

ACW 2022 - List of Climate Week Events (v2 as of 09/08/2022)
29 August - 02 September

AFRICA

Date	Start time	End time	Organizer(s)	Title	Description	Event type	Code
29-Aug	9:00	10:00	UNFCCC and Partners	Official Opening of the ACW	Opening remarks from high-level dignitaries and a welcome message from the host government of Gabon.	Open	ACW-Open-2
29-Aug	10:00	12:50	UNFCCC and HC	Ministerial roundtable on Climate Finance	Main Programme	Open	ACW-HLmin3-2
29-Aug	12:50	13:00	UNFCCC and HC	Closing of High Level Segment and Family Photo	Main Programme	Closed	ACW-HLmin4-2
29-Aug	14:00	15:00	High-Level Champions; 2XCollaborative; UN Climate Change; Gender Smart Investing. She Leads Climate Action;	Gender Considerations in Climate Investment	The climate crisis is not “gender neutral”. Women and girls experience the greatest impacts of climate change, which amplifies existing gender inequalities and poses unique threats to their livelihoods, health, and safety. Yet there is not much traction around mobilising resources towards gender adaptation and resilience building. A gender perspective needs to be taken into account when developing resource mobilization strategies, applying climate finance instruments, and ensuring equal participation in the deployment of financial resources, particularly at the local level. The aim of the session is to put gender considerations front and centre in investment in climate action by unlocking the potential of applying a gender lens to climate finance and vice versa. Integrating these two investment agendas is a powerful lever for amplifying both impacts and returns, thus supporting the case for their widespread adoption in the financial mainstream and driving positive outcomes for women and the world.	Open	ACW-AE014
29-Aug	15:15	16:15	High-Level Champions; UN Climate Change	Unlocking Trade and Finance for Ambitious Climate Action	Explore a holistic approach to mobilizing climate capital into nature positive and sustainable African businesses, people, and projects, including considering the role the African Continental Free Trade Agreement can play in amplifying the impacts.	Open	ACW-AE015
29-Aug	16:30	18:30	UN Climate Change; NDC Partnership	Regional Exchange on Long-term Climate Ambition and Implementation at the Africa Climate Week 2022	Regional Exchange on Long-term Climate Ambition and Implementation at the Africa Climate Week 2022 consist of a 4-day long curated program on learning exchanges about the links between the NDC update cycle, LT-LEDS, implementation and green finance.	Open	ACW-AE007-1
30-Aug	9:00	10:30	UNFCCC; AfDB; UNDP; RCC Lome; RCC Kampala	Track 1. Connecting Nationally Determined Contributions, Long-term Strategies, and immediate action on the ground	Long-term low GHG emission development strategies (LTLEDS) are an important tool in setting out the vision, policies and pathways to achieving net zero emissions. Alongside the NDCs, LTLEDS can help provide important signals to investors, businesses, civil society and the international community on the direction of travel towards low GHG emission development and facilitate the development of aligned policies while accelerating immediate action on the ground. Developing these strategies can ensure that pathways to achieve development and climate goals are consistent and mutually beneficial, helping countries to make sound development choices today and putting in place the foundations for sustainable, resilient growth. In this session government and non-government stakeholders will share their efforts to prepare the grounds for developing LTLEDS, NDCs and aligned policies, explore the regional challenges and opportunities in these efforts, and consider good practices towards the effective translation of long-term strategies into short- and medium-term actions.	Open	ACW-T1001
30-Aug	9:00	10:30	UN Climate Change;	Track 2. Africa's dream for transformative adaptation and long-term resilience	Transformative adaptation and long-term resilience require a shift in response and policies to facilitate addressing of the core socio-economic and environmental challenges that climate change presents. This session will explore relevant paradigm shifts and appropriate policy environments for transformative adaptation.	Open	ACW-T2001
30-Aug	10:30	12:30	UNEP; IRENA; EN21; (UNFCCC?)	Track 1. Planning sustainable energy systems for greater climate justice and energy security in Africa	Just energy transition and long-term energy and emission reduction planning in the region focusing on energy generation, energy security and alignment of LTLEDS and long-term energy planning from a policy and technology perspective.	Open	ACW-T1002
30-Aug	10:30	12:30	UN Climate Change;	Track 2. Innovative community practices for transformative adaptation and long-term resilience	It is widely known that climate change adaptation measures and approaches may involve unique practices engineered by communities. This session will highlight some of the successful practices to date while citing their enabling and inhibiting factors and measures for scaling-up.	Open	ACW-T2002
30-Aug	14:00	15:30	World Bank; IETA; UNDP; UNFCCC	Track 1. Engaging non-state actors in Climate Change mitigation actions through setting price on carbon & use of article 6 mechanisms	This session will showcase developments in carbon pricing and voluntary carbon markets for Africa, to help provide a better understanding of the state and trends of carbon pricing developments in the region and explore collaboration and knowledge exchange among stakeholders in the region. Government representatives from countries will present on their work on climate change mitigation and carbon pricing implementation and non-state actors will contribute to the discussion by sharing their vision and needs in order create a broad carbon pricing ecosystem that effectively contributes to transition towards a net-zero development path. The session will showcase progress, expected outputs, milestones, and achievements, provide insights into challenges and lessons learned in implementing country programs, and discuss next steps for each country, both in terms of country policy implementation.	Open	ACW-T1003
30-Aug	14:00	15:30	UN Climate Change;	Track 2. Financing transformative adaptation and long-term resilience	A resilient financial sector closes the adaptation funding gap, but also ensures appropriate scaling up of climate resilient investments with just disbursement ratios toward transformative adaptation and long-term resilience. This session will discuss how to unlock the much-needed finance in Africa.	Open	ACW-T2003
30-Aug	15:30	17:00	AGRA; GAIN; UN Climate Champions (from GCA) UNEP / UNDP	Track 1. Advancing climate smart, nature positive and nutritious food systems in Africa.	This session will discuss good practices from African Agri SME's across the food systems in 4 specific locations that are delivering on climate action and will raise awareness on the financial needs and opportunities that have the potential to transform food systems across and beyond the continent. This event will showcase investable initiatives that are being implemented in Africa, or that are implementation ready, and discuss the short- and long-term policy, finance actions and technical know-how needed to mainstream and make food systems in Africa climate-smart, nature-positive, and nutritious. The impact of this proposed system change is: -Carbon sequestration through HYRAP; -Increased carbon saved through solar irrigation; -Reduction on the use of water due to tolerant seeds; -Increase in yield per hectare; -Increase on farmers income; -Increase in diet diversity and nutrition.	Open	ACW-T1004
30-Aug	15:30	17:00	UN Climate Change;	Track 2. Beyond activism — Leveraging the potential of youth contribution to transformative adaptation and long-term resilience	With charismatic young people emerging from Africa, activism has been the most prominent contribution by far. This section will discuss other avenues for youth contribution to transformative climate action while highlighting challenges and potential solutions for effective youth contribution.	Open	ACW-T2004

