- At COP 28:
  1. **Negotiating sessions under the SBs and the CMA** with a view to recommending a draft **decision** for consideration and adoption, to consider progress, including key findings, opportunities and barriers in implementing the work programme
  2. Presentation by the co-chairs on the annual report at the **annual high-level ministerial round table on pre-2030 ambition**

## Links to the Global Stocktake

---

### Mandate

- to urgently scale up mitigation ambition and implementation in this critical decade **in a manner that complements the global Stocktake**
- Organizing two global dialogues focusing on an exchange of views, information and ideas and investment related events to bring together a multitude of stakeholders. Other dialogues may be held in conjunction with existing events, such as the regional climate weeks.

### In 2023

- Global Dialogues & Investment-focused events aim to become an impactful tool to drive ambition and implementation, facilitative and inspiring and bring together the “right” participants.
- The topics covered by the Mitigation Work Programme are also considered under the Global Stocktake “technical” phase (e.g. Synthesis report of the technical assessment paras 112-125).

### In 2024 and beyond

- The “consideration of outputs” ought to give political signals that the MWP may consider in its work in 2024 and beyond.
-
