

**Individual actions supported by EU fast start financing**

*Updated data on specific examples of Fast Start Climate Finance actions, to accompany the 2012 EU Fast Start Finance report for the UNFCCC secretariat*

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
AT	Bilateral unallocated	adaptation	Contribution to the Lucerne World Mountain Conference on sustainable mountain development	2011	CONDESAN	0.02	grant	Provision of funding for the participation of developing country representatives. The conference will take stock and look at way forwards for sustainable mountain development - particularly against the backdrop of climate change challenges and the promotion of a climate-resilient green economy.
AT	North & Central America, regional/multi-country	mitigation	Cash contribution to Energy & Environment Partnership for Central America (EEP) - phase 2010-2012	2011	Secretaria General del Sistema de la Integración Centroamericana	0.60	grant	The Energy and Environment Partnership improves the access to modern, efficient and affordable energy services particularly for the poorer segments of the population in the Central America. Capacities on country level and knowledge management with regard to renewables are enhanced. Investments in new technologies are promoted and their financing facilitated. The programme is jointly funded by Finland and the EC. The contribution of the FC is managed by ADA under an ICM-agreement.
AT	Bilateral unallocated	mitigation	GFSE energy conference - energy between Danube and Caucasus, costs for participants from ODA countries	2011	VIDC	0.04	grant	GFSE conference on energy between Danube and Caucasus - the role of renewable energy and energy efficiency as a key issue for economic development. Support is offered for the participation of developing country representatives.
AT	Cape Verde	mitigation	Monitoring of sector budget support for environment in Cape Verde 2011	2011	Ecosphere - Consultores em Ambiente e Desenvolvimento, Lda.	0.02	grant	The project is part of Austria's environment sector support to Cape Verde to boost the implementation of the second National Environmental Action Plan (PANA II). The plan addresses both climate change mitigation and adaptation challenges, e.g. in the energy sector and with regard to integrated water resource management. It specifically includes support to the joint government-donor monitoring missions.
AT	Burkina Faso	mitigation	Electrification of Beiga Primary School	2011	Initiative eine Welt	0.01	grant	Provision of a primary school with PV-systems
AT	Bilateral unallocated	mitigation/adaptation	Environment for development - strengthening of the international dialogue and capacity development	2011	various	0.02	grant	The project aims at strengthening the national and international practice-oriented dialogue and capacity development concerning burning issues at the environment and development interface - focusing mainly on climate change related challenges. For 2011 it includes support to of the annual meeting of the Poverty Environment Partnership (PEP). Common PEP-approaches to pro-poor natural resource management, climate change adaptation and mitigation in the context of nationally-owned Green Economy are discussed and developed.
AT	Peru	mitigation/capacity building	Study "Las Orquideas" (sHPP Peru)	2011	OeEB	0.05	grant	The aim of the study is to draw up the complete and bankable project documentation of a small hydro power plant in Peru, including financial, legal, commercial, technical and environmental aspects.
AT	Argentina	REDD+	Workshop on silvopastoral activities in Argentine Southern Andean forests	2011	N/A	0.01	grant	The aim of this workshop is to strengthen capacity concerning REDD+ in South Andean forests.
AT	Western Balkan, Eastern Europe, Central Asia	mitigation	EBRD TA Municipal Environment Infrastructure Program	2009 -2012	EBRD	4.00	grant	The Austrian MEI Fund supports advise and promotes environmental infrastructure projects in municipalities in Western Balkan, Eastern Europe and Central Asia through training and capacity building to communal institutions. The focus is on Water/Waste, Energy, Transport with emphasis on climate change.
AT	Western Balkan, Eastern Europe, Central Asia	mitigation	EBRD TA Municipal Environment Infrastructure Program	2012-13	EBRD	3.00	grant	The Austrian MEI Fund supports advise and promotes environmental infrastructure projects in municipalities in Western Balkan, Eastern Europe and Central Asia through training and capacity building to communal institutions. The focus is on Water/Waste, Energy, Transport with emphasis on climate change.
AT	South Eastern Europe	mitigation	IFC Renewable Energy Program for SEE	2009-2010	IFC	4.00	grant	Austria is cofinancing two landfill components of the Coastal Zone Management Program in Albania. The objectives of the component are to provide (grant technical assistance) for the construction of a municipal landfill near Saranda and a waste transfer station near Himara, and to provide a full waste management system in the Southern Coast in terms of the landfill, transfer station as well as the equipment needed for operation of the landfills and collection/transport of solid waste to the landfill.
AT	Western Balkan	mitigation	IFC Integrated Solid Waste Management TA Program (ISWMP)	2009-2011	IFC	2.30	grant	The program addresses the challenges posed by energy security, poverty reduction and climate change through its core functions as a think tank and knowledge clearing house, but also through operational leveraging. ESMAP assists low- and middle-income countries to promote environmentally sustainable energy solutions for poverty reduction and economic growth. ESMAP offers pre-investment activities such as analytical and advisory activities, studies, pilot projects, conferences, trainings and workshops, but not investments themselves. A priori the potential of investments are analysed, while ex post best practices are gathered, evaluations are undertaken and knowledge is transferred. The total budget for the ESMAP 2008-13 Business Plan is estimated at US\$55 million.
AT	Russia	mitigation	EBRD TA for Improving Energy Efficiency of Buildings in Russian Districts	2009-2011	EBRD	2.00	grant	The Austrian funded TA Project seeks establish a sustainable market for energy efficiency (EE) and renewable energy (RE) investments in Armenia. The Project will achieve this goal by: 1.Supporting the development of renewable energy financing through local financial institutions; 2.Creating a platform to support financial institutions in the development and marketing of energy efficiency lending; 3.Improving the regulatory framework for the development of renewable energy; 4.Increasing the awareness of RE project developers and the expertise of local design companies on the application of modern design solutions and new technologies to ensure the long-term sustainability of RE projects; 5. Building awareness and market demand for sustainable energy finance through a broad public awareness campaign.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
AT	ETC region	mitigation	EBRD Energy Efficiency Program for Early Transition Countries	2009-2011	EBRD	2.00	grant	The objective of the program is to introduce energy efficiency and demonstrate the efficient use of energy. The main focus of the Program will be to assist selected clients of the EBRD in the ETC region, Armenia, Azerbaijan, Georgia, Kyrgyzstan, Moldova, Tajikistan and Uzbekistan, by: a) conducting energy audits; b) providing energy management training programmes; and providing support for identification of carbon credits opportunities
AT	Ukraine	mitigation	EBRD Ukraine Energy Efficiency TC Program	2009-2012	EBRD	2.00	grant	The Global Environment Facility (GEF) provides grants to developing countries and countries with economies in transition for projects related to biodiversity, climate change, international waters, land degradation, the ozone layer, and persistent organic pollutants. 33% of GEF Funds are directly allocated to climate change programs to the overall objective of the UNFCCC. Cross elements of climate change are also found in other areas of GEF. Austria fast start support for the GEF, € 14 Million, is calculated from Austria contribution to GEF-5 using the climate change focal area allocation of GEF-5 (33%). Austria's total contribution for GEF-5 is around 75 % higher than for GEF-4. Total contribution for GEF-5 is € 42,6 Million.
AT	Armenia	adaptation	IFC Armenia Sustainable Energy Finance Project	2010-2011	IFC	0.70	grant	IFC DevCo ("Infrastructure Development Collaboration Partnership Fund") is a transaction advisory facility, supporting governments in preparing and structuring infrastructure projects for private investments. More specifically, DevCo funding is used to allow direct marketing, planning and development of transactions. Moreover, DevCo often comes in when a poorly prepared and under-resourced initiative has failed. DevCo's biggest sectors of activity are energy and transport, accounting for almost 70% of its commitments. The Austrian contribution focusses on renewable energy and waste
AT	Serbia	mitigation/ capacity building	Renewable Energy Sector Study Serbia	2010-2011	OeEB	0.07	grant	The study analyzed the Serbian energy market, investigated the potential for renewable energy and described the approval process for projects in the field of renewable energy. The study facilitates entry into this sector by private investors, thereby increasing the share of renewable energy on the Serbian market in the long term.
AT	Ethiopia	REDD+	REDD+ in North Gondar region	2010-2011	ADA/EPA	0.03	grant	This project supports the development of REDD+ readiness activities in Ethiopia's North Gondar region.
AT	Sub-Sahara Africa	mitigation	IFC Devco Afrika (Renewable/Waste)	2010-2012	IFC	3.60	grant	The program aims at supporting energy efficiency measures in the industrial sector in the Ukraine. The grant technical assistance help prepare the legal and institutional framework and provides training, capacity building and awareness raising in the context of piloting energy efficiency investment projects. Over time a market for self sustaining energy efficiency investments should develop
AT	Albania	mitigation	Weltbank Albania Coastal Zone Program (ICZMCP)/Land Fill	2010-2012	World Bank	2.00	grant	The objective of the technical assistance is to improve the energy performance of buildings in three Russian districts. The TA aims at improving the legal and regulatory framework, build capacities in the public and banking sector and raise public awareness to help improve the energy performance of buildings in Russia and encourage households to reduce their energy consumption.
AT	Western Balkan, South Caucasus	mitigation/ capacity building	EBRD Energy Efficiency Supporting TA Programme	2010-2012	EBRD	2.00	grant	Integrated Solid Waste Management Program (ISWMP) will address the financial, training, consulting, and market needs of the waste management/recycling sector, focusing on solid waste; focus its activities on government, municipalities, public and business stakeholders involved in the waste management by strengthening institutional and human capacity, helping to increase investments and improving operation of the waste management industry in the region.
AT	global	mitigation/ capacity building	Global Climate Partnership Fund (GCPF)	2010-2012	GCPF	0.50	grant	The Global Climate Partnership Fund (GCPF) is an innovative public-private partnership dedicated to mitigating climate change through a reduction of greenhouse gas emissions in emerging and developing markets. It focuses on financing energy efficiency and renewable energy projects primarily in cooperation with local financial institutions, thereby creating a positive impact on the local environment and economy.
AT	global	mitigation/ capacity building	Green for Growth TA Facility (GGF)	2010-2012	GGF	0.50	grant	The TA Facility of the GGF supports the Fund in achieving its goal of enhancing energy efficiency and reducing CO2 emissions through support of the renewable energy sector. By combining investments with targeted technical assistance, the GGF strives to build up capacities within its partner institutions that ensure the long-term effectiveness of its investments. Activities include Capacity building and training, awareness raising and market enabling activities and validation and monitoring of energy savings and CO2 emission reductions.
AT	South East Europe, Central Asia	mitigation/ capacity building	IFC Cleaner Production Program	2010-2013	IFC	1.40	grant	The Project aims at improvement of operational processes to make more efficient use of inputs such as energy, raw materials and water along a company's value chain. In addition to the reduction of costs and pollution, effective CP is a mitigation tool leading to decrease greenhouse gas emissions.
AT	global	mitigation	Global Environment Facility (GEF), 5th Replenishment period	2010-2014	GEF	14.00	grant	The program will promote small hydro power plants (SHPP) project in the Western Balkan region. The Project will focus on the following key objectives: 1. Improve existing regulatory framework to enable SHPP sponsors to develop and construct feasible SHPP. 2. Work with SHPP sponsors to improve their SHPP designs and business plans. 3. Work with selected financial institutions in the Western Balkan countries to improve their internal capacities and knowledge on SHPP and project financing
AT	Nepal	adaptation	SAMRAKSHAN - community based disaster prevention and preparedness, Western Nepal	2011-2012	CARE Austria	0.53	grant	The project focuses on capacity development among local communities, community-community exchange of experiences, and the development of an early-warning system in view of climate change related effects
AT	ETC region	adaption/ capacity building	EBRD Early Transition Countries	2011-2012	EBRD	2.00	grant	The objective of the program is to introduce energy efficiency and demonstrate the efficient use of energy. The main focus of the Program will be to assist selected clients of the EBRD in the ETC region, Armenia, Azerbaijan, Georgia, Kyrgyzstan, Moldova, Tajikistan and Uzbekistan, by: a) conducting energy audits; b) providing energy management training programmes; and providing support for identification of carbon credits opportunities
AT	Central Asia	mitigation	FLEGT project	2011-2012	ISRD - World Bank	0.3		ADC contribution to FLEGT (Forest Law Enforcement and Governance) in Armenia und Georgia

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
AT	Latinamerica	mitigation /Adaptation	Sustainable forestry management	2011-2012	IDB	1.00	grant	The purpose of the grant is to contribute to specific measures in the area of forestry protection and sustainable forestry management and support actions in the context of the regional REDD+
AT	Ukraine	mitigation/capacity building	EBRD UKEEP II	2011-2012	EBRD	2.00	grant	The program aims at supporting energy efficiency measures in the industrial sector in the Ukraine. The grant technical assistance helps prepare the legal and institutional framework and provides training, capacity building and awareness raising in the context of piloting energy efficiency investment projects. Over time a market for self-sustaining energy efficiency investments should develop.
AT	Africa	adaption/ capacity building	Public Private Infrastructure Programm für Africa (PPIAF)	2011-2013	PPIAF	2.00	grant	PPIAF provides grants to help African countries use public private partnerships in efforts to address climate change related problems through improved infrastructure service delivery. PPIAF develops appropriate policy strategies, action plans and regulations that incorporate adaption and mitigation measures to attract private sector climate finance in low-carbon, climate-resilient infrastructure PPPs.
AT	Africa (Kenya, Tanzania, Uganda)	adaption/ capacity building	Africa Sustainable Energy Facility	2011-2013	EIB/IFC	2.00	grant	This project focuses on capacity and institution building of public institutions, project developers, industry representatives and financial institutions to engage in developing energy efficiency and renewable energy projects and to enhance coordination between public-private stakeholders in Kenya, Tanzania and Uganda. Furthermore, innovative investment transactions are introduced at local financial institutions to increase lending to energy efficiency and renewable energy projects that are typically considered too risky to finance.
AT	Ukraine	adaption/ capacity building	IF Ukraine Sustainable Energy Financing	2011-2013	IFC	0.80	grant	The Austrian funded TA Project seeks establish a sustainable market for energy efficiency (EE) and renewable energy (RE) investments in Ukraine. The Project will achieve this goal by: 1. Creating a platform to support Ukrainian banks to develop and market energy efficiency products to the industrial sector; 2. Strengthening the capacity and effectiveness of local technical experts; 3. Building awareness and market demand for SE finance through a broad public awareness campaign.
AT	Serbia	mitigation	Business partnership program: Belgrade EcoProfit Project - Cleaner Production Advisors for SMEs	2011-2013	Denkstatt, Umweltberatung und Management GmbH	0.10	grant	Improvement of economic and environmental sustainability of SMEs by training of Cleaner Production advisors and development of an EcoBusiness plan for Novi Sad. Investments in renewable energy and energy efficiency measures are thereby promoted.
AT	Asia	mitigation	Energy for All Initiative	2011-2013	ADB	2.00	grant	Energy for All is an initiative founded in 2008, which aims to improve access to reliable, affordable and modern energy for the rural poor in Asia . Play off-grid renewable energy sources such as photovoltaics, small hydropower, biogas and improved cooking technologies play a major role. In addition, special attention is given to innovative approaches in the implementation and financing of projects, and to the upscaling of proven approaches.
AT	Uzbekistan	mitigation	Business partnership program: Drying and manufacturing of organic fruit, vegetables and nuts - programme for Fairtrade-certification	2011-2013	MARAP Handels GmbH	0.20	grant	Technology transfer and capacity development for combined solar-thermal energy and biomass desiccation
AT	Nicaragua	mitigation	Business partnership program: afforestation for Teakwood production in Chinandega, Nicaragua	2011-2013	Teak Partners GmbH	0.20	grant	Reforestation with teak of degraded agricultural land in cooperation with the local land owners. Teak is an interesting cash crop for the farmers. The sustainable management of the plantations is supported by specific trainings.
AT	SE Europe	mitigation	Natural Resources Management	2011-2013	REC	0.7	grant	Regional platform on sustainable natural resource management in South Eastern Europe to combat illegal logging
AT	global	mitigation/capacity building	Sustainable Business Indicators	2011-2013	IFC	1.00	grant	The purpose of IFC Sustainable Business advisory services is to contribute to the creation of inclusive, environmentally and socially sustainable, and efficient markets. SBA works at the firm level to pilot business models which address barriers to low carbon investment and enable scale; Building on these firm-level engagements, IFC seeks replication and market transformation by engaging: i) at the sector level to address barriers to scale-up of low carbon technologies and approaches; and ii) at the market level to create the enabling environment that supports the private sector to adopt low carbon investment.
AT	Ethiopia	mitigation/adaptation	Sustainable resource management and rural development in North Gondar	2011-2013	BoFED - Amhara National Regional State Bureau of Finance and Economic Development	2.87	grant	The overall objective is to contribute to sustainable rural development and improvement of food security in North Gondar. Promotion of integrated watershed management planning and practices, which is both essential for climate-resilient development in the region and includes afforestation and reforestation activities for low-carbon development, forms a major component of the programme.
AT	Africa, regional/multi-country	adaptation	Water, climate and development programme in Africa - support of Global Water Partnership in Africa to promote water as a key part of sustainable regional and national development	2011-2014	Global Water Partnership	1.50	grant	The Water, Climate and Development in Africa (WCDA) programme aims at promoting water as a key part of sustainable regional and national development and contribute to climate change adaptation for economic growth and human security in 8 African developing countries. Capacities of partnerships, institutions and stakeholders are enhanced to integrate water and climate change in development processes and enhanced resilience to climate change through better water management. Investment and financing strategies for water security, climate resilience and development are elaborated and governments begin to implement them. In addition, fundable projects (infrastructure-related) for water security, climate resilience and development are defined and shared with development banks.
AT	South & Central Asia, regional/multi-country	adaptation	Disaster prevention and preparedness measures to reduce poverty risks in Tajikistan, Afghanistan and Kyrgyz Republic	2011-2014	HWA - Hilfswerk Austria	0.85	grant	Components of the project include: applied research and modelling for environment related disasters climate variability - including climate variability and change related - to support DRR ; sustainable land management modelling and feasibility studies for soil protection measures; facilitation of cross-regional consultations and exchange.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
AT	SSA	adaptation	water catchment project	2011-2014	IUCN	1	grant	The project aims to improve water catchment management in Lower Tana, Kenya, and Upper Aswa-Agago, Uganda
AT	Egypt	mitigation	Business partnership program: Adaptation for solar energy systems for the Egypt market and requirements	2011-2014	Sekem Energy	0.20	grant	Technology transfer and capacity development for solar-thermal energy
AT	South Africa	mitigation	Solar technical education and training in South-Africa	2011-2014	SEG Solar Energy GmbH	0.20	grant	Establishment and support for a training centre for solar-thermal energy, primarily for local plumbers
AT	South Africa	mitigation	business partnership program	2011-2014	SEG Solar Energy GmbH	0.2	grant	This project supports a business partnership program for further education in solar technology and its applications in South Africa
AT	Burkina Faso	adaptation	COGEL - Strengthening of public and private capacities	2011-2015	UNDP	1.6	grant	This project aims to strengthen of public and private capacities to cope with the consequences and impact of climate change and integration in development strategies
AT	Georgia	adaptation/mitigation	Afforestation project	2011-2015	GIZ	1.5	grant	The aim of this afforestation project is to promote and support sustainable agriculture in Georgia
AT	Indonesia	adaptation	Austrian Soft Loan Programme to support sustainable projects in developing countries (Indonesia)	2012-2014	OeKB	2.9	loan/grant	Supply of mobile clean and drinking water treatment systems with a view to emergencies increasingly caused by climate change related natural catastrophes. A combination of loan and grants to reduce the buyer's financing cost throughout the repayment term leads to a concessionality level of approx. 35 % which is reported as grant in accordance with OECD rules.
AT	global	mitigation/adaptation	Technical Support Facility under the Carbon Market Initiative	bis 2012	ADB	1.50	grant	The Facility provides technical assistance for the development and deployment of clean energy projects that are appropriate to generate certificates under the "Clean Development Mechanism" of the Kyoto Protocol. This includes areas such as capacity development for project developers and sponsors, project identification and screening, support for project preparation, documentation and management of certificates, implementation and verification as well as certification of emission reduction.
AT	global	adaptation	The Energy Sector Management Assistance Program (ESMAP)		World Bank	1.90	grant	The TA focuses on capacity building of local experts , businesses and banks in the area of energy efficiency and energy savings to improve the quality of sustainable energy investments ( energy saved and greenhouse gas emissions avoided). Training and awareness raising is also an important part of this program.
AT	Ethiopia, Costa Rica, Uganda, Central America (regional project), South East Asia (regional project), Tanzania, Bosnia-Herzegovina, Burkina Faso, Mozambique, Geogia and Serbia.	adaption/ capacity building	Will be provided at a later stage	-	-	3.9	grant	Will be provided at a later stage
AT	Brazil	REDD+	Workshop on sustainable harvesting of non-timber forest products in the Brazilian Savanna	2012	-	0.01	grant	Will be provided at a later stage
AT	Western Balkans, Eastern Europe, SEMED, Central Asia	mitigation	EBRD TA Municipal Environment Infrastructure Program	2012-2013	EBRD	3.00	disbursed	grant
AT	Western Balkans, Moldova	adaptation/capacity building	IFC Renewable Energie Program	2013-2016	IFC	2.70	disbursed	grant
AT	ECA	mitigation/capacity building	Sustainable Energy Finance Program	2013-2015	IFC	1.80	disbursed	grant
AT	Global	adaptation/capacity building	Global Facility for Disaster Reduction and Recovery - Track III	2012-2015	World Bank	2.00	disbursed	grant
AT	Ukraine	mitigation/capacity building	EBRD UKEEP II	2012-2013	EBRD	2.00	disbursed	grant
AT	Latin America & Caribbean	adaptation/mitigation	Sustainable Energy and Climate Change Initiative	2012-2013	Inter-American Development Bank	0.90	disbursed	grant
AT	Western Balkans, Moldova	adaption/ capacity building	ENVSEC: Transforming Environmental and Security Risks into Cooperation in the South Eastern European Region (Phase II), and Climate Change and Security in Dniester River Basin	2012-2015	OSCE	1.30	1.00	grant

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
AT	Caribbean	adaption/ capacity building	Mainstreaming of climate change adaptation into Caribbean DRR Plans (phase II)	2012-2015	Caribbean Disaster Emergency Management Agency (CDEMA)	0.51	0.26	grant
AT	Moldova	adaption/ capacity building	Improving water management and protection of water-related ecosystems in the Lower Dniester Ramsar Site	2012-2014	BIOTOCA Ecological Society	0.32	0.16	grant
AT	Burkina Faso	adaption/ capacity building	Strengthening capacities of the federation of local agricultural cooperatives in western Burkina Faso	2012-2015	Ministry of Economy and Finance (MEF) Burkina Faso	0.70	0.00	grant
AT	Burkina Faso	adaption/ capacity building	Improvement of resilience and food security in rural areas in Burkina Faso	2012-2014	FAO	1.74	1.74	grant
AT	South of Sahara multi-country	adaption/ capacity building	Contribution to the Sahel and West Africa Club - Programme of Work 2013-14	2013-2014	OECD - Sahel and West Africa Club	0.40	0.40	grant
AT	South & Central Asia multi-country	adaption/ capacity building	Framework programme Austrian Red Cross	2012-2015	Austrian Red Cross	0.95	0.35	grant
AT	Mozambique	mitigation	Support to small scale agriculture in Sofala province	2012-2013	Ministry of Agriculture Mozambique	1.60	0.80	grant
AT	South of Sahara multi-country	mitigation/ capacity building	SolTrain- solarthermal energy training and demonstration project in the SADC region Phase II	2012-2015	AEE - INTEC	0.99	0.00	grant
AT	South of Sahara multi-country	mitigation/ capacity building	EEP S&EA, Contribution 5. Call for Proposal and Transition Phase	2012-2013	Finland, MFA	1.00	1.00	grant
AT	bilateral unallocated	mitigation	Access to Clean Energy For The Poor Through Microfinance CLEAN START	2012-2013	UNCDF	0.30	0.30	grant
AT	Africa unspecified	mitigation/ capacity building	EU/EI PDF - Africa-EU RECP- Action Area Technology, Innovation, Capacity Development		GIZ	0.30	0.00	grant
AT	Georgia	mitigation / capacity building	Sustainable Forest Governance in Georgia: Strengthening Local and National Capacity and Developing Structured Dialogue Phase I	2012-2015	CENN	0.58	0.30	grant
AT	Ethiopia		Contribution to the "Climate Resilient Green Economy (CRGE) Facility"	2012-2014	MoFED	0.63	0.63	grant
AT	Central America	mitigation	Contribution to the Energy & Environment Partnership	2012-2013	SG - SICA	0.60	0.44	grant
AT	Senegal, Gambia, Guinea-Bissau	mitigation/adaptation	Conflict prevention through natural resource management	2012-2014	ENDA thier Monde	0.31	0.15	grant
AT	Global	adaption/ capacity building	Klimabündnis projects	2010-2012	Misc	1.20	1.20	grant
AT	Brazil	REDD+	Workshop on sustainable harvesting of non-timber forest products in the Brazilian Savanna	2012	Energy Changes	0.01	0.01	grant
AT	Bhutan	mitigation	Energy	2011-2014	GNH Commission	1.8	grant	Contribution to rural electrification VII - Soe and Lingzhi
BG	FYROM	Mitigation	Bulgarian Fast Start Finance Contribution 2011-2012: Utilizing Bulgarian Experience in Monitoring, Reporting and Verification of Greenhouse Gas Emissions required for participation in the European Union Emission Trading Scheme	starting september 2011	UNDP	0.02	grant	The main aim of the project is to support the implementation process of the EU Directives 2003/87/EC and 2009/29/EC in Macedonia by utilizing Bulgarian expertise and capitalizing on best practices and lessons learned of Republic of Bulgaria in the field of monitoring, reporting and verification of greenhouse gas emissions as well as emission trading. This will be achieved through direct interaction between the Ministries of Environment in the two countries and information exchange between the national and Bulgarian institutions and experts. It is expected that the project will contribute to achieving national consensus on the actions and measures that need to be undertaken to address the climate change related issues relevant for the country in regards to the EU ETS on a short and long term, This should also open a dialogues on the need for allocation of adequate financial means for realization of the agreed actions and measures.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
CY	NEPAL	Adaptation	EU/DFID Project "Building Climate Resilience in Nepal"	36 months from signing of Financing Agreement between EU/DFID and Nepal	DFID	0.60	Grant	The project aims at enabling the Government of Nepal to adopt climate change policies and actions through capacity building at national and local levels and through establishment of local and sub-regional design and implementation mechanisms for climate adaptation. The project will be co-financed by the EU (€8.000.000), DFID (€10.800.000) and Cyprus (€600.000).
CY	Caribbean	Mitigation/adaptation	Global Climate Change Alliance	Starting 2012	European Committee	0.6	Grant	the Cyprus Government has decided to allocate its contribution, of the value of €600,000 (for 2012), to the project "Climate Change Adaptation and Sustainable Land Management in the Eastern Caribbean".
CY	TBD					0.6		
CZ	Mongolia	Adaptation	Plant Production Support in Arid Regions of Mongolia	2010	Czech University of Life Sciences in Prague	0.36	grant	The aim of the project is to carry out analysis of needs in crop production sector and afforestation of desert areas and to recommend steps to maintain, enhance and optimize crop production. Moreover, appropriate protection measures against sand and dust storms will be proposed together with efficient irrigation measures, measures to prevent soil salinisation, and to use alternative energy resources.
CZ	Georgia	Mitigation	Electrification of remote areas in Georgia	2010	Sunny Watt	0.30	grant	The project aims to ensure sustainable development of Tusheti region through electrification of public buildings and building an appropriate grid, using renewable energy resources (photovoltaic panels).
CZ	Mongolia	Adaptation	Water supply - extension of water resources in the province of Orkhon	2010 - 2012	Geomin cooperative	0.60	grant	Under this project 16 wells are going to be built in order to secure sustainable supply of water in the Zalugeen Gol and Ulaan Tolgoi regions. Complementary objective is to create water balance of these regions and to develop a water management plan for further development of grazing lands, fields and residential centers.
CZ	Moldova	Capacity Building	Flood warning and monitoring system on the Prut River	2010 - 2012	Aquatest a.s	0.83	grant	The primary objective is to improve public awareness of incoming floods on the river Prut. The new monitoring system will enable early warning of population by periodical monitoring of water flow. The secondary objective is to demonstrate suitable technological approach to river basin monitoring network, which could be used for others river basins as well.
CZ	Ethiopia	Capacity Building	Soil protection, minimization of negative effects of agriculture and water supply management in the Southern Nations, Nationalities and Peoples' Regional State	2010 - 2012	Mendel University in Brno	0.50	grant	The project will be carried out in Alaba Special Wereda and Awassa Zuriya Wereda districts. The water management part of this project is focused on revitalization of existing wells and enlargement of water supply system. The second part of the project will deliver specific measures among others to prevent soil degradation, for cultivation and planting of seedlings and application of erosion control measures.
CZ	Ethiopia	Capacity Building	Capacity development in the field of engineering geology and hydrogeology	2010 - 2012	Aquatest a.s.	0.28	grant	The project aims to train the employees of Geological Survey of Ethiopia (GSE) in the field of engineering geology and hydrogeology in order to introduce new methods of compilation, editing, presentation and practical interpretation of maps of groundwater sources.
CZ	Ethiopia	Adaptation	Sustainable usage of natural resources and assistance to small-scale farmers	2011 - 2013	People in Need, Charita	0.88	grant	The programme comprises of direct activities tackling erosion and deforestation in degraded areas, as well as on introduction of the alternative livelihoods and sources of energy among the locals, so the direct dependence on natural resources would be eventually decreased. Second component of the programme aims at introducing sustainable management of the watershed through a participatory integrated watershed management approach.
CZ	Georgia	Capacity Building	Enhanced Preparedness of Georgia against Extreme Weather Events	2011 - 2013	Glomex s.r.o., Aquatest a.s., CHMI, NEA,	0.56	grant	The project aims to promote prevention of disasters caused by extreme weather events in Georgia through introduction of an early warning system, which is a major element used for disaster risk reduction (DRR). Its successful realization would prevent losses of lives and reduce the negative economic and material impact on society.
CZ	Bosnia and Herzegovina	Mitigation	Usage of renewable sources of energy for district heating system in the village of Nemila	2011 - 2013	EKO-CZT Nemila	1.48	grant	The project will contribute to reduction of air pollution and GHG emissions from heating of individual housings through construction of a biomass heating plant and a heat distribution network. Biomass (wood chips) will replace coal and other non-renewable sources as fuel for heating. Apart from positive environmental impacts the project will also contribute to improvement of local population's health.
CZ	Cambodia	Mitigation	Development of a Permanent, Market-Oriented, Biogas Sector for Sustainable Energy Supply in Rural Cambodia	2011 - 2013	People in Need	0.56	grant	The project aims to contribute to the development of a permanent, market oriented, biogas sector in seven provinces of Cambodia with its main focus on Takeo province. Biogas is a locally well-proven technology which takes advantage of gasses released from decomposing manure and with a durability of 15-20 years. Through stimulating market demand by subsidising biogas construction, developing the private sector which constructs biogas plants and supporting biogas users, the project intends to achieve, by the end of 2013, sustainable energy supply for at least 12,800 people living in rural areas of Cambodia; the creation of 40 companies constructing biogas plants; an annual reduction of fuel-wood consumption by 6,350 tons; annual emissions reduction by at least 10,850 tons; the employment of 300 people; and improvement in the health of biogas users.
CZ	Vietnam	Mitigation	Renewable Energy Sources for Rural Areas of Thua-Thien Hue Province	2011 - 2013	Czech University of Life Sciences in Prague	0.36	grant	The objective of the project is to improve access of rural people in the Thua-Thien Hue province to sustainable energy sources through the use of renewable sources of energy for thermal and electric energy production and provide capacity building in this area, thus reducing fuel-wood consumption and GHG emissions. The project activities are focused on construction of family size anaerobic digesters to produce sufficient quantities of biogas, which cover household energy needs for cooking and possibly lighting. Further project activities are focused on the installation of two experimental photovoltaic units for monitoring electricity production under the specific conditions in the target area. Implementation of the above mentioned technologies will be accompanied by information campaigns, training courses and workshops for target groups and project beneficiaries.
CZ	Georgia	Mitigation	Renewable Energy for Remote Areas of Georgia - Solar Thermal Systems and Solar Photovoltaic Panels in Tusheti"	2011 - 2013	Glomex MS s.r.o.	0.26	grant	The project will increase energy independence of the Tusheti region in Georgia through supplying solar thermal and solar photovoltaic panels and subsequently leading to reduction of GHG emissions from individual heat/electricity sources. Secondary benefit of the project is increased protection of forests and other natural resources in the area.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
CZ	Ethiopia	Adaptation	Establishment of a Sustainable System of Drinking Water Supply in Small Towns of Sidama Zone, SNNPR, Ethiopia	2011-2013	Sidama Water Supply, Ircon, Aueatest, GEOTest	0.90	grant	The overall objective of the project is to improve the water supply, the management of water sources, the sanitation and the hygienic situation of the populations living in the targeted areas of the Sidama Zone. It is intended to strengthen the potential social and economic development within the area by improving the potable water supply and the sanitation as well as the hygiene habits of the community, reducing the presence and incidence of diseases caused by low quality water and bad sanitation, and improving the maintenance of water sources as well as of the management of the potable water supply within the zone.
CZ	Ethiopia	Adaptation/Capacity Building	Capacity building in environmental geology - mapping of geo-risk including hydrogeological condition in Dila and Hosaina areas	2012 - 2014	Czech Geological Survey	0.48	grant	The project aims to establish cooperation in the field of disaster prevention and preparedness. Main areas of concern are soil erosion and sustainability of water sources and other natural resources. The project should support Ethiopian government in its efforts to improve living conditions of Ethiopian citizens and organizations, with special attention being paid to their ability to reduce poverty with their own powers. This should be achieved by developing capacities in the field of geology, geological risks evaluation and hydrogeology, which will contribute to the protection of environment and sustainable use of natural resources.
DE	Global	Adaptation	Trust Fund for Ecosystem Based Adaptation	2010	UNEP	10.0	Grant	The objective of the programme is to strengthen the capacities of development countries to strengthen ecosystem resilience for promoting ecosystem based adaptation (EBA) options and to reduce the vulnerability of communities, with particular emphasis on mountain ecosystems. Specially the project will support: (i) the development of methodologies and tools for mountain ecosystems; (ii) the application of the above tools and methodologies at the national level; (iii) the implementation of EBA pilots at the ecosystem level; and (iv) the formulation of national policies and building an economic case for EBA at the national level. The programme will create new opportunities for experimental learning between regions and among countries within the same region. Through parallel and cooperative development and application of methodologies and tools and the implementation of pilot projects, the project will shorten the learning curve of local and national institutions and fast track the transfer of knowledge and experience building ecosystem resilience.
DE	Global	Adaptation	Adaptation Fund	2010	World Bank	10.0	Grant	The Adaptation Fund has been established by the Parties to the Kyoto Protocol of the UNFCCC to finance concrete adaptation projects and programmes in developing countries that are Parties to the Kyoto Protocol.
DE	Global	Adaptation	Pilot Programme for Climate Resilience (PPCR)	2010	World Bank	8.0	Grant	PPCR is a program für climate change adaptation under the Strategic Climate Fund (SCF), which is one of two funds within the design of the Climate Investment Funds (CIFs).
DE	Global	Mitigation	Thematic Trust Fund for Support to Energy and Environment for Sustainable Development	2010	UNDP	5.0	Grant	The overall objectives of the programme are to strengthen the capacity of developing countries (DCs) a) to monitor, report and verify greenhouse gas emissions; b) to identify opportunities for Nationally Appropriate Mitigation Actions (NAMAs) in the context of national development; and to support the design of low carbon development strategies (LCDS) and c) to facilitate the uptake of mitigation actions by selected sectors, with the participation of the private sector, as appropriate, taking into account national priorities and circumstances and national economic plans. The programme methodology follows a country-driven, multi-stakeholder approach.
DE	Global	Mitigation	Global Climate Partnership Fund (GCPF)	2010	KfW	10.0	Grant	The Global Climate Partnership Fund (GCPF) is an innovative funding instrument that should allow highly effective investments to be made in climate-relevant projects in selected countries. This involves providing local financial institutions with credit lines, with which they can in turn offer loans for investments in renewable energy, energy efficiency and the reduction of greenhouse gases. The focus is currently on Brazil, India, China, South Africa, Indonesia, Viet Nam, the Philippines, Chile, Mexico, Turkey, Tunisia, Morocco and Ukraine. Further countries can be included at a later date.
DE	Global	Mitigation: Technology	Clean Technology Fund (CTF)	2010	World Bank	125.0	Loan	The CTF is part of the Climate Investment Funds (CIFs) and finances scaled-up demonstration, deployment and transfer of low carbon technologies.
DE	Global	REDD	Forest Carbon Partnership Facility (FCPF)	2010	World Bank	34.0	Grant	FCPF assists developing countries in their efforts to reduce REDD by providing value to standing forests.
DE	Global	Adaptation	Pilot Programme for Climate Resilience (PPCR)	2011	World Bank	12.0	Grant	PPCR is a program für climate change adaptation under the Strategic Climate Fund (SCF), which is one of two funds within the design of the Climate Investment Funds (CIFs).
DE	Global	Adaptation	Special Climate Change Fund	2011	GEF	23.0	Grant	SCCF is a specific fund to support activities and programs in the area of adaptation to climate change, technology transfer, energy, transport, industry and waste management, among others, in developing countries.
DE	Global	Adaptation	LDCF	2011	GEF	45.0	Grant	The LDCF was established under the UNFCCC and aims to address the special needs of the LDCs, which are especially vulnerable to the adverse impacts of climate change. This includes preparing and implementing NAPAs.
DE	Global	Mitigation	Foundation "Future of the carbon market"	2011	KfW	10.0	Grant	The Foundation aims to provide start-up funds for supplying certificates from programmes of activities (PoAs). The funds are intended to finance the development, implementation and start-up costs of clean development mechanism (CDM) and joint implementation (JI) PoAs as well as the development of a corresponding portfolio. Funds are provided by the International Climate Initiative (IKI) and private investors are also permitted and encouraged to make donations (e.g. businesses with EU ETS III obligations).
DE	Global	Mitigation: Technology	Clean Technology Fund (CTF)	2011	World Bank	125.0	Loan	The CTF is part of the Climate Investment Funds (CIFs) and finances scaled-up demonstration, deployment and transfer of low carbon technologies.
DE	Global	REDD	Forest Carbon Partnership Facility (FCPF)	2011	World Bank	9.0	Grant	FCPF assists developing countries in their efforts to reduce REDD by providing value to standing forests.
DE	Southeastern Europe	Mitigation	Open Regional Fund Energy Efficiency	01/2010-12/2012	GIZ	3.0	Grant	Different energy efficiency measures in the field of private sector cooperation, capacity building.
DE	South Africa	Mitigation	Open Programme for Renewable Energy and Energy Efficiency	01/2011- 12/2013	GIZ	10.0	Grant	Technical cooperation in the field of renewable energies, and energy efficiency with special focus on private sector cooperation.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
DE	Vietnam	Adaptation	Innovative Financing for Building Community Resilience to Climate Change in Coastal Vietnam	01/2011-01/2014	SNV Vietnam	1.2	Grant	The goal is to make the livelihoods of coastal communities more resilient to the impacts of climate change. This can be achieved by introducing innovative financing tools; in particular using income from ecosystem payments to build capacity to adapt to climate change issues, and establish a weather risk insurance scheme to insure households against adverse weather events.
DE	China	Mitigation	Transportation Demand Management in Beijing – Sector-oriented Development of Urban NAMAs Focusing on Transportation	01/2011-02/2014	GIZ	2.0	Grant	The project aims to improve transport demand management (TDM) in Beijing in order to manage the steadily increasing traffic density in line with nationally appropriate mitigation actions (NAMAs). The project provides capacity building for decision-makers and transport planners in Beijing to enable them to calculate baselines and assess reduction potential. It also supports the production of transport plans and the implementation of transport demand management measures.
DE	Vietnam	Mitigation	Support to the Building of a Renewable Energy Agency (REDO)	01/2011-02/2014	GIZ	3.0	Grant	The main goal of the project is to build up capacity for the implementation of a renewable energy agency.
DE	Global	Mitigation	Innovative Tools to Lower the Entry Barriers and Allow for Scaling-up of Carbon Market Activities in Under-Represented Regions	01/2011-02/2014	The Gold Standard Foundation	2.2	Grant	The goal of the project is to enable both innovation and institutional preparation in regions of the world that are currently under-represented in the carbon market, most notably Least Developed Countries (LDCs), Land-locked Developing Countries (LLDCs), Small Island Developing States (SIDS), and poorer regions of developing countries. These two goals - innovation and institutional preparation - have the larger objective of improving access to carbon finance for emission reduction projects in the targeted regions by lowering entry barriers, and thereby achieve a multiplier effect, scaling-up, better involvement of the private sector and shaping of future climate policy frameworks. The high reputational standing and the considerable amount of local experience and expertise available within the Gold Standard provides an avenue to field-test these innovations and access to key institutions while at the same time making a case for the transfer of proven concepts to the compliance
DE	Mexico	REDD	Climate change and protected area management	01/2011-11/2014	GIZ	4.0	Grant	The purpose of the project is to explore the use of protected areas to conserve carbon reservoirs and to promote adaptation to climate change. To this end, Mexico's National Commission for Protected Areas (CONANP) is to be supported in connection with the implementation and further development of its climate protection strategy for protected areas. For this purpose, in selected protected areas of the densely forested Sierra Madre Oriental biodiversity hotspot, mitigation and adaptation measures will be included in the management plans and implemented on a model basis.
DE	Global	Adaptation	Placement of technical experts for capacity building in climate-related areas	01/2011-12/2013	GIZ	1.6	Grant	Placement of technical experts for capacity building in climate-related areas
DE	Turkey	Mitigation	Credit Programme for Climate Protection	01/2011-12/2013	KfW	5.0	Grant	The project will contribute towards guaranteeing an environmentally sound power supply and more efficient use of energy. In addition, it will demonstrate that investment in renewable energy sources and energy efficiency can deliver both environmental and economic benefits.
DE	Global	Mitigation	Stimulating Ambitious Nationally Appropriate Mitigation Actions (NAMAs) to Reduce GHGs in Developing Countries	01/2011-12/2013	Center for Clean Air Policy	1.9	Grant	This project aims to stimulate the development of ambitious and well designed nationally appropriate mitigation actions (NAMAs) and contribute to the provision of fast-start finance for the quick implementation. It is critical that those involved in NAMA design and implementation learn quickly about the most successful efforts to design and implement climate change mitigation actions, to monitor outcomes and to deliver finance. Regional peer-to-peer learning dialogues among developing countries in Latin America and Asia will involve officials responsible for implementing climate change mitigation policies, NGOs, financiers, industry, and policy experts, and expose officials from several key ministries in each country to the best practices in GHG mitigation. They will have the opportunity to work together to define actions for their countries and will receive peer review and training from other developing country colleagues. In-depth case studies of best practices and policy papers on key issues prepared by CCAP will be presented to fuel these discussions. CCAP will highlight opportunities for climate change mitigation policies developed by key country officials to support development goals such as poverty alleviation, energy security, and health protection through reductions in conventional pollutants. This project will likely lead to expanded support from other donors to spur implementation of ambitious actions in the target countries to provide follow-on technical assistance and capacity building financed from other sources. This will help to spur implementation of ambitious actions in the target countries.
DE	Global	Mitigation	Building MRV Standards and Capacity in Key Developing Economies	01/2011-12/2014	World Resources Institute	4.0	Grant	Developing countries will be required to measure, report, and verify mitigation actions according to international guidelines, but few have the capacity to do so. The goal of this project is to build the capacity of a set of countries both to inform the design of those guidelines and to implement them at the national level. Our approach will be to define the features of a robust national MRV system; map current national and sectoral systems against those features; engage policy-makers ("top-down") as well as the private sector and civil society ("bottom-up") in national stakeholder groups to understand national needs and inform the design of national systems; and build capacity and support in key corporate sectors and civil society to adopt and implement national MRV systems. This "top-down - bottom-up" approach should not only assist in getting guidelines and standards in place, but also build support for the implementation of such guidelines.
DE	Vietnam, Laos	REDD	Prevention of deforestation, forest degradation and leakage effects in the border area of central Vietnam and in the south of Laos for long-term maintenance of carbon sinks and biodiversity	01/2011-12/2014	KfW	7.0	Grant	Through improved management of several protected areas, renaturation of two important corridors and measures to contain the illegal cross-border timber trade (leakage effects as a consequence of REDD+ measures in Viet Nam), the purpose of the project is to avoid the large quantities of greenhouse gas emissions that would result from deforestation and forest degradation. The project will additionally support the national REDD readiness process in the two countries, albeit with a special focus on Viet Nam, through active participation in the national working group responsible for leakage effects.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
DE	Guatemala	REDD	Preparation of a REDD+ project for tropical forest protection and sustainable community development in the Sierra del Lacandón National Park in Guatemala	01/2011-12/2014	OroVerde - Die Tropenwaldstiftung	0.9	Grant	Every year, some 1,240 hectares of forest are cleared in the 202,865-hectare Sierra del Lacandón National Park. The purpose of the project is to reduce deforestation by means of a REDD+ project and to support the development of national and international guidelines for better integration of biodiversity protection and poverty reduction in REDD+ mechanisms. To this end, a project will be implemented at local level with active involvement of the population. At the national level, the Guatemalan Government will be advised in connection with national legislation. In addition, the experience gained from the project will be introduced into the debate at the international level. The project will make concrete contributions both to climate protection through reduced emissions from avoided deforestation and reforestation and to international climate policy through the development of detailed criteria for the implementation of REDD+ projects.
DE	Morocco	Mitigation	Solar Power Plant Ouarzazate Marokko	01/2012-12/2026	KfW	15.0	Grant	Morocco's energy supply is 97% dependent upon fossil fuel imports; in addition, the climate performance of the present energy mix is very poor. At the same time, the country hosts some of the best solar and wind power locations worldwide. In order to tap this potential, Morocco has adopted ambitious renewable-energy expansion targets, which are set out in the Moroccan Solar Plan. The project's goal is to complete the first phase of the planned solar power plant in Quarzazate with 160 MW capacity. The wider aim is the efficient, ecologically sound and socially equitable generation of electricity and the market introduction of a path-breaking technology for global climate change mitigation. Quarazazate is the first reference project for large-scale solar thermal power technology. As this is capital-intensive, the European Commission, the European Investment Bank and the Agence Francaise de Development, among others, are participating.
DE	Indonesia, Brazil, Colombia	REDD	Balancing Land Use Management, Sustainable Biomass Production and Conservation - a Practical Multi-stakeholder Approach to Land Use Planning for Climate Change Mitigation	02/2010 - 04/2013	World Wide Fund for Nature (WWF)	2.7	Grant	The goal of the project is the development of a land use planning framework in partnership with major land users, government partners, communities and conservation groups to avoid greenhouse gas emissions. The project aims at developing local government capacity to enable 8 participating cities in India and the Philippines to increase their resilience to climate change through the implementation of a climate sensitive local adaptation action plan.
DE	Philippines and India	Adaptation	Cities in Asia develop Climate Sensitive Adaptation Plans	02/2010-08/2013	ICLEI European Secretariat GmbH	1.6	Grant	The purpose of the project is to improve the local population's ability to adapt to the consequences of climate change in two catchment areas (Rodikot and Darma) in the Humla District of Nepal. This shall be achieved through capacity-building in climate-related issues among the user groups in the catchment area. Additionally, support will be given to improve erosion control for enhanced disaster prevention. A further goal of the project is to rehabilitate 50 hectares of forest as well as to restore and protect ten drinking water sources. The project thus combines the development of climate change adaptation strategies with environmental education and reforestation while at the same time developing best practices that can be applied to other catchment areas.
DE	Nepal	Adaptation	Increasing climate change resilience of vulnerable communities in Humla and Jumla districts, Nepal	02/2011-01/2014	The Mountain Institute (TMI)	0.2	Grant	The purpose of the project is to improve energy efficiency in the operation of the water authority's (WAJ) pumps in the governorates of Balqa, Madaba and Zarqa. To achieve this, the potentials for energy saving at the major power users will first be identified, and measures to improve energy efficiency will then be devised (e.g. procurement of new pumps, improvement of operation and repair processes). BOO/BOT and/or contracting schemes will be developed in order to implement the measures. It is envisaged that both the WAJ and the private sector are involved as key investors.
DE	Jordanien	Mitigation	Improving Energy Efficiency in the Water Sector	02/2011-03/2013	GIZ	1.0	Grant	Restoring the 1 billion hectares of lost forests and degraded lands worldwide could sequester up to twice as much carbon as avoided deforestation. This project will provide Mexico and Ghana with the analytical work, practical tools and methodologies and innovative and open platforms for assessing the restoration and climate change mitigation opportunity. This shall be used as a basis to support the participatory development of REDD+ strategies. The project will secure the 'plus' in REDD+. Broad uptake of the approaches and outputs shall be secured by capacity building of institutions from additional countries which will in consequence be better placed to increase social, ecological and economic resilience.
DE	Mexico, Ghana	REDD	Assessing and capitalizing on the potential to enhance forest carbon sinks through forest landscape restoration while benefitting biodiversity	02/2011-08/2012	IUCN - International Union for Conservation of Nature	0.6	Grant	In January 2009 the governments of China and Germany signed an agreement to cooperate on the issue of climate change mitigation. A bilateral working group was established whose aim is to ensure that this agreement will lead to the development of innovative measures. A liaison office in Beijing is providing support for the project. The project promotes dialogue on policy options and measures for both tackling climate change and adapting to climate change in China and Germany. It also encourages discussion on potential international climate change mitigation agreements as well as the exchange of ideas on the framework and management mechanisms required to establish a low-carbon economy. In addition, it supports the development of bilateral climate change mitigation projects focusing on the accelerated implementation of effective measures.
DE	China	Mitigation	Sino-German Climate Partnership	02/2011-11/2013	GIZ	2.0	Grant	The aim of the project is to build two highly innovative solar thermal power plants in Brazil for distributed electricity supply.
DE	Brazil	Mitigation: Technology	Solar-hybrid Microturbine Systems for Cogeneration in Agro-industrial Electricity and Heat Production (SMILE)	03/2010-04/2014	German Aero-Space Centre (DLR)	1.7	Grant	The purpose of this project is to cofinance measures in the field of climate protection for preparing and supporting private investment on a public-private partnership basis (PPP). Companies will receive support, up to a maximum of € 200,000 per measure, for technology and know-how transfer and capacity development/qualification.
DE	Global	Mitigation	Public-private Partnership (PPP) Programme for Climate Protection	03/2010-12/2013	DEG Invest (Deutsche Investitions- und Entwicklungsgesellschaft mbH)	2.0	Grant	