31-Aug	9:00	10:30	AfDB; ECOWAS; UNEP-convened Climate; Clean Air Coalition	Track 1. Addressing Africa's soaring Methane Emissions	Without decisive action on Methane, which complements decarbonisation efforts, we will not be able to keep 1.5 degree warming in reach (IPCC, AR6). The Global Methane Assessment released by CCAC and UNEP last year has shown that cost effective methane abatement measures are readily available and come with sustainable development benefits, including for health and food security. Almost half of the countries in the region have signed onto the Global Methane Pledge. While in the region, the reduction potential is highest in the fossil fuel and the livestock sectors, measures taken to address methane emissions from waste come with important air quality and resource benefits as well. This session will highlight how African countries have started to include methane action into their NDCs, zoom into national Methane Profiles and Roadmap development, sector specific policy and planning examples, as well as the importance of measurement of actual methane emissions.	Open	ACW-T1005
31-Aug	9:00	10:30	UN Climate Change;	Track 2. Addressing the critical Water-Food-Energy (WEF) needs in order to achieve transformative adaptation and long-term resilience	Climate change presents grave threats to the WEF sectors and their potential to contribute to transformative adaptation and long-term resilience. This session will explore what integrated and transformative approaches Africa could employ to meet its WEF needs.	Open	ACW-T2005
31-Aug	10:30	12:00	UNDP; UN Habitat; REN 21	Track 1. Cities as agents of transformation / Sustainable cities	Main Programme	Open	ACW-T1006
31-Aug	10:30	12:00	UN Climate Change;	Track 2. Harnessing nature for transformative adaptation in Africa	Besides their cost-effectiveness, nature-based solutions (NbS) have been found to offer major co-benefits for transformative adaptation and long-term resilience. This session discusses the potential for NbS and its enabling environment in Africa.	Open	ACW-T2006
31-Aug	14:00	15:30	World Bank; AfDB; UNDP	Track 1. Blended Finance to Support African SMEs to Scale Transformative Climate Solutions towards NDC/LTS implementation)	This session focuses on the three-pronged approach of policy incentives, capacity building tools and financing instruments required to support the private sector, particularly SMEs which are drivers of growth in emerging markets, to adopt and scale transformative climate solutions in mitigation.	Open	ACW-T1007
31-Aug	14:00	15:30	UN Climate Change;	Track 2. Exploiting indigenous and frontier technologies for transformative adaptation in Africa	This session will highlight the various adaptation challenges affecting the African region and how they can be addressed with the help of indigenous and frontier technologies in the face of climate change across Africa.	Open	ACW-T2007
31-Aug	15:30	17:00	IRENA; AGHA; UNDP	Track 1. Potential for green hydrogen production, finance and use in the African Region	The region shows strong potential for green hydrogen production and use due to the availability of renewable energy, growing local demand, and the ability to transport green hydrogen and its byproducts to meet growing international demand. This session will discuss opportunities for green hydrogen production and use in the region. Panelists will discuss how much can be done now (including participation in Article 6) to develop and demonstrate emerging technologies and prepare the ground for their future scaling up. This decade is expected to be crucial for the long-term promise of low-carbon hydrogen in the region.	Open	ACW-T1008
31-Aug	15:30	17:00	UN Climate Change;	Track 2. Collaboration — addressing common problems for transformative adaptation and resilience	Climate change introduces and exacerbates impacts spreading beyond countries' borders. War, conflict, social unrest as well as unsustainable use of natural resources are common challenges whose impacts are exacerbated by climate change. This session discusses effective ways of addressing transboundary challenges in the face of climate change.	Open	ACW-T2008
2-Sep	15:00	16:00	UN Climate Change; Partners	Wrap-up Ceremony	Main Programme	Open	ACW-WrapUp
2-Sep	16:00	17:00	UN Climate Change; Partners; Highlevel Champions	Closing Ceremony	Main Programme	Open	ACW-Closing

<div> <div> Regional Climate Weeks 2022 29 Aug - 02 Sep </div> <div>  </div> </div> <div> Africa Climate Week 2022 - List of Affiliated Events (version 3 as of 09/08/2022) 29 August - 02 September </div>							
Date	Start time	End time	Organizer(s)	Title	Description	Event type	Code
29-Aug	9:00	18:00	UNFCCC Transparency Division	Technical analysis of biennial update reports submitted by Parties not included in Annex I to the Convention	Technical analysis of reports submitted by Colombia and Uruguay by a team of technical experts. It is aimed at increasing the transparency of mitigation actions and their effects. It will also involve a virtual consultation with the Parties being analyzed.	Closed	ACW-AE003-1
29-Aug	14:00	15:00	High-Level Champions; 2XCollaborative; UN Climate Change; Gender Smart Investing. She Leads Climate Action;	Gender Considerations in Climate Investment	The climate crisis is not "gender neutral". Women and girls experience the greatest impacts of climate change, which amplifies existing gender inequalities and poses unique threats to their livelihoods, health, and safety. Yet there is not much traction around mobilising resources towards gender adaptation and resilience building. A gender perspective needs to be taken into account when developing resource mobilization strategies, applying climate finance instruments, and ensuring equal participation in the deployment of financial resources, particularly at the local level. The aim of the session is to put gender considerations front and centre in investment in climate action by unlocking the potential of applying a gender lens to climate finance and vice versa. Integrating these two investment agendas is a powerful lever for amplifying both impacts and returns, thus supporting the case for their widespread adoption in the financial mainstream and driving positive outcomes for women and the world.	Open	ACW-AE014
29-Aug	14:00	18:00	UN Climate Technology Centre and Network, UNEP	CTCN NDE REGIONAL FORUM FOR AFRICA	The main objectives of CTCN NDE Regional Forum for Africa 2022 is to engage and empower stakeholders to drive climate action across countries, communities, and economies. Working together opens opportunity to advance climate action, address social inequalities and invest in development that is good for humanity and nature.	Open	ACW-AE034-1
29-Aug	15:15	16:15	High-Level Champions; UN Climate Change	Unlocking Trade and Finance for Ambitious Climate Action	Explore a holistic approach to mobilizing climate capital into nature positive and sustainable African businesses, people, and projects, including considering the role the African Continental Free Trade Agreement can play in amplifying the impacts.	Open	ACW-AE015
29-Aug	16:30	18:30	UN Climate Change; NDC Partnership	Regional Exchange on Long-term Climate Ambition and Implementation at the Africa Climate Week 2022	Regional Exchange on Long-term Climate Ambition and Implementation at the Africa Climate Week 2022 consist of a 4-day long curated program on learning exchanges about the links between the NDC update cycle, LT-LEDS, implementation and green finance.	Open	ACW-AE007-1
30-Aug	9:00	18:00	UNFCCC Transparency Division	Technical analysis of biennial update reports submitted by Parties not included in Annex I to the Convention	Technical analysis of reports submitted by Colombia and Uruguay by a team of technical experts. It is aimed at increasing the transparency of mitigation actions and their effects. It will also involve a virtual consultation with the Parties being analyzed.	Closed	ACW-AE003-2

