Coalition on Paris Agreement Capacity Building

Smart Leadership for Empowering People and Institutions in the New Era of Climate Action

ANNEX: PRIORITY ACTIVITIES FOR CLIMATE CHANGE CAPACITY BUILDING

Institutional Arrangements and Training

- Activity 1: Facilitative peer assessments and improvements
- Activity 2: MRV training and tailored scholarships
- Activity 3: Translation of IPCC course material into Spanish and French
- Activity 4: Institutional Arrangements Tool
- Activity 5: Embedding transparency training and education into existing academic and research institutions
- Activity 6: New transparency (MRV) training curriculum
- Activity 7: Informal benchmarking and tracking country levels of transparency and institutional capacity

Expert and Knowledge Networks

- Activity 8: Mentor network on transparency
- Activity 9: Knowledge sharing platform on transparency (MRV)

Other Innovative Activity Concepts

- Activity 10: Integrated approaches for GHG and air pollution data
- Activity 11: NGO engagement in national verification and review activities
- Activity 12: Transparent GHG data presentation and viewers

Global Thought Leadership on Capacity Building

- Activity 13: Secretariat for the Coalition on Paris Agreement Capacity Building
- Activity 14: Launching the first annual Climate Workforce Day

We look forward to the discussion!

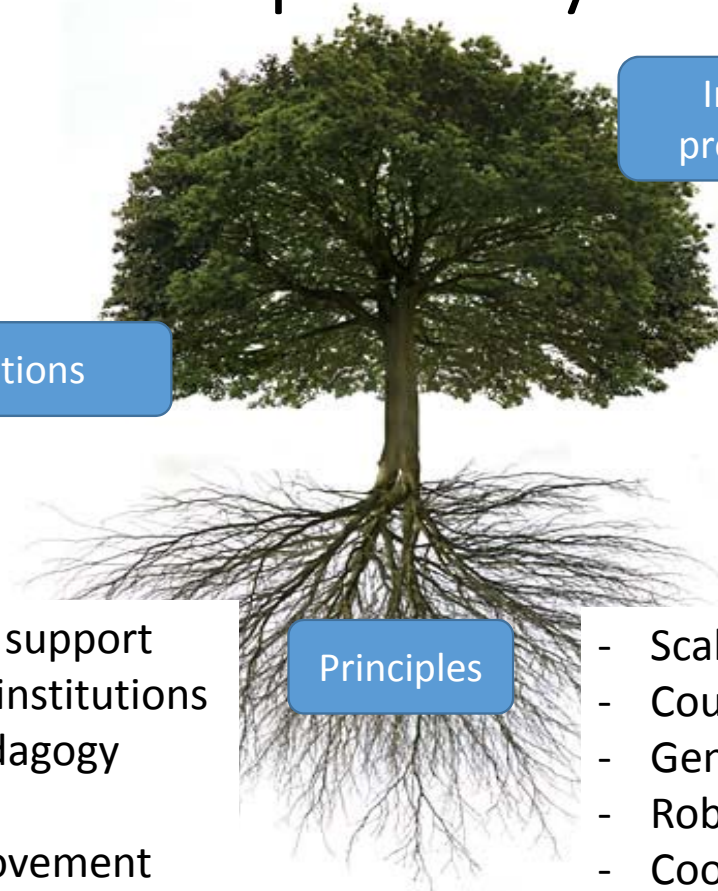

Thank you

Working more intelligently, strategically and cooperatively

Implement specific projects and activities

Recommendations

Principles

- Ambitious and meaningful support
- Focus on both people and institutions
- Constructed with good pedagogy
- Learn from experience
- Continuous/ iterative improvement

- Scalable and cost-effective
- Country driven-country owned
- Gender responsive
- Robust technical expert reviews
- Coordination with PCCB and CBIT

Coalition Strategy in Action

Principles

- Focus on institutions and people
- Scalable and cost effective
- Constructed with good pedagogy

Recommendations

- Nurture and build in-country professionals
- Broaden scope of stakeholders
- Establish a common core of learning and professional activities

Activities

- MRV training and tailored scholarships
- Translation of IPCC courses into Spanish and French

Coalition Strategy in Action

Principles

- Country-driven, country-owned

Recommendations

- Country lead facilitative peer assessment
- Nurture and build embedded in-country professional communities

Activities

- Facilitative peer assessments leading to development of country-specific work-plan

Coalition's Innovative Activities

capacitybuildingcoalition.org

Institutional Arrangements and Training

Activity 1: Facilitative peer assessments and improvements

Activity 2: MRV training and tailored scholarships

Activity 3: Translation of IPCC course material into Spanish and French

Activity 4: Institutional Arrangements Tool

Activity 5: Embedding transparency training and education into existing academic and research institutions

Activity 6: New transparency (MRV) training curriculum

Activity 7: Informal benchmarking and tracking country levels of transparency and institutional capacity

Expert and Knowledge Networks

Activity 8: Mentor network on transparency

Activity 9: Knowledge sharing platform on transparency (MRV)

Other Innovative Activity Concepts

Activity 10: Integrated approaches for GHG and air pollution data

Activity 11: NGO engagement in national verification and review activities

Activity 12: Transparent GHG data presentation and viewers

Global Thought Leadership on Capacity Building

Activity 13: Secretariat for the Coalition on Paris Agreement Capacity Building

Activity 14: Launching the first annual Climate Workforce Day

Coalition's Key Recommendations

1. Initiate “Fast start” activities
2. Support country-lead facilitative peer assessment
3. Nurture and build embedded in-country professional communities
4. Broaden the scope of stakeholders for country MRV activities
5. Establish a common core of learning and professional development activities

Coalition's Key Recommendations

6. Use smart IT tools and innovative mentoring processes
7. Invest in pilot projects
8. Integrate capacity building with national priorities (e.g. energy security, health and poverty).
9. Develop new and embed climate knowledge in existing academic programmes (e.g. engineering, accountancy, biotechnology)
10. Provide experts with a forum for discussion
