

Proposal for a short and concise formulation of Art. 2 (PURPOSE)

The purpose of the Agreement is to further the objective of the Convention by reducing global greenhouse gas emissions with the view to hold the increase in the global average temperature well below 2 degrees Celsius above pre-industrial levels [, without prejudice to adjusting the global long-term temperature goal on the basis of best available scientific knowledge], and also to promote the global transformation to low-emission and climate-resilient [societies and economies] [pathways that address climate change and its impacts].
