INTRODUCTION

The NAP process was established in 2010 as part of the Cancun Adaptation Framework to complement the existing short-term national adaptation programmes of action (NAPAs).

The NAP process is designed to support all developing countries, especially the least developed countries (LDCs), in satisfying their medium- and long-term adaptation needs.

The NAP process is meant to reduce vulnerability, build adaptive capacity and mainstream adaptation into all sector-specific and general development planning.

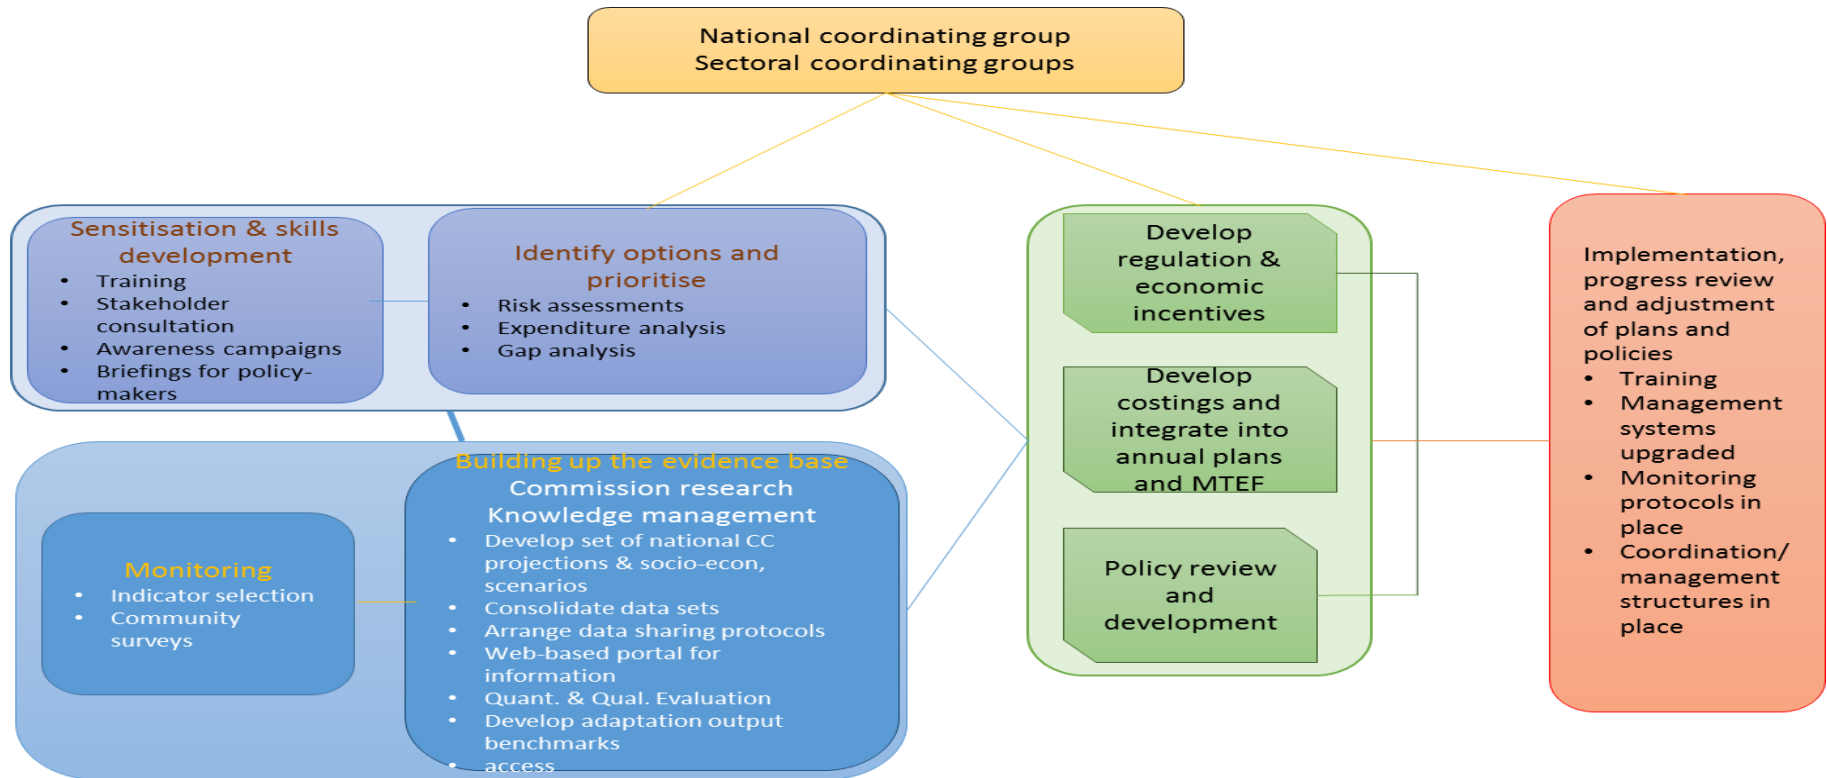

ACTIONS/Milestone

PLANNING PROCESS: WORKSHOP

- 35 participants attended
- From 7 regions of country; state and non state actors

Two year Road-map for NAP process in the Gambia

ACTIONS/Milestone

Establishment of a National NAPs Team

✓ Composed of 13 Institutions (Private sector)

PLANNED ACTIVITIES

❖ **Planning to submit request to GCF to start process**

❖ **NAPs-Ag: UNDP-FAO**

- Training of Trainers organized on hydro-climatic info
- Conduct outreach and sensitization on climate change issues in agriculture and natural resources sectors with CSOs and parliamentarians
- Update and mobilize resources for the NAP roadmap

PLANNED ACTIVITIES

- ❖ Ecosystem based adaption project (GCF)
- ❖ Restoring degraded lands
- ❖ Project to Complete the Gaps the current coastal project (GCF)
- ❖ Adapting agriculture to CC

Challenges

- i) Coordination,
- ii) overlapping mandates
- iii) Finance
- iv) Low National Capacity to design adaptation projects
- v) conflicting mandates
- vi) high turnover of staff

THANK YOU