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
DE	MENA	Mitigation	Supporting the Mediterranean Solar Plan (MSP), the Union for the Mediterranean	03/2011-02/2014	GIZ	2.9	Grant	Economic and demographic developments in the Middle East and North Africa (MENA) region have resulted in a growing demand for energy and rising CO <sub>2</sub> emissions in the energy sector. The project accelerates the installation and transfer of renewable energy technology and contributes directly to the implementation and promotion of the Solar Plan, the Union for the Mediterranean. The measures aim to provide direct support for the innovative regional integration of energy systems through commercial renewable energy power plants. They also contribute to economic and social development as well as climate change mitigation.
DE	Bolivia	REDD	Strengthening management and consolidation of the Protected Areas System	03/2011-02/2014	The Nature Conservancy (TNC)	0.4	Grant	The project aims to strengthen and support environmental management of protected areas of the Municipality of La Paz through the implementation of protected area management plans, including pre-existing management plans and those to be compiled as part of the project. The actions will involve reforestation with native species, studies of aquatic species, education and public awareness, proper management of watersheds and water resources and environmental services.
DE	Caribbean Grenada, Jamaica, Belize, Guyana, St. Lucia	Adaptation	Regional institutions, adaptation, and insurance: expanding coverage for medium-level weather extremes in vulnerable countries using risk reduction and innovative insurance solutions	03/2011-03/2014	Munich Climate Insurance Initiative (MCII)	2.0	Grant	The purpose of the project is to identify solutions for addressing medium-level weather-related risks as well as to develop and deliver public safety networks and public-private insurance solutions for at-risk population groups. A further goal of the project is to identify ways in which the approaches to insurance solutions and Disaster Risk Reduction (DRR) can be combined in order to achieve a sustainable adaptive benefit. The project involves collaboration between a regional risk management institution (CCRIF), the world's leading micro-insurance broker (MicroEnsure) and the Munich Climate Insurance Initiative (MCII), to extend the adaptation options to the at-risk population in the Caribbean.
DE	Global; Bangladesh, Dominican Republic, Kenya, Maldives, Mexico, and Peru	REDD	Strengthening transparency, accountability, anticorruption and public oversight in climate governance and finance for adaptation, mitigation, REDD+ and climate-friendly economy	03/2011-04/2013	Transparency International	2.5	Grant	The project is intended to make a contribution in six countries (Bangladesh, Dominican Republic, Kenya, Maldives, Mexico and Peru) to improved control of international climate funding on a pilot basis. Climate funding control addresses the key (funding) institutions, principles, regulations and international conventions that exist for funding measures to combat climate change impacts. Guaranteeing the effective control of climate funding, calls for a sufficient degree of transparency, accountability and integrity at both international and local level. Through targeted capacity-building among all actors, it is intended to enable greater engagement, cooperation, commitment and contributions to the development, implementation and control of climate funding policy.
DE	Philippines	Adaptation	Protection and restoration of coastal ecosystems for improved adaptation to climate change in the Philippines and the Coral Triangle	03/2011-06/2014	GIZ	4.4	Grant	Protection and restoration of coastal ecosystems for improved adaptation to climate change in the Philippines and the Coral Triangle
DE	China	Mitigation	Capacity Building to Establish and Develop the Technical and Institutional Infrastructure Required to Achieve the 2020 Goals (short title: GHG Monitoring in China)	03/2011-11/2013	GIZ	2.3	Grant	China does not currently have a reliable system for GHG monitoring, allocating reduction targets and mandatory emissions trading. The project develops the capacities needed to establish a GHG monitoring system and an emissions trading scheme (ETS) at regional level. This involves sharing international experience as well as supporting the development and evaluation of the technical and infrastructure conditions required to establish a GHG monitoring system and a regional ETS. An established, comprehensive GHG monitoring system allows the government to respond to the failure of provinces or businesses to fulfil their reduction obligations with decisive action to counteract this failure. Without a monitoring system, unfulfilled reduction obligations would not come to light and this would have a negative effect on GHG reduction results overall.
DE	Costa Rica	Mitigation	REN@EARTH - Facilitating Clean Energy Knowledge Acquisition (for Students) in the Humid Tropics with a Multiplier Effect	03/2011-12/2013	EARTH University	0.9	Grant	The project "REN @ EARTH" will implement capacity-building on renewable energy in the humid tropics. The aim is to strengthen the basis for an increased use of renewable energy technologies in order to reduce carbon emissions and energy imports. By facilitating know-how transfer to students, industry and other stakeholders, the foundation for a sustainable local value creation shall be built. To reach these goals, different measures will be taken: 1. Implementation of an overview course on renewable energy at EARTH University, which shall be implemented into the regular course syllabus for students, 2. Evening classes for the interested public, 3. Implementation of a training center for practical education, 4. Technology-specific further education seminars for engineers of Costa Rican industry as well as 5. Train-the-trainer seminars on various technologies for future EARTH University lecturers (Professors, students and technical experts from Costa Rican companies).  As EARTH University is an international university with 400 students from more than 25 countries in Central and South America, Europe and Africa, a huge multiplier effect will come into operation once the students return to their home countries. Also, relevant stakeholders for a sustainable market development for renewables in Costa Rica will be given the skills and knowledge in renewable energy technologies. PR and marketing activities will enhance public awareness for renewable energy technologies.
DE	China	Mitigation	Energy Efficiency in Chinese and Indian Industry	04/2010-04/2011	DEG - Deutsche Investitions- und Entwicklungsgesellschaft mbH	0.5	Grant	The aim of this project is to identify specific energy efficiency projects in China and supply advice and know-how for the implementation. The target groups are Chinese industrial enterprises and power plants with great energy efficiency potential. Planned activities are market analysis, advice and energy efficiency checks.
DE	Morocco	Mitigation	Promoting Wind Energy and other Renewables in Morocco (Plan Solaire)	04/2010-12/2012	Investitionsbank Schleswig-Holstein (IB-SH)	1.5	Grant	The purpose of this project is to help Morocco expand its wind and other renewable energy sources. This will be achieved by establishing a national competence network and holding information and training events.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
DE	Indonesia, Mexico, Philippines, Tunisia	Adaptation	Inventory of methods for climate adaptation	04/2011-05/2013	GIZ	2.5	Grant	The purpose of this supraregional project in Brazil, Indonesia, Mexico, Peru, the Philippines, Tunisia and Vietnam is to support decision-makers with a proven inventory of methods for the identification, analysis and prioritisation of adaptation needs and measures. The goal is to support the management of climate-related data and to promote the creation of a network for South-South exchange between the actors in the area of adaptation. The project will thus empower actors to take rational and strategic decisions on climate change adaptation, thereby increasing the adaptive capacity of the partner countries and mitigating the consequential costs of climate change in the long term.
DE	Kasachstan, Kirgistan, Tadschikistan, Turkmenistan, Usbekistan	Mitigation	Integrated Approaches to the Development of Climate Friendly Economies in Central Asia	05/2011-05/2013	DIW econ GmbH	2.9	Grant	The overall objective of the project is to support Central Asian (CA) countries in developing a comprehensive policy framework for mitigating climate change and assist them to re-orient their economic development in a low carbon, climate friendly way. To achieve this complex goal, the project will (i) develop a NAMA for each country in cooperation with national experts and provision of respective advice to governments, (ii) elaborate tool kits (blue prints) for sectors which are most relevant to accomplish climate friendly development in CA countries and (iii) strengthen the relevant regional networks by capacity building and through the transfer of respective technologies. Regional cooperation will be enhanced through continuous exchange of experiences in the design of policies and development of implementation measures between all partners involved. The main partner is the Central Asian Regional Environmental Center (CAREC).
DE	Global: South Africa, Philippines, Brazil	Adaptation	Ecosystem-based adaptation in marine, terrestrial and coastal regions as a means of improving livelihoods, conserving biodiversity and adapting to climate change	05/2011-07/2015	Conservation International Foundation	4.4	Grant	To increase the resilience and adaptive capacity of vulnerable people to climate change, Conservation International will assess the vulnerability and the potential for ecosystem-based adaptation (Eba) solutions in three very diverse settings in the Philippines, South Africa and Brazil. Conservation International will implement the elaborated pilot solutions and provide capacity building. The activities shall serve as a model for amplification of ecosystem-based adaptation in marine and terrestrial settings in other areas and countries. The project will work with regional and national authorities as well as international policy bodies to create conditions that allow nationwide and worldwide replication of the results.
DE	Ukraine	Mitigation	Climate Change Mitigation Focus in Economic Development in the Donetsk Region as a Model	05/2011-07/2015	GIZ	3.0	Grant	In comparison with other countries, energy consumption in the Ukrainian industrial sector is higher than average. The project region, Donetsk, is the largest coal mining and industrial area in Ukraine. For this reason, a technology cooperation project is being established in the region to aid economic development. The aim is to provide a model of an industry's focus on climate change mitigation. This involves the implementation of model pilot measures that demonstrate how to realise a regional concept for reducing climate-damaging emissions through resource and energy efficiency. For Donetsk Province the objective is to introduce resource and energy efficiency as a key component in business activities in order to reduce the volume of greenhouse gas emissions. The project operates on several levels – business, provincial and national level.
DE	El Salvador, Mexico, Costa Rica, Panama	Adaptation	Climate Change Governance Capacity: Building Regional and Nationally-tailored Ecosystem-based Adaptation in Mesoamerica	06/2010 - 03/2013	International Union for Conservation of Nature (IUCN)	2.5	Grant	The project addresses the Bali Roadmap call for climate adaptation by building frameworks for governance on climate change responses. It aims to develop climate change governance capacity in the target countries through applied research, demonstration sites and public participation with a view towards effective ecosystem-based water management.
DE	Turkmenistan	REDD	Sustainable Forest Management	06/2011-06/2012	GIZ	0.8	Grant	The project supports efforts by state actors and the population to sustainably manage selected forest areas. Reforestation measures are underway in mountainous regions and arid zones, with the project supporting joint efforts by the partners with the forest users to prepare and implement local forest management plans. The forest administration is being advised in its efforts to establish functionally capable organisational structures, and its technical staff trained in how to set up and operate a system for monitoring greenhouse gas emissions and reforestation.
DE	Global	Mitigation	Global Ideas - jointly for climate protection	06/2011-06/2013	DW TV	3.0	Grant	Goal of this project is to enhance visibility of climate projects in developing and transition countries.
DE	Global	Mitigation	Analytical Support for the creation and operation of the Registry for recording NAMAs and facilitating matching of support	06/2011-12/2012	Ecofys	0.3	Grant	This project will provide public analytical support for the development and operation of an online registry for Nationally Appropriate Mitigation Actions (NAMAs). The project will accelerate the implementation of the registry and help reaching international agreement on its modalities. Within this project Ecofys would provide public analytical support based on the extensive experience with the development of NAMAs, designing a NAMA proposal template and methods to measure report and verify (MRV) the emissions reductions. The registry will record NAMAs seeking international support and facilitate the matching of support.
DE	Morocco	Mitigation	Construction of a Solar Power Plant in Ouarzazate	07/2010 - 12/2012	KfW	10.0	Grant	Support für construction of solar power plant in the Ouarzazate region.
DE	Global	Adaptation	Special Climate Funds	07/2010-06/2011	Protestant and Catholique Association for Cooperation in Development	2.7	Grant	Strengthening of local population by information on possible adaptation actions to climate change and initial implementation.
DE	Africa (Benin, Mosambique, Namibia, Uganda)	Adaptation	Fast Start Finance of Adaptation to Climate Change in Africa	07/2010-12/2010	GIZ	2.1	Grant	Adaptation-related direct technical support and capacity building to improve the situation of regions, highly affected by climate change.
DE	Asia (Bangladesh, India, Nepal, Mongolia)	Adaptation	Fast Start Finance of Adaptation to Climate Change in Asia	07/2010-12/2010	GIZ	2.7	Grant	Adaptation-related direct technical support and capacity building to improve the situation of regions, highly affected by climate change.
DE	Latin America (Honduras, Guatemala)	Adaptation	Fast Start Finance of Adaptation to Climate Change in Latin America	07/2010-12/2010	GIZ	0.7	Grant	Adaptation-related direct technical support and capacity building to improve the situation of regions, highly affected by climate change.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
DE	Global	Adaptation	Dialog Programme about Climate Protection	07/2010-12/2010	German political foundations	1.9	Grant	Strengthening and sensitization of civil society for the process of national and/or regional adaptation policies.
DE	Global	Adaptation	Fast Start Climate Facility	07/2010-12/2010	GIZ	0.2	Grant	Technical assistance and capacity building for development or improvement of climate strategies in developing countries.
DE	Global	Mitigation	Pilot testing of Global Bioenergy Partnership (GBEP) criteria and indicators for sustainable bioenergy in targeted developing countries	07/2011-04/2012	Food and Agriculture Organization of the United Nations (FAO)	0.6	Grant	The proposed activity is intended to build capacity to measure GBEP sustainability indicators for bioenergy in Indonesia and Colombia to help governments to monitor the environmental, social and economic impacts of their bioenergy production and use and to develop sound policy for sustainable bioenergy development.
DE	Global	Mitigation	Public-private Partnership (PPP) Programme for Climate Protection	07/2011-12/2013	DEG Invest (Deutsche Investitions- und Entwicklungsgesellschaft mbH)	2.0	Grant	The purpose of this project is to cofinance measures in the field of climate protection for preparing and supporting private investment on a public-private partnership basis (PPP). Companies will receive support, up to a maximum of € 200,000 per measure, for technology and know-how transfer and capacity development/qualification.
DE	Mexico	Adaptation	Innovative mechanisms for a cooperative climate change adaptation programme in Sierra Madre and the Coast of Chiapas, Mexico	07/2011-12/2014	The Nature Conservancy	1.5	Grant	The project will design and implement financial mechanisms that enhance action for ecosystem based adaptation to climate change impacts in Chiapas, Mexico. The mechanisms will facilitate community-based management for resilience to ecological, social and economic impacts through restoration and adaptation of production practices in 6-8 watersheds. The goal is to improve current adaptive capacity in key watersheds by a) involving resource users in managing the landscape for adaptation to climate change, b) promoting resource conservation, fostering economic development, and c) assuring financial sustainability over time.
DE	Brazil	Mitigation: Technology	Refrigerator Recycling Programme - Phase II	08/2010-04/2012	GIZ	0.9	Grant	The purpose of the project is to set up a recycling system for old refrigerators as a best-practice model. To this end, a pilot scheme will be developed to recover the refrigerants from the cooling systems and the greenhouse gases contained in the insulating foam.
DE	China	Mitigation: Technology	Switching XPS Foam Production from F-Gases to Climate-Friendly CO2 Technology - Phase II	08/2010-04/2012	GIZ	1.0	Grant	The project aims to convert production at up to two foam insulation production lines to CO2 technology to replace the F-gases customarily used. Participating companies receive technical support and training.
DE	Philippines	Adaptation	Forest and Climate Protection on Panay	08/2010-05/2014	GIZ	2.0	Grant	The goals of the project are to establish the status as a protected area for the last major block of forest on the island of Panay which will secure a key carbon sink, to develop alternative energy sources and to spread sustainable agroforestry in buffer zones, which will reduce greenhouse gas emissions.
DE	Global	Adaptation	PREVENT – Providing Support to Delegations from Least Developed Countries (LDCs) and Small Island Developing States (SIDS) for the Post-2012 Negotiations - Phase II	08/2010-08/2011	Potsdam Institut für Klimafolgenforschung (PIK) e.V.	0.8	Grant	The project objective is to provide scientific and strategic support on demand for the negotiating delegations from least developed countries (LDC) and small island developing states (SIDS) providing briefings, analyses and modelling tools. It builds on a successful first phase of the project.
DE	China	Mitigation: Technology	From Halogenated Refrigerants to Climate-Friendly Hydrocarbons - Showcase Production of Environmentally Sound Air-Conditioning Systems - Phase II	08/2010-10/2011	GIZ	0.9	Grant	The project aims to convert the production of air-conditioning systems by a local Chinese manufacturer from HCFCs to natural refrigerants (hydrocarbons), thereby establishing a best-practice model. It also includes comprehensive training delivery for production and service technicians.
DE	Mosambique	Adaptation	Fast Start Finance of Adaptation to Climate Change along the River Chire	08/2010-12/2010	Munich Re Foundation/GIZ	0.3	Grant	Implementation of a flood warning system along the river Chire and sensitisation of the local population.
DE	Peru, Guatemala, Tajikistan, India	Adaptation	Capacity Building for Adaptation to Climate Change	08/2010-12/2010	German Agro Action/Oro Verde	0.7	Grant	Strengthening of local population by information on possible adaptation actions to climate change and initial implementation as well as development of climate proofing methodology.
DE	Ethiopia and 3 further countries	Mitigation	Low Carbon Development Plans (Ethiopia Low Carbon Growth & 3 Additional Countries)	08/2011-05/2013	Global Green Growth Institute (GGGI)	5.0	Grant	Many developing countries are seeking support and expertise for the development of fact-based, relevant, and context-aware low-carbon growth plans and, in a second step, for turning these plans into reality by means of a detailed and pragmatic roadmap, jointly developed and validated by all stakeholders. Therefore, the project's primary goal is to increase the number of developing countries demonstrating the feasibility and the benefits of a green growth development path. Focus of the first component is the support to low carbon planning in Ethiopia. In the second component three additional partner countries are selected. In the third component, project activities are realized in the selected countries in order to facilitate their assessment and formulation of low carbon development paths. Project activities are mainly the assessment of abatement levers in various sectors as well as for example the development of implementation and MRV systems and capacity development of the local partners. Results of the first component will be presented at the COP in Durban. Throughout the project duration, experiences and the lessons learnt from all four partner countries will be shared publicly in the form of reports, presentations, workshops, and conferences.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
DE	South Africa	Mitigation	Developing Climate Policy Capacity within the South African Department of Environmental Affairs and Tourism (DEAT)	08/2011-06/2013	GIZ	1.5	Grant	This project will support the Ministry of Environment DEAT in its climate policy capacity building, in policy-making and implementation. It will cover international climate negotiations, emission reduction analysis, sectoral policy implementation and adaptation measures.
DE	Thailand	REDD	Thailand forest carbon baseline development, monitoring and REDD capacity building	08/2011-08/2014	WWF - Germany	1.7	Grant	This project aims to create a cost effective, high resolution forest carbon basemap as the Thai Government's inventory and put into place a credible, transparent carbon monitoring system for REDD+. Capacity-building and the development of a sub-national pilot project design document will contribute to Thailand's ability to design and benefit from a range of new carbon financing mechanisms and to better understand how co-benefits are identified, measured and monitored. A structured experience-sharing programme will ensure that insights from the project contribute to regional uptake of forest carbon conservation and financing mechanisms. The proposed project activities will establish a solid foundation of policy and technical expertise and will facilitate Thailand becoming a technology and training hub for regional forest monitoring and conservation.
DE	Ecuador	Mitigation	Switching from Fossil Fuels to Biofuels on the Galapagos Islands	08/2011-12/2011	GIZ	0.5	Grant	The aim of the project is to support the Ecuadorian government in switching the Galapagos Islands' energy supply completely to renewable energy sources by 2015. Of particular importance in this connection is the substitution of fossil fuels by plant oil that is grown under environmentally and socially acceptable conditions. The project provides advice and scientific support for promoting the use and cultivation of the native jatropa curcas (physic nut) and its processing into plant oil. Training measures for local actors are also planned. In addition, both existing and newly purchased generators are to be converted to run on plant oil.
DE	Global	Adaptation	Adaptation Fund Network	09/2010-08/2013	Germanwatch	0.5	Grant	Supporting facility for the NGO monitoring of the Adaptation Fund under the Kyoto Protocol of the UNFCCC especially to check the implementation of "direct access" in developing countries.
DE	Asia	Mitigation	End-User Finance for Access to Clean Energy Technologies in South and South-East Asia (FACET)	09/2010-08/2014	UNEP	5.0	Grant	The project will implement country programmes aiming at mobilizing end-user financing for small scale climate friendly technologies such as solar systems and high efficiency appliances.
DE	India	Mitigation	Promoting Low Carbon Transport in India	09/2010-12/2013	UNEP	2.0	Grant	The project aims to promote low carbon sustainable transport systems in India through modal substitutions and technological improvements. To this end an integrated assessment for the transport sector in four cities will be carried out and linked to the national and city level.
DE	Africa (Southern African Development Community - SADC)	REDD+	Development of integrated monitoring systems for REDD+ in the SADC Region	09/2011-02/2015	GIZ	3.4	Grant	The project intends to set up an integrated system for monitoring of forest area, carbon stocks and emissions from deforestation and forest degradation. The system will have the buy-in of all SADC (Southern African Development Community) countries. The project's cornerstone is to achieve high precision in emissions accounting through a combination of innovative remote sensing data and results of terrestrial inventories. In order to achieve this goal, the project will enhance the technical and institutional capacities in selected SADC countries.
DE	Ukraine	Mitigation	Capacity building for low carbon growth in Ukraine	09/2011-07/2013	United Nations Development Programme (UNDP)	2.5	Grant	Due to economic decline following the break-up of the Soviet Union, Ukraine's greenhouse gas emissions are currently 54% lower than in 1990. At the same time, the Ukrainian economy remains among the most carbon intensive globally. Therefore the project aims to assist Ukraine in developing a long-term low carbon development strategy, focusing on achieving economic growth and avoiding concomitant increase in greenhouse gas emissions. The integrated approach of the project will allow the utilization of appropriate decision-making tools which increases the Ukrainian government's overall institutional capacity to design and implement climate change policies and improved and adequate measures.
DE	Global	Mitigation	Enhancing low-carbon development by greening the economy: policy dialogue, advisory services, benchmarking	09/2011-07/2014	GIZ	3.0	Grant	The project will promote Green Economy (GE) in developing countries and emerging economies as a realistic approach towards low-carbon development. It will be implemented in cooperation with UNEP (focus on macroeconomic policies) and close coordination with the BMU, with special regard of the particular environmental perspective on the next UN Conference on Sustainable Development (Rio 2012) and UNFCCC negotiation issues. The project includes elaboration of concept papers, establishing and testing of indicators and benchmarking methods (supporting MRV) as a part of demand-oriented advisory services in selected partner countries. It will provide concrete support to decision-makers to design suitable policies for a Green Economy transition, including fiscal and economic incentives that aim to contribute to the mitigation of and adaptation to climate change.
DE	Global	Adaptation	Survive: Science and policy to assist and support SIDS and LDCs to negotiate a strong international climate regime enabling low carbon development and supporting adaptation needs	09/2011-08/2014	Potsdam-Institut für Klimafolgenforschung (PIK) e. V.	4.0	Grant	The project goal is to provide strategic, technical, policy and scientific support for Small Island Developing States (SIDS) and Least Developed Countries (LDCs) to assist them in achieving their objective of a legally binding, ambitious and comprehensive international climate regime. This climate regime shall include modalities for the design, financing and implementation of low carbon development and adaptation plans. This includes the set-up of the Green Climate Fund established in Cancun (SIDS and LDCs on the Board and Transitional Committee), further work on long term finance (especially from innovative sources), advancing work on loss and damage mechanism, the set-up of the Adaptation and Technology Committees, the review of the 1.5°C issue, as well as the review of mitigation commitments, pledges and actions noted in the Cancun Agreement.
DE	Türkei, Brasilien, Argentinien, Chile, Senegal, Vietnam	Mitigation	Initial funding of local project development companies for renewable energy projects in developing countries	09/2011-12/2012	KfW Entwicklungsbank	2.5	Grant	The aim of the project is to assist in the start-up and financing for experienced local project developers that provide equity and/or shareholder-like loans to them. If the venture is successful and afore defined indicators are reached the capital flows back to the fund, if so including profit participation. Hence the fund could be revolving and provide funding for a longer period.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
DE	China	Mitigation	Low Carbon Development Achieved Through Energy Efficiency Measures in Jiangsu Province	10/2010-01/2015	GIZ	3.0	Grant	The project develops and supports the implementation of strategies for reducing greenhouse gas emissions in Jiangsu Province as well as in selected towns and industrial areas. The project aims to contribute to the reduction of greenhouse gas emissions by providing training, encouraging knowledge transfer and implementing concrete pilot projects focusing on energy efficiency in the building and industrial sectors. The emphasis is on improving the legal and institutional framework for energy efficiency in Jiangsu as well as supporting the use of energy-efficient solutions and products, particularly in the building and industrial sectors.
DE	Turkey	Mitigation	Efficient and Environmentally-Friendly Use of Animal Waste in Turkey	10/2010-04/2014	GIZ	2.5	Grant	The project aims to establish the environmentally-friendly use and processing of agricultural waste in Turkey. A pilot plant for generating biogas (energy) and fertiliser is having a direct impact by reducing greenhouse gas emissions. There are now plans to introduce an operating model using substantial private investment. In addition, the project includes providing advice on developing adequate general conditions as well as the necessary training on technical, economical and operational issues.
DE	MENA	Mitigation	Solar Resource Atlas for the Mediterranean	10/2010-09/2012	Deutsches Zentrum für Luft- und Raumfahrt	1.5	Grant	The aim of the project is to develop a high quality and easy accessible database of available solar resource in the Mediterranean and to disseminate relevant information to stakeholders in the field of solar energy use via internet. With it, among other things, investments into solar energy applications will be facilitated, the financial risk will be lowered, the data base for policy support mechanisms will be qualified and the implementation of initiatives promoting solar energy will be supported.
DE	Global	Mitigation	Advancing UNFCCC Negotiating Process through Preparatory Workshops for Negotiators from Developing Countries	10/2010-12/2010	UNEP	0.5	Grant	The objective of this project is to support climate change negotiators from developing countries through workshops to discuss and refine their regional policy positions.
DE	Maldives	Mitigation	Supporting the Carbon Neutral Strategy of the Maldives	10/2011-09/2014	GIZ	3.1	Grant	The Maldives presented a Carbon Neutral Strategy in 2009 which foresees a massive installation of renewable energies and energy efficiency measures to reach the goal by 2020. The project aims at supporting the government of the Maldives in the implementation of the strategy so that public bodies and private actors gain the capacities and know how to elaborate and implement comprehensive, specific strategies. To this end, a number of pilot installations of renewable energies and energy efficiency measures will be complemented by the development of a learning and training platform on energy topics. In addition, the relevant ministries will be offered advice on formulating framework conditions and incentives. Close cooperation with the World Bank, the Asian Development Bank as well as other international actors is intended.
DE	Dominican Republic, Haiti, Jamaica (the Greater Antilles of the Caribbean)	Mitigation	Designing and Communicating Low Carbon Energy Roadmaps for Small Island States of the Caribbean	11/2010-01/2013	Worldwatch Institute	1.4	Grant	In the Caribbean, island nations are largely dependent on energy imports, including oil. This dependence leads to higher energy costs, reduced competitiveness, price fluctuations, reduced energy security, and often an unreliable energy infrastructure. Dependence on foreign fossil fuels also leads to high greenhouse gas emissions. The project goal is to work with the local governments, business leaders, utilities, academia, and civil society groups to develop low-carbon strategies for the Dominican Republic, Jamaica, and Haiti. The project will include renewable resource assessments and mapping, technical, social and economic assessments, and a full-scope policy analysis of potential renewable energy zones and energy efficiency projects. The project will develop and communicate low-carbon strategies in climate vulnerable countries (Jamaica, Dominican Republic, Haiti) via renewable resource and energy efficiency assessments, research, evaluation of technological and economic issues, and analysis of policies. Final product are policy roadmaps for decision makers with specific steps to implement.
DE	India	Mitigation	Solar Mapping and Monitoring	11/2010-02/2014	GIZ	1.6	Grant	The project aims at mapping potential for solar power production and thus furthering the production of renewable energies.
DE	Vietnam	REDD	Exploring Mechanisms to promote High Biodiversity REDD: Piloting in Vietnam	11/2010-07/2013	SNV Vietnam	0.9	Grant	The goal is to promote high biodiversity REDD schemes leading to the protection of biodiversity, helping mitigate global climate change and benefiting local communities. It will achieve this by exploring and testing national and international mechanisms to foster high biodiversity REDD. The new research will help inform CBD (Convention on Biological Diversity) and UNFCCC* discussions.
DE	Global	Mitigation: Technology	Facility for climate friendly transport technologies and actions	11/2010-09/2013	GIZ	1.5	Grant	The project supports developing countries through specific handouts regarding existing instruments and technologies as well as climate related processes (e. g. MRV).
DE	Peru	Adaptation	Insurances for Small Loans in the Agricultural Sector for Adapting to the Effects of Climate Change	11/2010-10/2013	GIZ	2.0	Grant	During the implementation of the project the development of an innovative insurance system in order to cover the risks of climate change will take place. The project goal is to establish a sustainable market for insurances in the agricultural sector.
DE	Global	Adaptation	Gender in Adaptation and Low-Carbon Development. Raising Awareness, Building Capacity, Supporting National and International Policy Making.	11/2010-10/2013	GenderCC - Women for Climate Justice	0.5	Grant	Raising awareness of climate change and developing capacity particularly among women on adaptation & low carbon development; raising awareness of gender aspects mainly among policy makers at national & international levels; contributing to integrating gender in climate change related policies & programs; facilitating global learning exchange.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
DE	Indonesia	Mitigation	Energy Efficiency for sustainable tourism in Pangandaran, Indonesia	11/2010-10/2013	United Nations World Tourism Organization-UNWTO	1.2	Grant	In the nationally important destination of Pangandaran, West Java, the project aims at community based low carbon development especially in the tourism sector by increasing efficiency of energy use, showing exemplary use of renewable energy and increasing awareness for the need of adaptation measures. The results of the project will feed from the local level to the district and provincial level in the framework of the decentralization policy of Indonesia as well as in national processes on MRV-system establishment and the formulation of the National Sectoral Road Map for Climate Change on tourism. The project experiences shall also inform other destinations in Indonesia and be presented and discussed on regional and global level.
DE	Brazil	REDD	Monitoring of climate-relevant biodiversity in protected areas in consideration of reduction and adaptation measures	11/2010-10/2013	GIZ	3.5	Grant	Even though Brazil is a global pioneer in terms of forest monitoring, biodiversity is not yet fully integrated in the monitoring systems and only scarcely linked to the issue of climate change. The structuring and improvement of the monitoring of climate-relevant biodiversity is tracked at the level of nature conservation areas. The goal is to prepare and use REDD+ and other compensation mechanisms for biodiversity and climate protection, with the inclusion of the local population.
DE	Sahel-Region	Adaptation	Sahel-Adaptation-Facility	11/2010-12/2010	KfW	10.7	Grant	Contribution to the "fonds de Bonification" of the BOAD (Banque Ouest Africaine de Developpment), meant to finance adaptation-related activities of UEMOA-memberstates (West African Economic and Monetary Union).
DE	Brazil	REDD	Fundo Amazônia	11/2010-12/2010	KfW	3.0	Grant	Finance of REDD-activities.
DE	Costa Rica	REDD	Fondo de Biodiversidad Sostenible	11/2010-12/2010	KfW	6.0	Grant	Contribution to the "Fondo de Biodiversidad Sostenible", meant to finance REDD+-activities.
DE	Dominican Republic	Mitigation	Fast track development of 2 transformative climate-compatible development plans	11/2010-12/2011	CFRN-Coalition for Rainforest Nations	1.7	Grant	The project will develop a Climate Compatible Development Plan (CCDP) for the Dominican Republic. A CCDP is a document that presents a reference scenario for economic development and the resulting emissions. Broken down by sector, mitigation options are identified and recommendations for climate-compatible growth are proposed. Such a CCDP is based on a comprehensive data set and is developed out of the national context in collaboration with the government of the relevant country. In addition to the CCDP development, the project also proposes integrating the results into national policy. Finally, an additional goal is to return the experiences made to the international political level.
DE	Chile	Mitigation: LEDS/MRV	Implementing fast-track climate finance - development of proposals for Nationally Appropriate Mitigation Actions (NAMAs)	11/2010-12/2011	Ecofys Germany GmbH	0.3	Grant	To support fast track climate finance, the project supports Chile to make timely proposals on nationally appropriate mitigation actions (NAMAs). It builds on Ecofys experience on NAMA development in Mexico, China and Turkey. Good NAMA proposals are a pre-condition for sound guidelines for a future financial climate mechanism.
DE	Global	Mitigation	National Climate Finance Institutions Support Programme	11/2010-12/2012	UNEP	2.4	Grant	A support programme will be established to assist national climate finance agencies to maximize the impact of climate finance activity in developing countries. A coordinated set of research activities will be aligned with joint project preparatory activities.
DE	Global	Mitigation	Sectoral Study on Climate and Refrigeration Technology in Developing Countries and the Development of Methods and Instruments for Identifying Reduction Potential and Implementing NAMAs	11/2010-12/2012	GIZ	1.9	Grant	The project allows decision-makers in developing countries to assess the greenhouse gas emissions from fluorinated gases and also to evaluate the reduction potential of alternative technologies, such as natural refrigerants. Building on this knowledge, decision-makers can then formulate sectoral policies or nationally appropriate mitigation actions (NAMAs). The project aims to develop a methodology for calculating and modelling emissions as well as a handbook for formulating NAMAs. The results could be used worldwide to develop sectoral NAMAs.
DE	Mali	Adaptation	Innovative development plan for adaptation to climate change in Mali	11/2011 - 08/2014	GIZ	3.0	Grant	Goal of this project is to tie the topic adaptation to climate change to the decentralisation processes in Mali.
DE	Peru	Adaptation	Adaptation of public investments to climate change	11/2011 - 10/2014	GIZ	3.0	Grant	Consideration of criteria for adaptation to climate change in public investment strategies.
DE	Global	Mitigation	Non-Renewable Biomass Fraction	11/2011-04/2013	Perspectives GmbH	0.2	Grant	Goal of this project is to support the implementation of CDM-projects in Africa with baseline-scenarios that are based on the use of non-renewable biomass.
DE	Costa Rica	Mitigation	Support of Costa Rica's Zero-Emission Development Strategy as Model for Low Carbon Development	11/2011-04/2015	GIZ	3.5	Grant	Costa Rica has the aim to become carbon neutral by 2021. The project supports achieving this aim by strengthening institutional structures and capacities on various levels, developing Nationally Appropriate Mitigation Actions (NAMAs) in selected thematic sectors and implementing pilot measures. Furthermore, communication campaigns and the formulation of specific climate strategies for selected institutions will be facilitated. In order to establish a far reaching network, necessary for attaining the country's aims, not only a close cooperation with the main partner, the Ministry for the Environment MINAET (Ministerio de Ambiente, Energía y Telecomunicaciones) is planned but also with a vast number of other actors including the private sector. In addition, an essential field of activity of the project is the further development of concepts and strategies for low carbon development in developing and newly industrialized countries. The project's accumulated experiences and lessons learnt shall be disseminated to regional and international forums and discussions about "Low Carbon Development" in order to make patterns of solutions and strategic approaches
DE	Brazil	REDD+	Prevention, control and monitoring of fires in the brazilian Cerrado	11/2011-10/2014	GIZ, KfW	8.5	Grant	Deforestation and bush fires in the brazilian Cerrado, the worlds species richest savanne formation, are responsible for 24% of the green house gas emissions from land use change in Brazil. The project aims at reducing the bush fires and by this the maintainance of the Cerrado ecosystem. Fire prevention, fire control and the improvement of the monitoring system for deforestation and fires in the cerrado are foreseen activities to achieve project goals. A technical- and a financial cooperation (GIZ and KfW) complement each other.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
DE	Vietnam, Laos	REDD+	Advancing Understanding of Forest Carbon Stock Enhancement as part of REDD+	11/2011-10/2014	SNV Vietnam	1.3	Grant	This project aims to advance understanding of forest carbon stock enhancement as part of any future REDD+ Agreement through exploring the technical and economic feasibility of different forest carbon stock enhancement strategies in pilot sites, across Vietnam and Lao PDR. The sites will be chosen to reflect representative forest ecosystems of the region. The results and operational guidance will feed into the National REDD+ Strategies, which will ensure their replication across the respective countries. The project also aims to better understand the economic feasibility of different options and the incentives which need to be in place to engage local communities and improve their living conditions.
DE	Congo Basin, Brazil	REDD+	REDD+ Policy Assessment Center (REDD-PAC)	11/2011-11/2015	International Institute for Applied Systems Analysis (IIASA)	4.5	Grant	The project will apply integrated land-use modelling to support the design of globally consistent national and regional REDD+ policies that safeguard and enhance other ecosystem values, in particular those related to the Convention on Biological Diversity (CBD). The project is dedicated to support a fair, efficient and effective international REDD+ architecture. Furthermore, the project will support high resolution planning for REDD+ and the Convention on Biological Diversity in the Congo basin and Brazil. The REDD+ Policy Support Center (REDD-PAC) will act as a global forum for sharing and improving global data on forests and deforestation drivers, developing best practices on national REDD+ modelling and thereby supporting bilateral and multilateral efforts to ensure transparency as well as environmental and financial integrity of REDD+ efforts.
DE	Global	REDD+	Independent Network for REDD+ Funds Tracking	11/2011-11/2015	Forest Trends Association	1.9	Grant	The project will establish a global network to track and analyze public and private REDD+ fund expenditures, with a special focus on specific use of funds in recipient countries. Local institutions from priority REDD+ regions will receive support and training to track REDD+ finance in the region, including sources of funds, activities, management, and disbursement time. The findings will be presented in an online data base and annual analytical report. The project issues will be aligned with the workplan of the REDD-Plus Partnership.
DE	Mexico	Mitigation	German-Mexican Climate Change Mitigation Alliance	12/2010-01/2014	GIZ	3.0	Grant	The project aims to support the effective and efficient implementation of Mexican climate change mitigation policy encourage further development for the period after 2012 and promote the integration of additional innovative mechanisms for adapting to and reducing climate change. In order to achieve this, the Mexican Ministry of Environment and Natural Resources is being provided with advice at strategic level on climate policy and innovative mechanisms. Incentives are also being offered to adopt energy and resource-saving production techniques.
DE	China	Mitigation	Climate Change Mitigation by Promoting Energy Efficiency in Buildings -	12/2010-02/2012	GIZ	1.5	Grant	Energy efficiency in residential buildings in northern China is poor, and such buildings are responsible for high greenhouse gas emissions. To date very few mechanisms have been introduced for promoting energy rehabilitation in these buildings. A baseline study lays the foundations for implementing a carbon exchange system in the construction sector. This will make new sources of financing available for rehabilitation and provides incentives to reduce greenhouse gas emissions. In addition, the project will result in the development of the first comprehensive digital databank for residential housing; this will be useful for long-term rehabilitation planning.
DE	Kenya	Adaptation	Risk Management Strategies for Adaptation to the Impacts of Climate Change in the Kenyan Highlands Agriculture	12/2010-02/2014	GIZ	2.3	Grant	Measures of the project contain the development of extensive risk management strategies for value chains of selected agricultural products. Further, an upscaling of weather insurances and activities for an innovative impact monitoring are planned.
DE	Member States of the Mekong River Commission	Adaptation	Flood Prevention and Disaster Risk Management in the Lower Mekong Basin	12/2010-03/2014	GIZ	3.2	Grant	The project is part of the Mekong River Commission's (MRC) Flood Management and Mitigation programme. It supplements the activities of this programme in the areas of flood forecasting, structural measures and regional cooperation. The project is also supporting the development of a results-based monitoring system for the entire programme and the efficient integration of all the separate components.
DE	Chile	Mitigation	Energy Efficiency and Cogeneration in Public Hospitals (Pilot Project)	12/2010-04/2012	GIZ	1.1	Grant	This pilot programme focuses on the development and implementation of measures to increase energy efficiency (EE) and cogeneration in public hospitals. The aim is to apply this pilot model to other hospitals, primarily in the target areas worst affected by the earthquake in 2010. In Chile, energy performance contracting through energy service companies (the ESCO model) and the use of micro and small-scale cogeneration systems is not yet widespread. The project offers the potential to establish a growth market and the business models and technology developed could be applied in schools, educational institutions, hotels, shopping centres and public buildings.
DE	Ukraine	Mitigation	Modernisation of Public Transport in Lviv (Phase II)	12/2010-07/2013	European Bank for Reconstruction and Development	5.0	Grant	This project addresses the comprehensive modernisation and expansion of the public transport system required in the city of Lviv (800,000 inhabitants) in order to minimise the climate impact of both increased mobility and the 2012 European football championships. The aim is to reduce transport-related CO2 emissions through the use of modern, energy-efficient technologies in local public transport systems and to reduce the number of private vehicles as a proportion of the total traffic. (Prosecution of '09_I_087_UKR_K_Energy-efficient extension and modernisation of the local public transport in Lviv')
DE	Fiji, Vanuatu, Solomon Islands, Papua New Guinea	REDD	Climate protection through forest conservation in Pacific Island States	12/2010-10/2014	GIZ	4.9	Grant	The purpose of the project is to conserve forests in the Pacific Island States in order to avoid greenhouse gas emissions. To achieve this, REDD+ processes are to be initiated and implemented in island states and a regional REDD+ strategy is to be elaborated. The actors will be enabled to earn carbon credits for forest conservation: a direct contribution to the reduction of greenhouse gas emissions. Regional cooperation will make it possible to address the problem of leakage at a supranational level. Sustainable forest management and reduced greenhouse gas emissions will become a shared concern for government, civil society and the timber industry.
DE	Indonesia	Adaptation	Database for management of climate adaptation information and data	12/2010-11/2013	GIZ	2.1	Grant	In Indonesia, the statistical basis for the efficient use of climate adaptation information and the formulation of appropriate adaptation strategies are still insufficient. There is a lack of scientific capacities as well as of human, financial and technical resources. Accordingly, the purpose of the project is to improve Indonesia's ability to adapt to climate change impacts by means of an improved statistical basis and a standardised processing of data. A further goal of the project is to create an information management system to support planning, implementation and monitoring of adaptation measures.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
DE	Peru	REDD	Facilitation of the Peruvian Tropical Rainforest Programme „Conservando Juntos“	12/2010-11/2013	GIZ	3.0	Grant	This project will support the Peruvian environmental ministry during the development and exemplary testing of the tropical rainforest programme "Conservando Juntos".
DE	Costa Rica	Adaptation	Protection of Marine and Coastal Biodiversity through Capacity Building and Adaptation to the Impacts of Climate Change	12/2010-11/2014	GIZ	3.5	Grant	The purpose of the project is the protection of coastal and marine areas through capacity development actions towards the Costa Rican authorities. Co requisite ecosystem-based adaptation actions to the impacts of climate change are an integral part.
DE	Peru	REDD	Support of the Development of a National REDD-system in Peru	12/2010-11/2014	KfW	6.3	Grant	Goal of the project is to support the Peruvian government during the development of a national REDD-system. It will then be possible to integrate sub-national approaches into the national REDD-politics.
DE	MENA	Mitigation	Providing Training for Integrating the Renewable Energy Networks for Supplying Electricity in Selected Newly Industrialised Countries and Developing Countries (RE Grid System)	12/2010-12/2013	Renewables Academy (RENAC) AG	1.9	Grant	Providing Training for Integrating the Renewable Energy Networks for Supplying Electricity in Selected Newly Industrialised Countries and Developing Countries (RE Grid System). The project provides knowledge on integrating renewable energy networks to grid operators, energy producers, ministries and administrations in the Middle East and North Africa region. It holds seminars, Web-based seminars, a mobile exhibition and workshops.
DE	India	Mitigation: Technology	Research Cooperation	12/2010-12/2013	KfW	5.0	Grant	The programme's objective is to deepen the Indo-German research cooperation in the field of innovative clean energy technologies. Within the programme, it is foreseen to finance e.g. research/testing facilities in the field of solar thermal energy and further renewable energies, as well as related capacity building measures.
DE	Indonesia, Thailand, Vietnam	Adaptation	Vulnerability assessment and adaptation to climate change for water resource management in coastal cities of Southeast Asia	12/2010-12/2014	Asian Institute of Technology (AIT)	0.1	Grant	The goal of this project is to enhance local adaptive capacities through learning from the cooperative research results on climate change impacts in Southeast Asian coastal cities. The project will be launched at selected coastal cities in three countries in Southeast Asia, namely Indonesia, Thailand and Vietnam. This cooperation aims to share the information and experiences on climate change risk assessment and adaptation in urban water resources management based on research results and several dissemination activities.
DE	Vietnam	Adaptation	Promoting Biodiversity as Adapting Action to the Impacts of Climate Change in Bac Lieu Province	12/2010-12/2014	GIZ	3.5	Grant	The goal of the project is the protection of coastal forests through the sustainable use of resources and promoting biodiversity. This can be achieved in enabling local authorities to face the impacts of climate change within developing land use plans.
DE	Global	Adaptation / All	Programme Implementing the UN Convention on Biological Diversity (CBD)	2010 - 2012	GIZ	2.3	Grant	The programme provides advisory services to the further development and implementation of international and national biodiversity policies from a sustainable development perspective, and supports the integration of biodiversity-related objectives and activities into projects and programmes in partner countries. This includes approaches to the protection of ecosystems, to the sustainable use of biological diversity, and to issues of ecosystem-based adaptation and the mitigation potential of healthy and well-managed ecosystems. The project further develops capacity building tools, and supports partner countries and organisation in developing Access and Benefit Sharing (ABS) regulations and approaches for the benefit of local communities and the conservation of biodiversity.
DE	Brazil	Adaptation	Promotion of protected areas and sustainable Management	2010-2013	GIZ	2.0	Grant	The program aims at supporting involved stakeholders to manage protected areas and primary forests in the Brazilian Amazon area and to adapt management approaches in the face of increased climatic and environmental changes. It provides policy support, training and financial support to reduce deforestation rates in protected areas and their surroundings resulting in the protection and sustainable use of the habitat Amazonia.
DE	Bangladesh	Adaptation	Protection of biodiversity in wetlands	2011 - 2015	GIZ	4.0	Grant	The project aims at the improvement of the management of wetlands and floodplains through the local population and municipalities. Given the changing environmental conditions in Bangladesh, the approach will establish new protected areas, rehabilitate natural resources, and provide policy advice for an improved management of e.g. fisheries and local biodiversity. In addition, it will support income generating measures through the sustainable use of water-saving agricultural production.
DE	Caucasus (only developing countries)	Adaptation	Focal Area Environment - Component for the Sustainable Management of Biodiversity	2011 - 2016	GIZ	13.5	Grant	The programme supports efforts to help to create the conditions needed for sustainable biodiversity management in the Southern Caucasus countries, taking into special consideration the expected changes to the environment due to increased climatic variability and changes to ecosystems. Support is provided for the development of biodiversity management implementation guidelines, organisational development and the development of capacity and potential at the environment ministries, staff development within and outside the environment ministries, and environmental communication.
DE	Ecuador	REDD	Forest Protection	2011 - 2016	KfW	10.0	Grant	The program aims at broadening and consolidating forest protection measures in Ecuador as a part of the national REDD-strategy.
DE	Mauritania	Adaptation	Natural Resources Management Programme	2011-2013	GIZ	1.5	Grant	The program is based on the national environmental plan of action. It aims at improving local and national capacities for sustainable management of natural resources, contributing to the conservation of Mauritania's unique ecosystem. A particular focus is also the advisory and support of poverty-related use of natural resources and the development of approaches for adaptation and mitigation strategies with regard to climate change and combating desertification.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
DE	Ecuador	Adaptation / REDD	Programme for the sustainable management of natural resources	2012 - 2013	GIZ	1.3	Grant	The programme aims at supporting the rural population to apply sustainable natural resource management strategies and methods to increase their income. It supports the development of institutions and strategies for the conservation of natural resources, it fosters the valorisation of natural resources and environmental services, it supports local governance of nature conservation and eco-corridors, and helps to develop a national framework for REDD and adaptation strategies.
DE	Namibia	Adaptation / Capacity Building	Vocational Training for Agriculture (incl. Land Management and Land Reform)	2012 - 2016	GIZ	2.5	Grant	This project supports the Namibian Training Authority in the implementation of a nationally recognized vocational training program in the Namibian agriculture and land management sector over a period of five years, with a focus on enhancing sustainable income generation, food security and supporting sustainable land management, also in the face of increased climate variability and the need to adapt current practices to the changing conditions.
DE	Laos	REDD	Sustainable development and protection of the forest in Southern Laos	2012-2013	KfW	6.0	Grant	Intention of the programme is to reduce the ongoing degradation and illegal clearing of the tropical forests in southern Laos. The program will protect the high biodiversity in the region and mitigate the economic loss which occurs to the local population through logging. Related emission of carbon will be reduced.
DE	Indonesia	REDD	Forest and Climate Change	ongoing project	GIZ	8.6	Grant	The programme is an integral part of the Forests and Climate Change program. It offers policy advice, strategy development and implementation with special regard to REDD+. It supports biodiversity and sustainable development in the Heart of Borneo.
DE	Guyana	REDD	Protection of tropical forests 3	ongoing project	KfW	4.3	Grant	The programme supports the REDD+ preparation process and sustainable forest management measures.
DE	Honduras	Adaptation	Conservation of Natural Resources, Local Economic Development and Climate Protection	Ongoing project.	GIZ	6.0	Grant	The project supplies policy advisory services for environmental and resource management at the national level, and supports sustainable management of natural resources and local economic promotion of the country's strategically most important forest regions. It further more contributes to securing the largest and most important national protected areas, highlighting the relevance of ecosystem-based adaptation especially with regard to increasing resilience towards the effects of severe weather events (like hurricanes) resulting from an increased climate variability in the region.
DE	Namibia	Adaptation	Biodiversity Management and Climate Change	Starting 2011	GIZ	5.0	Grant	The program aims at supporting the Government of the Republic of Namibia, especially the Ministry of Environment and Tourism, in strengthening capacity for environmental resources management under changing climatic conditions. The program interventions will focus on environmental policy development and implementation, capacity development for biodiversity management in selected community protected areas and biodiversity and climate change as a cross-sector challenge for improved decision-making taking into account the importance of functioning ecosystems for adaptation to climate change.
DE	Honduras	Adaptation	Consolidation of the National Protected Areas System (LifeWeb)	Starting 2012	KfW	10.0	Grant	This project supports the Honduran counterparts in assuring future biodiversity conservation and long-term provision of ecosystem goods and services through a participatively managed and ecologically representative Honduran National Protected Areas System. The priority areas are, among others: promotion of sustainable livelihoods, climate change adaptation, ecosystem restoration and maintenance, and mitigation of severe weather events and natural hazards.
DE	Namibia	Adaptation	Programme for Integrated National Park Management	Starting 2012	KfW	14.0	Grant	This programme supports the Ministry of Environment and Tourism in the establishment and integrated management of national parks in the northern part of the country. It focuses on the maintenance and improvement of the ecological value of the biodiversity-rich areas and contribute to poverty reduction and the protection of natural habitats and ecosystems.
DE	Namibia	Adaptation	Support to Debushing	Starting 2012	GIZ	4.0	Grant	The programme aims at developing viable, appropriate de-bushing techniques in close cooperation with most affected communities, thus increasing the carrying capacity of Namibian farmland. This programme will create job opportunities and support local livelihoods, contributing to higher production on this land, while alleviating poverty and promoting the sustainable management of resources in the face of changing environmental conditions partly due to climate change.
DE	Pakistan	Adaptation	Programme Supporting Biodiversity in Pakistan	Starting 2012	GIZ	5.0	Grant	The program aims at providing support to the Government of Pakistan to promote the protection and sustainable use of biological diversity and ecosystems in order to maintain and improve ecosystem services such as water and sustainable energy through appropriate approaches for sustainable economic development.
DE	Brazil	REDD	Combating deforestation in Pará	Starting 2012	KfW	12.5	Grant	The program aims at protecting biodiversity and forests in the state of Pará and therewith contributes to the Brazilian aim of reducing the deforestation rate by 80% until 2020. By reducing emissions, this directly impacts on climate protection.
DE	Indonesia	REDD	Forestry program	starting 2012	KfW	23.0	Grant	The programme aims at supporting the development and implementation of strategies for biodiversity and watershed management strategies in the context of the national REDD+ strategy.
DE	Global	REDD+ / All	Advisory Project "International Forest Policy" IWP (German acronym for "Internationale Waldpolitik")		GIZ	3.6	Grant	IWP provides advisory services for the further development and application of international forestry policies from a development policy perspective, and supports the integration of forestry-related issues such as sustainable forest management, climate change mitigation and adaptation, REDD+ and capacity development into German development cooperation. It closely cooperates with projects and programmes in partner countries on the formulation of national policies, forest governance, climate protection, financing issues as well as forestry standards and sustainable use.
DE	Namibia	Adaptation / Capacity Building	Vocational Training for Agriculture (incl. Land Management and Land Reform)	2012 - 2016	GIZ	2.5	Grant	This project supports the Namibian Training Authority in the implementation of a nationally recognized vocational training program in the Namibian agriculture and land management sector over a period of five years, with a focus on enhancing sustainable income generation, food security and supporting sustainable land management, also in the face of increased climate variability and the need to adapt current practices to the changing conditions.
DE	Africa	Mitigation	African Carbon Asset Development (ACAD)	03/20012-12/2013	UNEP	1.0	Grant	The proposed facility will scale up carbon investment in Africa by providing small grants to overcome the initial transaction cost barrier of project completion. UNEP support will be directed towards first-of-a-kind transactions that are specifically adapted to the Sub-Saharan African context and have high potential for replication.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
DE	Asia (Thailand and other ASEAN)	Mitigation	SCP4LCE - Sustainable Consumption and Production for Low Carbon Economy	05/2012-06/2015	GIZ	2.0	Grant	The project promotes low-carbon patterns of consumption and production in Thailand and other ASEAN states by developing criteria for climate-smart products and services. These criteria are to be applied to particularly climate-relevant product groups within the states' existing ecolabelling systems, and are to be used as a basis for public procurement. Thailand's government has set up a corresponding programme, among other related activities. Criteria development is the bottleneck in this process. The project's goal is to substantially improve climate performance on both the production and consumption side. Experience gained with the German 'Blue Angel' ecolabel scheme will be utilised to ensure optimised labelling, awareness-raising and marketing strategies for climate-smart products. Existing label schemes such as the Thai Green Label will be expanded and harmonised.
DE	Brazil, Indonesia and 3 others	REDD+	Catalyzing forest and landscape restoration in key countries	01/2013-12/2017	World Resources Institute	3.0	Grant	Store carbon and conserve biodiversity by catalyzing forest and landscape restoration globally and in Indonesia, DRC, and Brazil. A Global Restoration Council and Prize will inspire, national opportunity and policy assessments will guide, and national coalitions of champions will mobilize action.
DE	Burkina Faso, Ghana, Kenya	Adaptation	A Global Early Warning System for Climate Change - A Case Study for Designing the System	12/2012-12/2014	UNEP	0.6	Grant	Current climate-related early warning systems are still far from providing the coverage and scope that is needed and technically feasible. This project presents the first stage in developing "CLIM-WARN", a global early warning system for climate change. CLIM-WARN will provide warnings for the most vulnerable parts of the world, within a time scope that allows reacting to the warnings (time horizon of six months to 10 years). In order to gather fundamental information needed for designing the system, the goal of this project is to carry out a case study in West Africa. Users will be identified, prototype plans developed and the efficiency of data delivery improved so that the comprehensive CLIM-WARN system focussing on most vulnerable developing countries can be designed.
DE	Chile	Mitigation	Energy Efficiency and Cogeneration in Public Hospitals (Pilot Project)	12/2010-10/2013	GIZ	1.2	Grant	This pilot programme focuses on the development and implementation of measures to increase energy efficiency (EE) and cogeneration in public hospitals. The aim is to apply this pilot model to other hospitals, primarily in the target areas worst affected by the earthquake in 2010. The earthquake caused damage to 79 hospitals and 12 must now be completely rebuilt. In Chile, energy performance contracting through energy service companies (the ESCO model) and the use of micro and small-scale cogeneration systems is not yet widespread. The project offers the potential to establish a growth market and the business models and technology developed could be applied in schools, educational institutions, hotels, shopping centres and public buildings.
DE	China	REDD	Low Carbon Land Use	03/2012-02/2016	GIZ	3.5	Grant	The potential for reducing greenhouse gas (GHG) emissions caused by land use in China is high, and of global relevance. The project assists the government's efforts to achieve its GHG reduction goal by developing and piloting sectoral approaches in agriculture and forestry, aquaculture and mining landscape restoration. Measuring, reporting and verification (MRV) methodologies for GHG reduction are developed. Strategies are formulated for the rapid dissemination of technical options by means of integrated regulatory and economic incentive systems. This is the first time that a clear focus is placed on the mitigation potential of land use in China. BMU will feed the outcomes into the international climate policy process.
DE	China	Mitigation	Climate Protection and Electric Vehicles in China - Field Tests, Case Studies and Policy Advice on Integrating Renewables into the Growth Market for Electric Vehicles	01/2013-12/2016	GIZ	2.0	Grant	This project addresses the interfaces between transport, the energy industry, climate protection, innovation and the market. It is designed to support relevant decision-makers in developing strategies for rolling out electric transport, which will reduce levels of greenhouse gases. That includes renewable energy grid integration, using intelligent grid and charging technologies (smart grids), for example. To this end, model and pilot projects will be supported, analyses and studies conducted, and dialogue initiated.
DE	Colombia	REDD+	Piloting nested REDD+ accounting at national, provincial and project scales for results based payments in Colombia	01/2013-12/2016	Winrock International Institute for Agricultural Development	1.5	Grant	Establishing of a REDD+ system and register for Colombia that will incorporate project and provincial reference levels (RLs), monitoring and reporting into national systems. This will support accurate accounting for emission reductions, facilitate results-based funding, and increase community and private sector participation in REDD+ in Colombia, and develop important lessons for other REDD+ countries and UNFCCC negotiations.
DE	Democratic Republic of the Congo	REDD	Development of a carbon storage map and carbon payment model regions for the DR Congo forest belt	07/2012-06/2016	KfW	6.1	Grant	The purpose of the project is to comprehensively map the carbon content of the forest belt in the Democratic Republic of Congo with previously unattained accuracy and validity. The results will be useful for the development of payment systems for environmental services and REDD+. Capacity-building will provide the Democratic Republic of Congo with the necessary specialists in this matter. The valorisation and conservation of forests through REDD+ measures will be developed on a model basis in two representative regions (lowland rainforest around Lac Tumba, mountain rainforest in the northern part of the Virungas) on the basis of an especially detailed data set created with the new LIDAR system. The goal is to reduce deforestation and degradation in the project regions using all existing and future methods and measures and to finance this on a sustainable basis through payments for environmental services.
DE	Ecuador	Mitigation	Climate Protection with Renewable Energies on the Galapagos Islands in consideration of Electricity Production with Jatropa Oil	05/2012-12/2013	GIZ	2.1	Grant	The government of Ecuador and other relevant actors for the production of electrical energy are being advised in the planning and implementation of an adequate mix of different renewable energies on the islands of Floreana and Isabela (as pilot schemes for the other two islands of Santa Cruz and San Cristóbal). The focus lies on the coordination in so called hybrid systems of Jatropa oil operated generators and other renewable energies like wind power and photovoltaics, as well as the sustainable production of Jatropa oil on the Ecuadorian mainland. Furthermore contact between German knowledge holders in the field of renewable energies and the Ecuadorian actors shall be established and cultivated. Finally experiences with so called smart grids shall be collected that are also interesting and deployable in the renewable energy matrix of other countries.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
DE	Ghana	Adaptation	Innovative Insurance Products for+B28 Climate Change Adaptation	05/2012-06/2013	GIZ	1.6	Grant	The project is intended to support efforts in Ghana to overcome the socio-economic costs and risks arising from climate change. The project seeks to develop climate-relevant agricultural insurance products for selected value-adding chains, and to bring these solutions to market. Efforts to these ends are pursued in collaboration with regulating and supervisory institutions, insurance companies and their trade associations as well as end customers. This project helps to improve the income security and food security, credit supply and employment opportunities of Ghana's rural population.
DE	Ghana, Mexico, Peru	REDD+	REDD-Plus Benefits: Facilitating countries and communities in designing pro-poor REDD-Plus benefit-sharing schemes	12/2012-10/2015	IUCN - International Union for Conservation of Nature	4.8	Grant	Pro-poor REDD benefit-sharing schemes incentivize reduction of forest emissions by safeguarding livelihoods of forest communities. This project fills a gap by building capacity and modeling benefit-sharing schemes for REDD activities. Aligned with the workplan of the REDD-Plus Partnership, it scales up actions needed for national REDD strategies under the Cancun Agreement.
DE	Global	Mitigation	Bringing a range of supported mitigation activities in selected countries to the next level	02/2012-01/2014	ECN	1.9	Grant	The goals of this project are twofold. First, we will build on the extensive activities of ECN and Ecofys on supported mitigation activities such as Nationally Appropriate Mitigation Actions (NAMAs), low carbon development (LCD) strategies and technology innovation centers to bring a portfolio of projects from the proposal stage to the next stage ready for financing concrete activities. This can include: developing proposals for supported actions and/or identifying financing for existing proposal and/or starting the implementation. The second objective is to complete an analytical overview of the lessons that can be drawn from these instruments and how they relate to each other. This overview will cover all the major actors in the field to pinpoint the most effective practices for identifying and supporting mitigation actions in developing countries. By being the largest and most comprehensive study in the field, this work will greatly support the climate policy community.
DE	Global	Mitigation	Supporting International Mitigation and MRV activities	01/2012-03/2014	GIZ	2.0	Grant	The project supports capacity building for members of the International Partnership for Mitigation and MRV. BMU partner countries that are part of the partnership receive refined information on mitigation strategies (Low Carbon Development Strategies - LCDS), Nationally Appropriate Mitigation Actions (NAMA) and concepts for the measurement, reporting and verification (measurable, reportable and verifiable – MRV) with a special focus on implementing instruments and experiences as well as on methods and knowledge-based products on LCDS, NAMAs and MRV. The project activities include an inventory of all mitigation projects in the field of LCDS/NAMA/MRV, knowledge management, the analysis and documentation of successful methods and instruments as well as their distribution via newsletter and website and the support and organisation of measures for capacity building.
DE	Global	Mitigation	Generating Expertise on Climate and Resource Protection in Young Management Professionals (Postgraduates) from Emerging Countries	06/2012-12/2014	Alexander von Humboldt Stiftung	1.3	Grant	The International Climate Protection Scholarship programme is aimed at young managers from the fields of science and economics, and from public and private organisations. It is intended to promote exchanges of knowledge, methodologies and technologies as well as networking within the field of climate protection and resource conservation. Besides carrying out a research project of their own choosing in the field of climate protection and resource conservation at a host institution in Germany, the participants can also benefit from training courses and internships with companies, public administrations and other institutions.
DE	Global	REDD+	Long-term financing for REDDplus - Analysis and development of investment options for private actors in REDDplus projects	08/2012-01/2013	Germanwatch e.V.	0.1	Grant	Long-term financing for REDDplus - Analysis and development of investment options for private actors in REDDplus projects
DE	Global (South Africa and Indonesia)	Mitigation	MAs – integrating sub-national actors into national mitigation strategies through vertically integrated NAMAs	05/2012-04/2015	GIZ	1.9	Grant	It can be said of many future NAMAs that they will only be successful to the extent that the sub-national players who also carry responsibility – such as provinces and cities – are effectively involved in planning and implementation. The project's goal is to develop an approach for vertically integrated NAMAs (v-NAMAs). The project will trial this approach in cooperation with national decision-makers in selected emerging countries (South Africa and Indonesia) and sectors (pilot v-NAMAs), and will use the experience gained to operationalise the approach to the point at which it can be made an element of international climate financing. The outcome will be an orientation framework containing proposals for the design of v-NAMAs that meet MRV and financing eligibility criteria.
DE	India	Mitigation	Permanent Office – Indo-German Energy Forum (Phase 2 – Climate Change Mitigation and Decentralised Power Generation – Indo-German Energy Forum)	04/2012-05/2015	GIZ	3.2	Grant	Permanent Office – Indo-German Energy Forum (Phase 2 – Climate Change Mitigation and Decentralised Power Generation – Indo-German Energy Forum) The Indo-German Energy Forum (DIEF) is the only institutionalised bilateral platform for energy dialogue in India. Through the permanent office already established in New Delhi, the project aims to give substance to the DIEF's services and activities, e.g. by supporting cooperation projects, communication and reporting mechanisms.
DE	India	Mitigation	Climate-Neutral Energy Supply for Rural Areas	10/2012-12/2013	GIZ	2.1	Grant	The purpose of the project is to develop tailor-made and sustainable solutions for rural energy supply that make use of locally available biomass (agricultural waste, inedible plant oils) as well as other renewable energy sources. The biomass is converted into electric power by means of biodiesel generator sets and gas engines. Two pilot projects covering 30 villages will be used to develop together with the National Bank for Agriculture and Rural Development (NABARD) business models for energy services that are made available by the village community.
DE	India	Mitigation	Commercialization of Solar Energy in Urban and Industrial Areas in India (ComSolar)	10/2012-12/2013	GIZ	3.0	Grant	The objective of the project is to design suitable business models and to test them through pilot initiatives and to prepare a strategy for commercialization of solar energy in urban and industrial areas, which supports the implementation of the Solar Mission of the National Action Plan for Climate Change (NAPCC). Pilots and capacity building activities will be developed and implemented in the following fields: buildings, industry, solar thermal power plants. Moreover, recommendations for a regulatory framework for grid connection and feed in tariffs will be elaborated.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
DE	Indonesia	Mitigation	Promotion of Least Cost Renewables in Indonesia (LCORE-INDO)	03/2012-02/2015	GIZ	3.0	Grant	The project assists Indonesia in planning and implementing renewable energy programmes that have the best cost-benefit ratio in relation to electricity generation and CO2 reduction. In the process, it helps the country attain its climate-policy and economic goals. At policy-making level, capacity-building will be provided for the renewable energy department. In collaboration with the private sector, cost-effective ways to substitute fossil fuels will be developed and tested. This will lead to the proposal of practicable policies, guidelines and grant programmes by which to tap the economically viable renewable energy potential. Efficient technologies will be introduced in partnership with German companies. Key elements of the project include: substituting expensive diesel-generated electricity; utilising agro-industrial biomass wastes as energy feedstock; and providing advice on improved conditions for feeding renewables into the grid.
DE	Indonesien, Mexiko, Philippinen, Tunesien	Adaptation	Inventory of methods for climate adaptation	04/2011-05/2013	GIZ	0.9	Grant	The purpose of this supranational project in Brazil, Indonesia, Mexico, Peru, the Philippines, Tunisia and Vietnam is to support decision-makers with a proven inventory of methods for the identification, analysis and prioritisation of adaptation needs and measures. The goal is to support the management of climate-related data and to promote the creation of a network for South-South exchange between the actors in the area of adaptation. The project will thus empower actors to take rational and strategic decisions on climate change adaptation, thereby increasing the adaptive capacity of the partner countries and mitigating the consequential costs of climate change in the long term.
DE	Jordan	Mitigation	Industrial Solar Cooling in Jordan	03/2012-02/2015	GIZ	3.3	Grant	Demand for air-conditioning in commercial buildings is rising rapidly in Jordan. The project will initiate a switch from the present air-conditioning technologies, which have poor environmental performance, to alternatives based on solar cooling which are largely CO2-free. To this end, Jordanian/German technology partnerships between firms and institutes will be sought, whereby Germany will act as the provider of technologies for refrigeration equipment, solar installations and system solutions. The transfer of (combined cold and solar) knowledge and technology will boost local production. The specific advantages of Jordan (high average level of insolation, own production capacity) will be harnessed for sustainable air-conditioning in buildings, while at the same time the framework conditions (incentives, standards, guidance) for dissemination of the applications will be created. The demonstration project will serve as an example of best practice in order to set new energy efficiency standards.
DE	Panama	REDD+	Protection of carbon pool and sinks within wetlands and protected areas of Panama	03/2013-03/2016	United Nations Development Program (UNDP)	2.5	Grant	Wetlands perform a great number of socio-economic and ecological functions. Nonetheless, only few wetlands are under effective protection in Panama. UNDP envisages an array of measures designed to manage protected mangroves and other wetlands over an area of 13,800 ha. The measures are to be monitored and assessed with regard to their carbon dynamics. The project shall give greater priority to wetlands within Panama's national protected area system and will improve the capacity of the national environmental authority to manage protected areas.
DE	Paraguay	REDD+	Protecting Forest for the Benefit of Climate, People and Nature in Paraguay - a Multi-level Approach	09/2012-08/2015	WWF - Germany	2.1	Grant	The Atlantic Forest, Pantanal and Chaco Ecoregions are threatened by increasing land conversion, especially the conversion of forest due to growing soy production and livestock breeding. Working with Paraguayan government and local communities at the national, sub national and site level, this project will provide the necessary capacities to protect and enhance forest and high carbon stock areas and at the same time support ecosystems and social benefits in the key biodiversity areas. The focus is set on development and testing of bottom-up tailor-made REDD+ projects for local communities and indigenous people. All activities will be carried out in close cooperation with governmental institutions and civil society organizations and will be integrated into the development of the national REDD+ strategies and programmes.
DE	Philippines	Adaptation	Support to the Philippine Climate Change Commission on the Implementation	11/2011-09/2015	GIZ	3.0	Grant	The government of the Philippines resolved a climate legislative in 2009, which provides adaptation and mitigation. However, institutional capacities for the implementation of a consistent climate policy are weak and activities are not or insufficiently integrated into the planning process. The project therefore strengthens the national climate commission in development, implementation and coordination of the national climate strategy, and the national climate action plan and its integration in the planning system, e.g. applying an innovative monitoring system of effects of adaptation, local climate-compatible planning, support of the law of renewable energies, and with small-scale projects for better adaptation, mitigation and creation of carbon sinks with high possibility of duplication and multiplier effects. The objective of the project is a better adaptation to climate change and emission reduction.
DE	Philippines, Turkey	Mitigation	Building momentum for low carbon development in the Philippines and Turkey	04/2012-09/2013	WWF	0.5	Grant	The project will establish country specific Low Carbon Plans (LCP). These LCPs will be the basis to create momentum for the uptake of mitigation and adaptation targets and measures in government policies and programmes as well as by civil society, and the business sector. The LCPs will start from emission reduction targets set for 2050, and will analyse all relevant sectors, taking into account carbon emissions, efficiency potential, policy options, drivers of and barriers to change. The LCPs will deliver recommendations on the policies and actions necessary to achieve these ambitious emission reductions. National research institutes in the respective countries plus Germany will work together closely. The project will thus further knowledge exchange and transfer.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
DE	Philippinen	REDD+	National REDD+ system, Philippines	11/2012-04/2017	GIZ	5.3	Grant	The Philippines has adopted an innovative REDD+ strategy, but there are insufficient structures in place for implementing and monitoring REDD+ measures. The project aims at creating a national framework for reducing greenhouse gases from deforestation and forest degradation. The target groups are those responsible for REDD+ in the environment ministry, national and local government authorities as well as the populations who are dependent on forests, primarily indigenous groups. Measures include the establishment of a national implementation and coordination system (REDD+ register, governance structures); the development of REDD+ financial and participation mechanisms; extensive forest-related land-use planning in selected regions as a prerequisite for zoning and establishing land-use rights; the integration of ecological and social standards in implementing REDD+ measures; and awareness-raising and information/knowledge management. The project contributes to reducing greenhouse gas emissions and preserving biodiversity while complying with social and ecological standards.
DE	Ruanda	REDD+	Preliminary Study: Piloting multiple-benefit investment "Packages" through forest/landscape restoration and REDD+ in Rwanda for scaling up in Central- an West Africa	01/2013-09/2013	International Union for Conservation of Nature (IUCN)	0.2	Grant	Preliminary Study: Paving the way for future financial participation in the REDD+ mechanism is a vital step in the global development process. This project will bring local public and private sector players together to construct, test and promote creative REDD+ investment "packages" through implementation of forest and landscape restoration, based on the integration of relevant REDD+ standards and the creation of favourable investment conditions. These packages will be designed to bring multiple social, economic and ecological benefits including but also beyond carbon, and be attractive to local and international private sector investors, with benefits for communities and national ownership. This approach will be piloted in two landscapes in each country to provide a model for scaling up to other landscapes, countries, the regional level (COMIFAC, FROMAC) and the international level.
DE	South Africa	Mitigation	Development of Innovative Logistics and Supply Structures in the Refrigerated Transport Sector in South Africa	06/2012-04/2016	GIZ	3.0	Grant	The transportation of chilled goods causes both direct and indirect greenhouse gas emissions, for example through the use of refrigerants (which are still fluorinated) and the energy required to cool the refrigerated areas in distribution centres and delivery vehicles. The project aims to encourage environmentally-friendly development in the sector. This involves undertaking an analysis of the sector and a technical needs assessment as well as installing and demonstrating suitable technology on a pilot basis. Measures to provide qualifications are also being implemented and a monitoring system is in place to measure, report and verify emissions reductions.
DE	Thailand	Mitigation	National energy efficiency plan as a core element for an activity- and evidence-based mitigation strategy	02/2012-04/2015	GIZ	3.0	Grant	The project will support the formulation and implementation of a national energy efficiency plan for Thailand, with the aim of tapping efficient and cost-effective potential. Approaches such as using tariff systems as an incentive for energy efficiency measures, boosting energy management services and optimising standards and labelling schemes will be key elements of a 6-point programme of immediate action. Furthermore, NAMAs will be developed and tested as an implementation mechanism. The goal is to reduce the energy intensity of the industrial and commercial sectors by 25% by the year 2030 (from the 2005 baseline) and to achieve substantial energy savings in the residential and transport sectors. MRV systems are accepted politically and are implemented at national level to furnish proof of compliance and to serve as a user-friendly governance instrument.
DE	Thailand	Mitigation	Programme for the Development and Implementation of Climate Policy	02/2012-09/2013	GIZ	1.9	Grant	The purpose of the project is to support Thailand in the elaboration and implementation of the strategy on climate change and reduction of greenhouse gas emissions. International experts will advise the various political bodies, and the necessary implementation capacities at the relevant institutions will be put in place. In addition, the project will assist Thailand with regard to international cooperation in the area of climate policy and will promote awareness-raising and participation of society in questions relating to climate change.
DE	Thailand, Vietnam	Adaptation	Promoting Ecosystem-based Adaptation through Mangrove Restoration and Sustainable Use in Thailand and Vietnam	09/2012-02/2016	International Union for Conservation of Nature (IUCN)	1.6	Grant	Promote ecosystem based-adaptation (EbA) and mitigation by providing economic incentives for mangrove restoration and sustainable use by piloting projects and integrating results into provincial and national policies. EbA pilot projects in Ca Mau Province, Vietnam and Surat Thani Province, Thailand will test innovative financing that links climate change adaptation and mitigation, and sustainable aquaculture in mangrove ecosystems. Results will be fed into national and provincial laws, regional learning and global REDD dialogue. This project, through research, policy advice and application intends to identify and test possible mechanisms at the international, national and field levels which will help promote high biodiversity REDD+.
DE	Vietnam, Laos	REDD+	Exploring mechanisms to promote high biodiversity REDD: piloting in Viet Nam	12/2012-11/2016	SNV Vietnam	1.5	Grant	The project works closely with the Directorate of Forestry and the Ministry of Environment and Natural Resources to introduce biodiversity standards and a monitoring framework as part of the national REDD+ system in Viet Nam. At the field level, working closely with the Institute of Tropical Biology, the project will test biodiversity indicators and establish a model community-based monitoring system, which could be scaled up across the country. These interventions will provide valuable insights and lessons on introducing biodiversity standards and monitoring frameworks in the national context. Such lessons can be replicated throughout the country and region and will be fed into ongoing international climate negotiations at the United Nations Framework Convention on Climate Change (UNFCCC).
DE	Afghanistan	Adaptation	Diversification of Livelihoods in Baghlan	2010-2013	GIZ*	6.0	Grant	The project is concerned with the diversification of rural livelihoods, agriculture and irrigation methods.
DE	Africa	Adaptation	Strengthening IGAD's Capacity to Increase Drought Resilience	Supplementary funds for ongoing project	GIZ	0.5	Grant	The project aims at strengthening capacity of the Intergovernmental Authority on Development (IGAD) to increase drought resilience in the Horn of Africa.
DE	Asia Pacific	Adaptation	Coping with Climate Change in the Pacific Region	Supplementary funds for ongoing project (01/2009-12/2015)	GIZ	1.3	Grant	The project contributes to manage the impact of climate change in the Pacific.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
DE	Brasilia	REDD+	Promotion of Protected Areas and Sustainable Management	Supplementary funds for ongoing project 01/07 to 12/14	GIZ	1.2	Grant	The project aims at improving efficiency of management of protected areas and sustainable use of natural forests in the Amazonas Region in Brasil.
DE	Burkina Faso	Adaptation	Promotion of Sustainable Agriculture	starting 2013	KfW*	2.5	Grant	The project provides assistance to improve the infrastructure for agricultural production particularly in the southwest and the east of the country. The includes the construction of dams and flood plains.
DE	Caribbean, Central America	REDD+	Reducing Emissions from Deforestation and Degradation in Central America and the Dominican Republic (REDD-CCAD)	Supplementary funds for ongoing project 10/09 bis 03/13	GIZ	2.7	Grant	This project's goal is to enable Member countries of the Central American Commission for the Environment (CCAD) to implement REDD+ activities.
DE	Columbia	REDD+	Development and implementation of the national REDD strategy with the involvement of biodiversity conservation in Colombia	foreseen 04/2013 - 03/2016	GIZ	3.0	Grant	The project provides assistance to the Colombian Environment Ministry in the coordinated and participatory development and implementation of its national REDD+ strategy by assisting the coordination of the relevant sectoral ministries and other institutions related to deforestation and fostering the implementation capacities on the regional and local scale.
DE	Columbia	REDD+	Promotion of sustainable and biodiverse forest production in the coffee area of Colombia	1/2012-12/2015	KfW	3.0	Grant	The project aims at fostering forestry in a sustainable manner as income supplement for coffee growers. Specifically, this project component supports reforestation with a focus on biodiversity.
DE	COMIFAC	REDD+	Regional support for the Central Africa Forests Commission (COMIFAC)	07/2011-06/2014	GIZ	1.6	Grant	In line with the Convergence Plan, the design and implementation of national forest and environment programmes and the representation of Member States' interests at international level have improved. The additional grant in 2012 has the focus on the China-Africa Dialogue. This new working area aims to integrate Chinese Actors into the dialogue on sustainable forest management (SFM) in Africa. Trend at the moment is, that illegal logging is rather increasing. SFM Does contribute to - conservation and enhancement of carbon stock, - improved resilience of ecosystems to climate change (thus contribution to adaptation to climate change)
DE	Cote d'Ivoire	REDD+/Adaptation	Promotion of agricultural value Chains and Development of the economic Region around Tai Park	Supplementary funds for ongoing project; new phase starting 2013	GIZ	9.0	Grant	The project aims at developing adapted solutions for agricultural value chains for small farmers around the protected area of the Tai National Park, UNESCO world nature heritage. By reducing pressures on forests resources the project will contribute to the protection of forest carbon stocks.
DE	Cote d'Ivoire	REDD+	Protection of Biodiversity in the Tai-Park	starting 2014	KfW	5.0	Grant	The project aims at exploring and developing biodiversity protection schemes around the Tai National Park, if security situation and legal framework make a common work possible, to connect to the Sapo- Park in Liberia. The more concrete project design is still under discussion.
DE	Democratic Republic of the Congo	REDD+/Adaptation	Programme Conservation of Biodiversity and sustainable Forst Management	Supplementary funds for ongoing project 10/2012 - 09/2013	GIZ	2.0	Grant	The programme supports the national and decentralized governmental institutions for natural resources management in cooperation with non-governmental actors to develop and implement an adequate political and operational framework for the forest sector and the management of protected areas; additional funds for human capacity development, logistics and equipment will be provided.
DE	Democratic Republic of the Congo	REDD+/Adaptation	Programme Conservation of Biodiversity and sustainable Forst Management	10/2013 - 06/2016	GIZ	22.3	Grant	The programme supports the national and decentralized governmental institutions for natural resources management in cooperation with non-governmental actors to develop and implement an adequate political and operational framework for the forest sector and the management of protected areas (continuation of a previous project, see above)
DE	Democratic Republic of the Congo	REDD+	Biodiversity and Forestry Program	Phase II started in 2012	KfW	5.0	Grant	The purpose of the program is a sustainable conservation of the rich biodiversity of the Democratic Republic of Congo as well as a sustainable forestry development.
DE	Democratic Republic of the Congo	REDD+	Conservation Trust Fund	Preparation in 2013	KfW	7.5	Grant	The purpose of the creation of this trust fund is sustainable financing of protected areas.
DE	Guatemala	Adaptation	Environmental Protection and Adaptation to Climate Change	01/2013-11/2015	GIZ	4.0	Grant	The project provides assistance to national ministries, regional governments, private sector and civil society in their efforts to improve environmental management and adaptation to climate change, including watershed management and chains of agricultural production.
DE	Indonesia	REDD+	Forests and Climate Change Programme	Supplementary funds for ongoing project (01/2009-12/2012)	GIZ	0.5	Grant	The programme aims at supporting the development and implementation of strategies for biodiversity and watershed management strategies in the context of the national REDD+-strategy. With the support of the programme relevant public and private actors implement the improved institutional and regulatory framework, as well as methods and services for sustainable forest management, nature conservation and the reduction of GHG emissions from deforestation and forest degradation.
DE	Indonesia	REDD+	Forests and Climate Change Programme	Supplementary funds for ongoing project (2013-2015)	GIZ	0.6	Grant	With the support of the programme relevant public and private actors implement the improved institutional and regulatory framework, as well as methods and services for sustainable forest management, nature conservation and the reduction of GHG emissions from deforestation and forest degradation.
DE	Indonesia	REDD+	Policy Advice for Environment and Climate Change (PAKLIM)	2012- 2015	GIZ	0.4	Grant	This project provides support for policy advice for environment and climate change.
DE	Indonesia	REDD+	Forest Programm Sulawesi	2014-2017	KfW	6.5	Grant	This project has still to be designed but will support the implementation of the Indonesian climate strategy by implementing biodiversity and REDD+ related activities in critical watershed areas.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
DE	Laos	REDD+	Integrated Conservation of Biodiversity in National Protected Areas and Corridors	starting 2013	KfW	9.5	Grant	The government of Laos will be supported in the field of sustainable management of natural resources, with a focus on biodiversity, protected areas and corridors.
DE	Laos	REDD+	Integrated Nature Conservation and Sustainable Resource Management in the Hin Nam No Region	2013	GIZ	3.6	Grant	The government of Laos will be supported to develop an efficient park protection in the National Protected Area Hin Nam No. Measures will also focus on supporting sustainable forest management, nature conservation and the reduction of GHG emissions from deforestation and forest degradation. Furthermore population within and outside the National Protected Area Hin Nam No will be supported in developing alternative livelihoods.
DE	Laos	REDD+	Climate Protection through Avoided Deforestation (CliPAD)	Supplementary funds for ongoing project (until 09/2014)	GIZ	0.4	Grant	The project provides national policy advisory services, capacity development and institutional support in the area of forests and climate change mitigation / REDD+.
DE	Laos	REDD+	Climate Protection through Avoided Deforestation (CliPAD) Phase II	starting 2014	GIZ	3.6	Grant	The project provides national policy advisory services, capacity development and institutional support in the area of forests and climate change mitigation / REDD+.
DE	Laos	REDD+	Supporting the Laos-EU Forest Law Enforcement, Governance and Trade (FLEGT) Process	starting 2013	GIZ	5.8	Grant	The project supports the government of Laos in fulfilling EU requirements for a transparent FLEGT process with a view to prevent illegal logging and forest (carbon) loss.
DE	Liberia	REDD+	Protection of Biodiversity in the Tai-Sapo-forest corridor (Sapo-Park-Liberia)	starting 2014	KfW	6.0	Grant	The objective of the project is to develop agricultural value chains for small farmers in the Tai-Sapo forest corridor, contributing to the generation of income. The project also aims at promoting bio-diversity in protected areas.
DE	Marocco	Adaptation	Adaptation to Climate Change/ Implementation of the Nagoya Protocol	01/2013-06/2016	GIZ	6.0	Grant	The project supports the adaptation to climate change by implementing the Nagoya Protocol.
DE	Marocco	Adaptation	Integrated Water Resources Management Tensift	01/2014-12/2018	KfW	4.0	Grant	Integrated Water Resources Management Tensift
DE	Mauretania	Adaptation	Natural Resources Management Program	01/2014-12/2016	GIZ	2.0	Grant	The programme aims at improving local and national capacities for the sustainable management of natural resources, contributing to the conservation of Mauritania's ecosystem. It will provide advice on and support the use of (1) natural resources to help alleviate poverty; and (2) the development of approaches for adaptation and mitigation strategie
DE	Niger	Adaptation	Rural Development and productive agriculture	supplementary funds for ongoing project; 01/2012 - 12/2017	GIZ	2.3	Grant	The project aims at developing small farmers irrigation and agricultural production in Tillabéri, Agadez, Tahoua. The programme uses a multi level framework.
DE	Peru	REDD+	Forestry Investment Programme	starting 2014	KfW	10.0	Grant	The programme promotes sustainable forest management in the Amazon region and thus contributes to the protection of tropical forests as a biodiversity hotspot and carbon sink.
DE	Peru	REDD+/ Adaptation	Program for Protection and Sustainable Management of Natural Ressource Management	2014-2016	GIZ	12.8	Grant	The projects strengthens the environmental policy and Ministry for Environment and supports national ressource management, conservation of biodiversity and agrobiodiversity and sustainable forest management.
DE	Senegal	Adaptation	Decentralisation with special emphasis on Peace Development in the Casamance Region	Supplementary funds for ongoing project; 2012 - 2015	KfW	3.0	Grant	The project intends to strengthen the framework for sustainable decentralisation and efficient local administration. Construction of infrastructure is an important element. In this context, basins for desalination are built, which are means of climate adaption.
DE	Tanzania	Adaptation	Sustainable development Serengeti ecosystem	03/2013 - 02/2016	KfW	10.3	Grant	The programme supports community-based conservation and benefit sharing, the managment of the Serengeti National Park, improved social and economic infrastructure in districts at the northern borders of the SNP
DE	Togo	Adaptation	Programme for Rural Development and Agriculture	2013-2014	GIZ	1.6	Grant	The programme promotes sustainable agricultural development.
DE	Togo	Adaptation	Programme for Rural Development and Agriculture	2013-2014	KfW	2.5	Grant	The programme promotes sustainable agricultural development.
DE	Tunesia	Adaptation	Development of rural regions in Tunesia	10/2013-12/2018	KfW	8.0	Grant	Development of rural regions in Tunesia.
DE	Vietnam	Adaptation	Integrated Coastal and Mangrove Protection in the Mekong Delta for Adaptation to Climate Change	Supplementary funds for ongoing project; 08/11 - 07/14	GIZ	0.8	Grant	The project is aimed at improving coastal protection, preserving and rebuilding mangrove forests, and securing a basic living income for the rural population in coastal areas in the Mekong Delta.
DE	Global	Mitigation	Clean Technology Fund (CTF)	2012	World Bank	125.0	Loan	The CTF is part of the Climate Investment Funds (CIFs) and finances the scaled-up demonstration, deployment and transfer of low carbon technologies.
DE	Global	REDD+	Forest Carbon Partnership Facility (FCPF)	2012	World Bank	14.0	Grant	FCPF assists several developing countries in their efforts to develop and pilot national REDD+ approaches.
DE	Global	REDD+	Advisory Project "International Forest Policy" IWP	2012	GIZ	0.7	Grant	The project provides advisory services for the further development and application of international forestry policies from a development policy perspective, and supports the integration of forestry-related issues such as sustainable forest management, climate change mitigation and adaptation, REDD+ and capacity development into German development cooperation.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
DE	Global	Adaptation	Pilot Programme for Climate Resilience (PPCR)	2012	World Bank	17.0	Grant	PPCR is a programme for climate change adaptation under the Strategic Climate Fund (SCF). It funds technical assistance and investments to support countries' efforts to integrate climate risk and resilience into core development planning and implementation.
DE	Global	Adaptation	Special Climate Change Fund	2012	GEF*	8.0	Grant	SCCF is a specific fund to support activities and programmes related to the adaptation to climate change, technology transfer, energy, transport, industry and waste management in developing countries.
DE	Global	Adaptation	The Least Developed Countries Fund (LDCF)	2012	GEF	15.0	Grant	The LDCF was established under the UNFCCC* and aims to address the special needs of Least Developed Countries (LDCs), which are especially vulnerable to the adverse impacts of climate change. This includes preparing and implementing national adaptation programmes of action (NAPAs).
EC	Benin	Adaptation	Adaptation aux changements climatiques (GCCA) – Lutter contre les inondations par la préservation et le développement de forêts galeries et doter le Bénin d'une cartographie de base fiable	2011-2016		8.00	Grant	L'objectif global du projet est de lutter contre les effets du changement climatique et accompagner la Stratégie de Croissance pour la Réduction de la Pauvreté. Les objectifs spécifiques du projet sont les suivants : (1) Réduire les effets des inondations en promouvant la conservation et l'utilisation durable des Forêts galeries du fleuve Ouémé sous forme d'un réseau de zones de conservation communautaires incorporées dans le système national des aires protégées. (2) Doter le Bénin d'infrastructures géographiques de base pour aider à la gestion forestière dans le pays, informer la Stratégie de Croissance pour la Réduction de la Pauvreté, le Programme National de Gestion de l'Environnement, et le sous Programme d'Action National d'Adaptation aux changements climatiques.
EC	Africa	Mitigation/Technology	Africa-EU Renewable Energy Cooperation Programme	2011-2014	GTZ/AFD	5.00	Grants	The overall objective of the RECP is to stimulate sustainable economic and social development in Africa through an increased use of Africa's renewable energy sources. The purpose of the EU support to the start-up phase is that a basis is established for the comprehensive 10 year Africa-EU Renewable Energy Cooperation Programme (including inputs to planning/preparation and mobilising stronger EU MS involvement), and that the first activities of the programme are successfully implemented including on policy and market development and on mobilisation of finance.
EC	Nepal	Adaptation	Building climate resilience in Nepal	2011-2013	DfID	7.00	Grants	Total EC Contribution: €8M (of which €7M counting as fast start). Other MS will also contribute. Build capacity of Government of Nepal to develop, cost, budget and implement evidence-based policy and measures aimed at mainstreaming climate change in key development sectors (agriculture, forestry, water and energy), including through public private partnerships. R1: Capacity of relevant institutions at national and local levels to support the design, implementation and monitoring of climate change mainstreaming interventions strengthened. R2: Local and sub-regional level mechanisms to test and promote scalable initiatives for climate adaptation and resilience put in place (based on the watershed approach).
EC	Ethiopia	Adaptation	Ethiopia Global Climate Change Alliance (GCCA-E): Building the national capacity and knowledge on climate change resilient adaptation actions	2011-2013	AFD/GTZ	8.00	Grants	Total EC Contribution: €13.7M (of which €8M counting as fast start). The overall objective is to contribute towards the construction of a carbon neutral and climate resilient economy. The specific objective is to increase the awareness and capacity of targeted Government institutions both at federal and regional levels and of the rural population at large to deal with climate change. R1: EPA has the institutional capacities to coordinate and mainstream climate change into policy, regulatory and strategic development planning. R2: A knowledge base is developed that allows stakeholders at all levels (national, regional and local) to build resilience to climate change impacts. R3: Climate change activities in the context of CNCR-E have successfully been field tested in the areas of the SLM programme of the MoARD.
EC	Pilot countries in Asia, Africa and Latin America (to be defined)	REDD+	EU REDD Facility	2011-2014	European Forestry Institute	3.00	Grants	Within the overall principle of enhancing forests' contribution to poverty reduction, sustainable economic development, and mitigation of the impacts of climate change by reducing deforestation and forest degradation in developing countries, the general objective of the action is to assist developing countries in preparing for REDD, in particular with regard to forest governance related issues. The specific objective of the action is to provide effective support to the emergence of the REDD mechanisms in developing countries and to help them build their capacity and improve forest governance for REDD by building on work done under the Forest Law Enforcement, Governance and Trade (FLEGT) programme and other on-going initiatives.
EC	Multi	Mitigation	EU-UNDP Climate Change Capacity Building (Phase II)	2011-2015		5.00	Grant	The overall objectives of this extension of the Programme continue to be to strengthen the capacity of developing countries to design GHG inventory management systems, develop MRV systems, identify opportunities for NAMAs, support the design of LEDS and promote the adoption of mitigation actions by selected sectors, with the participation of Industry. National priorities and circumstances and national economic plans are always taken into account. Capacity building is also an important building block of sectoral approaches for climate action. A second part of the Programme would provide support to an additional 8 countries. The Programme will be carried out over 4 years and include two components: a) Public sector capacity building on MRV and LEDS and b) Industry capacity building for mitigation actions. However, it is important to note that a second phase of the EU-UNDP Programme would focus on the Public Sector and not split countries on the basis of these two components. Rather, based on recommendations from countries included in Phase 1, countries will determine to what extent activities related to Industry will be addressed. At a minimum, and depending on the scope of the projects of these additional countries, the private sectors or representatives of selected industries will be included in the stakeholder processes. Selection of countries will continue to be based on capacity building needs and priorities for support. The Programme will build on the infrastructure, experience and lessons learned, expanding the initiative to other countries. An expanded indicative list of 25 countries is provided at the end of this Action Fiche, from which, 8 countries will be selected on the basis of discussions with the UNDP regional centres, EU Delegations in the host countries, UNDP country offices, and respective government focal points.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
EC	In consultation with Kenya, Uganda, Zambia, DRC, Egypt, Morocco, Peru, Colombia, Ecuador, Chile, Philippines	MRV, LEDS	EU-UNDP Climate Change Capacity Building Programme	2011-2014	UNDP	8.00	Grants	The overall objectives of the programme are to strengthen the capacity of developing countries a) to monitor, report and verify greenhouse gas emissions; b) to identify opportunities for Nationally Appropriate Mitigation Actions (NAMAs) in the context of national development; and to support the design of low-emission development strategies (LEDs) and c) to facilitate the uptake of mitigation actions by selected sectors, with the participation of the private sector, as appropriate, taking into account national priorities and circumstances and national economic plans.
EC	Multi	Adaptation/Mitigation	FAO: Climate Smart Agriculture: Capturing synergies between Mitigation, Adaptation and Food Security	2011-2014		3.30	Grant	The project has three main objectives: (1) Assist countries in building a country-specific evidence base for developing strategies and roadmaps. This includes identification of: (i) agricultural practices where there are potential synergies and trade-offs between food security and agricultural adaptation/mitigation, (ii) household-level and institutional constraints that need to be addressed in order to secure these synergies, and (iii) possible policy options to enable adoption of these practices. (2) Support the formulation of nationally-owned roadmaps that prioritise implementation of promising policies and practices, identify the potential and approach for mitigation financing, estimate related costs, identify other enabling needs (capacity building, technology transfer) and show how food security, agricultural sector development, and climate change agendas, institutions and financing could be linked. (3) Support the formulation of pilot project proposals to capture synergies between mitigation, adaptation and food security from agricultural practices that include specific institutional innovations and financing mechanisms to support them.
EC	The Gambia	Adaptation	GCCA support project to The Gambia for Integrated Coastal Zone Management and the mainstreaming of Climate Change	2012-2016		3.86	Grant	The overall objective of the project is to contribute to the capability of the government and people of The Gambia to adapt to increased climate variability and change. The specific objectives are (i) to strengthen national level capacity to plan for and respond to climate change impacts in coastal areas and (ii) to contribute to mainstreaming climate change into development planning.
EC	Bhutan	Adaptation	Global Climate Change Alliance – Climate Change Adaptation in the Renewable Natural Resources Sector	2012-2016		3.60	Grant	The overall objective of the proposed Global Climate Change Alliance-programme is to enhance resilience of Bhutan's rural households to the effects of climate change. The specific objective is to ensure climate change readiness of the Renewable Natural Resources sector in Bhutan by mainstreaming climate change into the sector and ensuring steps are taken towards increasingly addressing climate change adaptation at multi-sectoral level.
EC	Lower Mekong Basin	Adaptation	Global Climate Change Alliance (GCCA) in the Lower Mekong Basin - Addressing ecosystem challenges through the support to the Climate Change Adaptation Initiative (CCAI) of the Mekong River Commission (MRC)	2011-2015		1.54	Grant	Total EC contribution: €5M (of which €1.5M count as FSF). The goal of the Climate Change Adaptation Initiative is: "An economically prosperous, socially just and environmentally sound Mekong River Basin responsive and adapting to the challenges induced by climate change", reflecting the overall vision of the MRC. Inherent to the goal is a commitment to poverty reduction, gender responsiveness and ecological sustainability in adapting to climate change. The objective is: "Climate change adaptation planning and implementation is guided by improved strategies and plans at various levels and in priority locations throughout the LMB". The CCAI focus on the basin-wide level, addressing basin wide and trans-boundary issues and the sectors for which the MRC has a mandate and experience (flood and drought, agriculture, fisheries, aquaculture, hydropower, and river transport).
EC	Samoa	Adaptation	Global Climate Change Alliance (Priority 2 of the ENRTP): Supporting Climate Change Adaptation for the Samoan Water Sector	2012-2014		3.00	Grant	The overall objective of the intervention is to support the National Strategy for Development of Samoa to reduce poverty and hardship, and to provide social and economic opportunities, for the people of Samoa, by integrating climate change into national and sector development planning, budgeting and implementation. Specifically, the intervention will support the integration of climate change in the water sector policies and plans and support the implementation of selected adaptation measures in the sector. The purpose of this sector policy support programme is to strengthen the integration of climate change adaptation into the updated of the Water for Life Sector Plan 2012-16, and to mitigate the impact of flooding in central Apia through rehabilitation of priority drainage infrastructure and introduction of an effective maintenance programme.
EC	Pacific	Adaptation	Increasing climate resilience of Pacific Small Islands States through the Global Climate Change Alliance	2011-2013	The Secretariat of the Pacific Community (SPC)	10.00	Grants	Total EC Contribution: €11.4M (of which €10M counting as fast start). Promote a long term/strategic approach to adaptation to CC planning and budgets and to pave the way towards more effective and coordinated aid delivery modalities at national and regional level in the sector of CC. Complementary to GTZ actions in the Pacific. R1 (national level): Beneficiary countries are better equipped to mainstream CC in policies, planning processes and country budgets allowing for the increased use of the budget support aid cooperation modality. R2 (regional level): Regional capacity to support national adaptation needs is strengthened
EC	Multi	Mitigation	Investment Facilitie Latin America: Climate Change Windows			1.70	Grant	Total EC contribution is €15M (of which €1.7M is counted as FSF). The CCW's main purpose is to promote additional investments in projects which have climate change as their principal objective. They should contribute to the objective of stabilisation of greenhouse gas (GHG) concentrations in the atmosphere at a level that would prevent dangerous anthropogenic. Operations should address all relevant fields in line with the ones of the facilities such as transport, energy, and environment sectors and to support social sector such as health and education, and private sector development in the corresponding partner countries. The Facility will support the growth of SMEs, by making available a range of financial instruments in Latin America. The leverage effect of the CCW should generate a multiplying factor of at least 4 to 5 times the amount of financial non-refundable contributions provided. The input of the financing institutions will increase the resources to be directed towards the Latin American beneficiary countries.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
EC	Lao PDR	Adaptation	Lao PDR Global Climate Change Alliance Programme	2012-2017		5.00	Grant	The overall objective of the intervention is to mainstream climate change into Government of Lao PDR's poverty eradication efforts by promoting sustainable natural resources management and improved land management. The purpose (specific objectives) of the intervention is: 1. To strengthen the climate change related institutional, policy and regulatory framework; 2. To pilot sustainable and climate resilient land use approaches and adapted farming systems at local level to <u>inform policy making and improve communities' livelihoods and resilience to climate change.</u>
EC	Pilot countries in Asia, Africa and Latin America (to be defined)	Carbon market mechanisms	Partnership for Market Readiness	2011-2014	World Bank	5.00	Grants	Overall objective is to reduce greenhouse gas emissions globally in a cost effective manner by scaling up of the use of carbon market mechanisms in developing countries. Specific objective is to improve capacity of developing countries to develop and impl
EC	Multi	Mitigation	Promoting Low Carbon Urban Development Strategies in Emerging Economy Countries (UN-HABITAT)	2012-2015		5.00	Grant	The global objective is to support/contribute to the promotion of low emission, urban development in developing economies. The specific objectives are: 1) To create up to 8 model cities or metropolitan areas in countries with developing economies within Africa, Asia and Latin America, in order to demonstrate and showcase low carbon development strategies under conditions of rapid growth and transition through knowledge transfer and technical support ; 2) To create a networking system which will promote emission mitigation measures in urban development through the transfer of technical expertise, technology, research, innovation and financing
EC	The Forest Carbon Partnership Facility currently supports 15 countries in Latin America, 14 countries in Africa and 8 countries in Asia Pacific	REDD+	Support to the Forest Carbon Partnership Facility's Readiness Fund (possibly including provisions for support to REDD+ Partnership actions / Paris-Oslo process)	2011-2014	World Bank	4.00	Grants	The overall development objective of the Facility is to set the stage for a much larger system of positive incentives and financing flows in the future, which is in line with the EU strategy on REDD described above. It is expected that the framework and approaches that will be tested under the FCPF will inform Parties to the UNFCCC as they negotiate a future climate regime which may include REDD. It seeks to create an enabling environment and sponsor a body of knowledge and experience that can facilitate the development of a much larger global program of incentives for REDD over the medium term (5-10 years).
EC	Multi	REDD+	UN-REDD programme	2011-2015		10.00	Grant	The global objective of this action is to support the UNREDD programme to deliver more support to developing countries on REDD+ preparation, both through national support and through global support. This support will enable UNREDD to serve more countries and to strengthen its GPA on Governance aspects: Developed parties have committed through the Cancun Agreement to provide adequate and predictable support to countries preparing for REDD+ activities so that they can develop their national strategies and capacities focusing on governance, forest information, drivers, and policy reforms. This will allow REDD+ countries to provide regular, complete and meaningful data demonstrating the effectiveness of their efforts in tackling deforestation. EU contribution to the UNDP Multi Donor Trust Fund (Legal Entity) which feeds the UN-REDD Programme by FAO, UNEP and UNDP in addition to other co-donors: Norway EUR 98 Million approximately, Denmark EUR 5.5 Million approximately, Japan EUR 2 Million approximately, Spain EUR 1 Million approximately.
EC	Burkina Faso	Mitigation	Gouvernance climatique et gestion durable et décentralisée des forêts (CLIM-GDDF)	2012		8.00	Grant	L'objectif spécifique du projet est d'aider le Burkina Faso à améliorer la gestion durable décentralisée des ressources forestières pour un développement socio-économique vert, et par une amélioration de la gouvernance climatique au niveau national.
EC	Caribbean Region (OECS)	Adaptation	Global Climate Change Alliance (GCCA) project on Climate Change Adaptation and Sustainable Land Management in the Eastern Caribbean	2012		7.00	Grant	the present project will support the Organisation of Eastern Caribbean States' (OECS) efforts in enhancing the resilience of its Member States to the impacts of global climate change by defining and implementing sustainable land management strategies and practices
EC	Central African Republic	Mitigation	GCCA - Intégration du changement climatique dans le développement du Sud Ouest de la RCA	2012		4.00	Grant	gestion durable et responsable des ressources naturelles; l'appui à la gouvernance et à l'état de droit en zone d'exploitation forestière, en vue de contribuer à la réduction des émissions liées à la déforestation et à la dégradation des forêts
EC	Global	Adaptation/Mitigation	Support to Climate Technology Transfer and Networking ( UNEP)	2012		5.00	Grant	Strategic Cooperation Agreement (SCA) between European Commission and UNEP (covering ENRTP priorities 1, 2 and 3.3 – Support for mainstreaming) – managed by DG DEVCO. General objective: "to integrate environmental protection requirements and climate change action into the Community's development and other external policies and topromote the Community's environmental, climate and energy policies abroad.
EC	Global	Mitigation	Sound management and destruction of substances depleting the ozone layer (ODS) (with UNEP)	2012		5.00	Grant	Strategic Cooperation Agreement (SCA) between European Commission and UNEP (covering ENRTP priorities 1, 2 and 3.3 – Support for mainstreaming) – managed by DG DEVCO. General objective: "to integrate environmental protection requirements and climate change action into the Community's development and other external policies and topromote the Community's environmental, climate and energy policies abroad.
EC	Global	REDD	Additional support to the EU REDD Facility	2012		5.00	Grant	2010 AAP ENRTP (Part II) Fast-start funding
EC	Global	Mitigation	EU-UNDP climate change capacity building programme (for NAMA Net) Mitigation	2012		5.00	Grant	AAP 2010 ENRTP Part 2 (FAST START FUNDING)
EC	Global	Mitigation	Partnership for Market Readiness (PMR) with WB	2012	World Bank	10.00	Grant	2010 AAP Part-II under the ENRTP - fast start funding

