

FACILITATIVE SHARING OF VIEW

DEMOCRATIC REPUBLIC OF THE CONGO

BONN

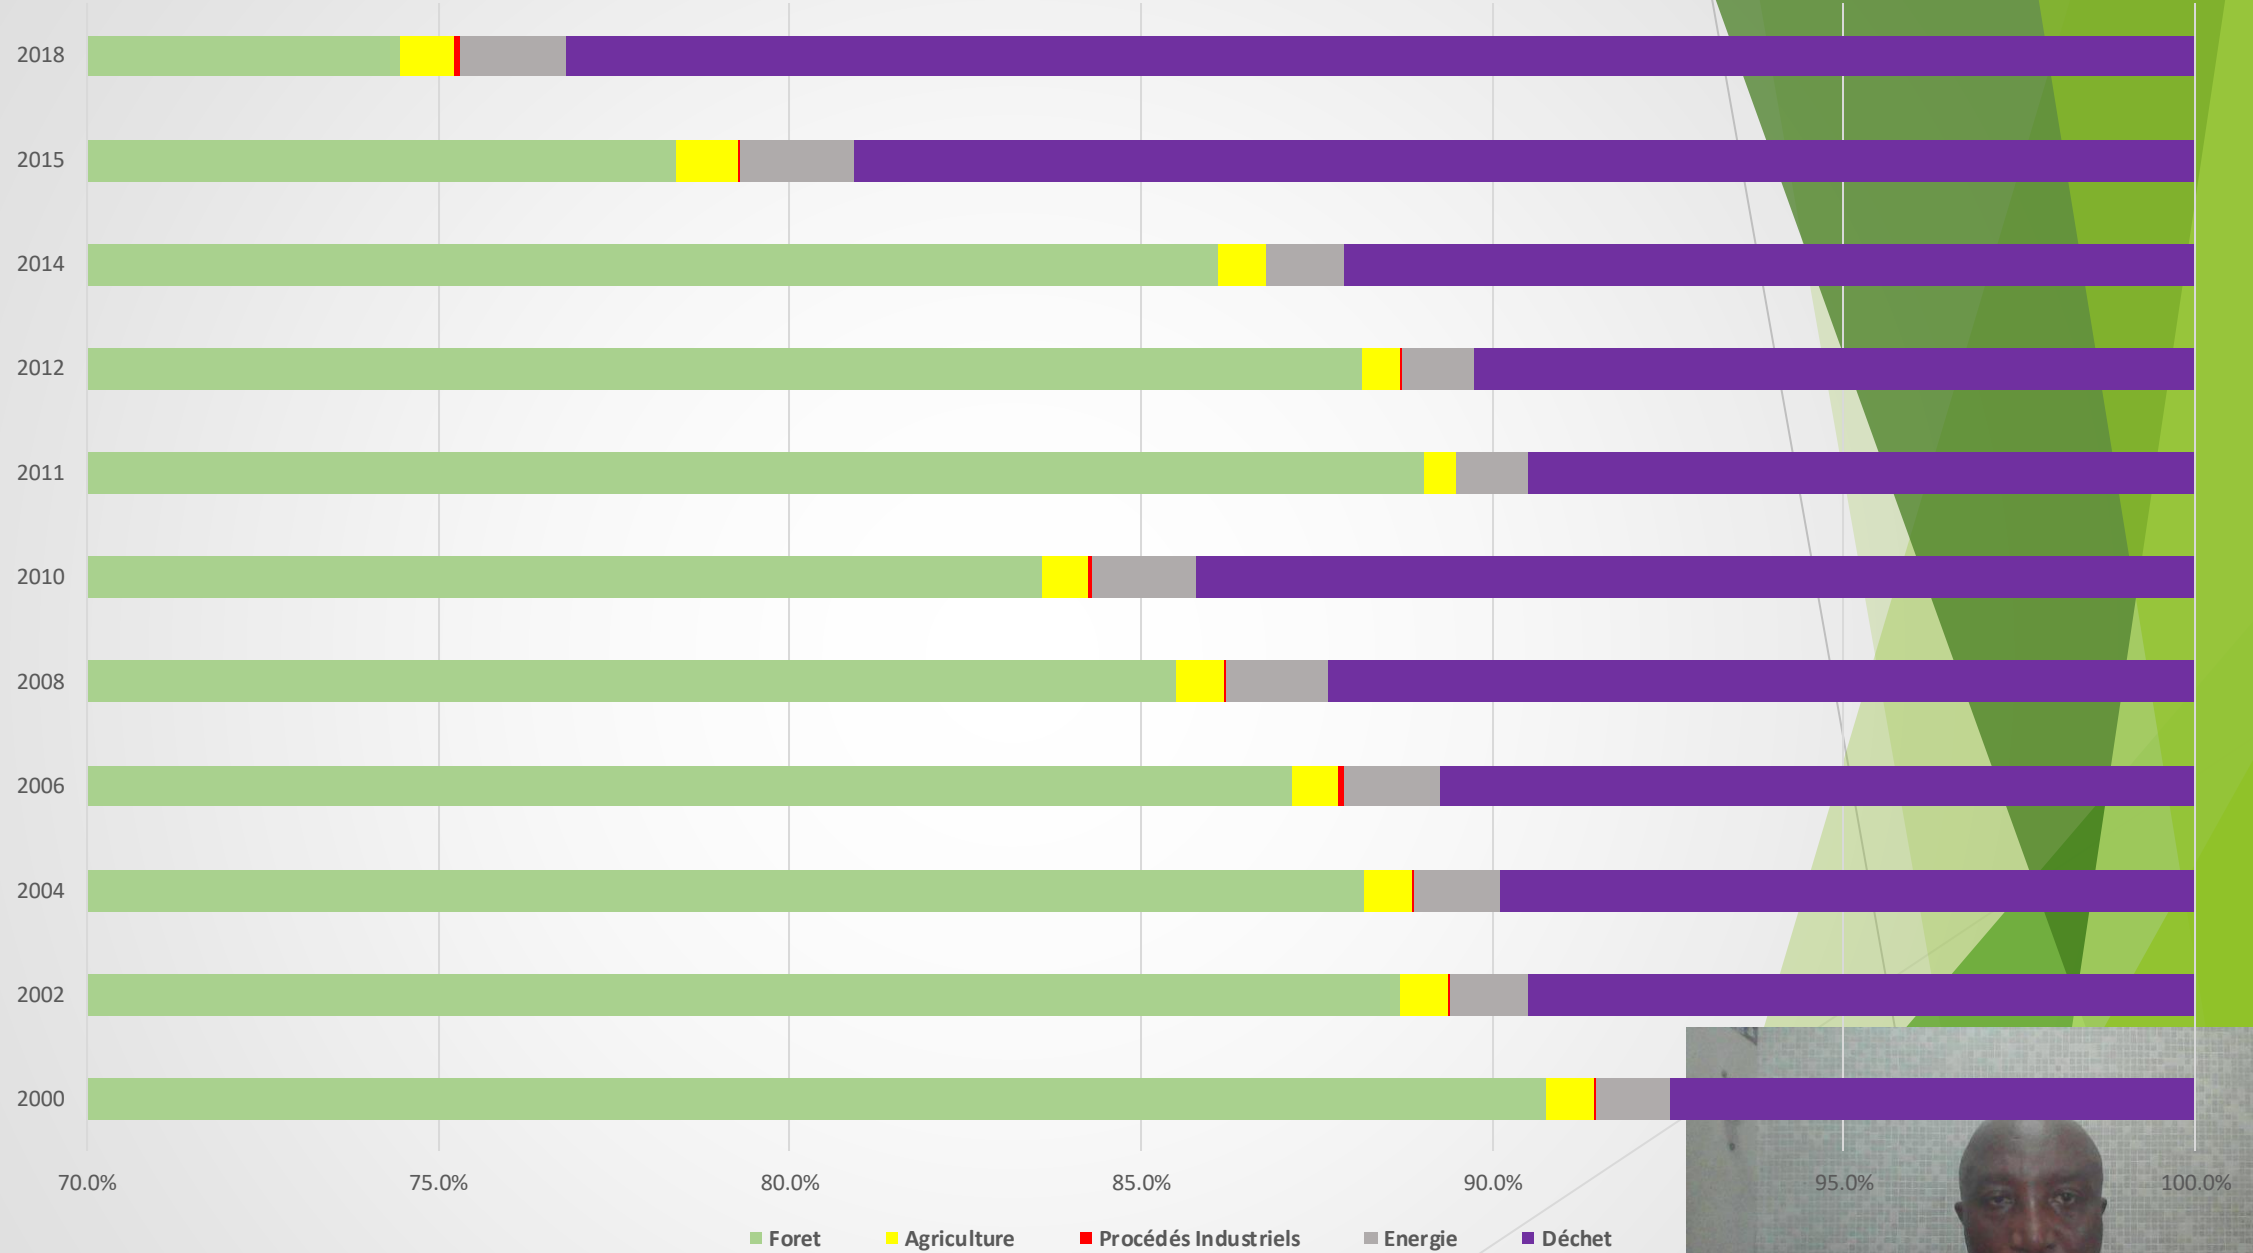

05 JUNE 2024

National context

Institutional arrangements

GHG inventory

Contribution of sectoral emissions to the national total

Types of measures:

1. legal and regulatory
2. Economic and fiscal
3. Voluntary and negotiated Agreements
4. Popularization, public awareness
5. Education, research and development.

Approach:

Review of different PNSD studies, projects and programs

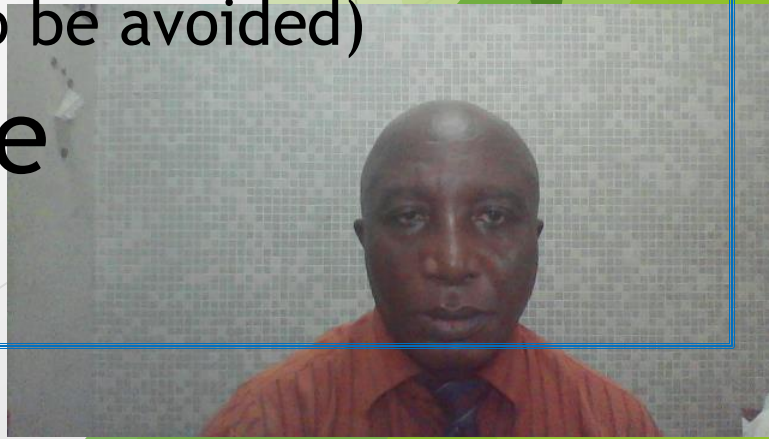

Energy (120.43 Gt eq-CO₂ expected to be avoided)