30-Aug	9:00	11:00	High-Level Champions; UN Climate Change; Marrakech Partnership	Marrakech Partnership Regionalization workshop	As part of the Improved Marrakech Partnership for Global Climate Action for enhancing ambition that was welcomed by Parties at COP 26, the High-Level Champions and the Marrakech Partnership will convene a workshop to facilitate a deep understanding of the needs on the ground and gather regional perspectives. The aim of the event is to provide an overview of the functions and tools of the Marrakech Partnership, including the global campaigns to mobilize and align non-Party stakeholders (Race to Zero, Race to Resilience and the Glasgow Finance Alliance for Net Zero and the tools to drive systems transformation (Climate Action Pathways, 2030 Breakthroughs), and have a solutions-oriented dialogue on how to drive ambitious action across the region taking into account regional context and how the Marrakech Partnership can help.	Closed	ACW-AE013
30-Aug	9:00	18:00	UN Climate Technology Centre and Network, UNEP	CTCN NDE REGIONAL FORUM FOR AFRICA	The main objectives of CTCN NDE Regional Forum for Africa 2022 is to engage and empower stakeholders to drive climate action across countries, communities, and economies. Working together opens opportunity to advance climate action, address social inequalities and invest in development that is good for humanity and nature.	Open	ACW-AE034-2
30-Aug	12:30	14:30	High-Level Champions; UN Climate Change; Marrakech Partnership	Marrakech Partnership Implementation Lab	Following the welcoming by Parties of the Improved Marrakech Partnership for Global Climate Action for enhancing ambition at COP 26, the High-Level Champions will continue to convene Implementation Labs to strengthen the collaboration between national governments and non-Party stakeholders. The aim of the event is to have an open, solutions-oriented exchange between national government representatives and non-Party stakeholders (e.g., businesses, cities, subnational regions, investors, and civil society) in the region whose areas of expertise can support countries in implementing their NDCs, NAPs and long-term strategies. By matching the priorities and needs outlined in national plans with the options for policies, technologies and solutions described in the Marrakech Partnership Climate Action Pathways, this will frame the collaboration around shared sectoral goals and a common purpose. It will also provide opportunities on how to adapt the Climate Action Pathways and 2030 Breakthroughs outcomes to bring in the regional context and perspectives.	Closed	ACW-AE012
30-Aug	14:00	17:00	Cluster Francophone by the Partnership on Transparency in the Paris Agreement (PATPA); Germany; Belgium; France; UNDP; Global Environment Facility (GEF); ICAT; UNFCCC; FAO	From a zero BUR today to a first BTR in 2024 – which steps to take for francophone countries	There are still around 15 francophone countries, which have not yet submitted a Biennial Update Report (BUR) Yet, in 2024 developing countries may submit their first Biennial transparency report (BTR). What do concerned countries need to plan for the relevant next steps, required capacity and data and which technical and financial support is at their disposal? The Cluster Francophone invites managerial and technical staff involved in NDC implementation and reporting to the UNFCCC to exchange views and solutions. This session will be held in French and will focus on challenges, barriers, gaps, opportunities and solutions encountered by francophone developing countries.	Open	ACW-AE017
31-Aug	9:00	18:00	UNFCCC Transparency Division	Technical analysis of biennial update reports submitted by Parties not included in Annex I to the Convention	Technical analysis of reports submitted by Colombia and Uruguay by a team of technical experts. It is aimed at increasing the transparency of mitigation actions and their effects. It will also involve a virtual consultation with the Parties being analyzed.	Closed	ACW-AE003-3
31-Aug	9:00	18:00	ICAT; UNFCCC	Africa Regional Dialogue on ETF	A regional platform for policy dialogue and peer-to-peer engagement on the ETF offering in-depth policy discussions and effective exchange of knowledge, that will be delivered over two days bringing together different stakeholders, from the public and private sectors. First day will be focused on peer-to-peer dialogue between transparency practitioners, and the second dedicated to a more senior-level policy dialogue on transitioning to the ETF.	Open	ACW-AE004-1
31-Aug	9:00	12:45	NDC Partnership	NDC Partnership Regional Peer Exchange: Green Finance and Investment	NDC Partnership African members countries have highlighted financial resource mobilization and green investment as the top priority in their climate agenda and in their future collaboration within the framework of the NDC Partnership. In addition, with the launch of the NDC Partnership's Finance Strategy in early 2022, the Support Unit is exploring and designing the entry points for collaboration on finance, potential delivery modalities and specific offering to be brought to member countries. The 2022 edition of the Regional Peer Exchange for Africa will therefore focus on fostering peer learning on green finance and investment, focusing on the barriers and challenges faced by developing countries to access climate finance, and on identifying the solutions to overcome them. This is a closed event, by invitation only to NDC Partnership Country Focal Points (from Ministries of Planning and Finance and Ministries of Environment).	Closed	ACW-AE008
31-Aug	11:00	13:00	UNFCCC	Opportunities and risks arising from implementation of mitigation actions: work by the KCI	The climate actions at required scale can be realized if they are sustainable, planned and executed taking into account adverse impacts specifically on groups of people vulnerable to climate change and climate actions. This event will cover the work undertaken by Katowice Committee on Impacts under the convention to understand the impacts of climate actions including tools developed to understand the impacts to facilitate just transition and also to understand the business opportunities arising due to climate actions.	Open	ACW-AE035
31-Aug	13:00	16:00	UNFCCC, YO UNGO, RCC	Youth Event - Part 1	Launching the Youth4Capacity initiative and creating a platform for youth to get together and discuss opportunities to enhance meaningful youth engagement and participation in climate policymaking and action in the African region.	Open	ACW-AE005-1
31-Aug	14:00	18:00	UNFCCC, RCC Lome, RCC Kampala	Africa Regional CDM DNA Forum Meeting 2022	The Regional DNA Forum is to provide opportunities for DNA representatives to exchange views, share their experiences relating to the CDM and bring forward common views and issues to the attention of the CDM Executive Board. The 2022 edition will be focused on temporary measures under the CDM. transition of CDM activities, and Article 6 and readiness to implement Article 6, including capacity-building needs for the Africa region in implementing Article 6.	Closed	ACW-AE011-1
31-Aug	16:30	18:30	World Bank; and Clients (Gabon, Nigeria, DRC, Burundi)	Natural Capital as a cornerstone of resilience and reduced emissions	Showcase how natural capital is not just critical for enhancing resilience of communities, livelihoods and economies, but as a crucial strategy for capping emissions. The Congo Basin forests, drylands, wetlands, coastal and marine ecosystems in SSA have to be recognized for the full range of services - especially as a global public good.	Open	ACW-AE020
1-Sep	9:00	18:00	UNFCCC Transparency Division	Technical analysis of biennial update reports submitted by Parties not included in Annex I to the Convention	Technical analysis of reports submitted by Colombia and Uruguay by a team of technical experts. It is aimed at increasing the transparency of mitigation actions and their effects. It will also involve a virtual consultation with the Parties being analyzed.	Closed	ACW-AE003-4