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
EC	Papua New Guinea	Mitigation	GCCA - Technical support to the Papua New Guinea Forest Authority to implement a continuous and multi-purpose National Forest Inventory	2012		6.00	Grant	The overall objective of the project is to contribute to the implementation of Papua New Guinea's climate change policies and measures on mitigation. The purpose of the project is to support the Papua New Guinea Forest Authority to implement a continuous and multi-purpose National Forest Inventory (NFI).
EI	Uganda	Adaptation	Karamoja Livestock Support Programme	2010		0.5	grant	mitigating the impact of climate change in Karamoja
EI	Uganda	Adaptation	Peace Recovery & Development Plan	2010-2012		0.7	grant	Spent on water supply
EI	Vietnam	Adaptation /Mitigation	One UN	2010		0.045	grant	Support for mainstreaming climate issues within the One UN framework and for the construction of carbon neutral building to house UN agencies
EI	Vietnam	Adaptation	Prog 135	2010		0.7	grant	Programme 135 for Ethnic Minorities and Mountainous Areas, aspects of the programme have a strong climate relevance. Programme 135 is a national targeted programme seeking to reduce poverty in marginalised areas through small community infrastructure, production support and capacity building.
EI	Vietnam	Adaptation	Voice	2010		0.045	grant	Irish Aid's provincial programme in Bac Kan Province Village Ownership and Community Empowerment supports commune level development i.e. community infrastructure, livelihoods and capacity building. Aspects of the programme have climate relevance.
EI	Vietnam	Mitigation	Mekong Private Sector Development Facility	2010		0.375	grant	The goal of the development facility's engagements in Environmental and Social Sustainability is to demonstrate the business case for sustainability and increase the adoption of sustainable business practices by private firms. A number of projects funded under this facility have climate relevance.
EI	Vietnam	Adaptation	Prosperity Initiatives	2010 onwards		0.1125	grant	the programme seeks to develop the industrial bamboo sector in Vietnam through market development, farm extension and technology transfer.
EI	Zambia	Adaptation	Northern Province	2010		0.327	grant	Proportion of budget estimated to be attributable as having climate relevance - water, sanitation, agricultural irrigation, and afforestation.
EI	Zambia	Adaptation	Social Cash Transfers	2010	Zambian Government	0.3	grant	Proportion of budget estimated to be attributable as having climate relevance.
EI	Mozambique	Adaptation	Pro Agri	2010	government of Mozambique	0.5	grant	Irish Aid provides sector budget support to Pro Agri, the Government of Mozambique's sector support programme in Agriculture. Certain activities of the programme can be attributed to adaptive practices.
EI	Mozambique	Adaptation	Provincial Programme in Inhambane	2010		0.26	grant	Key measures supported by Ireland in the Province related to climate change adaptation include, support to Inhambane agriculture directorate in promoting drought resistant crops, support for the construction of boreholes with solar panel pumps, support to an integrated waste management study in Inhambane, support to Dept of Water to construct cisterns in communities, schools, and hospitals in rainfall and drought prone areas.
EI	Malawi	Adaptation	International Potato Centre	2010	CIP	0.75	grant	Research, assessment and roll out of improved drought resistant varieties of potatoes.
EI	Malawi	Adaptation	International Crops Research Institute for Semi Arid Tropics ICRISAT	2010		0.50	grant	support for ICRISAT to implement the Malawi Seed Industry Development Programme'
EI	Malawi	Adaptation / mitigation	World Agro-forestry Centre - ICRAF	2010		0.75	grant	To limit soil erosion, improve water management, increase soil fertility and improve agricultural production, Irish Aid support agro forestry as part of consolidation agriculture.
EI	Malawi	Adaptation	National Smallholder Farmers' Association of Malawi - NASFAM	2010		0.25	grant	Support to NASFAM to implement a national programme whose goal is to achieve sustainable food production and reverse environmental degradation through the promotion of conservation agriculture.
EI	Malawi	Adaptation	JRU/DDR	2010	Department of Disaster Management	0.425	grant	reducing the vulnerability of the poorest households to the effects of climate change and environmental degradation in disaster prone districts. Irish Aid is working with DFID and the Royal Norwegian Embassy in supporting a more effective response to disaster risk through the establishment of a joint resilience unit.
EI	Tanzania	Adaptation	Agriculture Sector Development Programme	2010		1.275	grant	National irrigation development activities
EI	Tanzania	Adaptation	One UN	2010		0.10	grant	Support of the UN 'Delivering as One' Programme in Tanzania
EI	Tanzania	Adaptation	Support to the Pastoralist Basket Fund	2010	CARE International	0.05	grant	the programme is engaged in capacity building to allow pastoralists CSOs advocate for their rights to services (extension services, water, land use and rights) and generate awareness among pastoralists in this regard.
EI	Ethiopia	Adaptation	Productive Safety Net Programme (PSNP)	2010		1.00	grant	Proportion of budget estimated to be climate change relevant. The programme contributes to protecting the most vulnerable people in Ethiopia from the impacts of droughts and floods through environmental restoration projects.
EI	Ethiopia	Adaptation	Bale Mountains Programme	2010		0.25	grant	Block Grant funding to regional government. Proportion of budget estimated to be climate change relevant.
EI	Ethiopia	Adaptation	Operational Research	2010		0.08	grant	The Agriculture Operational Research Programmes based in Awassa and Mekelle Universities contribute to raising the capacities of farmers and researchers to improve food security and promote sustainable livelihoods in the Southern Nations and national People Republic and Tigray regions of Ethiopia
EI	Ethiopia	Adaptation	Regional (Tigray) support programme	2010	Ethiopian Govt.	0.50	grant	Building resilience to drought and hunger by halting and reversing environmental degradation.
EI	Africa	Adaptation	Global Climate Change Alliance (GCCA): Specific countries yet to be decided.	2010-2012	EC GCCA	23.00	grant	Support to EC-GCCA for increasing the capacities of developing countries to cope with the effects of climate change. Priority to be given to one or a number of countries which Ireland prioritises in it's overseas development assistance, i.e. Ethiopia, Uganda, Tanzania, Zambia, Malawi, Mozambique, Lesotho, Timor-Leste and Vietnam.
EI	Multilateral		UNFCCC	2010		0.05	grant

