Mali Climate Funds (MCF)

- Background
- Setting-up of MCF
- Keys lessons

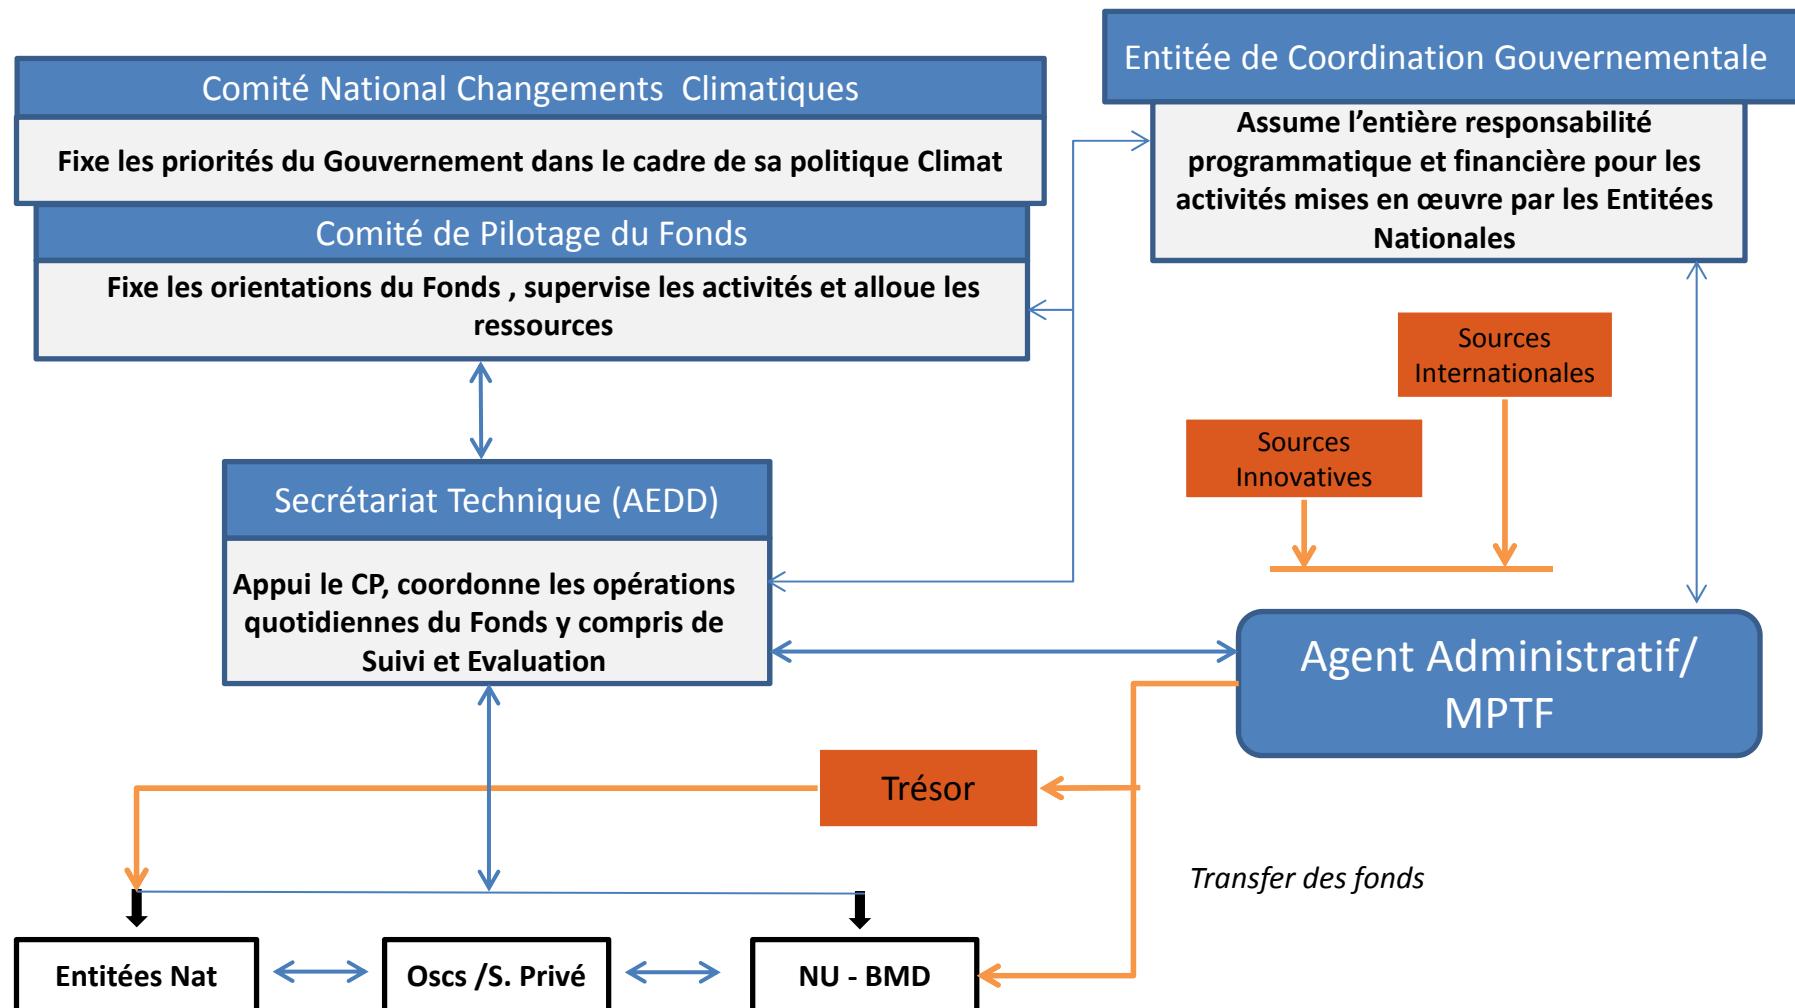

Background

- In 2011, Mali has elaborated a strategic framework for Green Economy and Resilient to Climate Changes based on its National Strategy for Climate Changes (NSCC).
- Building a resilient economy to climate change will require massive investments in the most vulnerable sectors, including: e.g: Agri, Forestry, Renewable energy, new transport system, etc
- The path towards a green economy, resilient to climate change also involves the integration of country' priorities in all development planning tools and institutionalization of economic instruments.