1-Sep	9:00	18:00	ICAT; UNFCCC	Africa Regional Dialogue on ETF	A regional platform for policy dialogue and peer-to-peer engagement on the ETF offering in-depth policy discussions and effective exchange of knowledge, that will be delivered over two days bringing together different stakeholders, from the public and private sectors. First day will be focused on peer-to-peer dialogue between transparency practitioners, and the second dedicated to a more senior-level policy dialogue on transitioning to the ETF.	Open	ACW-AE004-2
1-Sep	9:00	15:00	UNFCCC, YO UNGO, RCC	Youth Event - Part 2	Launching the Youth4Capacity initiative and creating a platform for youth to get together and discuss opportunities to enhance meaningful youth engagement and participation in climate policymaking and action in the African region.	Open	ACW-AE005-2
1-Sep	9:00	18:00	UNFCCC, RCC Lome, RCC Kampala	Africa Regional CDM DNA Forum Meeting 2022	The Regional DNA Forum is to provide opportunities for DNA representatives to exchange views, share their experiences relating to the CDM and bring forward common views and issues to the attention of the CDM Executive Board. The 2022 edition will be focused on temporary measures under the CDM. transition of CDM activities, and Article 6 and readiness to implement Article 6, including capacity-building needs for the Africa region in implementing Article 6.	Closed	ACW-AE011-2

1-Sep	10:15	12:15	UNDP; AUC; CABRI; CPI; NDC-P; Commonwealth Secretariat	Africa's Public Expenditure on Adaptation	<p>The 2018 UNDP report on Africa's Public Expenditure on Adaptation (APEA) revealed that most adaptation expenditure is primarily development expenditure that provides good benefits with current climate conditions. It shows that African countries could be spending 2-9 percent of GDP on adaptation from their stretched national budgets - which represents more expenditure than healthcare and education. In 2018 this was significantly higher than the adaptation resource flow from international sources. The report is being updated with the aim of comparing the updated analysis with other recent work on adaptation funding needs to inform regional dialogue</p> <p>Objectives</p> <p>To discuss the initial estimates of the current spending on adaptation by African governments and international partners based on the 2018 APEA report.</p> <p>To interrogate the methodology used in the 2018 report to and solicit stakeholder views for updating the analysis</p> <p>To discuss the usefulness of this research and complementarity with other regional analyses</p>	Open	ACW-AE023
1-Sep	11:00	13:00	UN Climate Change; NDC Partnership	Regional Exchange on Long-term Climate Ambition and Implementation at the Africa Climate Week 2022	<p>The Africa Regional Exchange on Long-term Climate Ambition and Implementation will bring together key policymakers and key stakeholders from the region to discuss, deliberate and share information, good practices, and the challenges and opportunities specific to the region to transition towards low GHG development and ambitious climate action in the context of LT-LEDS, NDCs and sectoral policies to support the achievement of the Paris Agreement, aligned with green economy principles.</p> <p>Through a week-long, iterative programme, participants will engage around common learning objectives – sharing good practices and lessons learned to strengthen mitigation and adaptation ambition raising efforts and ground them in realistic and actionable implementation plans. These learning exchanges will draw the links between the NDC update cycle, Long-Term Low Development Strategies (LT-LEDS), implementation and finance – to help enhance ambition and accelerate implementation.</p>	Open	ACW-AE007-2
1-Sep	11:15	13:45	ICAT; UNFCCC	Discussion- Africa Regional Dialogue on ETF	A regional platform for policy dialogue and peer-to-peer engagement on the ETF offering in-depth policy discussions and effective exchange of knowledge, that will be delivered over two days bringing together different stakeholders, from the public and private sectors. First day will be focused on peer-to-peer dialogue between transparency practitioners, and the second dedicated to a more senior-level policy dialogue on transitioning to the ETF.	Open	ACW-AE036
1-Sep	11:30	15:00	UNFCCC; RCC	Regional ACE Workshop	Regional ACE Workshop aims to strengthen the regional network of ACE focal points and stakeholders and build capacity for the implementation of Action for Climate Empowerment and the Glasgow work programme on ACE in the region.	Open	ACW-AE006
1-Sep	13:45	16:45	UNFCCC	The first global stocktake: process and engagement opportunities	<p>This event will aim to share information on the modalities, status of work on GST1 and provide an opportunity for discuss climate action and support within the context of Africa, including challenges, barriers, solutions and opportunities. The first GST started at COP26 in Glasgow and will conclude at CMA5 (2023). GST1's technical dialogue met for the first time in June 2022 (Bonn), with the second and third meetings scheduled for November 2022 (Sharm El-Sheikh) and June 2023 (Bonn). The modalities (themes, components and overall design) of and sources of input for the GST process are outlined in Article 14 of the Paris Agreement and decision 19/CMA.1. The outcome of the GST will inform Parties in updating and enhancing their NDCs (actions and support), as well as international cooperation for climate action.</p>	Open	ACW-AE033
1-Sep	14:00	18:00	UNFCCC secretariat with partners (e.g. World Bank; CCAC of UNEP; Clean Cooking Alliance) and German Ministry BMUB who have funded a secretariat project	Enabling and fast tracking PoAs under Article 6.4	<p>The operationalization Art. 6.4 mechanism requires the availability of GHG mitigation methodologies. The broad set of existing CDM methodologies may provide a good basis for a prompt start. However, an important technical work, for instance on baselines, additionality and the contribution to sustainable development is needed to adapt them to the Art. 6.4 requirements. Without a significant effort put urgently on this work stream, the entire process of operationalizing Article 6, especially Article 6.4. could be delayed.</p> <p>An integral component of this work would involve exchange with host countries to understand their perspectives as Art 6 mechanisms envisage enhanced involvement of host countries.</p> <p>The Foundation Future of the Carbon Market, established in 2011 by KfW Development Bank with funds provided by Germany's Federal Ministry of the Environment (BMU) through its International Climate Initiative is supporting the work on selected CDM methodologies that include aspects of programming, standardization, and upscaling for alignment with the Paris Agreement.</p>	Open	ACW-AE010
2-Sep	9:00	18:00	UNFCCC Transparency Division	Technical analysis of biennial update reports submitted by Parties not included in Annex I to the Convention	Technical analysis of reports submitted by Colombia and Uruguay by a team of technical experts. It is aimed at increasing the transparency of mitigation actions and their effects. It will also involve a virtual consultation with the Parties being analyzed.	Closed	ACW-AE003-5

<div> <div>Regional Climate Weeks 2022</div> <div>29 Aug - 02 Sep</div> <div>Hosted by The Government of Sudan</div> </div> <div> <div>Africa Climate Week 2022 - List of Side Events (version 2 as of 9/8/2022)</div> <div>29 August - 02 September</div> </div>							
Column1	Start time	End time	Organizer(s)	Title	Description	Event type	Code
29-Aug	10:00	11:00	The Mary Robinson Centre for Climate Justice, Glasgow Caledonian University; FEMNET; Life Concerns Malawi; Mzuzu University Malawi; Pan-African Climate Justice Alliance	Climate Just Solutions to Tackling Emergent GBV and Mental Health Crisis Due to Climate Change	<p>The links between climate change, gender based violence & mental health are profound and deep. There is no doubt that women's health and well-being is being affected by climate change and extreme weather events; these impacts are compounded by existing structural socio-economic inequalities. There is currently little research that explores the inter-relationship between climate change, mental health and gender-based violence in developing countries and in determining what is required to help build resilience of people.</p> <p>This event will be a far reaching an deep conversation on justice, equity, human rights to decent quality of life and building resilience. It will be used to i) share new breakthroughs in terms of providing new evidence of the increasing incidence of GBV and mental health of women and ii) will allow for rich discussion in a panel of 'potential solutions' for the provision of recovery & resilience support services required by women.</p>	Open	ACW-SE051