EI	Multilateral	Adaptation	Global Information and Early Warning System (GIEWS)	2011	FAO	0.10	grant	Preparation for food shortages
EI	Multilateral	Adaptation	Conserving Plant genetic resources	2011	FAO	0.03	grant	Global plan of action for plant genetic resources
EI	Multilateral	Adaptation	Traditional seed systems-Bioversity international	2011	Bioversity International	0.41	grant	Traditional seed systems for tackling climate change
EI	Ethiopia	Adaptation	Productive Safety Nets Programme	2012	Govt. Of Ethiopia	8.00	grant	This government led multi donor programme provides food and cash support for approx. 7 million Ethiopians on an annual basis improving their resilience to climatic and other shocks
EI	Ethiopia	Adaptation	Household Asset Building Programme	2012	Govt. Of Ethiopia	0.50	grant	This is a sister programme of the PSNP and seeks to help people graduate from the PSNP, building the assets of household, and improving their resilience to climatic and other shocks. It supports on and off farm activities income generating opportunities by providing appropriate credit and expertise.
EI	Ethiopia	Adaptation	Tigray Regional Support programme	2012	Govt Of Ethiopia	1.50	grant	Support to this drought prone region aimed at increasing resilience to climatic and other shocks
EI	Ethiopia	Adaptation	Smallholder Livelihoods Improvement Project	2012	SOS Sahel	0.60	grant	The project seeks to promote climate smart agriculture practises, addressing issues of soil erosion, deforestation, and general environmental degradation.
EI	Ethiopia	Adaptation	Rural Women's Economic Empowerment	2012	Farm Africa	0.05	grant	This initiative seeks to improve poor rural womens resilience to climate change through access to credit, livelihood diversification and income generating activities
EI	Ethiopia	Adaptation	Rural Eco Tourism initiative	2012	TESFA	0.01	grant	Livelihood support programme, diversifying peoples livelihoods, increasing their resilience through development of sustainable agri tourism industry.
EI	Ethiopia	Adaptation	Agriculture Operational Research	2012	Irish and Ethiopian Universities	0.22	grant	Operational research programme, identifying best farming practises to respond to climate variation and climatic shocks
EI	Ethiopia	Adaptation	International Potato Centre (CIP)	2012	CIP	0.15	grant	Assistance to smallholder farmers to grow more productive varieties of potato and increase farmers incomes.
EI	Lesotho	Mitigation	Health systems support	2012	Gov of Lesotho	0.02	grant	Installation of solar PV energy systems in remote Health Centres
EI	Lesotho	Adaptation	Emerging Needs - Flooding relief	2012	Gov of Lesotho	0.75	grant	Support to Disaster Management Fund established by Government of Lesotho following 2011 floods.
EI	Vietnam	Adaptation/mitigation	One UN support initiative	2012	UNDP	0.05	grant	Number of climate relevant initiatives support, including strengthening capacity of climate negotiators, DRR, REDD etc.
EI	Vietnam	Mitigation	Civil Society Support	2012	Various NGOs	0.13	grant	Sustainable management of natural resources, livelihoods enhancement in Hanoi, education on responses to natural disasters (typhoons) in Quang Binh and Quang Tri provinces.
EI	Vietnam	Adaptation	Programme 135	2012	Govt of Vietnam (CEM)	0.55	grant	National Targeted Programme for Sustainable Reduction of Poverty amongst marginalised communities including ethnic minorities.
EI	Mozambique	Adaptation	Regional Support Programme - Inhambane Province	2012	Govt. Of Mozambique	0.65	grant	Support to this drought prone region aimed at increasing resilience to climatic and other shocks
EI	Mozambique	Adaptation	Livelihoods/Farmer Support/Resilience Prog	2012	CARE & TECHNOSERVE	1.00	grant	Programmes to improve resilience of small holder farmers during dry season and increased productivity and access to markets
EI	Mozambique	Adaptation	Climate Change	2012	Govt of Mozambique	0.55	grant	Programme to enhance environmental sustainability
EI	Mozambique	Adaptation	Decentralisation (Municipalities - PDA)	2012	Govt of Mozambique	0.35	grant	Urban poverty reduction, sustainable development of municipalities and addressing challenges of climate change.
EI	Malawi	Adaptation	Improved crop productivity and soil fertility management	2012	Various NGOs	3.67	grant	Support to civil society and government to improve peoples resilience through use of climate smart agriculture practises and technologies.
EI	Malawi	Adaptation	Disaster risk reduction and strengthening resilience programme	2012	Govt of Mozambique and Donor partners	0.69	grant	Multi donor support to advance disaster risk reduction measures and local and national level
EI	South Africa	Adaptation	Water Research Commission	2012	Govt of South Africa	0.20	grant	Support to water commission to research future water provision under climatic variability
EI	South Africa	Adaption	Limpopo Water Consortium	2012	Various NGOs (LINGO)	0.80	grant	Support to improvement of water and sanitation services in Limpopo Province
EI	Tanzania	Adaptation	Agricultural Sectoral Support Programme	2012	Govt of Tanzania	4.00	grant	Promotion within the sectoral programme of conservation agriculture, use of drought resistant crops, and drip fed irrigation systems
EI	Tanzania	Adaptation	Pastoralist Support Programme	2012	Various NGOs	0.40	grant	Support for Basket fund for actions aimed to improve the livelihoods of pastoral communities, including improving their resilience to climatic shocks
EI	Tanzania	Adaptation	One UN support initiative	2012	UN	0.10	grant	Reducing emissions from deforestation, assistance to Government management of disasters, mainstreaming disaster management into development programmes
EI	Tanzania	Adaptation	Cocoa Value Added/Market Programme	2012	TechnoServe	1.00	grant	Improved livelihoods for pastoralists and smallholders including assistance with access to markets, use of environmentally friendly insecticides and crop bio-diversity.
EI	Uganda	Adaptation	Karamoja Livelihood Support programme	2012	Oxfam	0.33	grant	This programme addresses the key vulnerabilities of this mainly pastoralist community, increasing their resilience to climatic and other shocks

