CAPACITY DEVELOPMENT & SHOWCASING PACIFIC CLIMATE ACTION

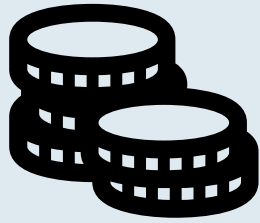

BROADER IMPACT

*This represents the NDC Hub's achievements during phase 1 - phase 3, between January 2019 - September 2024

Macro level view of climate finance in the Pacific

Global Climate Finance Promises

- 100b p/a (2009) by 2020
- 100b p/a shifted to 2023 (COP 26)
- Double Adaptation Funding 2022 (COP 27)
- Loss & Damage Fund 2022 (COP 27)

What the Pacific needs?

- 1 billion p/a for resilience and adaptation (IMF)
- ~650m p/a until 2030 for RE in NDCs (IRENA)
- So less than 2% of Global Promise

What are we receiving?

- Only receiving 220m p/a
- Less than 0.22% of the global promise
- Less than 7 % of what we need
- Sporadic, short term and unsustainable projects
- ODA restrictions – human capacity, ODA graduates can't access CF

Thank you
