

International Ecosystem Management Partnership
国际生态系统管理伙伴计划

VISION

To enhance the role of **ecosystem management** as a vital approach to working with nature for a world with a green economy and green development.

MISSION

To provide science, policy and capacity support to **developing countries** in order to integrate ecosystem management into their national policies to enhance delivery of ecosystem services for human well-being.

Ecosystem management

“an integrated process to conserve and improve ecosystem health that sustains ecosystem services for human well-being”

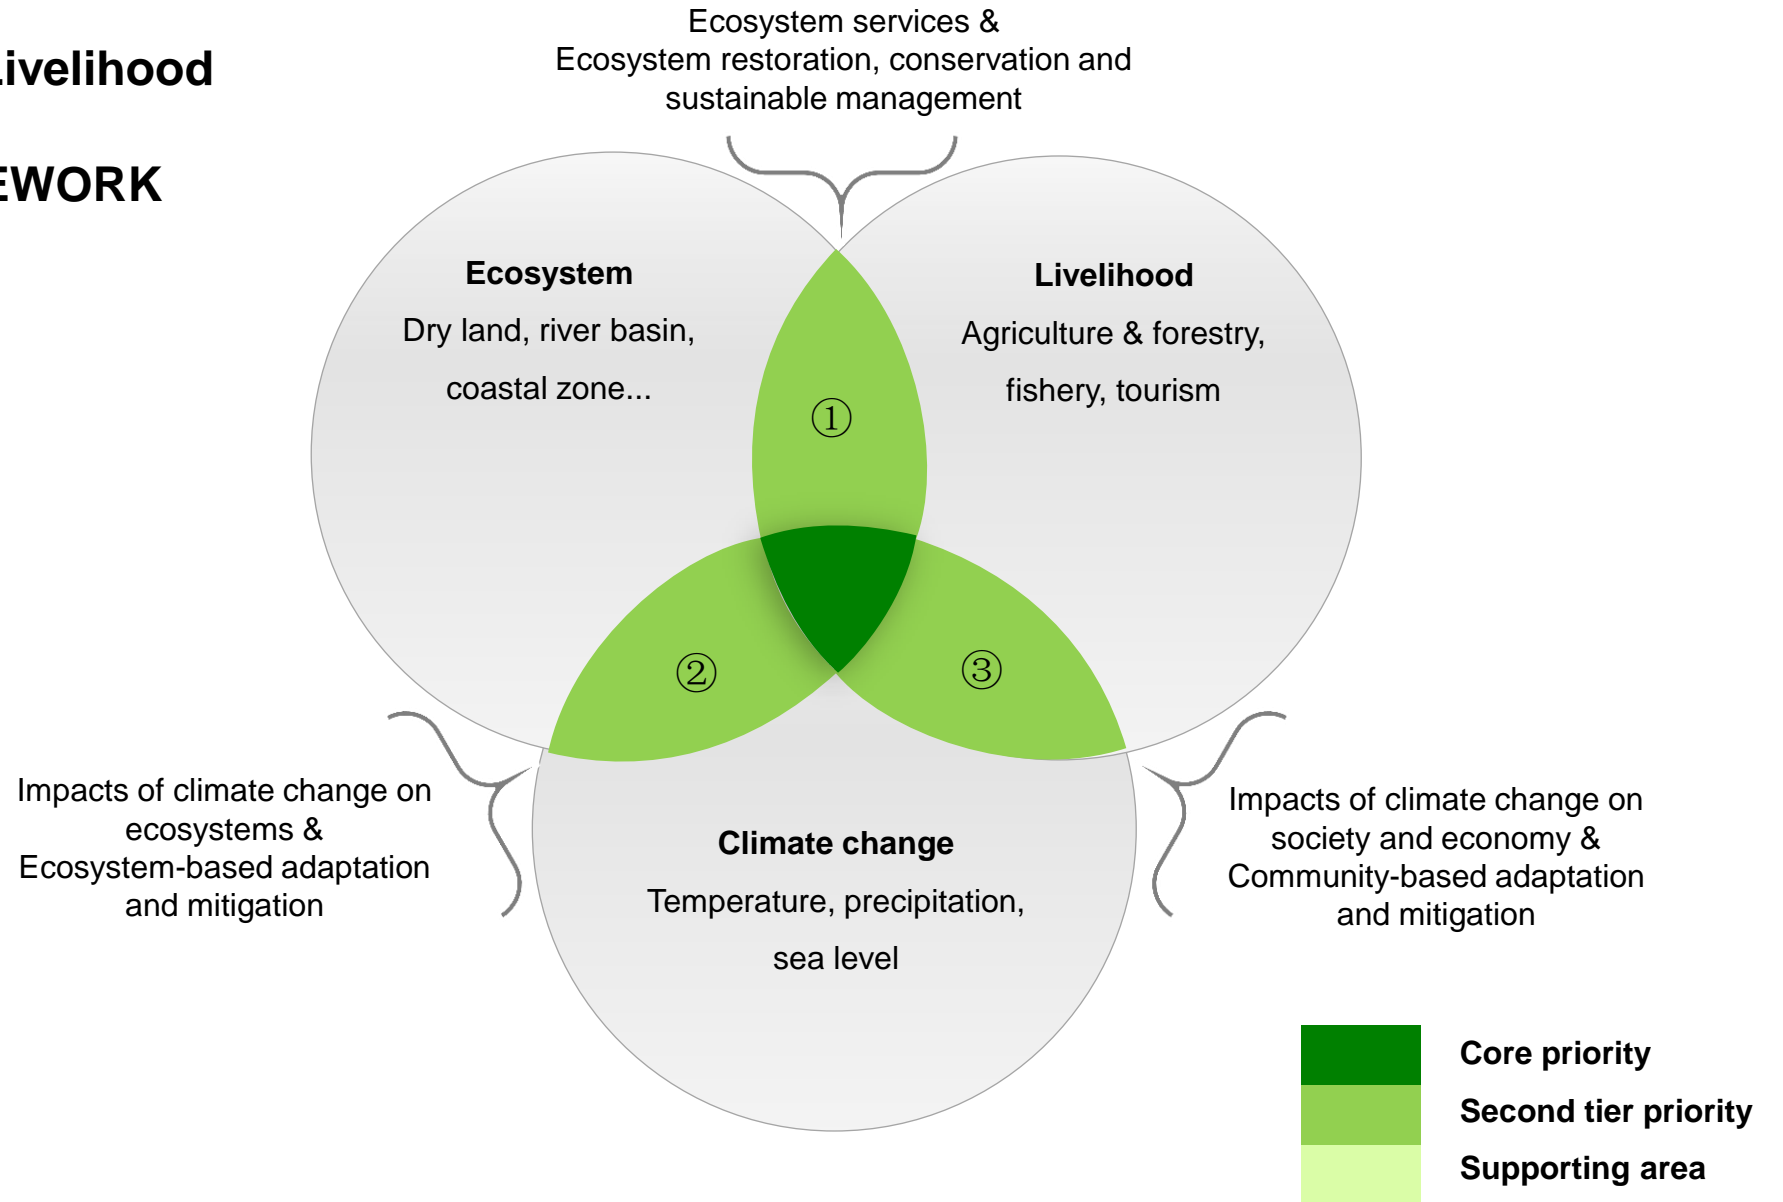

can **halt and reverse the increasing degradation** of ecosystems, while also **providing economic benefits and job opportunities**

particularly for developing countries that are more directly dependent on provisioning with **ecosystem services**

- **Provisioning services:** food, fiber, water, energy
- **Supporting services:** nutrient cycling, seed dispersal, biodiversity conservation
- **Regulating services:** carbon sequestration, waste decomposition, flood regulation, water storage, water purification, sediment and nutrient retention, erosion control
- **Cultural services:** ecotourism, aesthetic value, recreation, education

Flagship Programme Ecosystem, Climate, Livelihood

CONCEPTUAL FRAMEWORK

Flagship Programme Ecosystem, Climate, Livelihood

FOCAL REGIONS AND ECOSYSTEM PATTERNS

Components (sub-programmes)

- ① arid areas from Central Asia to Africa;
- ② Lancang-Mekong River Basin; other river basins (Congo River, Amazon River)
- ③ coastal zones of the Southeast Asia and Africa; coastal zone of the Caribbean Sea