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
EI	Zambia	Adaptation	Northern Province Support Programme	2012	Govt of Zambia	0.47	grant	Water and sanitation interventions, climate smart agriculture, and afforestation activities are all covered under this programme.
EI	Zambia	Adaptation	Social Cash Transfer	2012	Govt of Zambia	1.35	grant	Social protection programme to increase the resilience of the poorest.
EI	Multilateral / LDCs	Adaptation	UNFCCC LEG	2012	UNFCCC	0.05	grant	Least Developed countries expert group operating under the framework of the UNFCCC framework
EI	Multilateral	Adaptation	Climate research and Advocacy	2012	IIED	0.10	grant	Leading global environment and development research and advocacy group
EI	Multilateral	Adaptation	Climate research and Advocacy	2012	WRI	0.09	grant	Leading global environment and development research and advocacy group
EI	Multilateral	Adaptation	IFAD global support	2012	IFAD	2.00	grant	Core support to global work
EI	Multilateral	Adaptation	Hunger Reduction and Climate Change Adaptation	2012	Institute of Development Studies (IDS)	0.10	grant	Establishing linkages between hunger reduction, climate adaptation and social protection programmes
EI	Multilateral	Adaptation	Various finance approved initiatives in planning including supports to climate advocacy, community resilience and drought resilience	2012	Various NGOs	1.75	grants	Interventions at an advanced planning stage to support a range of activities that will inter alia support the promotion of clean and efficient cooking methods, climate change advocacy, social programmes and increased resilience to the adverse impacts of climate change on small farmers.
EI	Multilateral	Adaptation	CGIAR Climate Programme	2012	CGIAR	0.85	grant	Specific support to the Climate programme within CGIAR global programmes
EI	Multilateral	REDD+	European Forest Institute EU REDD facility	2012	European Forest Institute	0.15	grant	REDD+ outreach programme in developing countries
EI	Multilateral	Adaptation/Mitigation	Benchmarking of methane emissions for livestock production	2012	FAO	0.04	grant	Benchmarking of methane emissions for livestock production
EI	Ethiopia	Adaptation	Productive Safety Nets Programme	2011	Govt. Of Ethiopia	8.00	grant	This government led multi donor programme provides food and cash support for approx. 7 million Ethiopians on an annual basis improving their resilience to climatic and other shocks

EI	Africa	Adaptation	Global Climate Change Alliance (GCCA): Specific countries yet to be decided.		EC GCCA	8.00	grant	
EI			Least Developed Countries Fund established by the UNFCCC	2011	UNFCCC	2.00	grant	
EL	Burkina Faso, Chad, Mali, Niger, Sudan, Uganda	ADAPTATION	Climate Change Adaptation in East and Central Africa	2010	World Meteorological Organization	1.00	Grant	The objective of the project is to support the re-establishment of the National Meteorological Services (NMS) of Burkina Faso, Chad, Mali, Niger, Sudan and Uganda, sustaining their capability for national weather and climate monitoring and weather forecasting.
EL	Indian Ocean Commission member states (not yet defined)	ADAPTATION	Indian Ocean Commission Secretariat	2010	Indian Ocean Commission Secretariat	1.00	Grant	Collection, analysis, and dissemination of meteorological and sea-level data, awareness raising, capacity development.
EL	Saint Lucia, Saint Vincent and the Grenadines	ADAPTATION	Climate Change Vulnerability, Risk Assessment, Adaptation in the Caribbean	2010	Caribbean Community Climate Change Centre	1.00	Grant	Collection, analysis, and dissemination of meteorological and sea-level data, awareness raising, capacity development.
EL	Albania, Bosnia Herzegovina, Croatia, FYROM, Moldavia, Montenegro, Serbia, Georgia, Ukraine	MITIGATION	"SYNERGY"	2010	Hellenic Centre for Renewable Energy Sources (CRES)	0.90	Grant	The objectives of the project include: Promotion of the use of RES for electricity and heat production, Promotion of EE in residential and public buildings, scientific and business cooperation for RES and E.E, Support to the development of an institutional and legislative framework for supporting RES and EE investments, Development of a regional RES and EE technologies and services market. The project is co-financed by USAID.
EL	BSEC member states (not yet defined)	MITIGATION	RES and EE project financing through the Hellenic Development Fund of the Black Sea Economic Cooperation (BSEC)	2010	Call for proposals still open	0.50	Grant	The BSEC-HDF is a financial instrument set up as a voluntary contribution from the Hellenic Republic within the BSEC, aiming to provide grants for the implementation of projects in BSEC member states. Proposals eligible to be funded by BSEC-HDF, according to the Fund's 2010 Call for Proposals, must target the area of Renewable Energy Sources and Energy Efficiency, thus contributing to regional efforts for climate change mitigation
FI	Global	Mitigation/CDM/gender	Study on clean development mechanism and gender	2010	MFA Finland/GreenStream Network Oyj	0.03	grant	The aim of the study is to 1) create a set of criteria to be used for analyzing the impacts of CDM projects from gender perspective 2) study the social impacts that CDM project have on the local population from the gender perspective 3) identify project types that have the potential to create positive impacts among the local people, especially local women.
FI	Global	REDD+	Forest Carbon Partnership Facility - FCPF (Readiness Fund)	2011&2012		8.00	grant	<b>The Forest Carbon Partnership Facility (FCPF) assists developing countries in their efforts to reduce emissions from deforestation and land degradation (REDD). It has two objectives: to build capacity for REDD in developing countries, and to test a program of performance-based incentive payments in some pilot countries. Two separate mechanisms are set up to support FCPF objectives: Readiness Mechanism and Carbon Finance Mechanism. Together, these two mechanisms seek to develop a realistic and cost-effective large new instrument for tackling deforestation, to help safeguard the Earth's climate, reduce poverty, manage freshwater resources, and protect biodiversity. Finnish contribution is targeted to the Readiness Fund.</b>
FI	Global	Capacity building, gender	Support for GGCA for Gender Mainstreaming in Global Climate	2010-2014	Global Gender and Climate Alliance (GGCA)	5.20	grant	The Global Gender and Climate Alliance brings together key UN actors in the field of international environmental and development policy to address the question of gender and climate change. Its main goal is a more widespread recognition of a gender perspective in decision making and policy planning related to climate change. Participation of women government delegates to UNFCCC negotiations is supported through the Women Delegates Fund. The project also helps countries to develop different national strategies (such as NAPAs) in a gender responsive manner.
FI	Nepal	Adaptation/CB	Increased Capacity of Hydrometeorological Services ICI-project	2010-2012	Finnish Meteorological Institute	0.49	grant	The project aims to improve the capacity of the Department of Hydrology and Meteorology under the Ministry of Environment in hydrometeorological observations, services and international data sharing and thus improve the capability of the Government of Nepal to respond to the increased risks of natural disasters related to weather and climate.
FI	Caribbean	Adaptation/CB	ICI; Caribbean/SIDS Strengthening hydrometeorological Capacity	2010-2012	Finnish Meteorological Institute	0.49	grant	<b>The cooperation project between the Finnish Meteorological Institute and the Association of the Caribbean States (ACS) aims to strengthen the capacity and ability of the ACS member states to deal with natural disasters and adverse effects of climate change. Furthermore, the project identifies the needs for training and development of technical systems and formulates an action plan in 16 Caribbean states (Small Island Developing States, SIDS).</b>
FI	Africa (Niger, Ghana, Kenya and Mozambique)	Adaptation	INGO/Care Danmark Adaptation Learning Programme for Africa	2010-2013	CARE Danmark/CARE International	1.65	grant	The objective is to strengthen the capacity of poor households to adapt to climate variability and change. The programme uses a community-based adaptation approach and it has special focus on women and vulnerable groups. Learning, application of collected information and spreading of the results are integral parts of the programme.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
FI	Indonesia	Mitigation	Indonesia Energy and Environment Partnership	2010-2013		4.00	grant	One of the Finnish key projects has been the Energy and Environment Partnership Program (EEP) which aims to promote renewable energy, energy efficiency, and clean technology investments in selected program countries, with the twin objectives of providing sustainable energy services to the poor and simultaneously combating climate change. The Energy and Environment Partnership with Central America (EEP-CA), was launched by the Ministry for Foreign Affairs of Finland and the seven participating Central American countries in 2002, during the United Nations World Summit on Sustainable Development. Since 2003, Finland has allocated a total of 7 MEUR for the partnership, for the period 2010-2012, a total of 6 MEUR has been allocated. Based on the encouraging results from the Central American EEP, the MFA Finland has initiated similar programs in other regions (Mekong 2009-12 4,9 MEUR; Indonesia 2010-13 4 MEUR; Southern and East Africa 2010-12 8,5 MEUR; and Andean Region 2010-12 6 MEUR).
FI	Global	Mitigation	GEF, 5th Replenishment period	2010-2014		6.30	grant	Calculated from the growth of the total contribution using the climate change focal area allocation percentage presented in the GEF's Annual Report 2008 (32 %). Finland's total contribution for GEF5 is around 84 % higher than for GEF4. Total contribution for GEF is 57,3 MEUR during the 5th Replenishment Period.
FI	Global	Mitigation/Adaptation	Making agriculture part of the solution to climate change—Building capacities for Agriculture Mitigation)	2010-2014	FAO	5.00	grant	Agriculture and land use are responsible of around 30 percent of the emissions and have a significant potential for mitigation. The goal of the project is to enable countries to better realize the opportunities of climate change mitigation in agriculture while improving food security and increasing resilience of farming systems at the same time. The project implementation can be divided into five modules: 1) Better knowledge support 2) Increased awareness, participation and partnerships; 3) Strengthened technical consultative processes; 4) developed communities of practices and 5) Development and advice on options. The duration of the project is five years (2010-2014) and the total budget is about 40 000 000 Euros. <b>The Finnish commitment so far is 2.5 million euros.</b>
FI	Global	Mitigation/Adaptation	Support for enhancing the capacity of the developing countries to undertake climate actions and to engage in global climate change and sustainable development processes and discussions	2011-12	South Centre	0.40	grant	The overall annual budget for this project is EUR700,000.00 per year, and the Finnish contribution is EUR200,000.00 per year. The project will have an initial year (2011) with the possibility of extending it for another two years (2012, 2013) depending on the experience of the initial year and other factors. The programme will give a boost to the capacity of developing countries in addressing the global and national climate crisis. In the initial year (2011), the focus of project activities in relation to national climate change action plans and policies of developing countries will be on: (1) Collecting information on the development of climate action institutional frameworks in developing countries; (2) Documenting the climate action plans (mitigation and adaptation) of developing countries. (3) Documenting and drawing lessons from Technology Needs assessments and identification of barriers to technology development or transfer in developing countries.
FI	Vietnam	Adaptation	Climate change adaptation in coastal areas in Vietnam	2011-2013		0.50	grant	The initial phase of this programme was in the 12 month period 1 March 2011 to 28 Feb 2011. As this was successfully implemented, the second phase of the programme followed (1 Mar to 31 Dec 2012). The overall focus for the project is on: (1) Assisting developing countries through research to contribute to global climate change efforts through national actions and to engaging constructively to the international climate discussions especially at the UNFCCC; (2) Convening workshops and other meetings to facilitate South-South sharing of experiences and positions on climate policies and eventually North-South dialogue; (3) Publications and outreach in relation to the project's research products. The project will thus provide support to improve the capacity of developing countries in addressing the global and national climate crisis.
FI	Global		Green Climate Fund	2012		0.50	grant	Start-up support to the GCF. The Fund will contribute to the achievement of the ultimate objective of the United Nations Framework Convention on Climate Change (UNFCCC). In the context of sustainable development, the Fund will promote the paradigm shift towards lowemission and climate-resilient development pathways by providing support to developing countries to limit or reduce their greenhouse gas emissions and to adapt to the impacts of climate change, taking into account the needs of those developing countries particularly vulnerable to the adverse effects of climate change.
FI	LDCs	Adaptation	Least Developed Countries Fund	2012		8.30	grant	The LDCF was established to address the special needs of the Least Developed Countries (LDCs) under the Climate Convention. The LDCs identified adaptation as their top priority. Specifically, the LDCF was tasked with financing the preparation and implementation of National Adaptation Programs of Action (NAPAs). Consistent with the findings of the NAPAs, the LDCF focuses on reducing the vulnerability of those sectors and resources that are central to development and livelihoods, such as water; agriculture and food security; health; disaster risk management and prevention; infrastructure; and fragile ecosystems.
FI	Global	Adaptation	Special Climate Change Fund (adaptation window)	2012		2.90	grant	The Special Climate Change Fund (SCCF) was established to support adaptation and technology transfer in all developing country parties to the UNFCCC. The SCCF supports both long-term and short-term adaptation activities in water resources management, land management, agriculture, health, infrastructure development, fragile ecosystems, including mountainous ecosystems, and integrated coastal zone management.
HU	TBD	Adaptation	LDCF	2011	N.A.	1.00	Grant	The LDCF was established under the UNFCCC and aims to address the special needs of the LDCs, which are especially vulnerable to the adverse impacts of climate change. This includes preparing and implementing NAPAs.
HU	Ukraine	Mitigation	Energy efficiency programme	2012	Charitable Foundation of the Transcarpathian Hungarian College	0.58	Grant	Increasing energy efficiency in local schools/buildings by modernizing the insulation and heating system.

LV	Georgia	Adaptation	Activity in the framework of Agreement between the Ministry of the Environment of the Republic of Latvia and the Ministry of Environment Protection and Natural Resources of Georgia	2010	Ministry of the Environment of the Republic of Latvia	0.00	grant	Action aims to assist in identification of adaptation measures by providing expertise
LV	Georgia	Mitigation	Activity in the framework of Agreement between the Ministry of the Environment of the Republic of Latvia and the Ministry of Environment Protection and Natural Resources of Georgia	2010-2011	Ministry of the Environment of the Republic of Latvia	0.01	grant	Action aims to build the capacity of public administration and experts in receiving country. The skills gained will be used during the project for creating instruments for rising public awareness and to promote climate change mitigation actions and technologies
LV	Moldova	Mitigation	Activity in the framework of collaboration between the Ministry of Environmental Protection and Regional Development of the Republic of Latvia and the Ministry of Environmental Protection of Moldova	2012	Ministry of Environmental Protection and Regional Development of the Republic of Latvia	0.00338	grant	Aim of activities is raising of capacity on renewable energy resources and technology transfer
LV	Georgia	Mitigation	Activity in the framework of Agreement between the Ministry of the Environment of the Republic of Latvia and the Ministry of Environment Protection and Natural Resources of Georgia	2011	Ministry of Environmental Protection and Regional Development of the Republic of Latvia	0.01000	grant	Aim of activities is support improvement of GHG inventory and projection system as well as increase public awareness about climate change issues, including promotion of use of renewable energy resources and implementation of new climate friendly technologies
MT	Various developing countries	Mitigation	Global Alliance for Clean Cookstoves	2010	Global Alliance for Clean Cookstoves	0.125	Grant	The Global Alliance for Clean Cookstoves is a new public-private partnership, which amongst others aims at combating climate change by creating a thriving global market for clean and efficient household cooking solutions. The Alliance is sponsored by the U
MT	Small island developing states	Capacity building for adaptation	Climate Change Diplomacy Project	The project ran from 2008 to 2010. The funds for 2010 were allocated from Fast-Start financing.	DiploFoundation	0.025	Grant	The project focused on preparing small island states for the Bali process. In the period 2008/2009 it involved: 1. An international conference on climate change diplomacy; 2. The development of an online course on climate change; and 3. Delivery of onli
MT	Uganda	Adaptation	Rainwater harvesting for natural resource management and sustainable development			0.05055	Grant	Construction of rain water harvesting systems, sanitation and hygiene promotion and provide interactive workshops on climate change.
MT	Ethiopia	Adaptation	Integrated environmental intervention			0.018767	Grant	Training session to improve living and environmental conditions in order to adapt to the climate change.
MT	Ghana	Adaptation / Mitigation	Bore Hole Project ; Solar Water Heating Project;			0.113295	Grant	(a) Supply of safe and clean water ; (b) Incorporation of solar systems
MT	Tanzania	Mitigation	Energy from recycled waste: Biogas plant			0.025	Grant	Construction of Biogas plant.
MT	Ethiopia	Mitigation	Community Managed Environmental Sanitation and Biogas Development			0.03257	Grant	Improves access to clean water, providing access to alternative energy.
MT	Uganda	Mitigation	Proposal for co-funding of a Mini Grid			0.059818	Grant	Installation of solar power alternative
MT	Uganda	Adaptation	Water and Food Security	2012		0.056525	Grant	The project's prime aim is water and food security using an integrated approach, which has water management, farming and poultry as key elements.
MT	Ethiopia	Adaptation	Sanitation and Water	2012		0.039492	Grant	The proposed project aims to improve the Ethiopian beneficiaries' access to sanitation and clean water, to improve the overall health status of the targeted community and to ameliorate the environmental condition found in the target area by minimising health related problems emanated from poor environmental sanitation and the lack of eco-friendly alternative energy source.
MT	Ghana	Mitigation	Bio Gas System	2012		0.0963	Grant	The installation of a 200cbm bio-gas system for the production of gas for cooking for the hospital and the hospital residence.
MT	Madagascar	Adaptation	Water Harvest	2012		0.014752	Grant	A water harvesting system which will provide access to water to a community within a region which is very arid, hot and exposed to cyclones and also has clay soil which leaves rain water to remain on the ground.
MT	India	Mitigation	Solar Lighting	2012		0.04	Grant	The project involves the installation of solar electricity (through a system utilising photovoltaic cells) in a school, hostel and residences for children.
MT	Kenya	Adaptation	Borehole	2012		0.0395	Grant	This project aims to construct a borehole.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
MT	Philippines	Adaptation	Water Canals	2012		0.024334	Grant	This project aims to prevent soil erosion by building canals which will collect flood water caused by typhoons in the rainy season and dispose of it without causing further damage to the neighbouring local community.
NL		adaptation and mitigation	World Resources Institute	2010-2012	WRI	6.91	grant	WRI advises developing countries and international stakeholders on renewable energy, water and food security, urban management and climate change. This two year programme with the Netherland has a <u>focused dialogue on Adaptation. Especially on the themes: Water, Food Security and Climate Finance.</u>
NL	Mozambique	Mitigation	Nat.Programme Mozambique	2010-2012	GoM Cepagni	4.64	grant	The programme in Mozambique starts with sustainable biofuel production and a study for certification of biomass for export. Collaboration opportunities are explored within the Netherlands-Mozambique country programme.
NL	Bangladesh, Benin, Bolivia, Burkina Faso, Burundi, Ethiopia, Ghana, Honduras, Indonesia, Kenya, Mali, Mongolia, Mozambique, Nepal, Nicaragua, Peru, Rwanda, Senegal, Uganda	mitigation	Energising Development	2010-2013	BMZ/GIZ	48.09	grant	This programme contributes to the second phase of the German Energising Development Programme which aims to provide access to renewable energy to 5 million people ( <a href="http://www.senternovem.nl/energising_development">http://www.senternovem.nl/energising_development</a> ).
NL	Burundi, DRC Congo, Rwanda	mitigation	Regional Programme Renewable Energy Great lakes	2010-2013	IFDC-FMO AfDB, KfW	19.54	grant	This programme focusses on the regional implementation of renewable energy in the Great Lakes region. It contributes, among others, to the rehabilitation of the Rusumo Falls hydropower plant and the interconnection of powergrids in the region. The programme includes as well reforestation activities and sustainable production of firewood.
NL	Indonesia	mitigation	Nat.Programme Ren.Energy Indonesia	2010-2013	WB-Agency NL- HIVOS GIZ/BMZ	14.62	grant	In the framework of a 15 year long cooperation on energy between Indonesia and the Netherlands, a program on renewable energy has been developed. This program includes capacity building, institutional strengthening and implementation of new technologies such as geothermal energy and biogas; it supports the implementation of small scale hydropower for rural electrification; and it includes activities in the field of sustainable palm oil production.
NL	Bangladesh, Cambodia, Laos, Pakistan, Vietnam	mitigation	Asian Biogas Partnership Programme (ABPP)	2010-2013	SNV	6.91	grant	The Asian Biogas Programmes aims at constructing biogas plants, providing people with access to sustainable source of renewable energy by the year 2013. In Pakistan a separate biogas program is operational.
NL	Bolivia	adaptation and capacity building	Support and capacity	2010-2014	Universidad de Cordillera / Viceministerio de Recursos Hídricos y Riego / FUNDEPCO	0.75	grant	Includes adaptation activities to mitigate flood risks, capacity building in climate negotiations and agriculture.
NL	Ethiopia, Philippines, Guatemala, India, Indonesia, Kenya, Mali, Nicaragua, Uganda	adaptation, capacity building	Partners for resilience programme	2010-2014	Red Cross NL, Care, Climate centre, Cordaid NL, Wetlands Int	15.13	grant	Improve the resilience of vulnerable people through disaster risk reduction for climate change and climate change adaptation
NL	Ethiopia, Honduras, Kenya, Maldives, Mali, Nepal	mitigation	Scalingup renewable energy programme for low income countries (SREP)	2010-2014	WB	19.00	grant	The Scaling Up Renewable Energy Program in Low Income Countries (SREP). The SREP stimulates renewable energy solutions and acts as a catalyst for the transformation of the renewables market by obtaining government support for market creation, private sector implementation, and productive energy use ( <a href="http://www.climateinvestmentfunds.org/cif/srep">http://www.climateinvestmentfunds.org/cif/srep</a> ). FMO access to Energy Fund and WB's Clean Investment Framework
NL	Burkina Faso, Ethiopia, Kenya, Senegal, Tanzania, Uganda	mitigation	African Biogas Partnership Programme (ABPP)	2010-2014	HIVOS/SNV	18.83	grant	The African Biogas Programmes comprises a partnership between HIVOS and SNV in supporting national programmes on domestic biogas in six African and four Asian countries. The African Programme aims at constructing 70,000 biogas plants, providing about half a million people access to a sustainable source of energy by the year 2013. ( <a href="http://www.snoworld.org/en/ourwork/Pages/Africa_Biogas_Partnership_Programme.aspx">http://www.snoworld.org/en/ourwork/Pages/Africa_Biogas_Partnership_Programme.aspx</a> )

The initiatives vary between EUR 140 000 and EUR 2.200.000 and include Jatropa oil, solar power, biomass, micro-hydro power.
NL	DRC, Central African Republic, Ghana, Indonesia, Colombia	REDD+	REDD Forest Carbon Partnership + FLEGT	2010-2018	FCFP/WB	13.37	grant	Includes the Forest Carbon Partnership facility, the FLEGT under programming and the early implementation of REDD+ in the Colombian Amazon
NL	Mali, Mozambique, Uganda, Ghana, Kenya, Indonesia, Vietnam	adaptation and mitigation	Consultative Group on International Agricultural Research (CGIAR)	2011-2012	CGIAR Trust Fund WB	2.00	grant	The CGIAR Research Program aims to integrate the functions and services of forest ecosystems into food security, water and energy services, climate mitigation and adaptation, and the wood chain.
NL	Indonesia	adaptation	Adaptation and water management	2011-2013	JCP / BMKG / PusAir / KNMI / Deltares	1.18		Aim of this collaboration is to establish long-term knowledge sharing and capacity building with the partners in Indonesia regarding planning and management of salt- and freshwater systems in the light of increased climate change.
NL	Cambodia, China, Fiji, India, Indonesia, Lao, Mongolia, Papua New Guinee, Philippines, Solomon Islands, Thailand, Timor-Leste, Tonga, Vanatu, Vietnam	mitigation	Asian Sustainable and Alternative Energy Programme (ASTAE)	2011-2013	WB	7.80	grant	Includes the ASTEA program. Under programming. The mandate is to scale up the use of sustainable energy options in Asia to reduce energy poverty and protect the environment. Achieving this objective rest on promoting ASTEA's three pillars for sustainable development: renewable energy, energy efficiency and access to energy.
NL	60 countries	adaptation and mitigation	Climate Development and Knowledge Network		CDKN/ DfID	10.32	grant	The CDKN provides 'demand' driven research and policy advice on climate cahnge issues.
NL	not yet decided	adaptation	UNFCCC-GEF - Least Developed Country Fund	2012-1214	GEF/WB	25.00	grant	The Least Developed Countries Fund (LDCF) was established to support a work programme to assist Least Developed Country Parties (LDCs) carry out, inter alia, the preparation and implementation of national adaptation programmes of action (NAPAs).  The Global Environment Facility (GEF), as an operating entity of the financial mechanism of the Convention, has been entrusted to operate this Fund through decision 27/CP.7.
NL	not yet decided	adapration	Agricultural Smallholder Adaptation Programme	2012-2015	IFAD	20.00	grant	ASAP adresses the problem that that small agricultural production systems and farmers in LDCs are highly vulnerable to the more extreme and more variable weather circumstances that are caudes by climate change.
NL	Various	adaptation	Water, adaptation and strategic assessments	2011-2014		4.52	grant	Includes integrated water management and start-up cost of the sustainable water fund as well as strategic environmental impact assessments
NL	Rwanda	mitigation	Nat.Programme Ren.Energy Rwanda	2010-2012	GoR-BTC WB	23.97	grant	The programme in Rwanda encompasses a contribution to the national Energy Strategy, the National Strategy for reforestation and sustainable forest management and the introduction of renewable energy technologies. The focus of the Dutch funded activities is on small scale hydropower, biogas, and sustainable production of firewood. Rwanda takes also part in the regional Great Lakes programme of the Netherlands.
NL	Various	mitigation	IFC Private sector renewable energy and energy window under NIPP	2011-2012	IFC	9.91	grant	Renewable energy window under the Netherlands IFC Partnership Programme and Energy Sector Management Assistance Programme (ESMAP) providing support to the development of the energy sector in developing countries.
NL	Various	mitigation	WB Clean Energy Investment Framework (CEIF)	2011-2012	WB	9.03	grant	The WB Clean Energy Investment Framework (CEIF) programme provides support to developing countries to improve access to renewable energy. Sector investment plans are developed and implemented.
PL	Afghanistan	Adaptation	Mechanical sewage treatment plant building in Ghazni	2010	Ministry of Defence	0.49	Grant	The overall aim of the investment is to improve hygiene and sanitary conditions and raise standards of living in Ghazni
PL	Ukraine	Adaptation	Energy efficiency planning for the benefit of budget and climate in Ukraine	2010	Polish-Ukrainian Cooperation Foundation PAUCI	0.12	Grant	Increasing energy efficiency in the municipal households by introducing energy management professional principles in selected cities in Ukraine and information and educational campaign in local schools

