

Session on the COP30 Presidency Roadmap on Transitioning Away from Fossil Fuels in Energy Systems

Climate Week 4

9 September 2026 (17h – 18h)

Room A7 – Baku Convention Center

The COP30 Presidency invites the participants of the Implementation Forum to a session focused on the **COP30 Presidency Roadmap on Transitioning Away from Fossil Fuels in Energy Systems, in a just, orderly and equitable manner, accelerating action in this critical decade, so as to achieve net zero by 2050 in keeping with the science.**

Accelerating the transformation of energy systems is critical to achieving the objectives of the Paris Agreement and advancing climate action in this critical decade. As an action-oriented contribution to the implementation of paragraph 28 of the first Global Stocktake, adopted by consensus at COP28, the COP30 Presidency is developing a Roadmap to support countries and other stakeholders in advancing this transition. It seeks to build a shared understanding by identifying systemic risks, structural barriers and enabling conditions, while presenting options, opportunities and possible sequences of action consistent with national circumstances and the Paris Agreement.

Climate Week 4 in Baku provides an opportunity to present the **latest updates on the Roadmap to stakeholders and to continue the dialogue to inform its finalization.** The session will be hosted by **COP30 CEO Ana Toni.**