29-Aug	10:00	11:00	CGLU Afrique	Vers le renforcement du cadre opérationnel de l'initiative (BCRUP)	<p>Ce Side Event, sera structuré autour de trois temps à savoir :</p> <ul style="list-style-type: none"> · L'état d'avancement de l'initiative et l'identification des leviers pour renforcer l'engagement des partenaires ; · Quel cadre de gouvernance pour améliorer l'opérationnalisation de l'initiative BCRUP ; · Quel cadre de partenariat pour structurer les synergies avec les autres initiatives climatiques. 	Open	ACW-SE208

29-Aug	11:00	12:00	UNEP; Cool Coalition; FAO; IRENA; ACES	Tackle Food Loss and Waste in Africa for a Resilient Future	<p>Around 1/3 of food produced globally is lost or wasted, resulting in economic losses of an estimated \$1 trillion a year. In sub-Saharan Africa, the estimate is roughly 37%* or 120-170 kg/year per capita. Food loss and waste leads to reduced economic returns for farmers, and the water, fertilizers, energy and land used in production also go to waste. Such loss and waste drives expansion into fragile ecosystems, accelerates deforestation, species extinction and contributes to 8-10% of annual GHG emissions. In a continent where so many people are starving, reducing FLW could be one of the leading strategies for Africa, and globally, for achieving a resilient future.</p> <p>Halving FLW in line with SDG 12.3 is critical to slow climate change, protect nature and increase food security. At this event, countries, companies and cities will unite to commit to FLW reduction as part of their climate strategies.</p>	Open	ACW-SE148
29-Aug	11:00	12:00	The Global Energy Alliance for People and Planet; High Level Champions	Accelerating Green Energy Solutions for People and Planet	<p>Energy is the undercurrent that drives economies: it powers jobs, lives and opportunities. But 3.6 billion people, nearly half of the world's population, lack access to reliable, affordable and sufficient energy needed to power productive lives and livelihoods. Without a viable pathway for rapid, equitable, and climate friendly economic development, countries will be forced to pursue a fossil-fuel intensive path – shattering any possibility of reaching the goal of 1.5°C degrees.</p> <p>This session will explore how governments, philanthropy, multilateral development banks, development finance institutions and international organizations can come together to accelerate sustainable renewable energy systems that reduce carbon, empower people, and enable jobs across developing and emerging economies. Panelists will speak to the opportunities and learnings from projects already underway, and how collaboration on national programs can ensure that the energy transition is grounded in inclusion and equity for all people.</p>	Open	ACW-SE161
29-Aug	12:00	13:00	International Energy Agency (IEA)	Africa Energy Outlook 2022: achieving all African development goals, including access & NDCs	<p>The International Energy Agency, along with its partners African Union Commission (AUC) and United Nations Economic Commission for Africa (UNECA), recently released the Africa Energy Outlook 2022, which explores pathways for Africa's energy system to evolve toward achieving all African development goals, including universal access to modern and affordable energy services by 2030 and nationally determined contributions. The report analyses infrastructure expansion needs, investment requirements, financing options and energy policy priorities. It also explores a shifting fuel mix that supports resilient development, opportunities for new exports, and just transition issues – including energy access, affordability and employment. The report aims to be one of the primary analytical sources available to African leaders in their preparations for COP27 in Egypt.</p>	Open	ACW-SE041
29-Aug	12:00	13:00	UNFCCC (RCC Dubai, Kampala, Lomé / AGYLE); Fundación Avina; IDRC; UN University	Capacity Building for Youth Climate Action and Entrepreneurial Leadership in Africa	<p>This is the second session of an event series (LACCW, ACW, COP27) that aims to provide a platform for youth and youth-related stakeholders to share recommendations and views on capacity building efforts to enhance youth leadership in climate action. By so doing, taking the pulse for youth capacity, exploring challenges and showcase solutions across Africa and Latin America. Focusing on the role played by young leaders through research, training and green innovation.</p> <p>This session will present a stock on youth leadership in Africa. It will consist of a series of short presentations on good practices and approaches across the region related to building capacities for engaging youth in green entrepreneurship and climate processes at the national and local level – both as capacity builders and recipients. Followed by a discussion on how to better support actions required to strengthen youth leadership.</p>	Open	ACW-SE102
29-Aug	13:00	14:00	UNDP - United Nations Development Programme	Accelerating and scaling up climate action through National Climate Funds	<p>Tackling the complex challenges exacerbated by climate change requires significant financial resources, innovative tools, and strategies. Based on the latest NDC submissions, African countries will need to mobilize 2.8 trillion USD between 2020 and 2030, where 2.5 trillion USD should come from external sources. Considering the significant amount of finance needed and the complexity in accessing existing resources, a mechanism that has been gaining in prominence is the establishment of National Climate Change Funds as vehicles to engage in accessing, mobilizing, pooling, and coordinating. In this vein, the Climate Promise provided support to several countries to develop NDC financing strategies, many of which recommend the establishment of national climate funds.</p> <p><i>This event aims to bring together countries to showcase examples of nationally established climate funds.</i></p>	Open	ACW-AE026-s
29-Aug	13:00	14:00	GIZ	Climate economy modelling to inform policymaking	<p>Macro-economic models are widely used tools to inform policy making by simulating the impacts of specific policy measures on the economy. However, the integration of climate change into economic models in planning by Ministries, Government Departments and Agencies (MDAs) has not received enough attention. To ensure coherent planning and strategic decision making, it is necessary to include the effects of climate change and the impacts of specific climate policies on the economy into modelling frameworks. Experiences from finance, planning or environment Ministries on integrating climate change into macro-economic models for political planning from Nigeria, Rwanda and Uganda will be shared. Additionally, the challenges and experiences of effective dialogue between science and policy will be discussed with members of the international Climate Economy Energy Modelling Network ("CIEEN").</p>	Open	ACW-SE107
29-Aug	14:00	15:00	Ajemalebu Self Help (AJESH)	Integrating Nature-based Solution (NbS) for Natural Resources management	<p>The event aims at showcasing how Nature-Based Solutions contributes to biodiversity protection in the Littoral Region of Cameroon.</p> <p>Discussions will centre around the following elements:</p> <ol style="list-style-type: none"> 1. approaches to zero deforestation agricultural production (cocoa, cassava and plantains) of small and medium-sized farms and the related value chains as well as the technical capacities of farmers, including youth and women and resilience to climate change; 2. community participatory maps and land use plans integrating biodiversity footprint restoration opportunities, involving the city of Douala in their food supply chains while taking into account the management of natural resources, 3. the implementation of the Douala III Communal Development Plan (CDP) and land use plan underpinning the restoration of degraded landscapes (farms) and sustainable management of the ecosystems. 	Open	ACW-SE030