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
PL	Ukraine	Adaptation	Exchange of experience between the Polish agricultural advisory and Ukraine in the field of agricultural development including environmental and renewable energy sources	2010	The Warmia and Masuria Center of Agricultural Advisory Support	0.12	Grant	Contribution to the development of agriculture and implementation of environmental programs and renewable energy sources
PL	Ukraine	Adaptation	Two countries - one energy efficiency programme. Polish-Ukrainian cooperation in the supranational European Commission initiative entitled Covenant of Mayors	2010	Association of Municipalities - Polish Network "Energie Cites"	0.09	Grant	Natural resources sustainable management by implementing energy efficiency programmes, using renewable energy sources and engaging in activities aimed at climate protection
PL	Ukraine	Adaptation	An exchange of experience in the field of system solutions and good practices in energy efficiency in Poland and Ukraine	2010	Association for Innovation and Technology Transfer "Horizons"	0.04	Grant	Developing active attitudes of Ukrainian partners through the acquisition of knowledge and European experience in energy efficiency
PL	Belarus	Adaptation	Institutional strengthening of the Belarusian administration responsible for protection of the environment through the promotion of good governance in selected areas	2010	Ministry of Environment	0.03	Grant	Strengthening of the administrative capacity of environmental protection in the Republic of Belarus to develop policies and implement environmental law consistent with European standards in a manner commensurate with the principles of good governance
PL	Afghanistan	Mitigation	Hydroelectric power station in Gelan	2010	Ministry of Defence	0.07	Grant	The overall objective of the project is to increase access to electricity in Gelan town
PL	Georgia		Support for the reform of forestry - protection of forests by strengthening the competence of foresters	2010	Polish Embassy in Georgia	0.06	Grant	Implementation of forest resources management plans
PL	Georgia		Preparation of a concept model of forestry in Georgia in the example of the Racha Region	2010	Forest Research Institute	0.05	Grant	The reform of Georgia's forest management based on the principles of sustainable development
PL	Georgia		Forestry Education in schools in Kvemo Kartli in Georgia	2010	Polish Embassy in Georgia	0.04	Grant	Support for the development of civil society through the increased involvement of teachers and youth in environmental protection
PL		Adaptation	Workshop for WMO Information and Public Affairs Focal Points of regional Associations	2011	Institute of Meteorology and Water Management - National Research Institute	0.04	Grant - 50%	Workshop focused on improving the collection of meteorological data, better communication between the meteorological services worldwide
PL	China	Disaster risk reduction, Adaptation	Fire fighting cars and extinguishing equipment	2010-2012	Ministry of Finance	9.57	Credit	Enhance the capacity to combat disasters increased by climate change
PL	Armenia	Adaptation	Water supply	2012	Ministry of Foreign Affairs	0.02	Grant	Improvement of the water supply system in the rural area
PL	Autonomous Republic Crimea	Mitigation	Energy efficiency	2012	Association for Innovation and Technology Transfer "Horizons"	0.04	Grant	Promoting development of innovative, energy efficient technology
PL	Azerbaijan	Mitigation/Adaptation	Capacity building	2012	Ministry of Foreign Affairs	0.04	Grant	Capacity building in the area of environment protection and good governance
PL	Egypt	Mitigation	Promotion of the renewable energy	2012	Ministry of Foreign Affairs	0.01	Grant	Contribution to the construction of the solar panel system for educational purposes
PL	Ethiopia	Adaptation	Water management	2012	International Institute of the Polish Academy of Science - European Centre for Ecohydrology	0.06	Grant	Building of the capacity: implementation of the eco-hydrology into the water management and sustainable development in Ethiopia
PL	Kenya	Adaptation	Access to water	2012	Ministry of Foreign Affairs	0.01	Grant	Building of the water supply installation in the rural area in Kenya
PL	Kyrgyzstan	Adaptation	Water management	2012	East-European Democratic Center	0.11	Grant	Improved access to water in the Fergana Valley

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
PL	Kyrgyzstan	Adaptation	Access to water	2012	Ministry of Foreign Affairs	0.01	Grant	Improvement of the access to water in the rural area
PL	Moldova	Mitigation	Energy efficiency	2012	Ministry of Foreign Affairs	0.02	Grant	Improvement of the heating system in local, social facilities
PL	Moldova	Mitigation	Eco-technologies for agriculture	2012	Social Ecological Institut	0.14	Grant	Innovative eco-technologies for sustainable agriculture in Moldova
PL	Nigeria	Adaptation	Access to water	2012	Ministry of Foreign Affairs	0.01	Grant	Improvement of the access to water in the rural area
PL	North Korea	Adaptation/Mitigation	Installation of the solar system and improvements in the water delivery system	2012	Ministry of Foreign Affairs	0.02	Grant	projects made in the rural area
PL	Palestine	Adaptation	Access to water	2012	Ministry of Foreign Affairs	0.07	Grant	Building of the water supply and water recycling installation in the rural area in Palestine
PL	Palestine	Adaptation	Water management	2012	Polish Humanitarian Action	0.09	Grant	Improved access to water in Hebron district
PL	Tanzania	Mitigation	Renewable energy	2012	Polish Green Network	0.06	Grant	Project aims to improve access to renewable energy at the rural area in Tanzania
PL	Ukraine	Mitigation	Energy saving	2012	Ministry of Foreign Affairs	0.04	Grant	Energy saving improvements in the local educational facilities
PL	Ukraine	Mitigation	Energy efficiency	2012	Local organisation - Warmiński Zakątek	0.09	Grant	Promotion of the efficient city lighting
PT	Guinea-Bissau	Adaptation	Access to water	2010	VIDA	0.25	Grant	Support to the local Communities of Mamelamu in water sector, improvement of the local communities access to water
PT	São Tomé and Príncipe	Mitigation	Solar panels in schools	2010	TESE	0.17	Grant	Support to the education sector toward the improvement of the access to modern sources of energy
PT	Cape Verde		Supporting participation of Cape Verde delegates in the UNFCCC process	2010	CECAC	0.02	Grant	Participation by developing countries in UNFCCC meetings in 2010
PT	Mozambique	Mitigation, Adaptation	MoU on Fast Start support	2010-2012	to be defined on a project by project basis	9.00	Grant	Support programme to assist Mozambique in implementing climate change related programmes and projects with particular focus on capacity building for mitigation and adaptation.
PT	East Timor	Mitigation, Adaptation	MoU on Fast Start support	2010-2012	to be defined on a project by project basis	1.50	Grant	Support programme to assist East Timor in implementing climate change related programmes and projects with particular focus on capacity building for mitigation and adaptation (including DNA support).
PT	Guinea-Bissau	Mitigation, Adaptation	MoU on Fast Start support	2010-2012	to be defined on a project by project basis	1.50	Grant	Support programme to assist Guinea-Bissau in implementing climate change related programmes and projects with particular focus on capacity building for mitigation and adaptation (including DNA support).
PT	Angola	Mitigation/Adaptation	MoU on Fast Start support	2010-2012	to be defined on a project by project basis	9.00	Grant	Support programme to assist Angola in implementing climate change related programmes and projects with particular focus on capacity building for mitigation and adaptation.
PT	Cape Verde	Mitigation, Adaptation	MoU on Fast Start support	2010-2012	to be defined on a project by project basis	1.50	Grant	Support programme to assist Cape Verde in implementing climate change related programmes and projects with particular focus on capacity building for mitigation and adaptation (including DNA support).
PT	São Tomé and Príncipe	Mitigation, Adaptation	MoU on Fast Start support	2010-2012	to be defined on a project by project basis	1.50	Grant	Support programme to assist Sao Tomé and Príncipe in implementing climate change related programmes and projects with particular focus on capacity building for mitigation and adaptation (including DNA support).
RO	Various (LDC)	Adaptation		2011	GEF (LDC) voluntary contribution	0.15	Grant	
RO	Various			2010	UNFCCC (voluntary contribution)	0.10	Grant	Grant transferred to the UNFCCC based on a bilateral agreement directing the sum towards the UNFCCC's Trust Fund for Supplementary Activities(Group of Experts for LDCs, capacity building for developing countries, technology transfer framework etc.)
RO	Various (LDC)	Adaptation	Allocation from the MFA's ODA budget	2012	UNFCCC voluntary contribution	0.18	Grant	Grant transferred to the UNFCCC based on a bilateral agreement directing the sum towards the UNFCCC's Trust Fund for Supplementary Activities
SE	Various	REDD+		2010	GEF additional contribution	11.60	grant	
SE	Various	Adaptation		2011-2012	Least Developed Countries Fund	33.00	grant	
SE	Various	REDD+		2011	CIF - Forest Investment programme (FIP)	11.60	grant

SE	Mali	Adaptation	Climate Change RESO Mali	2010-2012	Le Mali-Folkcenter Nyetaa	4.30	Grant	Resource fund for local initiatives by NGOs in climate change adaptation work.
SE	Regional Africa	Adaptation	Regional Climate Change Adaptation Programme in Southern Africa	2010-2012	One World/DFID	1.80	Grant	To enable transboundary adaptation to climate change, with equitable access to climate funding, in southern Africa.
SE	Cambodia	Adaptation	Cambodia Climate Change Alliance	2010-2014	Govt of Cambodia/UNDP	3.20	Grant	Support to EC-CCCA Multi Donor Trust Fund, strengthening institutional capacity for CCA coordination and coastal zone management
SE	Bangladesh	Adaptation	Bangladesh Climate Change Resilience Fund	2010-2012	Govt of Bangladesh	8.60	Grant	A Multi Donor Trust Fund administered by World Bank to support implementation of Bangladesh Climate Change Strategy and Action Plan, endorsed by the elected government in September 2009
SE	Regional Asia	Adaptation	Wetlands Alliance II	2010-2012	Wetlands Alliance	2.80	Grant	Alliance of development partners committed to a progress of regional collaboration to strengthen local level capacity for sustainable poverty focused wetlands management and adaptation to climate change.
SE	Bolivia	Adaptation	PROAGRO Phase II - joint programme with GIZ (Germany) and Bolivian Government	2010-2014	GIZ/Govt of Bolivia	6.60	Grant	Increasing resilience among small farmers in arid and semi-arid areas, increasing their return from agricultural production, while ensuring food security.
SE	Bolivia	Adaptation	Periurban Water and Sanitation (co-financed with EU Commission)	2010-2013	Govt of Bolivia	2.50	Grant	Applying defined parameters for Climate Change adaptation aspects (with well-defined technical descriptions and indicators) to a major program for access to water and sanitation in towns with at least 10,000 inhabitants
SE	Mali	Adaptation - REDD	Climate Change Initiative GEDEFOR adaptation	2010-2012	Ministry of Environment, Gov of Mali	3.10	Grant	Adaptation of existing program for forest management decentralisation to ensure incorporated climate adaptation perspective.
SE	Regional Africa	REDD	RFGI (Regional Forest Governance Initiative)	2010-2012	CODESRIA/IUCN	3.60	Grant	An applied research cooperation among CODESRIA, IUCN and University of Illinois to increase the knowledge about critical elements for a well-functioning local forest governance and to increase the possibilities for REDD+ (Reducing Emissions from Deforestation and Degradation)to benefit poor, forest dependant groups.
SE	Burkina Faso	Adaptation	Water Reservoir project	2010-2013	Ministry of Hydrology and Water Resources	7.40	Grant	Support to the GoBF in the rehabilitation and maintenance of dams damaged by the recent floods
SK	Various	Various	Granted Scholarships for Foreign Students	2011	Ministry of Education, Science, Research and Sport	0.16	Grant	Granted Scholarships for students from different developing countries who study in the field of environment and land protection, ecology and environmental sciences.
SK	Serbia	Mitigation	Construction of Sewage Treatment Plant and 1st Phase of Canalization Network for town Kovacica	2009 - 2012	SAIDC	0.22	Grant	Construction of the 1st phase of canalization network of the town Kovacica - canalization network, sewage treatment plant and main collector.
SK	Serbia	Adaptation	Ecological Agriculture Production System Construction on the EU Level in Serbia	2009-2011	SAIDC	0.15	Grant	Construction of an ecological agriculture production system on the EU level.
SK	Sudan	Adaptation /agriculture and water/	Restarting of Farming with Modern Technology at Maridi, South Sudan	2010-2011	SAIDC	0.19	Grant	The project will promote sustainable farming and strengthen capacities. The building of irrigation system will reduce the dependence on the weather and affect the local climate in positive way. The ambition of the project is also to offer applicable solutions how to resolve consequences of climate changes in the agricultural sector.
SK	Kenya	Adaptation /capacity building/	Forest Protection Strategy for Improved Carbon Balance and Preservation of Biodiversity Despite Climate Change	2010-2011	SAIDC	0.12	Grant	The overall objective is to suggest a list of action for protection of forest resources, sustaining of carbon deposits in forests and improvement of forest management in order to increase carbon deposits and assure preservation of biodiversity of forest ecosystems despite climate change and land desertification.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
SK	Kenya	Mitigation /technology/	Utilization of Solar Energy in Kenya	2010-2011	SAIDC	0.21	Grant	The overall aim is to develop a series of photovoltaic complexes in rural areas of Kenya, i.e. regions without regular electricity supply and without distribution lines. Further solar electricity produced will be used for purification and disinfection of drinking water to increase the hygienic standards of local community and enhance the overall living conditions.
SK	Serbia	Mitigation /technology/	Solar Energy for Handicapped Children in Serbia	2010-2011	SAIDC	0.16	Grant	Installation of solar thermal technology for all day care facilities for handicapped children and young people. The installed solar thermal technology will include solar collectors, heat exchangers, water tanks and complete equipment for solar heating of domestic hot water.
SK	Kenya	Other mitigation (capacity building for MRV) Adaptation	Capacity Building for Activities Concerning Climate Change MRV System and Adaptation	2010-2011	SAIDC	0.10	Grant	Capacity building on preparing national communications on climate change, development of monitoring, reporting and verification systems for mitigation policies and measures; training on development and implementation of methodology to quantify reduction potential of policies and measures; development and trainings on methodology for correlation between climate change impacts and vulnerability assessment.
SK	Montenegro	Adaptation	Mobile Flood Protection of Cities and Municipalities in Montenegro -FLOODefence.ME	2011-	SAIDC	0.20	Grant	Mobile flood protection of cities and municipalities in Montenegro with an accent on immediate engagement and compatibility with procedural and organizational standards of EU.
SK	Kenya	REDD+	Mau Forest Ecosystem Degradation Reduction	2011-	SAIDC	0.30	Grant	Reduction of the forest ecosystem degradation through active involvement of local communities.
SK	Montenegro	Adaptation	Flood Protection Aid for Montenegro	2011 - 2012	SAIDC	0.20	Grant	Flood protection aid.
SK	Bosnia and Herzegovina	Mitigation	Solar and Water Energy Sources Mapping in Bosnia and Herzegovina	2011 - 2012	SAIDC	0.16	Grant	Mapping of solar and water energy sources.
SK	Georgia	Adaptation	EU Directive on Assessment and Management of Flood Risks in Georgia Implementation Process Support	2011 - 2013	SAIDC	0.08	Grant	Support of the implementation process of the EU directive on assessment and management of flood risks.
SK	Kyrgyzstan.	Mitigation	EBRD Technical Cooperation Fund	2011-2012	EBRD/ Slovak consultant	0.27	Grant	Technical assistance to the Kirgizstan national authorities responsible for implementation of the legislation on energy efficiency of buildings, including but not limited to the State Agency on Architecture and Construction of the Kyrgyz Republic on setting institutional capacities for practical implementation of the new legislation on energy efficiency in buildings in Kyrgyzstan.
SK	Kenya	Adaptation	Drinking Water Source	2012-	SAIDC	0.15	Grant	Drinking water source from a deep well for the rural population.
SK	Various	Mitigation	Contribution to the Technical Co-operation Fund SR - EBRD	2010	Ministry of Finance	0.13	Grant	Financial contribution to the Technical Co-operation Fund Slovak Republic - EBRD dedicated to support projects of Slovak private sector in developing countries in the field of energy efficiency, renewable energy sources and climate change mitigation.
SK	Various	Various	Granted Scholarships for Foreign Students	2012	Ministry of Education, Science, Research and Sport	1.63	Grant	Granted Scholarships for students from countries, which represent territorial priorities of ODA of Slovakia.
SK	Various	Various	Granted Scholarships for Foreign Students	2010	Ministry of Education, Science, Research and Sport	0.11	Grant	Granted Scholarships for students from different developing countries who study in the field of environment and land protection, ecology and environmental sciences.
SK	Afghanistan	Adaptation/Mitigation	Higher Expert Education in Parwan Province	2012-	SAIDC	0.27	Grant	Higher expert education through accredited study programs in Parwan province.
SK	Kenya	Adaptation/Mitigation	Agricultural Development and Natural Resources Conservation	2012-	SAIDC	0.27	Grant	Improving economic and food security through agricultural development and natural resources conservation.
SK	Kyrgyzstan	Adaptation	Rice from Uzgen - Poverty Reduction Strategy and Small-Scale Enterprise Development through Traditional Agriculture in Southern Kyrgyzstan	2010 - 2012	SAIDC	0.10	Grant	Slovak - Kyrgyz scientific and technical co-operation through performing and documenting for the coordinator and orderer of activities linked with realization of research activities during rice genotype testing and assessment
SK	South Sudan	Adaptation/Mitigation	Sustainable Agri-Business for Eira	2012-	SAIDC	0.19	Grant	Sustainable agri-business.
SK	Turkey	Mitigation	EBRD Technical Cooperation Fund	2011 - 2012	EBRD/ Slovak consultant	0.28	Grant	Bodrum Water Project – Corporate Development Programme. The Project focuses on (i) purchasing leak detection equipment and pipe replacements in order to reduce water losses; and (ii) connecting new customers to the City's network.
SK	Turkey	Mitigation	EBRD Technical Cooperation Fund	2012 - 2013	EBRD/ Slovak consultant	0.30	Grant	Mersin Wastewater - the objective of this technical co-operation is to bring transition impact through the institutional strengthening of the Mersin Water and Sewage Administration and further commercialisation of the water sector in Mersin.
SL	Western Balkans	Mitigation and Adaptation	Conference on Preparation of Low Carbon National Strategies	2011	Government	0.01	grant	2011 disbursement

UK	International	Adaptation	Pilot Program for Climate Resilience (PPCR)	2010-11			Mix	The Pilot Programme for Climate Resilience (PPCR) is part of the Climate Investment Funds. This programme supports developing countries to integrate climate risk and resilience into their development plans, and provide substantial programmatic resources to public and private sector investments identified in those plans.
						234.1040522		

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
UK	International	Mitigation	Clean Technology Fund (CTF)	2010-11		179.6342975	Capital	One of the Climate Investment Funds, the Clean Technology Fund provides developing countries with positive incentives to scale up the demonstration, deployment and transfer of technologies with a high potential for long-term green house gas emissions savings.
UK	International	Mitigation	World Bank Clean Technology Fund (CTF)	2011-12		178.7038586	Capital	One of the Climate Investment Funds, the Clean Technology Fund provides developing countries with positive incentives to scale up the demonstration, deployment and transfer of technologies with a high potential for long-term green house gas emissions savings.
UK	Global	Adaptation	IFAD Smallholder Adaptation Programme	2012	IFAD (UN)	123.3242415	Grant	UK contribution to a programme of the International Fund for Agricultural Development aiming to increase the resilience of poor smallholder farmers to climate change.
UK	International	REDD+	Forest Investment Programme (FIP)	2010-11		73.01264995	Capital	The FIP supports developing country efforts to reduce deforestation and forest degradation and promote sustainable forest management that leads to emissions reductions and enhancement of forest carbon stocks (REDD+).
UK	International	Adaptation	World Bank Pilot Programme for Climate Resilience (PPCR)	2011-12		67.90746625	Mix	The Pilot Programme for Climate Resilience (PPCR) is part of the Climate Investment Funds. This programme supports developing countries to integrate climate risk and resilience into their development plans, and provide substantial programmatic resources to public and private sector investments identified in those plans.
UK	Global	Mitigation	Climate Public Private Partnership (CP3) Platform	2012		63.26533591	Grant	The UK will invest £130 million in 2 commercial private equity funds, which will aim to leverage private co-investment. These funds will be run on a strictly commercial basis by professional fund managers. As well as an equity investment of £110 million, the project will include technical assistance to support the development of the project pipeline and facilitate pioneering projects.
UK	Global	Mitigation	International Carbon Capture and Storage Capacity Building	2012	World Bank and Asian Development Bank	61.56346137	Grant	Build developing country capacity to deploy carbon capture and storage technologies. The UK will provide £60 million of finance from the International Climate Fund (ICF) to support developing countries to develop both the technical and institutional knowledge necessary to enable the deployment of CCS technologies. Financial support would be channelled toward a range of projects with the aim of ensuring sufficient political support is created to pave the way for full scale demonstration and ultimately the deployment of CCS
UK	Global	Mitigation	Clean Technology Fund (CTF)	2012		56.72915111	Capital	One of the Climate Investment Funds, the Clean Technology Fund provides developing countries with positive incentives to scale up the demonstration, deployment and transfer of technologies with a high potential for long-term green house gas emissions savings.
UK	International	REDD+/Mitigation	Global Environment Facility (GEF) - climate change element	2011-12		50.0370804	Grant	Mitigation and biodiversity-related funding through GEF. An independent financial organization, the GEF provides grants to developing countries and countries with economies in transition for projects related to biodiversity, climate change, international waters, land degradation, the ozone layer, and persistent organic pollutants. These projects benefit the global environment, linking local, national, and global environmental challenges and promoting sustainable livelihoods.
UK	International	All	Research and Evidence Programmes	2011-12		42.50316637	Grant	International Research and Evidence Programmes
UK	International	Mitigation	Scaling-up Renewable Energy Program (SREP)	2010-11		40.56258331	Capital	The UK's contribution to the Scaling Up Renewable Energy programme, part of the Climate Investment Funds. This provides funding for scaling up the deployment of renewable energy solutions in the world's poorest countries.
UK	Congo Basin	REDD+	Congo Basin Forest Fund (CBFF)	2010-11		40.56258331	Grant	The Congo Basin Forest Fund (CBFF) is a multi-donor fund set up in June 2008 to take early action to protect the forests in the Congo Basin region.
UK	International	All	Research and Evidence Programmes	2010-11		39.40554025	Grant	International Research and Evidence Programmes
UK	Global	Adaptation	Pilot Programme for Climate Resilience (PPCR)	2012	World Bank Group	36.99727246	Mix	The Pilot Programme for Climate Resilience (PPCR) is part of the Climate Investment Funds. This programme supports developing countries to integrate climate risk and resilience into their development plans, and provide substantial programmatic resources to public and private sector investments identified in those plans.
UK	Global	Mitigation	Climate Investment Funds: Scaling Up Renewable Energy (SREP)	2012	World Bank Group	30.83106038	Capital	The UK's contribution to the Scaling Up Renewable Energy programme, part of the Climate Investment Funds. This provides funding for scaling up the deployment of renewable energy solutions in the world's poorest countries.
UK	Africa	Mitigation	Green Africa Power	2012		30.83106038	Grant	Green Africa Power (GAP) has been developed jointly by the UK Department of Energy and Climate Change (£25m) and UK Department for International Development (£53m) and in total the UK is contributing £98million over 2012 to 2015 to tackle specific constraints to private sector investment in renewable power generation in Africa. The UK will provide £95 million to capitalise GAP - a new company that will be established under the Private Infrastructure Development Group (PIDG) Trust. GAP will invest in renewable energy projects to demonstrate the viability of renewable energy in Africa so that future projects are more likely to happen and attract private developers and investors. A further £3 million will be used to set up the project, monitor and evaluate these impacts and capture and disseminate this knowledge. GAP aims to support projects that will install ~270MW of renewable energy in Africa in 4 years, avoiding an estimated 2.3m tonnes of CO2 emissions.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
UK	Global	Mitigation	Nationally Appropriate Mitigation Actions (NAMA) Facility	2012		30.83106038	Grant	The NAMA Facility is designed to support developing countries that show strong leadership in tackling climate change and want to implement transformational Nationally Appropriate Mitigating Actions (NAMA). Transformational NAMAs are projects, policies, or programmes that shift a whole technology or sector in a country onto a low-carbon development trajectory. Developing countries are preparing NAMAs as part of their national strategies. However, it is difficult to access finance through existing commercial and public channels to finance implementation, particularly for the most innovative NAMAs. By applying a competitive selection process the Facility will improve the value for money and quality of NAMAs and enable their implementation. It is intended that the Facility will support investments across a range of countries and sectors with grant funding as well as loan finance.
UK	International	Mitigation	Scaling-up Renewable Energy Program (SREP)	2011-12		29.78397643	Capital	The UK's contribution to the Scaling Up Renewable Energy programme, part of the Climate Investment Funds. This provides funding for scaling up the deployment of renewable energy solutions in the world's poorest countries.
UK	International	REDD+	Climate Investment Funds: FIP	2011-12		29.78397643	Capital	The FIP supports developing country efforts to reduce deforestation and forest degradation and promote sustainable forest management that leads to emissions reductions and enhancement of forest carbon stocks (REDD+).
UK	International	Adaptation	Least Developed Countries Fund	2011-12		26.20989925	Grant	To address the special needs of the 48 Least Developed Countries (LDCs), which are especially vulnerable to the adverse impacts of climate change. Fund established by the UNFCCC and managed by the Global Environment Facility (GEF).
UK	Global	REDD+ / Mitigation	Global Environment Facility (GEF) - climate change element	2012	Global Environment Facility	25.89809072	Grant	UK funding for climate change mitigation programmes through the Global Environment Facility (GEF). An independent financial organization, the GEF provides grants to developing countries and countries with economies in transition for projects related to biodiversity, climate change, international waters, land degradation, the ozone layer, and persistent organic pollutants. These projects benefit the global environment, linking local, national, and global environmental challenges and promoting sustainable livelihoods.
UK	Brazil	REDD+	Low Carbon Agriculture in Brazil and Avoided Deforestation to Reduce Poverty in Brazil	2012	Inter-American Development Bank	24.66484831	Grant	This project will restore deforested and degraded land on small and medium sized farms in the Amazon and Atlantic Forest regions, contributing to the Government of Brazil's Sectorial Plan for the Mitigation and Adaptation of Climate Change for a Low Carbon Emissions Agriculture. It will achieve significant greenhouse gas emissions abatement, biodiversity conservation benefits and poverty reduction and involves work with farmers to develop and implement restoration and low carbon agriculture plans to unlock in-country credit from Brazilian banks.
UK	Global	All	Climate Research	2012	Mixed	18.9919332	Grant	Funding for a range of international research and evidence programmes
UK	Colombia	REDD+	Silvopastoral systems for climate change mitigation	2012		18.49863623	Grant	The UK is providing a £15m grant over 2012 to 2016 to support the growth of silvopastoral systems (SPS) in Colombia to reduce greenhouse gas emissions, improve the livelihood of farmers, protect local forests and increase biodiversity. Agriculture is one of the biggest sources of greenhouse gas emissions in Colombia and many other developing countries, and a key driver of deforestation. Addressing this fact, the UK and partners are working with cattle ranchers to improve degraded grazing land by using SPS. This means managing the land in a different way: planting trees, shrubs, fodder crops and living fences and conserving existing forest.
UK	Global	REDD+	Forest Governance Markets and Climate (FGMC)	2012		14.42523653	Grant	This programme aims to reduce the illegal use of forest resources and benefit poor people through better governance and market reforms in developing countries. It combines support to actions by forest nations to tackle illegal logging and forest clearance for agriculture, with progress in consumer countries to curb demand for illegally-sourced products. It will expand the lessons learnt under past work on timber to other commodity markets that drive deforestation, such as palm oil, soy, beef and leather.
UK	International	Mitigation	GLOBAL ENVIRONMENT FACILITY (CLIMATE COMPONENT) (GCF)	2010-11		13.52124741	Grant	To provide funding to developing countries and those with economies in transition for projects and activities targeting global benefits in the area climate change
UK	International	All	FCO Prosperity Fund	2010-11		12.63674552	Grant	The Prosperity Fund supports projects to create the political and economic conditions for sustainable global growth and development. The portion of spend recorded here relates to spend on climate change in the major industrialising countries.
UK	International	All	FCO Prosperity Fund	2011-12		12.29066524	Grant	The Prosperity Fund supports projects to create the political and economic conditions for sustainable global growth and development. The portion of spend recorded here relates to spend on climate change in the major industrialising countries.
UK	International	Adaptation	Adaptation Fund	2011-12		11.91514529	Grant	Support to range of developing countries to implement concrete adaptation projects and programmes, with a focus on vulnerable communities.
UK	Brazil	REDD+	Reducing Deforestation in the Brazilian Cerrado	2011-2012	World Bank	11.91359057	Grant	This project aims to reduce rates of deforestation by supporting registration of land ownership under the Rural Environment Register to ensure compliance with the Brazilian Forest Code. It also provides technical assistance to help farmers with the restoration of vegetation on illegally cleared land. It promotes the gathering and marketing of products from natural Cerrado vegetation and supports measures to prevent and deal with forest fires – a major driver of deforestation.
UK	International	REDD+	Forest Carbon Partnership Facility (FCPF)	2010-11		11.58930952	Grant	The Forest Carbon Partnership Facility (FCPF) assists developing countries in their efforts to reduce emissions from deforestation and forest degradation and foster conservation, sustainable management of forests, and enhancement of forest carbon stocks by providing value to standing forests.
UK	Global	Adaptation	Least Development Country Fund (LDCF)	2012	Global Environment Facility / UNFCCC	9.865939323	Grant	UK contribution to the Least Development Country Fund, which addresses the special needs of the 48 Least Developed Countries (LDCs), which are especially vulnerable to the adverse impacts of climate change.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
UK	International	Mitigation	Carbon Markets Readiness Fund (Partnership for Market Readiness)	2011-12		8.339513399	Grant	The Department of Energy & Climate Change (DECC) has given £7 million to the PMR, which is a grant-based trust fund that helps middle-income countries develop and pilot market-based policies to reduce greenhouse gas emissions. The PMR brings together policy makers from governments with experts and stakeholders to provide a platform for piloting these market-based policies. It builds on developing countries' own mitigation priorities and recipient countries include Chile, Colombia, Costa Rica, Mexico, China, Indonesia, Thailand, Turkey and the Ukraine.
UK	Global	All	FCO Prosperity Fund	2012		7.769427217	Grant	The Prosperity Fund supports projects to create the political and economic conditions for sustainable global growth and development. The portion of spend recorded here relates to spend on climate change in the major industrialising countries.
UK	Africa	Adaptation	Climate Change adaptation Africa research	2010-11		7.440184889	Grant	To help improve the capacity of African countries to adapt to climate change in ways that benefit their most vulnerable citizens.
UK	Global	REDD+	Forest and Climate Knowledge	2012		7.140473585	Grant	UK investment in developing the latest knowledge and tools on forestry through organisations such as Rights and Resources Initiative (RRI), Global Programme on Forests (PROFOR), International Tropical Timber Organisation (ITTO) and the Centre for International Forestry research (CIFOR).
UK	International	Mitigation	Energy and Environment Partnership Programme with Southern and Eastern Africa	2012		6.289536318	Grant	The programme aims to provide low carbon private sector development through awarding co-financing to viable projects focusing on improving energy access for poor people, improving energy supply and energy efficiency by demonstrating new technologies.
UK	Indonesia	Mitigation	Promoting Low Carbon Development in Indonesia	2011-12		5.972707077	Mix	To demonstrate the viability of low carbon investment in Indonesia and which will then be funded by international and domestic capital.
UK	Global	Mitigation	Energy Sector Management Assistance Program and Asia Energy Policy Trust Fund	2012	World Bank	5.549590869	Grant	The Energy Sector Management Assistance Program (ESMAP) is a global, multidonor trust fund administered by the World Bank and funded by 13 bilateral donors - including the UK. ESMAP assists its clients - low- and middle-income countries - to increase know-how and institutional capacity in order to achieve environmentally sustainable energy solutions for poverty reduction and economic growth.
UK	International	Adaptation	Adaptation knowledge and tools on impacts	2011-12		5.521949229	Grant	This includes support to Adaptation Partnerships (£400k), Climate Resilient growth case studies (£100k), Social Protection (£500k), Adaptation contact group (£600k), Aid effectiveness lessons learned for climate finance (£500k), support to AfDB (£300k), M&E methodology (£2m), Economic guidance tools (£35k), Incentivising Private Sector action on adaptation (£100k) and Support to conflict-proofing ADA investments (£100k)
UK	International	Mitigation	Energy and Environment Partnership Programme with Southern and Eastern Africa	2011-12		5.361115757	Grant	The programme aims to provide low carbon private sector development through awarding co-financing to viable projects focusing on improving energy access for poor people, improving energy supply and energy efficiency by demonstrating new technologies.
UK	Global	All	CDKN (Climate & Development Knowledge Network)	2012		5.179618144	Grant	The UK is supporting the Climate and Development Knowledge Network (CDKN) to support developing countries successfully build resilience to climate change, enable low carbon growth and tackle poverty.
UK	International	All	CDKN (Climate & Development Knowledge Network)	2011-12		5.004844596	Grant	The UK is supporting the Climate and Development Knowledge Network (CDKN) to support developing countries to successfully build resilience to climate change, enable low carbon growth and tackle poverty. Decision-makers need access to the best available information, research and advice, such as basic climate impacts data and cost-benefit analysis of adaptation approaches.
UK	Kenya	All	Strengthening Adaptation and Resilience to Climate Change in Kenya (STARCK)	2011-12		4.833044663	Grant	The intended outcome of the programme is that new mechanisms are established by the Govt. of Kenya, private sector and civil society to enable substantially expanded investments for increased resilience to climate change.
UK	Africa	Adaptation	Cooperation in international waters in Africa	2010-11		4.749243411	Grant	To strengthen cooperative management and development of international waters within selected basins
UK	International	REDD+	Forest Governance Markets and Climate (FGMC)	2011-12		4.691112102	Grant	To reduce the illegal use of forest resources and benefit poor people through better governance and market reforms in developing countries.
UK	Southern Africa	Adaptation	REGIONAL TRANS BOUNDARY WATER RESOURCE MANAGEMENT	2010-11		4.635723806	Grant	To help ensure that River Basin Organisations have the authority and ability to deliver improved water resource management in at least 5 trans-boundary river basin organisations
UK	East and Central Africa	Adaptation	SUPPORT TO THE ASSOCIATION TO STRENGTHEN AGRICULTURE RESEARCH IN EAST AND CENTRAL AFRICA (ASARECA)	2010-11		4.635723806	Grant	To contribute to increased and sustainable productivity and competitiveness of the sub-regional agricultural system
UK	International	Adaptation	Support to Consultative Group for International Agricultural Research (CGIAR)	2010-11		4.345991068	Grant	To increase the contribution of agriculture and natural resources to food security, growth, poverty reduction, and environmental sustainability by increasing the relevance and impact of international agriculture and natural resources research
UK	Ethiopia	All	Strategic Climate Institutions Programme (SCIP)	2011-12		4.244071295	Grant	Activities to build Ethiopia's institutional capacity to respond to climate change. Includes working with private sector, government and civil society.
UK	International	REDD+	Forest governance and trade (FLEGT)	2011-12		4.064925442	Grant	Current support to tackling illegal logging and related trade in support of the EU Forest Law Enforcement Governance and Trade (FLEGT) Action Plan - ends September 2011.
UK	Nepal	All	SUPPORT TO CLIMATE CHANGE PROGRAMME	2010-11		3.145338603	Grant	To support the development of a strategic framework of action on climate change behind which stakeholders can align their response
UK	West and Central Africa	Adaptation	SUPPORT TO THE WEST AND CENTRAL AFRICAN COUNCIL FOR AGRICULTURAL RESEARCH AND DEVELOPMENT (WEFCARD/CORAF)	2010-11		2.897327379	Grant	To help increase both the quality and quantity of appropriate regional agricultural and natural resource management technologies and policies developed and adopted at the sub-regional level in West and Central Africa.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
UK	International	Adaptation	RESEARCH INTO USE PROGRAMME - SCALING UP OUTPUTS FROM DFID'S NATURAL RESOURCES RESEARCH	2010-11		2.653372414	Grant	To promote the production and uptake of technologies that will contribute to poverty reduction and the achievement of the Millennium Development Goals
UK	International	All	CLIMATE AND DEVELOPMENT KNOWLEDGE NETWORK (CDKN)	2010-11		2.64514864	Grant	That developing countries have improved access to high quality research and information in designing climate change policies and programmes by 2015.
UK	Southern Africa	All	REGIONAL CLIMATE CHANGE PROGRAMME	2010-11		2.549856701	Grant	To enable trans-boundary adaptation to climate change, with equitable access to climate funding, in Southern Africa
UK	Global	All	Advocacy Fund	2012		2.452919164	Grant	To support the very poorest developing countries to fully participate in the international climate change negotiations.
UK	Africa	Adaptation	PAN AFRICA DISASTER RISK POOL FOR FOOD SECURITY	2010-11		2.43602998	Grant	Design a potential programme to improve food security in Africa through regional risk financing that protects against the impact of climate related disasters.
UK	International	All	INTERNATIONAL CENTRE FOR TRADE AND SUSTAINABLE DEVELOPMENT STRATEGIC FRAMEWORK AGREEMENT	2010-11		2.093893861	Grant	To foster constructive dialogues and strengthen knowledge communities on trade and sustainable development.
UK	Asia Regional	Adaptation	South Asia Water Initiative (phase 2)	2012	World Bank	1.89919332	Grant	Continued UK support to provide funding for additional regional collaboration on the Sundarbans, Mt Kailash and for building broader accountability on hydropower and water management in the region.
UK	International	REDD+	Forest tenure	2011-12		1.819537669	Grant	To increase the global forest area under community tenure by supporting a civil society coalition Rights and Resources Initiative (RRI) that includes grassroots community and indigenous organisations.
UK	International	Adaptation	DISASTER RISK REDUCTION PROJECTS IN CONFLICT HUMANITARIAN FUND 2005	2010-11		1.760726709	Grant	Various projects involved in bringing about sustainable disaster risk reduction to communities, through education, livelihoods and international policy.
UK	Central Africa	REDD+	Congo Basin Forestry start-up fund	2010-11		1.74976554	Grant	Start-up funding for the interim establishment and operation of the Congo Basin Forest Fund (CBFF) and the delivery of a small regional project portfolio responding to immediate national and regional demands and pressures faced by the forests of the Congo
UK	Africa Regional	Adaptation	Climate Resilient Agriculture in Africa	2012		1.738871806	Grant	This DFID programme aims to improve knowledge, policies and longer-term incentives to drive increased use of 'climate smart' agriculture in eastern and southern Africa.
UK	International	Adaptation	COMBATING INFECTIOUS DISEASES OF LIVESTOCK (CIDLID) - TO HELP IMPROVE AGRICULTURAL PRODUCTION IN A CHANGING CLIMATE	2010-11		1.738396427	Grant	To support basic and strategic biological and biotechnological research in animal health that contributes to the achievement of the Millennium Development Goals through greater understanding of how to combat diseases of domesticated livestock that affect the livelihoods of poor people.
UK	Indonesia	REDD+	Indonesia Multistakeholder Forestry Programme II	2012		1.677209685	Grant	Support to Indonesia to implement EU/Indonesia agreement on timber accreditation
UK	International	All	Advocacy Fund	2011-12		1.658275307	Grant	To strengthen the voice of the poorest countries in international negotiations ensuring that their needs are reflected in international agreements.
UK	Africa	Adaptation	Nile Basin Discourse	2011-12		1.621831634	Grant	Regional and national engagement of civil society organisations on river Nile management and development related issues, especially in conjunction with the Nile Basin Initiative.
UK	Africa Regional	Adaptation	Support to trans-boundary water resource management in Southern Africa	2012		1.60321514	Grant	Strengthening the management of trans-boundary water resources in the Southern Africa Development Community region. Facilitating infrastructure investment and water demand management to increase the access of people to water, protection from flooding and efficient use of the scarce resource.
UK	Africa	Adaptation	Vulnerability analysis (RHVP)	2011-12		1.31056287	Grant	Regional Hunger and Vulnerability Programme.
UK	Africa	Adaptation	Community Adaptation Learning Programme (CARE)	2011-12	CARE International	1.255394606	Grant	CARE International will develop and pilot community-based adaptation (CBA) approaches for vulnerable communities in Ghana, Kenya, Mozambique and Niger. They will be incorporated into development policies and programmes, and disseminated for replication across Africa.
UK	Indonesia	REDD+	Improving Governance of Land Use, Land-Use Change and Forestry (LULUCF) in Indonesia	2012		1.220909991	Grant	Strengthen capacity of civil society and other non-state stakeholders to influence decision, policies and legislation on land-use and low carbon development
UK	International	All	CLIMATE SCIENCE RESEARCH	2010-11		1.21166231	Grant	To narrow the range of climate futures planners have to confront when designing resilient livelihood and development strategies for African regions/sub-regions.
UK	Kenya	Adaptation / mitigation	REACT Kenya	2012		1.208577567	Grant	A catalytic fund to stimulate private sector investment and innovation on renewable energy and climate adaptation technology, particularly in rural areas.
UK	Tanzania	Adaptation/mitigation	AECF Renewable Energy and Adapting to Climate Technologies (REACT) Private Sector Challenge Fund Tanzania Window	2012		1.206076551	Grant	Contribution to a catalytic fund to stimulate private sector investment and innovation on renewable energy and climate adaptation technology, particularly in rural areas.
UK	International	Adaptation	Climate Resilient Agriculture in Africa	2011-12		1.191359057	Grant	Working with the Tripartite RECs to address the food security and agriculture impacts of climate change.
UK	Africa	Adaptation	AFRICAN AGRICULTURAL TECHNOLOGY FOUNDATION (AATF) PHASE 2 OF DFID FUNDING, 2010 – 2013	2010-11		1.187200754	Grant	To facilitate public-private partnerships for the transfer, development, production and deployment of agricultural technology. AATF works closely with African farmers, scientists, businesses, NGOs to identify needs of poor farmers and to match these needs
UK	Global	REDD+	Forest tenure	2012		1.183912719	Grant	Increasing global forest area under community tenure by supporting a civil society coalition Rights and Resources Initiative (RRI) that includes grassroots community and indigenous organisations