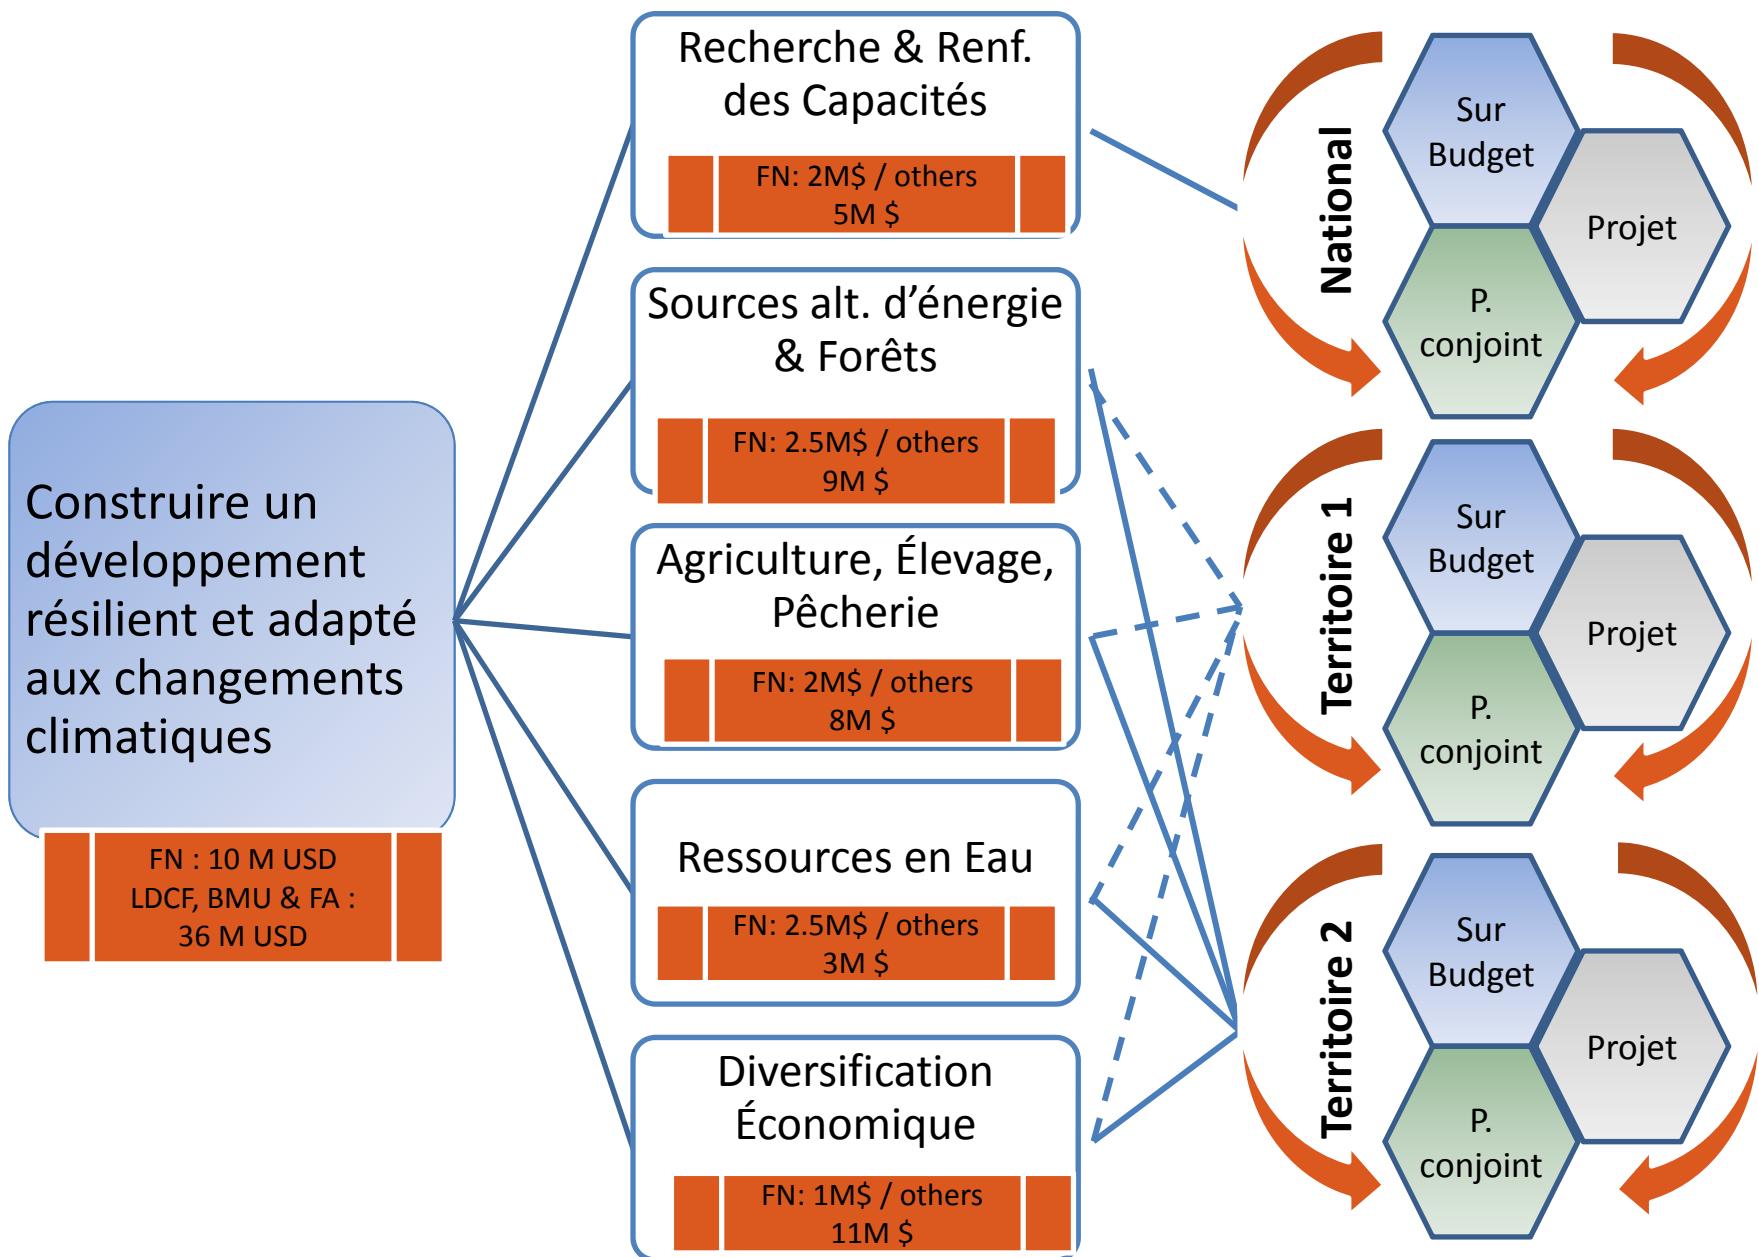

Setting-up Mali Climate funds

- Critical assessments of NSCC (8 political orientations, 8 Strategic Axes and 144 actions)
- Prioritization of actions
- Decide whether the Investment Plan is by each sector or global
- Identify the most appropriate sources of funding and the success rate and the probable chances of mobilization for each case
- Capacity building for the management of extra-budgetary funding mechanisms

Governance of Mali climate Fonds

2014 Results Framework

Key lessons

- Political will
- Leadership
- Strong Institutional arrangement
- Parties engagements
- Less constraints/ Flexibility

THANKS