29-Aug	14:00	15:00	United Nations Office for Disaster Risk Reduction (UNDRR); Global Network of Civil Society Organizations for Disaster Reduction (GNDR); The Deutsche Gesellschaft für Internationale Zusammenarbeit GmbH	Road to COP27: Scaling up Joint Action for Comprehensive Disaster and Climate Risk Management	<p>The Bali Agenda for Resilience, key outcome of the recent 7th Session of the Global Platform for Disaster Risk Reduction, calls for adopting integrated approaches to climate change adaptation and disaster risk reduction. To be ahead of the growing climate and disaster impacts and risks, we need to ensure connectivity and interoperability of interventions and synergize initiatives, sectors and approaches at all levels and scales. For this to be effective, we must take a whole of society approach and meaningfully create space to listen to local voices and lived experiences from those living on the frontline of risk.</p>	Open	ACW-SE131
29-Aug	15:00	16:00	Mbororo Social and Cultural Development Association MBOSCUA; Game Changer Yaounde; IFAD Yaounde; CORECT Confederation of Traditional Headers Organisation Nigeria; INDES Formation Cameroon	Pastoralist the impact of Climate Change prospect and resilience to challenges.	<p>The proposed event aims to generate actionable, replicable, and scalable integrated DRR and CCA</p> <p>The Side Event shall be organised and hosted by The Mbororo Social and Cultural Development Association (MBOSCUA) together with its Partners as mentioned above. The side event will show case the impact of the climate change on pastoralist community, and as well as the potential for the pastoralist contribution for the adaptation and mitigation of climate change through traditional practices. And also the resilience of the pastoralist to cope with climate change. This will take the form of presentation and sharing experience use PPP.</p>	Open	ACW-SE042

29-Aug	15:00	16:00	Nigerian Conservation Foundation; International Federation of Red Cross and Red Crescent Societies	Climate Crisis as Human Crisis: Aligning Africa's Resilience Action for People and Planet	The African region is currently at the edge of the climate crisis with less or no adaptive resources in policy and practice to build resilience for the increasing population of 1.4 billion. As part of the race to a resilient world, this event will showcase the impact of efficient state and non-state actors' collaboration in building resilience across climate risk sectors towards delivering one of the most vulnerable continents out of imminent human crisis. It will popularize innovative nature-based and people-centred solutions in attaining low-emission pathway and how these reduce vulnerability and risks to people's health, regional economy, and strengthened livelihood across the region.	Open	ACW-SE122
29-Aug	16:00	17:00	UN Centre of Excellence on Climate and Disaster Resilience	Moving back from the edge: climate and disaster risk reduction in highly vulnerable and fragile contexts	Growing risks, largely fueled by climate change, are pushing many communities in fragile and highly vulnerable countries to the edge of tipping into recurring or protracted states of crisis, where they would require humanitarian assistance. With a scale up in adaptation finance and increased efforts to "avert and minimise" loss and damage, how do we ensure that the right actions or interventions occur at the right time in these high-risk settings? How do we need to adjust our disaster risk reduction and adaptation approaches so that they are suited to contexts where vulnerability is high, coping capacities are low, resources are often constrained and other factors such as conflict or fragility come into play? This session will seek feedback on emerging findings from a flagship case-study report that examines evidence from the field.	Open	ACW-SE068
29-Aug	16:00	17:00	Stop Ecocide Foundation, Stop Ecocide International, Rebalance Earth	Strategic legal initiatives to protect the climate and our common future	We are witnessing a rising frustration globally with the failure to implement the multilateral environmental agreements and pledges which already exist. Legal parameters would hold government and corporate actors to account, acting as a creative constraint and provoking the urgent new thinking and innovation we know is needed. Making "ecocide" - severe and either widespread or long-term harm to nature - a crime could provide a legal guardrail to steer us back from the precipice by setting an outer boundary to deter, prevent and sanction the worst threats to ecosystems and keystone species. Meanwhile, a clear legal advisory opinion on the responsibilities of states with respect to climate change could set out what citizens should expect from their policy-makers and why. Together these avenues can frame the duties and responsibilities that could bridge to a liveable world for the children of all species, including our own.	Open	ACW-SE202
29-Aug	17:00	18:00	World Meteorological Organisation - WMO	State of Climate in Africa and Early Warning Systems Initiatives towards COP-27	WMO and partners produce annual reports on the State of Climate and Services providing scientific information on climate variability and extremes and their adverse impacts in key socio-economic sectors as well as the capacity to produce early warning climate services. The increasing frequency and severity of hazards (floods, droughts, heatwaves, landslides) and their impacts especially on the vulnerable LDC and SIDS is alarming and poses a real threat to attaining the global and regional development agenda. The UN Secretary General called on WMO to spearhead a new 5-year EWS initiative that protects every citizen, to be presented at COP-27. This initiative will be a critical contribution to adaptation and resilience in Africa. The side event will present the state of climate in Africa, the gaps in CIS value chain and foster collaboration amongst partners for effective delivery of CIS and EWS to people at the last mile user communities.	Open	ACW-SE070
29-Aug	17:00	18:00	GCoM; UNFCCC- Global Innovation Hub	An Expanded Innovation Space for Transformative Climate Solutions	This event will lead discussions on a transformative, need-focused, integrated, and solution-oriented approach to innovation, helping LAC practitioners base climate action pledges and commitments on what science says is needed, as opposed to what is perceived as possible with current technologies	Open	ACW-SE162
29-Aug	17:45	18:45	High-Level Champions	Accelerating Local Adaptation in Africa: Resilience Breakthroughs	This session will present a soft launch of the Resilience Breakthroughs with a focus on Africa to elevate how African non-state actors are already accelerating adaptation and resilience at the local level by implementing multi-sector innovative actions that helps 1) make climate risks visible, 2) deploy holistic/systemic responses to increase adaptive capacity and reduce vulnerability, and 3) factor them into governments, business decisions and finance sector, supporting locally-led adaptation and mobilization of finance for local climate resilience solutions. The desired outcomes are 1) the presentation of the Resilience Breakthroughs focused on Africa as an umbrella of actionable adaptation opportunities; 2) an interactive and inclusive dialogue to exchange solutions, enable matchmaking and elevate lessons learned among multiple actors around key adaptation and resilience impact areas: resilient cities, low-carbon & resilient housing, resilient infrastructure, resilient ocean and coastal communities, resilient food and agriculture, and resilient water; and 3) exchange on locally-led adaptation perspectives from communities affected by climate change.	Open	ACW-SE185