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
UK	International	Adaptation	Support to World Bank Water Partnership Programme	2010-11		1.158930952	Grant	To help ensure that approaches to water resources management are mainstreamed and better quality and effective water service delivered to developing countries
UK	Vietnam	Adaptation/mitigation	Vietnam DFID-WB Climate Change Partnership (VNCLIP)	2012		1.109918174	Grant	A programme to support adaptation to the impacts of climate change and low carbon development in Vietnam.
UK	Kenya	Adaptation	Strengthening Adaptation and Resilience to Climate Change in Kenya (STARCK)	2012		1.09758575	Grant	The intended outcome of the programme is that new mechanisms are established by the Govt. of Kenya, private sector and civil society to enable substantially expanded investments for increased resilience to climate change.
UK	Indonesia	Mitigation	Indonesia Low Carbon Growth Project	2011-12		1.088082523	Mix	Programme of support to the Ministry of Finance to support it to develop policies, structures and financing mechanisms integral to Indonesia's low-carbon growth strategy.
UK	Africa Regional	REDD+	Community Adaptation Learning Programme (CARE)	2012		1.085253325	Grant	To increase the capacity of vulnerable households in sub-Saharan Africa to adapt to climate variability and change.
UK	International	Adaptation	ECO SYSTEM SERVICES FOR POVERTY ALLEVIATION	2010-11		0.963597775	Grant	To ascertain what institutional changes need to be put in place for ecosystem management to improve for the benefit of the poor.
UK	Indonesia	All	SUPPORT TO CLIMATE CHANGE PROGRAMME IN INDONESIA	2010-11		0.953508123	Grant	To provide support to the Investment and Policy framework for climate change adaptation and mitigation
UK	International	Adaptation	UN water support (FAO/WHO)	2010-11		0.927144761	Grant	To improve the management of water resources for economic growth, building resilience to climate change and supporting adaptation through the implementation of integrated water resources management.
UK	Africa	Adaptation	Southern Africa Regional Climate Change Programme (RCCP)	2011-12		0.921724718	Grant	RCCP will generate and disseminate information for policy makers and planners in the Southern Africa Development Community (SADC) region. It will help make informed choices and respond to climate change implications for development and support the capacity of regional negotiators in global climate fora. It has a particular focus on Southern Africa transboundary issues.
UK	International	Mitigation	POLICY INNOVATION SYSTEMS FOR CLEAN ENERGY SECURITY	2010-11		0.862550586	Grant	To advance evidence based learning on energy, delivery and sustainability to improve equity of access for poor people.
UK	International	Adaptation	UN DEVELOPMENT PROGRAMME'S BUREAU FOR CRISIS PREVENTION AND RECOVERY	2010-11		0.811251666	Grant	National and local capacities established and/or strengthened to prevent , mitigate and recover from natural disasters
UK	International	Mitigation	GVEP (Global Village Energy Partnership)	2011-12		0.807357823	Grant	To reduce poverty through accelerated access to modern energy services.
UK	South Asia	Adaptation	SOUTH ASIA WATER INITIATIVE	2010-11		0.789648034	Grant	To help develop the knowledge, relationships and institutions to enable significant and measurable improvements in international water resource management.
UK	Uganda	All	Parliamentary Forum on Climate Change (PFCC)	2012		0.690615753	Grant	Working with Uganda's Parliamentary Forum on Climate Change (PFCC) to help build their capacity, advocate and promote dialogue on mainstreaming climate change in local districts and building the capacity of local government officials on climate change issues.
UK	Overseas Territories	Adaptation/Mitigation	Overseas Territories Environment Programme' (OTEP) - Joint DFID/FCO Environmental Challenge Fund	2011-12		0.679042496	Grant	OTEP addresses priority environmental issues, including adaptation to climate change and renewable energy issues in Overseas Territories.
UK	Tanzania	Adaptation/Mitigation	AECF Renewable Energy and Adapting to Climate Technologies (REACT) Private Sector Challenge Fund Tanzania Window	2011-12		0.672493595	Grant	Catalytic fund to stimulate private sector investment and innovation on renewable energy and climate adaptation technology, particularly in rural areas.
UK	Africa	Mitigation	Renewable Energy and Adapting to Climate Technologies (REACT)	2011-12		0.672493595	Grant	A new window of the existing Africa Enterprise Challenge Fund to catalyse private sector investment and innovation in low cost, clean energy and climate change adaptation technologies.
UK	International	Adaptation	STRATEGY FOR DFID/INTERNATIONAL FEDERATION OF RED CROSS AND RED CRESCENT PARTNERSHIP - REDUCING VULNERABILITY TO DISASTERS	2010-11		0.660590642	Grant	Strengthen International Federation of the Red Cross and Red Crescent's capabilities in Field Operations and Preventative Action
UK	Caribbean	Adaptation	CDEMA CDM HIP (Caribbean Comprehensive Disaster Management (CDM) – Harmonised Implementation Programme)	2011-12		0.659528034	Grant	Provide institutional support for CDM implementation at national and regional level and community resilience to mitigate, respond and recover from the adverse effects of climate variability, change and disasters. Implementing agency - Caribbean Disaster Emergency Management Agency CDEMA)
UK	Asia	Adaptation	Climate Asia	2011-12		0.633919772	Grant	Create an evidence base for knowledge and attitudes on climate change across seven countries in Asia which will provide the information and tools to enable vulnerable communities and influencers make informed decisions and take effective action on climate change.
UK	International	Adaptation	OXFAM CONSORTIUM - BUILDING RESILIENCE TO CLIMATE RELATED HAZARDS	2010-11		0.619139159	Grant	To promote the increased use of evidence by governments and other development and humanitarian actors in developing and implementing policies and interventions that improve people's resilience to climate related hazards.
UK	Indonesia	REDD+	Degraded Land Mapping in Indonesia	2012		0.616621208	Grant	Funding for mapping degraded land in Kalimantan, Borneo.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
UK	Tanzania	All	Climate Change Institutional Strengthening Programme	2012		0.616621208	Grant	This programme will provide strategic support, such as the development of a National Climate Change strategy and climate financing mechanism to better position Tanzania to access climate finance and then ensure its effective delivery. It will also look at mainstreaming climate change in the budgeting and planning process.
UK	Vietnam	Adaptation/Mitigation	VNCLIP	2011-12		0.614474409	Grant	The overall goal of the DFID-WB Climate Change Partnership (VNCLIP) is to ensure that Vietnam is less negatively affected by climate change and transitions to a low-carbon growth path. The purpose is to prepare Vietnam better to deal with climate change impacts and to contribute to climate change mitigation.
UK	International	Adaptation	INSTITUTE FOR DEVELOPMENT STUDIES CONSORTIUM - EFFECTIVE RESILIENCE TO DISASTERS AND CLIMATE CHANGE	2010-11		0.594612703	Grant	To enhance the ability of governments and CSOs in developing countries to build the resilience of communities to disasters and climate change as part of their development work.
UK	Nepal	Adaptation	Nepal Climate Change Support Programme	2012		0.591956359	Mix	A programme to ensure that three million of the poorest and most vulnerable women and men in Nepal are able to adapt to the effects of climate change.
UK	International	Adaptation	GLOBAL WATER PARTNERSHIP CONTRIBUTION	2010-11		0.579465476	Grant	To help ensure that Integrated Water Resources Management is applied in a growing number of regions and countries, as a means to ensure equitable and efficient management and sustainable water.
UK	Tanzania	All	Climate Change Institutional Strengthening Programme	2011-12		0.559745757	Grant	The programme will provide strategic support in key areas such as the development of a National Climate Change strategy and climate financing mechanism to better position Tanzania to access climate finance and then ensure its effective delivery. It will also look at mainstreaming climate change in the budgeting and planning process.
UK	Mozambique	Adaptation	ACCOUNTABLE GRANT SAVE THE CHILDREN: FLOODPLAIN MANAGEMENT (ZAMBETI)	2010-11		0.558568792	Grant	Enable communities living in four districts in the flood-prone areas of the Zambezi valley to develop resilient livelihood options
UK	Brazil	All	Brazilian Panel on Climate Change	2012		0.543859905	Grant	Helping to establish an expert scientific Panel modelled on the IPCC as the definitive source of knowledge and policy advice on climate change in Brazil; to support their engagement with international knowledge processes (IPCC) and negotiations (UNFCCC); and encourage their efforts to help other developing countries to develop robust plans and actions to address climate change.
UK	Africa	REDD+	Congo Basin Forestry Start Up Fund	2011-12		0.52090626	Grant	Five projects in advance of the main Congo Basin Project Fund, with a goal of increasing the capacity of the people and institutions in Congo Basin forest communities to manage and protect their forests sustainably. The projects were initiated whilst the mechanisms of the main CBFF Fund were being established. Their intention was to signal the range and type of projects the CBFF could support.
UK	Asia	Adaptation/Mitigation	South Asia Water Initiative	2011-12		0.476834314	Grant	SAWI focuses on the shared Himalayan Rivers of Afghanistan, Bangladesh, Bhutan, China, India, Pakistan and Nepal, where 700 million people live.
UK	Africa	Adaptation	Africa Risk Capacity pool (ARC)	2011-12		0.476543623	Grant	An African Union project to improve responses to drought food security emergencies.
UK	Africa	Adaptation	CARE ADAPTATION LEARNING PROGRAMME	2010-11		0.461533821	Grant	To help ensure that community-based adaptation approaches for vulnerable communities incorporated into development policies and programmes in Ghana, Kenya, Mozambique and Niger with plans to replicate across Africa
UK	International	All	LEARNING HUB FOR EVIDENCE-BASED POLICY MAKING ON CLIMATE CHANGE	2010-11		0.427902804	Grant	To build capacity to effectively support and guide national and sub-national adaptation and low carbon development.
UK	Uganda	All	STRATEGIC INFLUENCING FUND	2010-11		0.427645521	Grant	Provide timely, strategic financial and technical support to the climate change, oil and diversity task teams to facilitate their influencing agenda.
UK	Nepal	Adaptation/Mitigation	Nepal Climate Change Support Programme	2011-12		0.419358388	Mix	Ensure that three million of the poorest and most vulnerable women and men in Nepal are able to adapt to climate change effects.
UK	Tanzania	All	Civil Society Climate Change and Environment Fund (with DANIDA and USAID)	2012		0.419302421	Grant	The purpose of this fund is to improve public access to information, build support for action and strengthen accountability and advocacy around climate finance and delivery, through engagement with civil society, media and parliament.
UK	Ghana	All	GHANA CLIMATE CHANGE AND ENVIRONMENTAL GOVERNANCE	2010-11		0.389770499	Grant	To support Government policies and responses on climate change and environmental governance
UK	International	All	Learning Hub	2011-12		0.349544747	Grant	The Learning Hub for Low Carbon Climate Resilient Development linked up internal DFID knowledge with external expertise through reflection and joint problem solving on climate change and development
UK	Africa	All	EUROPEAN CAPACITY BUILDING INITIATIVE SUPPORT TO AFRICAN NEGOTIATORS	2010-11		0.344887421	Grant	To support African negotiators' participation in international climate change negotiations.
UK	International	Mitigation	World Bank LCD Post	2011-12		0.33093691	Grant	Funding for a low carbon development post at the World Bank
UK	Tajikistan	Adaptation	TECHNICAL ASSISTANCE TO START UP PILOT PROGRAM FOR CLIMATE RESILIENCE (PPCR) IN TAJIKISTAN	2010-11		0.322793561	Grant	Help the government of Tajikistan to make PPCR effective and ensure that climate change resilience is mainstreamed into policies and planning in the government
UK	Africa Regional	Adaptation	Nile Basin Discourse	2012		0.320643028	Grant	Regional and national engagement of civil society organisations on river Nile management and development related issues, especially in conjunction with the Nile Basin Initiative.
UK	Uganda	Adaptation/Mitigation	Oxfam Climate Action Network (Climate Advocacy Officer)	2011-12		0.314521174	Grant	Support to the Climate Action Network of Uganda by funding the post of National Climate Advocacy Officer hosted at Oxfam. The aim is to support Civil Society to enable them to influence climate change policy, to initiate and support national debates and campaigns on climate change.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
UK	International	Adaptation	Micro Insurance Pilot	2011-12		0.297839764	Grant	Micro insurance pilot
UK	Indonesia	Mitigation	INDONESIA LOW CARBON GROWTH PROJECT	2010-11		0.286948986	Grant	To support the policies, structures and financing mechanisms integral to Indonesia's integrated low-carbon growth strategy.
UK	Africa	All	AFRICAN DEVELOPMENT BANK TECHNICAL COOPERATION ARRANGEMENT - CLIMATE CHANGE	2010-11		0.283938083	Grant	To support African Development Bank policy and programme delivery on climate change
UK	Rwanda	Adaptation/Mitigation	Drafting a National Climate Change and Low Carbon Development Strategy	2011-12		0.274908485	Grant	The strategy will explore how Rwanda can move to a low carbon economy.
UK	Ethiopia	All	Strategic Climate Institutions Programme (SCIP)	2012		0.271313331	Grant	Activities to build Ethiopia's institutional capacity to respond to climate change. Includes working with private sector, government and civil society.
UK	International	All	HIGH-LEVEL DESIGN OF THE "CLEAN POOL FUND"	2010-11		0.256336984	Grant	Potential support to a pilot public-private fund (the "Climate Public Private Partnership", or "CP3") to catalyse private investment at scale, into low carbon infrastructure in Asia, to achieve significant carbon abatement as well as rural electrification
UK	Ghana	All	Ghana climate change programme	2012		0.246648483	Grant	A programme to integrate climate change responses into Ghanaian policy making.
UK	Malawi	All	DFID MALAWI CLIMATE CHANGE PROGRAMME	2010-11		0.237553031	Grant	To support Malawi's efforts to respond effectively to climate change.
UK	Uganda	All	Oxfam Climate Action Network (Climate Advocacy Officer)	2012		0.234316059	Grant	Support to the Climate Action Network of Uganda by funding the post of National Climate Advocacy Officer hosted at Oxfam. The aim is to support Civil Society to enable them to influence climate change policy, to initiate and support national debates and campaigns on climate change.
UK	Ghana	All	Climate Change and Environmental Governance	2011-12		0.23003952	Grant	Technical assistance to complement multi-donor sector budget support on Natural Resources and Environmental Governance (with WB, EU, Netherlands and France) and development of National Climate Change Policy Framework
UK	South Africa	Adaptation/Mitigation	Support to Preparatory Process for UN Framework Convention on Climate Change Conference of Parties 17	2011-12		0.226314141	Grant	Logistical and technical support to the Government of South Africa's Department for International Relations and Cooperation (DIRCO) to enable them to deliver a successful preparatory process for the UNFCCC Conference of Parties (COP) 17 meeting in Durban.
UK	Asia Regional	All	South Asia Alliance for Climate Resilient Landscapes & Livelihoods (SAACRLI)	2012		0.218283908	Grant	The South Asia Alliance for a Greener Revolution (SAAGR) will build a multi-stakeholder regional coalition to increase food and water security whilst reducing emissions from land use.
UK	Nepal	REDD+	Nepal Multi-stakeholder Forestry Programme	2011-12		0.208487835	Grant	Supporting Nepal's forestry sector contributing to inclusive economic growth, poverty reduction and tackling climate change.
UK	Vietnam	All	VIETNAM: DFID-WORLD BANK CLIMATE CHANGE PARTNERSHIP	2010-11		0.203796849	Grant	To support the Vietnamese Government in policy and decision-making on climate change
UK	Kenya	Adaptation	STRENGTHENING ADAPTATION AND RESILIENCE TO CLIMATE CHANGE IN KENYA (STARCK)	2010-11		0.189792327	Grant	To help strengthen organisational capacity within the Kenyan Government, civil society and private sector to increase resilience to current climate variability, adapt to future climate change and benefit from opportunities for low carbon growth
UK	Brazil	Adaptation	Brazilian Panel on Climate Change	2011-12		0.174879596	Grant	Helping to establish an expert scientific Panel modelled on the IPCC as the definitive source of knowledge and policy advice on climate change in Brazil; to support their engagement with international knowledge processes (IPCC) and negotiations (UNFCCC); and encourage their efforts to help other developing countries to develop robust plans and actions to address climate change.
UK	International	REDD+	CIFOR Scientist	2011-12		0.173156891	Grant	Expertise to the Centre for International Forestry Research to monitor REDD projects worldwide for outcome and impact - piloting and implementing the methodology
UK	Mozambique	Mitigation	BIOFUELS TECHNICAL SUPPORT TO MINISTRY OF ENERGY (FA)	2010-11		0.168624453	Grant	To support the Mozambican Government to implement its National Biofuels Strategy
UK	Caribbean	Mitigation	IDEAS Energy Enterprise Innovation Contest	2011-12		0.167837473	Grant	An Energy Innovation Contest intended to support the development of innovative projects and ideas promoting renewable energies, and improving energy efficiency and the access to energy in the Caribbean region.
UK	International	REDD+	Support services forestry	2010-11		0.151946278	Grant	Provide support to International Forest Policy Processes
UK	International	All	OPTIONS FOR PILOTING CREDITING AND TRADING MECHANISMS	2010-11		0.151515156	Grant	To increase poor countries' access to, and benefit from, the Clean Development Mechanism and other market-based mechanisms
UK	International	Adaptation	STRATEGIC FRAMEWORK WITH BRITISH RED CROSS - BUILDING RESILIENCE AND DISASTER PREPAREDNESS	2010-11		0.143681942	Grant	To support the British Red Cross' contribution to strengthening the effectiveness of the international work of the Red Cross Movement in its core functions (emergency response, resilience building, and international humanitarian law)
UK	International	Mitigation	Climate Public Private Partnership (CP3)	2011-12		0.141526087	Grant	The UK will invest £130 million in 2 commercial private equity funds, which will aim to leverage private co-investment. These funds will be run on a strictly commercial basis by professional fund managers. As well as an equity investment of £110 million, the project will include technical assistance to support the development of the project pipeline and facilitate pioneering projects.
UK	Ethiopia	All	STRATEGIC CLIMATE INSTITUTIONS PROGRAMME	2010-11		0.134588969	Grant	Support organisational and institutional capacity growth within Ethiopian Government, civil society and the private sector to 1) increase resilience to current climate variability 2) adapt to future climate change and 3) benefit from the opportunities for

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
UK	Africa	Adaptation	Cooperation in International Waters in Africa	2011-12	World Bank	0.133452467	Grant	To strengthen cooperative management and development of international waters within selected basins
UK	Indonesia	REDD+/Mitigation	Rapid Response Facility on Climate Change	2011-12		0.130783823	Grant	Fund to support the Government of Indonesia meet its climate objectives
UK	South Africa	Adaptation	SOUTH AFRICAN DEVELOPMENT COMMUNITY MULTI-COUNTRY AGRICULTURAL PRODUCTIVITY PROGRAMME (SADC/MAPP) PRE IMPLEMENTATION PHASE	2010-11		0.125799637	Grant	To contribute to the development of a multi-country agriculture productivity programme in Southern Africa
UK	Global	REDD+	Funding for a scientist post at the Centre for International Forestry Research	2012		0.123324242	Grant	Funding expertise to the Centre for International Forestry Research to monitor REDD projects worldwide for outcome and impact.
UK	Global	Mitigation	Encouraging civil society engagement in the Clean Development Mechanism	2012		0.123324242	Grant	Development of network and support services to encourage greater participation of civil society in the Clean Development Mechanism.
UK	Uganda	Adaptation/Mitigation	UNDP Territorial Approach to Climate Change (TAAC) in Eastern Uganda	2011-12		0.119135906	Grant	Co-funding this programme with UNDP and the Welsh Assembly Government in Mbale region. This will assist Mbale region, encompassing 3 districts of Mbale, Manafwa and Bududa, to realise low carbon and climate change resilience. The project will help the region develop their Integrated Territorial Climate Plan (ITCP) to fully integrate Climate change and mitigation into their regional development planning, acting as a pilot for Uganda. It is aligned to the Uganda National Adaptation Programme of Action (NAPA) and plans to develop projects for financing from international carbon markets.
UK	International	Mitigation	CDM: Encouraging civil society engagement in the CDM	2011-12		0.119135906	Grant	Development of network and support services to encourage greater participation of civil society in the CDM
UK	International	Mitigation	CDM: Piloting standardised approaches in the CDM	2011-12		0.119135906	Grant	Development of three standardised CDM methodologies for project types particularly suited to Least Developed Countries.
UK	Tanzania	All	RENEWABLE ENERGY AND ADAPTATION CLIMATE TECHNOLOGIES WINDOW (AFRICA CLIMATE CHANGE)/TANZANIA	2010-11		0.115893095	Grant	To catalyse private sector investment and innovation in low cost, clean energy and climate change technologies in Tanzania
UK	Africa	All	RENEWABLE ENERGY AND ADAPTATION CLIMATE TECHNOLOGIES WINDOW (AFRICA CLIMATE CHANGE)	2010-11		0.115893095	Grant	To catalyse private sector investment and innovation in low cost, clean energy and climate change technologies
UK	International	All	INTERNATIONAL INSTITUTE FOR SUSTAINABLE DEVELOPMENT - CLIMATE CHANGE	2010-11		0.115512966	Grant	To make available better information on the scope, value and impacts of fossil-fuel subsidies, on the environment, society, and the economy.
UK	Southern Africa	All	Southern Africa Regional Climate Change Programme (RCCP)	2012		0.110991817	Grant	A programme to generate and disseminate climate change information for policy makers and planners in the Southern Africa Development Community (SADC) region.
UK	Indonesia	REDD+/Mitigation	Spatial Planning and Low Carbon Development in Papua	2011-12		0.110017243	Grant	Support to entrepreneurs to bring forward their low carbon investment proposals and support to the spatial planning function of the provincial government in Papua to avoid deforestation. Long-term design work for a three year programme starting in 12/13.
UK	Zimbabwe	All	CLIMATE CHANGE ZIMBABWE	2010-11		0.107867498	Grant	To provide knowledge and information on climate risks and vulnerability in urban areas in Zimbabwe
UK	International	Adaptation	UK COLLABORATIVE ON DEVELOPMENT SCIENCES - DISASTER RESEARCH	2010-11		0.106145327	Grant	To conduct a short, high-level review of on-going and planned work on natural hazards, extreme events and disaster research
UK	Africa	All	Africa Climate Change champions	2010-11		0.104813715	Grant	Increase Africa voice and influence for a new international climate change agreement.
UK	Africa Regional	Adaptation	Cooperation in International Waters	2012	World Bank	0.103166894	Grant	Strengthen the cooperative management and development of trans boundary river basins in Africa (selection of priority basins to be determined). The programme is funded through and managed by the World Bank.
UK	Uganda	Adaptation/Mitigation	Parliamentary Forum on Climate Change (PFCC)	2011-12		0.100188531	Grant	Working with Parliamentary Forum on Climate Change (PFCC) to help build their capacity, advocate and promote dialogue on mainstreaming climate change in local districts and building the capacity of local government officials on climate change issues.
UK	Caribbean	All	Caribbean Climate Change Resilience Implementation Programme	2012		0.098659393	Grant	UK support for the Caribbean Community (CARICOM) Climate Change Resilience Programme.
UK	Tanzania	All	Support for Climate Change Forum - CS Network	2011-12		0.088220138	Grant	Establishment of a platform for CS organisation for advocacy, lobbying and raising awareness on climate change.
UK	Nepal	REDD+	Nepal Multi-stakeholder Forestry Programme	2012		0.085956996	Grant	A programme to support Nepal's forestry sector contributing to inclusive economic growth, poverty reduction and tackling climate change.
UK	Zambia	Adaptation	ZAMBIA CLIMATE RESILIENCE PROGRAMME	2010-11		0.085425959	Grant	To support the Government of Zambia to integrate climate resilience into its development planning, and provide scaled-up support to priority public and private investments

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
UK	Rwanda	All	PILOTING OUTPUT-BASED FINANCING FOR CLIMATE CHANGE	2010-11		0.082898331	Grant	To demonstrate the potential of a results-based finance, market-pull approach to promoting the deployment of low carbon, renewable energy technologies, to support the accelerated roll-out of modern energy services in rural Rwanda
UK	Africa	All	AFRICA CLIMATE CHANGE RESOURCE FACILITY	2010-11		0.081567878	Grant	To enable flexible limited scale support to country partners in the near term to catalyse initial assessment, informed dialogue and action on addressing climate variability and change
UK	Global	All	Climate Technology Innovation Support Package	2012		0.07646103	Grant	Piloting a global platform for applied innovation into climate technologies relevant to developing countries
UK	International	Mitigation	Capital Markets Climate Initiative (CMCI)	2011-12		0.070290184	Grant	The CMCI innovation platform will provide a forum whereby specific government proposals and ideas for using the UK's International Climate Fund (ICF) to mobilise private finance into low carbon, climate friendly solutions can be tested with CMCI participants. The objective is to: - encourage constructive challenge and feedback that can be directly used to refine and strengthen ICF projects at the design stage - enhance understanding amongst CMCI participants of the priorities, objectives and constraints associated with ICF funding - provide updates on government funding decisions and climate finance policy positions
UK	South Africa	Mitigation	Support to South Africa's low-carbon transition	2012		0.061662121	Grant	A programme focused on catalysing private sector innovation and investment in low-carbon technologies
UK	International	Mitigation	DFID PARTICIPATION IN EUROPEAN RESEARCH AREA NETWORK (ERA-NET) TRANSNATIONAL CALL ON BIO ENERGY: AN OPPORTUNITY OR THREAT TO THE RURAL POOR	2010-11		0.057946548	Grant	DFID participation in European Research Area Network (ERA-NET) transnational call on bio energy.
UK	Overseas Territories	Adaptation	Enhancing Capacity for Adaptation to Climate Change' (ECACC) in UK Overseas Territories in the Caribbean	2011-12		0.047654362	Grant	ECACC supports participation of UK Overseas Territories in GEF funded CARICOM regional programme.
UK	International	All	LOW CARBON GROWTH, ADAPTATION AND MITIGATION	2010-11		0.042579123	Grant	To support the development of low carbon growth workplans
UK	Caribbean	Adaptation	CARIBSAVE (Caribbean Climate Change, Tourism and Livelihoods: A Sectoral approach to vulnerability and resilience)	2011-12		0.040774264	Grant	Develop scenarios for changes in climate on the Caribbean tourism sector at a national and destination scale and assess the vulnerability, resilience and adaptive capacity of the sector
UK	Indonesia	Mitigation	UK-Indonesia Programme on Climate Change	2011-12		0.037297878	Grant	Design funds for future programmes
UK	Global	Mitigation	2050 Pathways	2012	DECC	0.033297545	Grant	A dedicated team in DECC's Strategy Directorate will provide direct technical support to 10 priority countries to develop their own in-house version of the UK's 2050 Calculator.
UK	Africa	Mitigation	PROMOTING AFRICAN ACCESS TO CLEAN DEVELOPMENT MECHANISM AND ENERGY (PACE)	2010-11		0.033038514	Grant	Scope possible support to provide poor people and communities across sub-Saharan Africa with access to international carbon finance. In particular the Programme should demonstrate how poor communities can use carbon markets to benefit from cost-effective
UK	Rwanda	All	SUPPORT TO LOW CARBON DEVELOPMENT AND CLIMATE CHANGE	2010-11		0.027733218	Grant	Support the development of a path of robust low carbon and climate resilient economic growth and a comprehensive climate adaptation action plan.
UK	International	Adaptation	ASSESSING ADAPTATION IN DEVELOPING COUNTRIES, MONITORING AND EVALUATION OF ADAPTATION	2010-11		0.024344504	Grant	To help develop methodology and approach to climate change adaptation at national levels
UK	International	All	Green Climate Fund design	2011-12		0.020350795	Grant	Consultancy on private sector and direct access to inform TC on GCF design.
BE	TBD	REDD+	SFM/REDD+	starting December 2010	N.A.	10.000	#REF!	The SustainableForest management/REDD+program is a renewed investment scheme within GEF-5 open to all type of forests and designed to provide incentives for the emergence of more impactful SFM/LULUCF projects and programs as well as respond to countries' REDD+ plans. This money comes over and above the Belgian contribution to the 5th replenishment of the GEF.
BE	TBD	Technology Transfer	SCCF (Special Climate Change Fund)	starting December 2011	N.A.	10.000	Grant	The SCCF was established under the UNFCCC to finance activities, programs and measures related to climate change that are complementary to those funded by resources from the GEF Trust Fund and with bilateral and multilateral funding. A specific choice has been made for technology transfer for low carbon technology (mitigation) and demonstration of adaptation technologies (adaptation).
BE	TBD	Adaptation	LDCF	starting November 2010	N.A.	20.000	Grants	The LDCF was established under the UNFCCC and aims to address the special needs of the LDCs, which are especially vulnerable to the adverse impacts of climate change. This includes preparing and implementing NAPAs.
BE	TBD	Mitigation: renewable energy sector	Belgian Investment Company for Developing Countries: scaling-up of the infrastructure and energy facility	starting September 2010	Belgian Investment Company for Developing Countries (BIO)	20.000	mix of loans, equities and subsidies	BIO will receive an additional 20 million EUR to scale-up its infrastructure and energy facility for direct investments or participations in funds in the renewable energy sector. Particular efforts will be made in least developing countries particularly in Africa where the need for access to energy is more evident.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
BE	TBD	Adaptation	LDCF	starting 2012	N.A.	5.000	Grant	The LDCF was established under the UNFCCC and aims to address the special needs of the LDCs, which are especially vulnerable to the adverse impacts of climate change. This includes preparing and implementing NAPAs.
BE	TBD	Technology Transfer	SCCF (Special Climate Change Fund)	starting 2012	N.A.	9.000	Grant	The SCCF was established under the UNFCCC to finance activities, programs and measures related to climate change that are complementary to those funded by resources from the GEF Trust Fund and with bilateral and multilateral funding. A specific choice has been made for technology transfer for low carbon technology (mitigation) and demonstration of adaptation technologies (adaptation).
BE	Mali	mitigation adaptation	CRB	starting 2010	N.A.	0.500	Grant	Renforcement des capacités opérationnelles de la Croix-Rouge malienne dans la gestion des catastrophes
BE	Rép. Dom.	mitigation adaptation	RKV	starting 2010	N.A.	0.186	Grant	Versterking van de rampenparaatheid van gemeenschappen ini Hato Mayor
BE	Cuba	mitigation adaptation	OXFAM	starting 2010	N.A.	0.363	Grant	Renforcement de la gestion de risques de désastres dans 12 municipalités des provinces de Las Tunas et Camaguey
BE	Great Lakes Region	mitigation adaptation	FAO	starting 2011	N.A.	1.000	Grant	Disaster Preparedness for Food Security Risks in the Great Lakes Region - Improving responses to the threat of banana diseases
BE	Caraiibes	mitigation adaptation	FAO	starting 2011	N.A.	1.000	Grant	Strengthening community preparedness and resilience to natural disasters in selected vulnerable areas of Dominican Republic, Haiti and Jamaica
BE	Bolivie / Equateur	mitigation adaptation	UNDP	starting 2011	N.A.	1.064	Grant	Enhancing Disaster Preparedness in Andean Countries
BE	Ecuador	mitigation	Yatsuni-ITT / Government of Ecuador	starting december 2010	Walloon Agency for Air and Climate (Walloon Region)	1.800	Grant	Yasuni ITT is a project of the government of Equator to protect the environment by preventing the petrol extraction and preserve biodiversity.
BE	BENIN	mitigation adaptation	amélioration des capacités de maîtrise de l'énergie domestique pour l'atténuation des émissions de GES et une meilleure adaptation aux CC dans les communes du Zou	starting 2011	Walloon Agency for Air and Climate (Walloon Region)	0.250	Grant	OFEDI, Cotonou
BE	BURKINA FASO	mitigation adaptation	foyers trois pierres améliorés	starting 2011	Walloon Agency for Air and Climate (Walloon Region)	0.250	Grant	Tii paalga
BE	SENEGAL	adaptation	Intégration locale de la micro irrigation pour le développement de l'agriculture paysanne au Sénégal	starting 2011	Walloon Agency for Air and Climate (Walloon Region)	0.250	Grant	Institut Sénégalais de Recherches Agricoles
BE	RWANDA	mitigation adaptation	Projet de reboisement, de réhabilitation, de conservation et de gestion des forêts sur les pentes raides du district de NGOMA, Secteur RURENGE	starting 2011	Walloon Agency for Air and Climate (Walloon Region)	0.270	Grant	Ditric de Ngoma
BE	BENIN	mitigation adaptation	Promotion des foyers érythréens dans les communes riveraines du parc national de le Pendjari	starting 2012	Walloon Agency for Air and Climate (Walloon Region)	0.300	Grant	Benin Ecotourism , Abomey Calavi
BE	Burkina Faso	mitigation adaptation	Acacia senegal et réhabilitation de terres dégradées pour l'amélioration de la productivité agro-sylvo-pastorale en zone sèche	starting 2012	Walloon Agency for Air and Climate (Walloon Region)	0.300	Grant	Centre national des semences forestières, Ouagadougou
BE	Burundi	mitigation adaptation	Amélioration de la gestion des déchets solides et liquides de la commune de Mutimbuzi	starting 2012	Walloon Agency for Air and Climate (Walloon Region)	0.214	Grant	Œuvre humanitaire pour la protection et le développement OPDE, Bujumbura
BE	SENEGAL	adaptation	Restauration et conservation de la mangrove dans la réserve de biosphère du delta du Saloum	starting 2012	Walloon Agency for Air and Climate (Walloon Region)	0.270	Grant	ADG, Dakar
BE	SENEGAL	mitigation adaptation	Développement de la filière charbon de paille au Sénégal	starting 2012	Walloon Agency for Air and Climate (Walloon Region)	0.300	Grant	Association sénégalaise de gestion participative des ressources naturelles, NEBEDAY, Dakar Fann

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
BE	RDCongo	adaptation	projet pilote d'adaptation de l'agriculture familiale au CC par la promotion de l'agro-écologie dans la presqu'île de Ruzi-Bulenga au sud Kivu	starting 2012	Walloon Agency for Air and Climate (Walloon Region)	0.210	Grant	Associazione di cooperazione e solidarieta et Villages durables, GOMA
BE	RWANDA	mitigation	projet de développement du secteur de la pico-hydro-électricité	starting 2012	Walloon Agency for Air and Climate (Walloon Region)	0.280	Grant	energy and water sanitation authority, Kigali
BE	HAITI	adaptation	Gestion autonome de l'alimentation en eau potable et renforcement des capacités pour les populations rurales vulnérables de l'Artibonite	starting 2012	Walloon Agency for Air and Climate (Walloon Region)	0.270	Grant	Organisation Calbasse Haïti, Port au Prince
BE	BENIN	mitigation adaptation	Promotion des exploitations agricoles résilientes aux CC dans la zone agro-écologique 5 au BENIN	starting 2012	Walloon Agency for Air and Climate (Walloon Region)	0.260	Grant	Initiative pour un Développement intégré durable, Porto-Novio
BE	BURKINA FASO	mitigation adaptation	Création d'une ferme école agro-écologique d'apprentissage et de capitalisation des initiatives locales d'adaptation aux CC dans la commune rurale de Saaba	starting 2012	Walloon Agency for Air and Climate (Walloon Region)	0.290	Grant	Association Songui Manégré et Aide au Développement endogène, Ouagadougou
BE	RDCongo	adaptation	Appui au renforcement des capacités des agriculteurs et des organisations paysannes des territoires de Kabare et Uvira en vue de leur adaptation au CC		Walloon Agency for Air and Climate (Walloon Region)	0.300	Grant	OXFAM

