
Break-out group: European Union

Plenary feedback

2023 Joint Meeting of Lead Reviewers
10th BR/NC Lead Reviewers Meeting
13, 15-16 February 2023

United Nations
Climate Change Secretariat

What worked well:

- Checklist provides a systematic approach to the review with reference to reporting requirements and the RPG; it also provides examples of possible recommendations
- Review report template provides specific guidance for EU and its member states
- Tables in the review report will be prefilled by the secretariat
- Guidance is provided on how to assess completeness and transparency (mostly, partially)

What could be improved:

- Issues with access to the review report through BR-VTR (some LRs couldn't open the report)
- Challenge with coordination of experts working on the same subject
- Challenge with different browsers when accessing BR-VTR

Suggestions:

- Checklist could be split by topics
- BR-VTR username could be an email account
- Chapter on projections should include 2025 as one of the optional years
- Check the instructions for filling in the assessment tables (there is a reference from the previous template)
- LRs should coordinate similar questions from different topics, for instance PaMs and projections
- Projections graph for the EU could include data for ETS and ESD
- Provide ERTs with the link to the BR-DI (data interface tool developed by the secretariat) as one of the tools that could help ERTs to analyse BR data
