UNFCCC TECHNICAL EXPERT MEETING ON ADAPTATION

Moldova on its national M&E framework

Ala Druta,
Climate Change Office
Ministry of Environment
Republic of Moldova

Bonn, 25 May, 2016

Republic of Moldova Climate Change Adaptation policy framework

National Adaptation Planning Process of Moldova established under UNFCCC enables parties to identify medium and long-term adaptation needs and to develop strategies to address these needs.

National Climate Change Adaptation Strategy and the Action Plan (2014)

Forestry sector Climate Change Adaptation Strategy and the Action Plan (2015-2016)

Health sector Climate Change Adaptation Strategy and the Action Plan (2015-2016)

CCA mainstreaming into sectoral development strategies of Agriculture, Energy and Transport sectors (2015-2016)

CCA mainstreaming into district level development strategies (2015-2016)

Government decision for setting up of inter- sectoral multi- stakeholder Coordination Mechanism (under approval) .

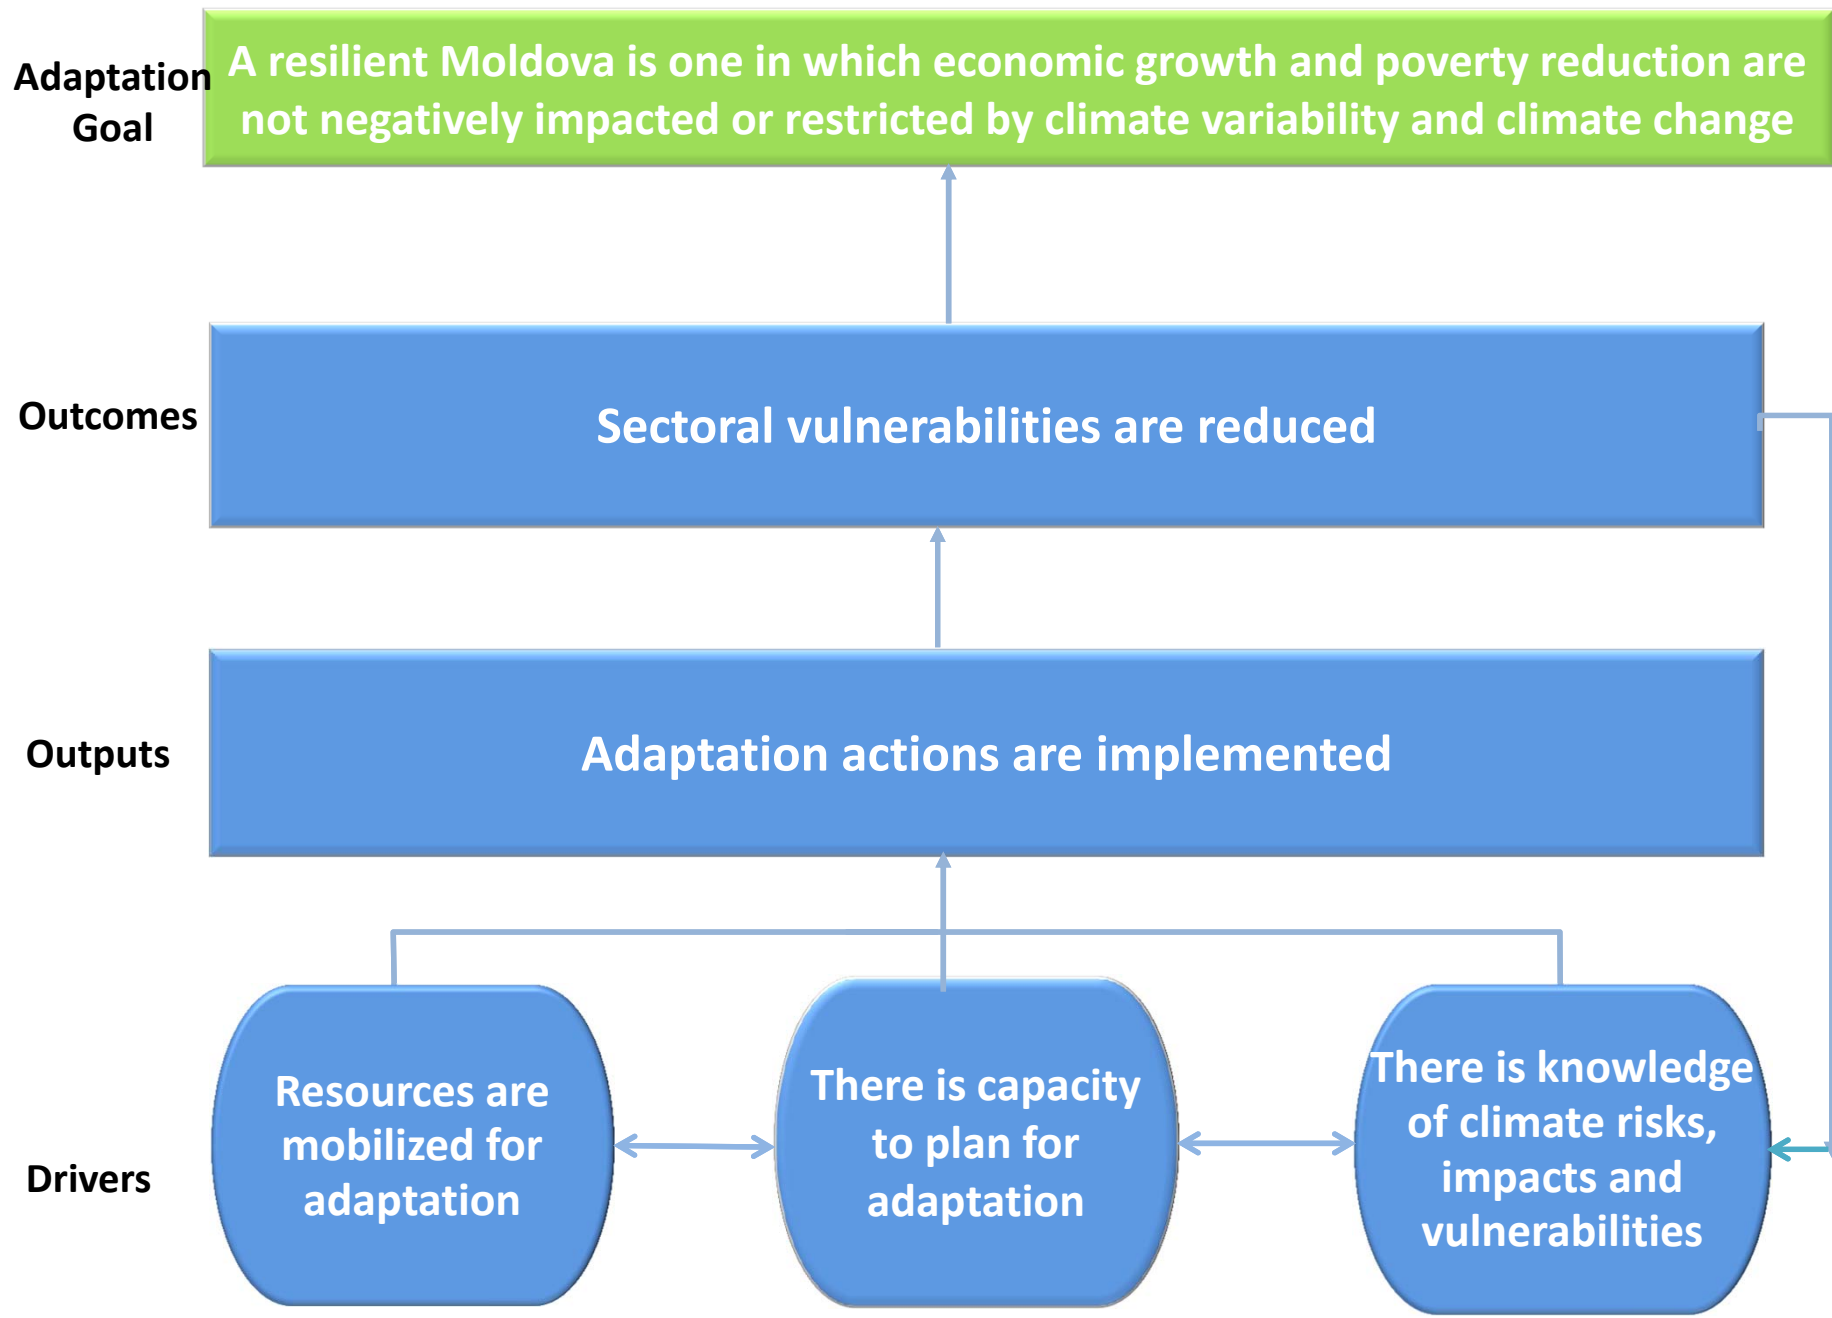

M&E Framework

Monitoring and Evaluation framework goal

is to ensure the measurability of progress across sectors, geographic scales, time and to be able to determine whether, as a result of its successive plans, Moldova is less vulnerable to the impacts of climate change.

M&E framework for Moldova serves the following purposes:

- to assess and track progress under the successive NAPs/SAPs and serve as a basis to design future iterations of each plan;
- create a set of overarching adaptation goals to which each sector will contribute;
- track and monitor individual sectoral objectives and indicators;
- allow for iterative planning and continuous, evidence-based adaptation planning;
- enforce the gradual integration of adaptation priorities in regular development planning.

Multilevel M&E Framework of adaptation

Level	Indicator category	Means of verification	Time line
Macro level	Objective indicators -sectoral vulnerability -economy-wide vulnerability -MD-specific Index of Resilience	-cross-sectoral assessment -monetary value of losses -% GDP in losses -index value	NAP every 4 years
Meso level	Outocme indicators -sector-specific indicators -theme-based indicators Driver indicators -% of national budget targeting -adaptation-related actions -level of IC for adaptation -number of V&A assessments	-direct observations -assessments -Coding system tracking SAP/ NAP -actions within the responsible ministries budgets and aggregated -Capacity Score Card -periodic sec-r V&A assessments	NAPs/SAPs every 4 years
Micro level	Output indicators -activity -related reporting	-results of implemented measures or actions	Actions, annually

M&E system supporting tools

M&E system tools	Responsible for applying M&E tools
V&A assessments	Inter-sectoral CC Commission, Ministry of Environment, sectors' working groups, experts
Climate Change vulnerability and resilience Index	Inter-sectoral CC Commission, Ministry of Environment, sectors' working groups, experts
Progress monitoring indicators	Inter-sectoral CC Commission, sectors' working groups, NGOs, private business
Climate adaptation reporting database	Secretariat of Inter-sectoral CC Commission
Sector and national budget climate tagging	Ministry of Finances, Inter-sectoral CC Commission,

M&E Process

Task	Responsibility	Y1	Y2	Y3	Y4	Y1	Y2	Y3	Y4	Etc ...
Nominate M&E focal points in each sector	Sector ministries	x								
Create M&E task force	Adaptation Commission	x								
Finalize list of output and outcome indicators	Sector ministries, Adaptation commission	x				x				
Establish and maintain M&E Database	Adaptation Commission	x			x	x			x	x
Conduct Baseline assessments for all indicators	Sector ministries, Adaptation commission	x								
Establish SAPs and activity-based indicators	Sector ministries	x				x				
Establish NAPs and perform capacity building		x								
Monitor activity-based indicators	Sector ministries	x	x	x	x	x	x	x	x	x
Provide information on outcome-based indicators	Sector ministries				x				x	
Provide information on drivers of change	Sector ministries, Adaptation commission				x				x	
Compile information on Objective-level indicators					x				x	

Thank you for attention.
