

DHS EdData is the primary mechanism by which EGAT/ED works toward providing developing countries with accurate and timely data for education policy and program planning. [Follow this link to learn more about DHS EdData activities](#) as implemented by ORC Macro under an Indefinite Quantity Contract (IQC).
