

SBI AIM submission on opportunities to further enhance the effective engagement of non-Party stakeholders with a view to strengthening the implementation of the provisions of decision 1/CP.21.

Here are some proposals from **Climate Leadership Council** (www.clc.fi).

- Our members are mostly CEOs or chairmen of the board. It would be great help if we could nominate participants on a daily or bi-daily basis, since their time schedule is very tight and it would be very difficult to get them to join for the whole week. The other option would be to admit overflow passports for one day.

- It would be helpful if the names of the participants could be informed closer to the event.

- There has been a lot of variations on how observers could join the negotiation meetings. It would be important to secure that an observer organisation could follow at least some, most relevant negotiations from their point of view.

- It would be important also to develop the mechanisms on how observers' viewpoints are presented from a certain topic to negotiating parties. Could there be a www-application for this?
