

GLOBAL COORDINATION PLATFORM

The CBIT Global Coordination Platform brings together practitioners from countries and implementing and executing agencies in order to:

- Enable coordination
- Identify needs and gaps in national transparency systems
- Share lessons learned through regional and global meetings
- Enable knowledge sharing to facilitate transparency enhancements
- Facilitate access to emerging practices, methodologies, and guidance on transparency of climate action and support
- Links closely to UNDP CBIT global activities and the GSP (NC and BUR)

www.cbitplatform.org

Examples of how to benefit from the CBIT Platform

- i) Reach out to other CBIT Country Focal Points to learn from implementation of specific activities of interest
- ii) When designing CBIT projects, the platform provides easy access to understand what other projects focus on and what the progress indicators are. If you are about to design a CBIT project, it is an excellent way to get inspiration to shape the project
- iii) When implementing project activities, Country Focal Points are supposed to upload documents, workshop reports, analyses etc. generated by the project. This will give users of the platform access to a wealth of information and learning
- iv) Yearly self-assessment of capacity will help countries to bridge the gaps in their transparency systems
- v) Webinars, articles and other knowledge exchange services
