# NEW Challenges

- How to raise collective and individual awareness with wide stakeholders to tackle climate change impacts with emphasis in terms of information dissemination in the context of Corona pandemic.
- How to improve stakeholders' knowledge to better understand the national adaptation plan and its integration in the national development activities
- How the NAP can be considered widely by all the stakeholder as the most appropriate tool for fighting against climate change in LDCs as well as in the context of the Corona pandemic
- How to seek the effective commitment of stakeholders in fighting against the effects of climate change
- How to tackle insecurity issues and to implement some adaption activities with local people

# How to address the news challenges

- Robust institutional arrangement to track and capitalize ;
- Substantial human and financial resources;
- Capacity building of actors at all levels.

# Goals to be achieved in sort middle and long term

- To sensitize more people on the impacts of climate change;
- To tackle land degradation issue given that the LDCs economies are based on natural resources such as agriculture
- To develop a national strategy for resilience and effective long-term adaptation;
- Develop a national platform to supervise and track the LDCs' vision 2050;
- To operationalize /implement the LDCs' vision 2050;
- To improve population resilient to climate change effects by adopting Smart agricultural practices

**Thank you**
