

10th meeting of the Adaptation Committee

**Reporting back to plenary
on “Establishment of a potential partnership platform ”**

Bonn, Germany, 7 to 8 September 2015

***Facilitator: Kimberly
Rapporteur: Clifford***

Outcomes suggested by the breakout group

There is a need to understand the landscape of existing platforms. This could be done by preparing an overview:

- Building on existing work already done by the AC
- Addressing the need for a common understanding of “technical support”
- Identifying:
 - Gaps in the area of technical support
 - Overlaps/duplication
 - Whether platforms are demand-driven, so to respond adequately to the needs of countries
- The landscape overview should cover institutions under the Convention and key institutions outside

Outcomes suggested by the breakout group

- Analysing the existing landscape could be an activity carried out in collaboration with the NWP and CTCN
- This work should take into account the AC's review of adaptation-related institutions under the Convention in 2017.
- The AC to agree on steps upon consideration of landscape analysis