29-Aug	17:45	18:45	Centre for 21st Century Issues; Pan African Climate Justice Alliance PACJA; Women Development Organisation WEDO; BOTHENDS	Access to Climate Finance and Structuring a Gender-Responsive Loss and Damage Finance: The Role of African Women	It is crystal clear that the poorest countries, majorly in Africa and especially the women, who contribute the least to global climate change, are bearing the bulk of climate-induced losses and damages. These populations are also marginalized in accessing climate finance. This amounts to gross climate injustice and undermines the fundamental rights of the poorest and vulnerable populations on the planet. This side event will showcase the efforts and work of the Centre for 21st Century Issues and its partners in mobilizing the active participation of African women for gender-responsive climate finance and access to the Green Climate Fund through the GCF African Gender Monitors Program as well as the advocacy to actualize Loss and damage finance in UNFCCC Climate Negotiations. The side event will also highlight entry points and opportunities available for African women to access climate finance to scale up their locally-led solutions and the proposed Glasgow Loss and Damage Finance to respond and recover from climate shocks. Furthermore, the side event will come out with a position paper on the local women accessing climate finance across Africa as an advocacy statement to COP27 in Egypt	Open	ACW-SE192
30-Aug	9:45	10:45	Forest Stewardship Council (FSC)	Forest Stewardship Solutions for climate and ecosystem smart forest management in the Congo Basin	The Forest Stewardship Council (FSC) promotes and deploys an integrated set of solutions to enable environmentally appropriate, socially beneficial and economically viable management of the world's forests. FSC-certified forests have measurable contributions to both climate change mitigation and adaptation by demonstrating positive impacts on carbon sequestration and conservation of carbon sinks, biodiversity, soil, water catchments, etc. This session will enable participants – forest management professionals, researchers, practitioners, decision-making – to development a conceptual and practical understanding of the range of solutions that FSC deploys to achieve responsible forest management, and their contributions to climate change mitigation and adaptation as well as their positive impacts on ecosystem services such as carbon, biodiversity, soil, water, etc. The relevance of these solutions for the responsible governance of Congo Basin forest will also be outlined and discussed.	Open	ACW-SE020

30-Aug	9:45	10:45	ACT Alliance Africa; Christian Aid; All African Council of Churches (AACC); Church of Uganda	Faith in Action for Climate Justice	Faith leaders from Uganda will present their calls, hopes and demands for climate justice to political leaders. The faith community is very key in mobilizing and influencing the demand for climate justice. These actions will include key note address and statements from Faith leaders who will speak and ask the political leaders who will be presented to take meaningful action for climate justice with upcoming COP27 negotiations. The event will feature discussions on the role of faith approach in building resilient communities.	Open	ACW-SE036
30-Aug	10:45	11:45	SDG7 Youth Constituency; UNMGCY; IRENA; UNIDO	Financing Youth-Led Clean Energy Solution and Initiatives: A Catalyst for the Emergence of a Sustainable Future	Young people under 24 make up over 40% of the world's population and by 2050, over 1.4 billion young people between the ages of 15 and 24. Finding a way to mobilize this group can go a long way to solve the world's problems—including climate change and energy access. A key barrier to youth action and engagement has been the lack of funding access. This session seeks to address current financing methods which may not be sufficient and designed to provide the needed support required by young people. This session would provide an opportunity to provide more insights from youth participants, entrepreneurs, innovators and decision-makers on a better approach to solving this challenge, allowing for the creation of a blueprint for effectively funding sustainable youth-led initiatives and solutions which are geared toward the emergence of a more sustainable future.	Open	ACW-SE059
30-Aug	10:45	11:45	WHO Regional Office for Africa, WHO Headquarter, WHO country office for Gabon, UK Foreign, Commonwealth & Development Office (FCDO), UNFCCC RCC Lome and the Students for Environmental Education & Discovery (SEED)	Update on COP26 Health and Climate Programme	The side event is co-organized by the World Health Organization, the UK Foreign, Commonwealth & Development Office, UNFCCC RCC Lome and the Students for Environmental Education & Discovery, with the aim of: •Presenting the COP26 Health Programme and country commitments on building climate resilient and environmentally sustainable low carbon health systems; •Informing on the new launched ATACH Initiative and the ongoing WHO AFRO and HQ technical support package for the implementation of the COP26 health commitments on building climate resilient and low carbon health systems; •Inviting new countries to make commitments on climate resilient and environmentally sustainable low carbon health systems; •Promoting the multisectoral approach (health, environment, Met service, Scientific Research....) for a better implementation of Cop26 commitment, tacking stock of the achievement in the AFRO region for multisectoral work; •Advocating for education and capacity building of youth on climate change and its impact on human, mainly in the health sector.	Open	ACW-SE194
30-Aug	11:45	12:45	Development Reimagined (DR); African Climate Foundation (ACF); Environmental Defense Fund (EDF)	Green Banking in Africa – the Reality and the Need	The AfDB's African Economic Outlook 2022 estimated that African countries require between \$1.3-\$1.6 trillion until 2030 to implement climate commitments and Nationally Determined Contributions (NDCs). However, Africa receives just 3% of global climate funding. The lack of climate finance tends to be blamed on Africans – lack of “bankable projects”, lack of transparency, ESG or other requirements. Our joint event will convene key stakeholders in Africa's climate finance and banking community to explore the reality of green banking in Africa, with case studies of projects that have been successful. The event will draw on lessons learnt to clarify what is needed from international climate financing mechanisms to unlock quality financing for green energy transitions and to achieve development goals such as Agenda 2063. The aim will be to also help shift the narrative away from Africa as a 'risky' environment for large-scale climate investment and towards one brimming with green potential.	Open	ACW-SE130
30-Aug	11:45	12:45	ICLEI Sustainability for Local Governments; African Development Bank; Development Bank of Southern Africa; United Cities and Local Governments of Africa; Alliance for Subnational Development Banks; Global Fund for Cities Development; UN Cities Development Fund	TRANSFORMATIVE CLIMATE FINANCE FOR CITIES: THE TIME IS NOW	Transformative finance for cities to effectively seize climate solutions: The UNFCCC estimates that globally, between US\$1.6 and 3.8 trillion in funding is needed annually to transition to low carbon and climate-resilient economies, and the African Development Bank estimates Africa needs between \$7 to 15 billion per year to mitigate the impacts of climate change. Amidst a flurry of global climate finance pledges, the transformative role of local governments in Africa to effectively access finance flows for climate change mitigation- and adaptation-based service delivery and project development is increasingly highlighted. In light of this challenge, multi-stakeholder alliances emerge as a key mechanism to support subnational finance entities and local governments to work together to scale up transformative subnational urban investment for climate action. This enabling role is essential in supporting cities to seize unprecedented finance flows for climate action in African cities. Join ICLEI Africa and partners – African Development Bank, Development Bank of Southern Africa, United Cities and Local Governments of Africa and the Alliance for Subnational Development Banks – in this event as we share innovative practices, tested solutions and lessons learnt, in enabling cities to take climate action by accessing climate finance.	Open	ACW-SE136