- Reducing wood energy demand and facilitating electricity access
- Developing and improving urban and interurban transportation

Agriculture (238.05 Gt eq-CO₂ expected to be avoided)

- Sedentarizing agriculture

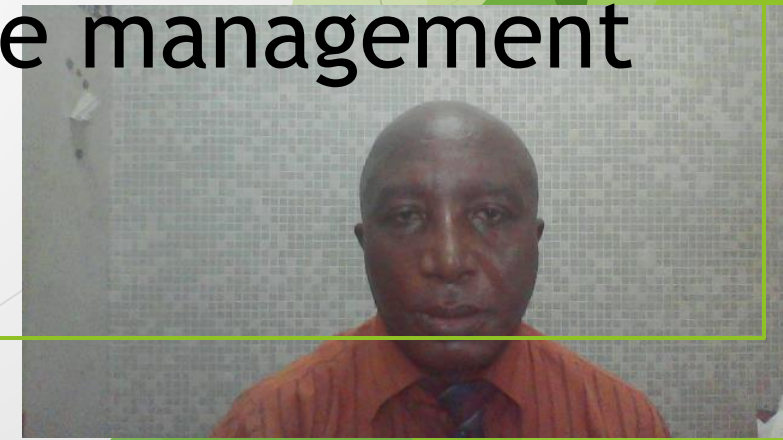

Forestry and other Land Uses (244.42 eq-Gt CO₂ expected to be avoided)

- Reducing deforestation and forest degradation
- Strengthening carbon stock

Waste (47.1 Gt eq-CO₂ expected to be avoided)

- Improving access to waste management services
- Waste valorizing

Insufficient access to resources

1. Insufficient funding in the national budget
2. Duplication of activities and funding
3. Insufficient transparency on non-financial support

Insufficient Current levels of GEF funding for preparation of NC/BUR

- Gaps in monitoring capacity and technical assistance

The background of the slide is a stylized, waving flag of the Democratic Republic of Congo. It features a light blue upper section with a yellow five-pointed star in the top-left corner. The lower section is divided into two diagonal stripes: a red stripe on the left and a green stripe on the right, both separated from the blue section by thin yellow borders. The entire flag is set against a white background with a subtle shadow effect.

Thank You!