BE	SENEGAL	mitigation adaptation	Production de charbon de bois efficient et durable en Casamance	starting 2012	Walloon Agency for Air and Climate (Walloon Region)	0.300	Grant	CEBED
BE	HAITI	mitigation adaptation	Adaptation aux CC de la ville de port de Paix par la gestion intégrée des déchets ménagers	starting 2012	Walloon Agency for Air and Climate (Walloon Region)	0.200	Grant	Groupe d'appui au développement local, Port de Paix
BE	TBD	adaptation	Fonds de Solidarité International de l'Eau	starting 2012	Walloon Agency for Air and Climate (Walloon Region)	1.000	Grant	Financement de projets liés à l'eau dans le cadre de l'adaptation aux changements climatiques.
BE	Senegal	mitigation adaptation	Territorial approach to climate change (TACC), Senegal	starting november 2010	Walloon Agency for Air and Climate (Walloon Region)	0.100	Grant	Territorial approach to climate change (TACC). The program launched by UNDP aimed to develop skills to integrate mitigation and adaptation actions in development plan of the Ferlo Region of Senegal. The program also seeks to strengthen Capacity building at local level to set up climate change projects.
BE	CDCF+	Mitigation	Fonds pour aider les LDCs à planifier et mettre en oeuvre leurs projets carbone	Starting 2012	Walloon Agency for Air and Climate (Walloon Region)	0.338	Grant	Fonds de la Banque Mondiale pour aider les LDCs à planifier et mettre en oeuvre leurs projets carbone
BE	ISDD	Autre (Capacity Building)	Bulletin des négociations CC	Starting 2010	Walloon Agency for Air and Climate (Walloon Region)	0.060	Grant	Traduction en français du Earth Negotiation Bulletin
BE	IEPF	Autre (Capacity Building)	Note de décryptage des négociations	Starting 2011	Walloon Agency for Air and Climate (Walloon Region)	0.030	Grant	Note de décryptage des négociations sur les changements climatiques destinée aux délégués des pays les moins avancés francophones
BE	IEPF	Autre (Capacity Building)	Soutien aux deux appels à projets lancés dans le cadre du Fats-Start Wallonie	Starting 2011	Walloon Agency for Air and Climate (Walloon Region)	0.084	Grant	Subvention accordée à l'IEPF pour soutenir et faciliter les appel sà projets lancés dans les pays africains partenaires de la Wallonie ainsi que Haïti

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
BE	TBD	Adaptation	Financing water, sanitation and integrated water resource management projects and programmes with focus on capacity building and technology transfer related to sustainable management of natural resources ("Flemish partnership Water for Development")	starting 2010 /2011 / 2012	Flemish Government	0.922	Grant	Financing water, sanitation and integrated water resource management projects and programmes with focus on capacity building and technology transfer related to sustainable management of natural resources ("Flemish partnership Water for Development")
BE	TBD	Adaptation / Mitigation	UNEP: Strengthening the capacity of humanitarian actors to integrate environmental considerations into humanitarian action and early recovery	starting 2010	Flemish Government	0.149	Grant	The project aims to build the capacity of humanitarian actors to integrate environmental considerations into policy development, planning, programme design, and operational activities. The project's main outputs are: (1) Two training sessions on "Mainstreaming Environment into Humanitarian Action and Early recovery", (2) the development of a training of trainers toolkit (ToT), and (3) the dissemination of the toolkit and resource material in DVD format and on-line.
BE	Mozambique	Agroforestry	ICRAF: Community Agroforestry Tree Seeds Banks (CATS Banks): Building Agroforestry Scaling up Platform for Diversifying Livelihoods Opportunities in Malawi and Mozambique	starting 2010	Flemish Government	0.320	Grant	The project's primary objectives are to: i) Apply a suite of agroforestry interventions for generating multiple streams of livelihood impact for smallholder farmers; ii) Apply the CATS Bank approach for building stronger platform for Wider farmer testing, and out-scaling of proven agroforestry portfolios customized for use by development agencies in pilot sites; iii) Building capacity of communities in nursery production, tree establishment and management, and facilitating community groups on CATS Banks in the pilot sites
BE	Mozambique	Adaptation	RED CROSS: Zembezi River Basin: Improve the disaster preparedness and emergency response capacity of the Mozambican Red Cross	starting 2011	Flemish Government	0.314	Grant	Overall objective: to alleviate the suffering of people affected by natural disasters in Mozambique by providing them with a timely effective and well coordinated response based on a sufficient level of institutional preparedness. Expected Outcomes: 1. Mozambican Red Cross (CVM) has an improved logistic capacity at regional level for emergency response. 2. CVM has improved coordination and (tele)communication capacities at regional level for emergency response. 3. CVM has established a strategic network of red cross volunteers and staff at regional level to lead emergency response interventions at grassroots level.
BE	Malawi	Adaptation / Mitigation	National programme for managing climate change in Malawi - formulation phase.	starting 2011	Flemish Government	0.275	Grant	The Flemish Government contributed 275.000 EUR in 2011 to support the One UN Fund for Malawi, administered by UNDP. This program is part of Cluster 1 (Economic growth and food security) of the UNDAF (United Nations Development Assistance Framework) for Malawi, which is aligned to the Malawi Growth and Development Strategy. Through this program, the Flemish Government is investing in institutional capacity building toward climate change adaptation and mitigation in Malawi. The main goal of the program is to develop a strategic framework for responding to the challenges that climate change poses for sustainable economic development and national food security in Malawi.
BE	TBD	Agroforestry	ICRAF: Building a larger Evergreen Agriculture Network for Southern Africa	starting 2012	Flemish Government	1.500	Grant	The general objective of the programme is to mobilise a network of government organisations, international institutions, donors, NGOs and private sector bodies for a well-coordinated and coherent investment in research and development in agroforestry and EverGreen agriculture in Southern Africa. An EverGreen Agriculture Action Network is envisaged to be managed by a small secretariat to allow stakeholders to share best practices, generate more resources, resolve policy conundrums, and achieve economies of scale. The specific objectives of the programme are: 1) To create a network of organisations and innovation platforms to coordinate research and development in agroforestry; 2) To review experiences gained from past research, to refine and optimize EverGreen agriculture, to distil experiences into policy recommendations, and to share these widely; 3) To encourage policy makers to develop policies which facilitate the wide-scale promotion and adoption of EverGreen agriculture; 4) To mobilize extension staff, farmers and other land users to scale up EverGreen Agriculture across southern Africa. 5) To investigate and pilot alternative farm income streams from trees to optimise the economic, environmental and social outcomes of the various locally-adapted EverGreen Agriculture systems 6) To build the R&D capacity of national institutions (including tertiary institutions) in EverGreen Agriculture.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
BE	TBD	Mitigation	UNIDO: Regional Potential Assessment of Novel Bio-energy Crops	starting 2012	Flemish Government	0.078	Grant	<p>The ECOWAS Regional Centre for Renewable Energy and Energy Efficiency (ECREEE), the United Nations Industrial Development Organization (UNIDO), the International Industrial Biotechnology Network (IIBN) and QUINVITA, a global industrial crop technology and knowledge provider for Jatropha, have launched a major strategic study on the potential for sustainable production of novel bio-energy crops in the ECOWAS region. Goal: Identifying the suitability of the ECOWAS region for the commercial/outgrower cultivation of novel energy crops</p> <p>The strategic study will:</p> <ol style="list-style-type: none"> <li>1. Assess the potential for increased food production and utilization of non-food/feed residue/waste for bio-energy production from selected food crops;</li> <li>2. Identify 'go' and 'no-go' regions for 5-8 novel bio-energy crops within the 15 ECOWAS countries, taking into account available land for agriculture, forestry and other environmental impacts;</li> <li>3. Identify 3 potential pilot projects for specific regions in ECOWAS countries with a potential for sustainable production of 10,00-15,000 hectares of a specific bio-energy crop, and</li> <li>4. Provide a sustainability assessment of potential projects taking into consideration social, economic and environmental aspects of the bio-energy crops and their integration with food production, social and environmental factors.</li> </ol>
BE	Andean Region	Adaptation	UNESCO: Andean Glacier multidisciplinary Network for Adaptation Strategies (AGiANAS)	starting 2012	Flemish Government	0.344	Grant	<p>The overall goal of the project is to contribute to improving the quality of life and alleviating the poverty of local communities in arid and semi-arid environments in Latin America and the Caribbean, through a reduction in the vulnerability of water resources systems to global changes based on sound scientific knowledge.</p> <p>The proposal has three main thematic priorities</p> <ol style="list-style-type: none"> <li>a) Improved water governance as a basis to attain integrated water resources management,</li> <li>b) use of modern techniques and methodologies to assess and improve water use efficiency;</li> <li>c) hydro-climatic risk management including decision making</li> </ol> <p>Project goals</p> <ol style="list-style-type: none"> <li>a) Integrated water management (Water Governance): <ul style="list-style-type: none"> <li>• Objective: to encourage actions aimed at increasing water governance in pilot areas;</li> <li>• Methodology: support local or regional programs to develop activities and water user organization participation related to water management;</li> </ul> </li> <li>b) Climate risk management: <ul style="list-style-type: none"> <li>• Objective: to encourage the inclusion of climate information in water management;</li> <li>• Methodology: to support local and regional projects aimed at generating and disseminating climate information systems for water management decision making;</li> </ul> </li> <li>c) Water supply increase and efficient use of water: <ul style="list-style-type: none"> <li>• Objective: support the adoption of systems aimed at assessing and increasing water supply;</li> <li>• Methodology: building capacities to implement water and soil conservation and efficient use methodologies and applying indicators to evaluate water use efficiency in the pilot area basins.</li> </ul> </li> </ol>
BE	Latin America and Caribbean	Adaptation	UNESCO: Managing Water Resources in Arid and Semi-Arid regions of Latin America and Caribbean	starting 2012	Flemish Government	0.598	Grant	<p>The overall goal of the project is to contribute to improving the quality of life and alleviating the poverty of local communities in arid and semi-arid environments in Latin America and the Caribbean, through a reduction in the vulnerability of water resources systems to global changes based on sound scientific knowledge.</p> <p>The proposal has three main thematic priorities</p> <ol style="list-style-type: none"> <li>a) Improved water governance as a basis to attain integrated water resources management,</li> <li>b) use of modern techniques and methodologies to assess and improve water use efficiency;</li> <li>c) hydro-climatic risk management including decision making</li> </ol> <p>Project goals</p> <ol style="list-style-type: none"> <li>a) Integrated water management (Water Governance): <ul style="list-style-type: none"> <li>• Objective: to encourage actions aimed at increasing water governance in pilot areas;</li> <li>• Methodology: support local or regional programs to develop activities and water user organization participation related to water management;</li> </ul> </li> <li>b) Climate risk management: <ul style="list-style-type: none"> <li>• Objective: to encourage the inclusion of climate information in water management;</li> <li>• Methodology: to support local and regional projects aimed at generating and disseminating climate information systems for water management decision making;</li> </ul> </li> <li>c) Water supply increase and efficient use of water: <ul style="list-style-type: none"> <li>• Objective: support the adoption of systems aimed at assessing and increasing water supply;</li> <li>• Methodology: building capacities to implement water and soil conservation and efficient use methodologies and applying indicators to evaluate water use efficiency in the pilot area basins,</li> </ul> </li> </ol>

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
BE	Comoros	Adaptation	UNDP: Adapting water resource management in the Comoros to expected climate change 2010-2014	starting 2012	Flemish Government	0.150	Grant	The project will contribute to Outcome 4.3 of the UNDP Energy and Environment Thematic Trust Fund: National and local governments and communities have the capacities to adapt to climate change and make inclusive and sustainable environment & energy decisions benefitting in particular under-served populations. The project is a contribution to two outputs to benefit 4824 people in Anjouan, 3000 in the Bandasamlini area of Ngazidja, and 4830 in Djandro Plateau of Moheli, as follows: * add an additional activity under Project Output 2.2: Community members trained to manage adaptive water interventions sustainably. The activity would be the introduction of local water treatment technologies, such as localized ecologically-based water purification systems. Awareness raising and community mobilization will be undertaken to promote safe use of water and sanitation among the surrounding communities, in order to reduce water contamination. Indicative budget: Euros 100,000 * to add an additional Output 2.3: Sustainable land management practiced in pilot sites. The additional contribution would be provided to support the training and support of local agricultural producers in the sustainable and resilient use of agricultural land. This will include training to be delivered through the local Centres for Agricultural Expertise (Ministry of Agriculture) and the provision of starter seeds and agricultural tools for enhanced agricultural production. Indicative budget: Euros 50,000
BE	Zambia	Adaptation/Mitigation	UNDP: Developing a people-centered wildlife policy in Zambia: Sharing revenue with communities in Game Management Areas: 2012-2013	starting 2012	Flemish Government	0.150	Grant	The project will be carried out from mid-2012 to end-2013, and is expected to have the impact of catalyzing a policy change that will have an important influence on future investment in the Game Management Areas (GMAs) by Government, private sector tourism operators and the donor community, putting meaningful benefit sharing at the heart of biodiversity conservation and tourism development in Zambia.
BE	Kenya	Adaptation/Mitigation	UNDP: Kenya: Adapting to Climate Change in Arid and Semi-Arid Lands (KACCAL) 2009-2013	starting 2012	Flemish Government	0.150	Grant	Improved cook stove dissemination is high on the government and many development partners agenda at the moment mainly because of deforestation, CO2 reduction, indoor air quality issues and economic concerns. To date, Mwingi has not benefited from improved cook stoves as the feeling among government planners has been that Mwingi communities had sufficient bush wood - a situation that is drastically changing. The Flemish support will expand the scope and coverage of Outcome 3 of the project: * Enhanced communities' ability to plan, manage and implement climate-related activities. The project target that the Flemish support will contribute to is: * No change in income or household assets due to climate variability.
BE	TBD	Adaptation	Ageas: Afromaison. Protection of drinking water services by means of basin protection, sensitization and capacity building in the municipality Fort Portal, Uganda	starting 2012	Flemish Government	0.102	Grant	This project will focus on securing the drinking water supply of the municipality Fort Portal, by improving the governance of water supply and sanitation practices at the upstream part of the Mpanga basin in Uganda.
BE	TBD	Adaptation	Adaptation Fund	starting 2012	Brussels-Capital Region	1.200	Grant	The Adaptation Fund was established to finance concrete adaptation projects and programmes in developing country Parties to the Kyoto Protocol that are particularly vulnerable to the adverse effects of climate change.
DK	Interregional	Adaptation	UNFCCC Trust Fund for Participation	2010-11	UNFCCC	0.80	Grant	Participation by developing countries in extraordinary meetings leading up to COP16
DK	Interregional	Adaptation	Capacity building of civil society	2010-12	CARE/92-gruppen (Danish NGOs)	1.07	Grant	Southern voices capacity building programme - strengthening climate policy networks in Africa, Asia, Latin America and the Pacifics
DK	Interregional	Adaptation	LDCF - Least Developed Countries Fund	2010-12		10.70	Grant	Contribution for Least Developed Countries Fund for Climate Change (LDCF)
DK	Interregional	Adaptation, Mitigation	Green growth: pilot activities under programming	2010-12	Danish Embassies	1.30	Grant	Pilot activities
DK	Interregional	Adaptation, REDD+, Mitigation	Strategic Climate Fund (PPCR, FIP and SREP)	2010-12	World Bank	16.90	Grant	Supplemental contribution for 1) Pilot Programme for Climate Resilience (PPCR), Forest Investment Programme (FIP) and Program on Scaling-up Renewable Energy in Low-income Countries (SREP)
DK	Interregional	Mitigation	Technology and capacity building	2010-12	UNEP	5.40	Grant	Facilitating Implementation and Readiness for Mitigation (FIRM)
DK	Interregional	REDD+	UN REDD	2010-12	UNDP, FAO, UNEP	4.40	Grant	Supplemental contribution for United Nations collaborative programme on reduced emissions from deforestation and degradation in developing countries (UN REDD)
DK	Interregional	Adaptation	Pilot activities - Green Facility	2010-13	UNEP Risoe	0.80	Grant	Supplementary low carbon and climate resilient development
DK	Indonesia	Adaptation	Indonesia: support to Harapan province	2011-13	Burung Indonesia	6.70	Grant	Support for CO2 sequestration and biodiversity building through a forest rehabilitation program
DK	Maldives	Adaptation	Support for the Maldives (coastal protection, sustainable energy, capacity building, research and technology)	2011-13	Various depending on the specific project	6.70	Grant	Adaptation activities related to sea-level rise. Support for disaster management and development of local contingency plans, coastal protection and climate adapted infrastructure, and protection of natural resources
DK	Interregional	Adaptation/mitigation	Small island development states programme - SIDS DOCK. Support Programme	2011-13	UNDP and World Bank	10.70	Grant	Promotion of sustainable energy supply and investments in climate change adaptation

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
DK	Kenya	Adaptation/mitigation	Kenya - support for climate adapted food production	2011-13	Africa Enterprise Challenge Fund (AECF), Kenya Association of Manufacturers (KAM), Community Development Trust Fund (CDTF)	6.70	Grant	Promotion of innovation and business opportunities within adaptation and sustainable energy
DK	Interregional	Adaptation/mitigation/green growth	General contribution to Global Green Growth Institute (3GI)	2011-13	GGGI	12.10	Grant	Support for development of strategies for mitigation (NAMAs) and adaptation (NAPAs) incl. methods for emission inventories (MRV) primarily in LDCs. The Danish contribution will include support for the development of green growth economies within 3GI partner countries in line with the countries own economic and social development goals
DK	Interregional	Crosscutting issues	Crosscutting issues	2011-13		5.40	Grant	Support for promotion of international climate negotiations, civil society interventions on climate change issues, a technical counselling facility, and administration
DK	Interregional	Mitigation	Global Climate Partnership Fund (GCPF)	2011-13	GCPF Partnership Fnd, SICAV-SIF	5.40	Grant	Reduction of greenhouse gas emissions through lending for investments in renewable energy and energy efficiency in developing countries
DK	Kenya	Adaptation/mitigation	Kenya - continuation of bilateral climate programme re. energy efficiency	2012-14	Northern Rangeland Trust (NRT), Kenya Association of Manufacturers (KAM), Community Development Trust Fund (CDTF)	6.70	Grant	Promotion of innovation and business opportunities within adaptation and sustainable energy
DK	Interregional	Mitigation	MAPS-Chile - mitigation options for addressing climate change	2012-2013 (2 years)	UNDP Chile	1.10	Grant	(part of Mitigation Action Plans and Scenarios - MAPS) - to support the finalization of a reduction strategy for Chile
DK	South Africa	Mitigation	Low carbon transition in the energy efficiency sector	2013-2016 (36 months)	Dept. of Energy	5.30	Grant	Concrete sector specific cooperation with South Africa aiming at improving renewable energy sources (primarily wind energy) with a lesser focus on energy efficiency improvement
DK	Vietnam	Mitigation	Low carbon transition in the energy efficiency sector	2013-2016 (36 months)	Min. of Industry and Trade	8.70	Grant	Concrete sector specific cooperation with Vietnam with the aim of improving energy efficiency of small and medium-size enterprises as well as of, to a lesser extent, buildings
DK	Interregional	Adaptation	Knowledge-based climate adaptation in West Africa	2012-2015?	Agryhmet	3.60	Grant	Development of strategies for climate adaptation in West Africa. Strengthening of the scientific and technical capacity of various actors at the regional and national levels within the fields of 1) gathering, treatment and analyses of hydro-climatic data; 2) establishment of hydro-climatic scenarios and models; 3) communication of hydro-climatic knowledge to decision-makers and users at all levels
DK	Interregional	Mitigation	Climate Investment Fund	2012	IFU - Investment Fund for Developing Countries	6.70	Grant	Mobilization of private funds towards climate relevant investments in developing countries
DK	Indonesia	Adaptation	Contribution to environment-, energy- and climate programme, ph. 3	2012-2017 (60 months)	Var. Indonesian ministries, relevant local authorities, World Bank, World Agroforestry Centre, The Borneo Initiative, Burung	6.70	Grant	Phase 3 of the Environment Programme in Indonesia aims at consolidating the results obtained during ph. 2 of the programme at national policy level in the areas of environment, energy and administration ? of natural resources as well as at improving the implementation of national and local policies in these fields
DK	Interregional	Adaptation/mitigation	Mangroves for the future (Asia)	2012-2015 (3 years)	IUCN - International Union for Conservation of Nature	3.30	Grant	rehabilitation of the coastal environment; resilience-building against natural hazards; climate change adaptation; poverty reduction; and gender equality.
DK	Interregional	Adaptation	Support to the Strategic Climate Fund (SCF) - CTF/PPCR	2012-2015?	World Bank	6.30	Grant	Supplemental contribution for SCF/CIF - Pilot Programme for Climate Resilience (PPCR)
DK	Interregional	Mitigation	Support for MAIN (Mitigation Action Implementation Network)	2012-2015 (3 years)	CCAP - Centre for Clean Air Policy	2.30	Grant	Support for CCAPs MAIN project aiming at expediting development and sound implementation of Nationally Appropriate Mitigation Actions (NAMAs) including a NAMA in the waste sector of Peru
DK	Interregional	Adaptation/mitigation	Crosscutting issues	2012-2015	Various	7.40	Grant	Support for civil society interventions on climate change issues, a technical counselling facility, participation from developing countries in Cartagena meeting, and administration
DK	Interregional	Mitigation	PMR - Partnership of Market Readiness	2012-2014 (2 years)	World Bank	3.90	Grant	Support for post-2012 reduction activities and support for future participation of developing countries in a carbon market

DK	Interregional	Adaptation/mitigation	Ministers' meeting in Brussels 7-8 May 2012	2012-2013	Danish Ministry of Climate, Energy and Buildings	0.04	Grant	Support for the participation from developing countries in the said meeting
DK	Interregional	Adaptation	Regional water and climate project in Africa south of Sahara (AMCOW)	2012-2017	GWP - Global Water Partnership	3.30	Grant	Support to integration of water security and climate change adaptation into developing plans and decision-making processes
DK	Interregional	Adaptation/mitigation	Contribution to the establishment of GCF (Green Climate Fund)	2012-2013	World Bank	0.49	Grant	Support to the establishment of the Green Climate Fund
DK	Interregional	Mitigation	Ghana/Zambia - renewable energy-related technology transfer	2012-2015?	UNDP China	0.30	Grant	Triangular co-operation on technology transfer (Zambia-UNDP-China)
EE	Bhutan	Adaptation	Climate Change Adaptation in the Renewable Natural Resources Sector	2011-2012	Global Climate Change Alliance	0.79	grant	In 2011 Estonia contributed 796 972 EUR to the co-financing action in Bhutan named "Global Climate Change Alliance- Climate Change Adaptation in the Renewable Natural Resources Sector". Co-financing is in cooperation with European Commission and total cost of the project is 4 396 972 EUR. The overall objective of the GCCA programme is to enhance resilience of Bhutan's rural households to the effects of climate change. The specific objective is to ensure climate change readiness of the Renewable Natural Resources sector in Bhutan by mainstreaming climate change into the sector and ensuring steps are taken towards increasingly addressing climate change adaptation at multi-sectoral level. The expected results of the proposed programme are the development of a Renewable Natural Resources- Climate Change Adaptation Action Plan as well as the establishment of an institutional framework allowing a multi-sectoral approach to climate change adaptation.
EE	Multi	Mitigation	World Clean Up 2012	2012	Civic movement-Let's Do It!	0.60	grant	Let's Do It! prepared the programme movement for activities in 2012 called World Cleanup 2012, which hundreds of volunteers, NGOs and many other groups and organizations, came together to initiate the ambitious global volunteer action to start cleaning the world. Series of local, national and regional cleanup events took place from 24th of March 2012 until the end of 2012. More than 3 million volunteers participated in the cleanup actions in more than 65 different countries, picking up together over 100 000 tons of waste. Regional gatherings in 2012 took place to share existing experiences and plan next steps together. Let's Do It! local teams gather in four different regions in November 2012:• European countries: Russia, St Petersburg, 8-11 Nov • Asian countries: Nepal, 8-11 Nov • North-, Central- and SouthAmerican countries: El Salvador, 16-18 Nov • African countries: Benin, 19-21 Nov World Cleanup 2012 Rio. During the programme the easy-to-use free online tool the World Waste Map was created. Everyone can use it to map the illegal garbage in any area in the world. By using free applications for iPhone and Android phones, it's possible to send the data and locations of the most troubling dumping areas to an open virtual world waste map, which is visible to everyone online.
EE	Afghanistan	Adaptation	Strengthening Climate Change Adaptation in Rural Communities, for Agriculture and Environmental Management in Afghanistan	2012-2015	UNEP	1.60	grant	Ministry of the Environment of Estonia made a contribution of 1,605,008 to the United Nations Environment Programme for "Strengthening Climate Change Adaptation in Rural Communities, for Agriculture and Environmental Management in Afghanistan" within UNEP project "Environmental Cooperation for Peacebuilding-Phase III" in 2012-2015. The project will build national capacity to plan for community resilience to climate change based threats in Afghanistan. Focus will be on sustainable water, pasture and environmental management in pilot sites and strengthening communities in Kabul province, the North and Central Highlands of Afghanistan. Core activities involve working with national government planners, advisors and decision makers to strengthen planning and action for community resilience in vulnerable areas of the country where high potential exists for productive, financially sustainable, ecologically sound agricultural development.
ES	International	Adaptation	Adaptation Fund	2010-	World Bank	45.00	Grant	The Adaptation Fund, established under the Kyoto Protocol, is mandated to finance concrete adaptation projects and programmes in developing countries.
ES	Latin America	Adaptation, REDD+, Mitigation	Thematic Window for Climate Change (Spain-IADB Fund for Latin America )	2010-	Inter-American Development Bank	28.00	Concessional loan	The main areas covered by the thematic window for climate change within the Spain-IADB fund are: land-use and forestry, agriculture, water management and sanitation, sustainable energy, and climate change adaptation in cities.
ES	International	REDD+	UN-REDD	2010-	UNDP	1.00	Grant	The UN-REDD Programme, managed by FAO, UNDP and UNEP, was launched to assist developing countries to prepare and implement national REDD+ strategies. The Programme currently supports activities in several countries in Africa, Asia and the Pacific and Latin America.
ES	Africa	REDD+, Mitigation	Africa Sustainable Forestry Fund	2010-	Global Environment Fund	15.16	Capital contribution	Established in 1990, the Global Environment Fund (GEF) promotes solutions to environmental and energy challenges. In this context, the Africa Sustainable Forestry Fund focuses on investments in forest management and forestry.
ES	International	Adaptation	Pilot Program for Climate Resilience (PPCR)	2010-11	World Bank	10.00	Concessional loan	PPCR is a program under the Strategic Climate Fund, one of the two Climate Investment Funds (CIF), which aims to pilot and demonstrate ways to integrate climate risk and resilience into core development planning, while complementing other ongoing activities.
ES	International	Adaptation	Special Climate Change Fund	2010-11	GEF	4.00	Grant	The SCCF is a fund established under the UNFCCC to support climate change activities and programs in developing countries, focusing its activities nowadays mainly in the area of adaptation to climate change.
ES	International	Adaptation,	GEF Replenishment	2010-11	GEF	2.60	Grant	The Global Environmental Facility, as an operating entity of the UNFCCC financial mechanism, provides funding to developing countries and economies in transition for projects and activities targeting global benefits in the areas of biodiversity, climate change, international waters, the ozone layer and land degradation. In this case the contribution focuses on Adaptation projects and activities.

Donor	Beneficiary Country / Region	Thematic area	Programme or Project title	Implementation Period	Implementing Agency	Contribution by EU or MS (million€)	Type (grant / loan)	Additional information (short description of the action, co-financing arrangements, etc.)
ES	International	Mitigation	GEF Replenishment	2010-11	GEF	10.40	Grant	The Global Environmental Facility as an operating entity of the UNFCCC financial mechanism, provides funding to developing countries and economies in transition for projects and activities targeting global benefits in the areas of biodiversity, climate change, international waters, the ozone layer and land degradation. In this case the contribution focuses on Mitigation projects and activities
ES	International	Mitigation	Scaling-up Renewable Energy Program (SREP)	2010-11	World Bank	3.00	Concessional loan	The SREP is a program under the Strategic Climate Fund, one of the two Climate Investment Funds (CIF), which aims to demonstrate the social, economic, and environmental viability of low carbon development pathways in the energy sector. It seeks to create new economic opportunities and increase energy access through the production and use of renewable energy.
ES	International	REDD+	Forest Investment Programme (FIP)	2010-11	World Bank	10.00	Concessional loan	The FIP is a program under the Strategic Climate Fund, one of the two Climate Investment Funds (CIF), which aims to support developing countries' efforts to reduce emissions from deforestation and forest degradation by providing scaled-up financing for readiness reforms and public and private investments. It will finance programmatic efforts to address the underlying causes of deforestation and forest degradation and to overcome barriers that have hindered past efforts to do so
ES	International	Adaptation	Global Facility for Disaster Reduction and Recovery (GFDRR)	2011-	World Bank	2.90	Grant	The Global Facility for Disaster Reduction and Recovery (GFDRR) is a partnership of 38 countries and 7 international organizations committed to helping developing countries reduce their vulnerability to natural hazards and adapt to climate change
ES	Mediterranean region (Algeria, Egypt, Gaza/West Bank, Israel, Jordan, Lebanon, Morocco, and Tunisia)	Mitigation	Facility for Euro-Mediterranean Investment and Partnership - FEMIP	2011-	European Investment Bank	100.00	Capital contribution	The FEMIP is a facility which aims to help the Mediterranean partner countries increase their economic growth and social development and to meet the challenges of economic and social modernisation and regional integration. This contribution will focus on sectors such as renewable energy and energy efficiency projects.
ES	International	REDD+	UN-REDD	2011-	UNEP & UNDP	0.98	Grant	The UN-REDD Programme, managed by FAO, UNDP and UNEP, was launched to assist developing countries to prepare and implement national REDD+ strategies. The Programme currently supports readiness activities in several countries in Africa, Asia and the Pacific and Latin America.
ES	Nicaragua	Adaptation	Project for integrated management and climate change adaptation the Gulf of Fonseca	2012	Spanish Agency for International Development Cooperation (AECID)	0.03	Grant	Economic development for integrated management and climate change adaptation in priority watersheds in the Gulf of Fonseca
ES	Nicaragua	Adaptation	Project on climate change adaptation in Natural Reserve of Yalí	2012	Spanish Agency for International Development Cooperation (AECID)	0.04	Grant	Socioeconomic development and adaptation to climate change in rural communities located in the Protected Area of Hills Natural Reserve of Yalí
ES	Nicaragua	Adaptation	Project for integrated management and climate change adaptation the Gulf of Fonseca-2	2012	Spanish Agency for International Development Cooperation (AECID)	0.02	Grant	Economic development for integrated management and climate change adaptation in priority watersheds in the Gulf of Fonseca

FR	West Africa	Adaptation	Programme régional de gestion durable terres et adaptation au changement climatique au Sahel	2010-2012	French GEF	2.00	grant	Renforcement des capacités des acteurs locaux (ONG, Collectivités locales) en matière de gestion des terres en zones sahéliennes. L'objectif du projet est de créer les conditions politiques, stratégiques et techniques pour que les acteurs locaux puissent définir, mettre en oeuvre et gérer les actions de gestion durable des terres qui amélioreront leurs revenus et réduiront leur vulnérabilité face au changement climatique.
FR	Central Africa	Adaptation	Suivi de la ressource en eau et outil prospectif bassin versant et fleuve du Congo	2010-2012	French GEF	1.30	grant	Mise en place d'un système de suivi hydrologique et environnemental dans le bassin du fleuve Congo. Le projet permettra de contribuer au développement durable du bassin versant du fleuve Congo en développant une politique de gestion intégrée des ressources en eau fondée sur une meilleure connaissance des ressources en eau et l'aide aux décisions d'aménagement et de gestion des eaux.
FR	Mozambique	Adaptation	Adaptation parc de Quirimbas	2010-2012	French GEF	1.00	grant	Le projet vise à créer les conditions d'une gestion économiquement, socialement et écologiquement durable du Parc au bénéfice des populations, tout en promouvant la résilience des écosystèmes d'une aire protégée et de sa périphérie aux changements climatiques. Il soutiendra pour ce faire la mise en place de stratégies d'adaptation et d'atténuation dans le Parc National de Quirimbas, parc représentatif des habitats marins et terrestres du nord du Mozambique. Forte valeur démonstrative.
FR	West Africa	Mitigation	Développement de référentiels pour accès à l'énergie à partir de jatropha**	2010-2012	French GEF	1.40	grant	Développement de filières de production d'énergie renouvelable et sobre en carbone à partir de Jatropha ayant un impact significatif dans la lutte contre la pauvreté en milieu rural africain : rampe à pour objectif : appui des opérations de développement, validation les référentiels agro-environnementaux, technico-économiques et socio-organisationnels de la production jusqu'à son usage énergétique, outils de formation et d'aide à la décision pour les acteurs professionnels et institutionnels, optimisation du développement des filières et aide à la construction des politiques publiques.
FR	North Africa	Mitigation	Appui au PSM**	2010-2012	French GEF	0.75	grant	Le projet a pour objectif d'appuyer la structuration des projets du Plan Solaire Méditerranéen et le renforcement de capacités au sein des pays méditerranéens dans le développement des énergies renouvelables et de l'efficacité énergétique.
FR	Brazil	REDD+	Gestion durable de la forêt et de la biodiversité dans l'Etat de l'Amapa	2010-2012	French GEF	1.60	grant	Renforcement de la politique de développement durable et de conservation de la biodiversité du gouvernement de l'Amapá, en contribuant à l'instauration d'un cadre légal encourageant l'exploitation durable de la forêt, en association avec les populations concernées. Consolider la gestion de la Forêt d'État (4M.ha) dont une partie sera concédée sous forme d'exploitation à faible impact ; et contribuer au renforcement du corridor biologique formé par les unités de conservation mises en place dans l'État.
FR	Central Africa	REDD+	Appui à l'écocertification des concessions forestières	2010-2012	French GEF	1.50	grant	Contribution à la prise en considération des critères environnementaux et sociaux dans les systèmes de certification des bois en Afrique centrale. Valorisation de ces certificats auprès des acheteurs occidentaux. Le projet a pour objet la promotion d'une exploitation des ressources ligneuses compatible avec la préservation des surfaces forestières et des services environnementaux produits par ces forêts pour les populations actuelles et futures, au niveau local, national et mondial. Le projet permettra d'élever le niveau de qualité des aménagements forestiers en Afrique centrale en améliorant les méthodes et les techniques de conception et de préparation des plans d'aménagement durables; de renforcer la capacité de gestion et de suivi des entreprises, des administrations nationales et des autres parties prenantes, ONG notamment; de diffuser auprès des entreprises d'exploitation forestière en relation avec les administrations les modalités et démarches de certification de légalité et d'écocertification; de promouvoir les labels d'écocertification auprès des importateurs européens de produits ligneux.
FR	Albania	REDD+	Protection zones montagneuses Albanie et pays limitrophes**	2010-2012	French GEF	1.20	grant	Mise en place d'un système d'Indications Géographiques pour des productions provenant des zones de montagne balkanique (Chataigne, Moutons, ...) afin de valoriser le potentiel économique de ces régions au bénéfice des populations locales. Le projet donnera les moyens aux acteurs du développement des zones de montagne de la région balkanique de faire de la conservation de la biodiversité une composante centrale de leurs stratégies de développement. Le projet vise à la valorisation, en Albanie et dans les pays limitrophes, et plus particulièrement ceux des régions montagneuses, qui sont aujourd'hui exposées aux phénomènes de désertification humaine en faveur des villes et du littoral.
FR	South America	REDD+	Développement REDD+ sur le plateau des Guyanes**	2010-2012	French GEF	1.00	grant	Créer une alliance technique à l'échelle du plateau des Guyanes destinée à conserver ses forêts et à contribuer au bien-être de ses populations, de sa biodiversité et de la communauté globale. Mise à disposition des ressources et compétences techniques des services forestiers de la France, du Suriname, du Guyana, du Venezuela et du Brésil (Etat d'Amapa) afin de développer des compétences REDD+ aux niveaux nationaux, facilitant le futur MRV du mécanisme REDD+ avant la mise en oeuvre d'actions REDD+ sur le Plateau des Guyanes. Etroite collaboration avec ONG (WWF, CI, Tropenbos), centres de recherche (UMR Ecofog, IRD, CELOS, INPA, RAINFOR, centre Iwokrama), bailleurs présents dans la région (Norvège, Allemagne, Pays-Bas, USA). Dialogue permanent avec les représentations des communautés indigènes (COICA).
FR	South America	REDD+	Appui au financements innovants des aires protégées	2010-2012	French GEF	0.983	grant	Le réseau de fonds fiduciaires pour la conservation de la biodiversité d'Amérique latine et Caraïbes (FFC RedLAC) a identifié plusieurs innovations de financement basées sur des instruments de marchés pouvant apporter des solutions durables et intégrées aux pressions qui menacent la biodiversité, en assurant dans le même temps de nouvelles sources de financement pour la conservation de la biodiversité. RedLAC propose d'utiliser les connaissances existantes et les meilleures pratiques de ses membres pour renforcer la capacité de ses FFC membres à recourir aux instruments de marchés, tels que la mise en oeuvre des crédits carbone générés par des projets de déforestation évitée (mécanismes REDD) et autres paiements pour les services écosystémiques.

FR	Tunisia	REDD+	Gestion écosystèmes forestiers de Chambi	2010-2012	French GEF	0.90	grant	Appui aux populations locales vivant en périphérie du Parc National de Chaambi et valorisation des produits issus des ressources naturelles de la région. Le projet vise à la réconciliation du Parc National avec les populations riveraines, sur la base d'un partage des avantages économiques de la conservation et d'une compensation des conséquences des restrictions d'accès aux ressources naturelles imposées par le Parc. Il vise à promouvoir un modèle de gouvernance et de gestion durable du Parc permettant de concilier la conservation des ressources naturelles et le développement socio-économique des populations riveraines, modèle qui pourra ensuite être diffusé au niveau national et régional.

FR	Colombia	REDD+	Valorisation potentiel REDD+ et MDP pour le développement durable du Rio Grande de la Magdalena	2011-2013	French GEF	1.46	grant	
FR	West Africa	REDD+	Afrique de l'Ouest - Forêt et adaptation au changement climatique		French GEF	1.64	grant	Analyse du rôle des forêts dans l'atténuation des impacts du changement climatique en Afrique de l'Ouest et intégration de ces éléments dans les politiques nationale d'adaptation. Le projet contribuera au développement de politiques et projets d'adaptation basée sur les écosystèmes à différentes échelles (locales, nationales, régionales) en Afrique de l'Ouest soudano-sahélienne afin de renforcer la gestion durable des forêts et permettre aux groupes sociaux les plus vulnérables d'accroître leurs capacités adaptatives et d'améliorer leurs conditions de vie grâce aux biens et services écosystémiques fournis durablement par les formations forestières.
FR	China	Mitigation	Carbone rural (bambous) et renforcement de capacités (Yunnan, Sichuan)		French GEF	1.00	grant	L'AFD, avec le soutien du FFEM, et l'ACCA21, centre agenda 21 du ministère des sciences et technologies chinois (MOST) ont coopéré de 2006 à 2009 sur un projet de promotion du MDP dans 4 provinces du sud-ouest de la Chine. Ce projet a proposé de poursuivre et d'étendre cette coopération en s'intéressant au secteur du carbone rural (reboisement, biogaz, agriculture). Il s'attachera, sur la base de projets concrets, à développer des outils et méthodologies adaptées pour ensuite promouvoir le carbone rural en Chine et au niveau international. Le projet ciblera géographiquement les provinces du Sichuan et du Yunnan, au caractère rural important.