30-Aug	11:45	12:45	YOUNGO (Child and Youth Constituency of the UNFCCC); High-Level Champions; Africa Youth Initiative On Climate Change (AYICC); Green Africa Youth Organization (GAYO)	Climate Finance for The Future: Radically Collaborating to Address the Financing Needs Gap	The event aims to raise awareness about the findings from the 'Youth Needs for Financing Report', highlight its significance, and build momentum towards the launch of the second report analysing the availability of climate finance for Youth . Further, it aims to engage in constructive and intergenerational dialogue with experts, state actors, and climate finance providers as to how climate finance should be scaled and made more accessible for young people using Africa as a pilot.	Open	ACW-SE146
30-Aug	12:45	13:45	Global Cement and Concrete Association	Accelerating Progress Towards Net Zero Concrete and Cement in Africa	In 2021 the Global Cement and Concrete Association launched its Roadmap to Net Zero by 2050 - the first heavy industrial sector to propose a route to zero carbon. This event will demonstrate how progress to net zero can be made with a focus on the African continent, with tailored solutions to ensure that all relevant stakeholders - cement and concrete companies, city planners, construction firms, policymakers and governments - can play their role in creating a zero carbon, resilient build environment by 2050 in Africa in line with global UN commitments.	Open	ACW-SE021
30-Aug	12:45	13:45	CARE International; ENDA; PACJA; CISONOCC; Germanwatch; AESVT; JVE	African CSO engagement on Climate Finance for enhancing community resilience	African CSOs share their national and regional level experiences of engaging with climate finance issues and mechanisms, including the GCF, the Adaptation Fund and others, to ensure that finance reaches the most vulnerable in developing countries, while promoting equity, justice and inclusiveness of different stakeholders. This includes considerations of gender, youth, indigenous peoples.	Open	ACW-SE024

30-Aug	13:45	14:45	International Water Management Institute (IWMI); Zambia Met Department; Zambia Water Resources Management Authority; AICRA Accelerator Partners.	Climate crisis is a water crisis: water management approaches to strengthening climate resilience in Africa	<p>This one-hour session will include presentations combined with panel discussion. The session will cover the following topics:</p> <p>Theme 1: Climate risks</p> <ol style="list-style-type: none"> 1.Climate extremes and water related risks with potential adaptation options, case studies from the Lake Tana Sub-basin, Ethiopia 2.Remote sensing approaches for flood mapping and citizen science approach, case study from Akaki area in Ethiopia 3.Flood and drought indicators: case study from Zambia <p>Theme 2: Adaptation options:</p> <ol style="list-style-type: none"> 4.Opportunities for strengthening solar power irrigation in Sahelian West Africa 5.Building resilience against climate change: understanding social transformation process 6.Climate smart agriculture and its effect on food security and multidimensional poverty of rural farm households 7.Scoping climate smart agriculture through innovation and partner bundling in Southern Africa <p>Theme 3: Partnership and collaboration:</p> <ol style="list-style-type: none"> 8.Evidence-based partnership strategies to accelerate innovation scaling in irrigated agricultural value chains, 9.Innovative partnerships for delivering climate smart agriculture and enhancing the delivery of climate information services in Zambia 	Open	ACW-SE086
30-Aug	13:45	14:45	International Union of Railways (UIC); Ministry of Transport of Gabon ; SETRAG (Société d'exploitation du Transgabonais (SETRAG) ; Autorité de Régulation des Transports Ferroviaires (ARTF)	Building decarbonized and resilient railways and mobility infrastructure in Africa	<p>A Paris-compliant sustainable mobility system will not be possible without the rail and public transport. Considering the low-energy and CO2 intensities of rail transport, shifting passenger and freight activity from more intensive modes such as private cars, trucks and airplanes to rail and public transport is a key strategy for net-zero and resilient future. Investments in railways produce several multiple socioeconomic benefits such as job creation, urban revitalization, cleaner air, among many others that are not always easy to estimate and quantify. The African continent is undergoing dramatic change and there is a growing need for sustainable mobility. The global economy has been thrown into disarray by the impact of Covid-19 and climate change and adaptation needs are more than ever giving rise to unprecedented challenges. In this session, we will hear from experts in the African railway sector on the return on investment in rail and how an enabling policy environment can get us to the sustainable mobility future that we want.</p>	Open	ACW-SE112
30-Aug	14:45	15:45	AfDB, Neyen Consulting firm	Just Transition	Just Transition	Open	ACW-AE029-s
30-Aug	14:45	15:45	Nature4Climate; Global Commons Alliance; High-level Climate Champions.	Africa leadership at COP27 on a transition to a Nature Positive Net Zero Future	Investments in nature are profitable and help deliver a net-zero & nature-positive future – with tremendous benefits for people - jobs, resilience and the wider economy. There is demand for NbS and public and private sectors are increasing investment. However, to unlock Nature-based Solutions (NbS) potential (in line with 1.5C), public & private actors need to scale up annual investments four times over the next three decades.	Open	ACW-SE076
30-Aug	15:45	16:45	UNEP; Government of Ghana, Government of Uganda	Blended finance and innovative insurance products to de-risk climate adaptation private sector investments	<p>According to UNEP's Adaptation Gap Report, the estimated costs to adapt in developing countries are five to ten times greater than current public adaptation finance flows. There is, therefore, an urgent need to: 1) scale up adaptation finance; and 2) to integrate climate change impacts across business models.</p> <p>This side event focuses on sustainable and practical financing solutions for climate adaptation looking at blended finance models to reduce investment risks. Innovative use of insurance and guarantee products will also be discussed. Speakers comprising of the private sector (including financial institutions and impact investors), enabling government ministries, third sector organizations and the beneficiaries (mostly vulnerable communities), will provide practical insights on barriers to the design of these solutions and ways to overcome them. Specifically, nature-based solutions, ecosystems-based adaptation and value chain approaches to prepare investable opportunities will be presented. Potential to scale and replicate successful initiatives across regions, will be highlighted.</p>	Open	ACW-SE055
30-Aug	15:45	16:45	Solidaridad East, Central, and Southern Africa	Promoting Indigenous Knowledge in Agriculture: A Community Driven Climate Change Resilience Approach	Despite increasing recognition of the importance of indigenous knowledge in achieving climate change resilience in agriculture, when designing and implementing interventions indigenous knowledge approaches are sometimes underemphasized and yet their integration presents fertile ground for community-based and driven climate adaptation and mitigation. Join Solidaridad as we showcase how our focus on embedding and preserving culture, and promoting indigenous low-carbon practices is facilitating uptake of sustainable interventions that ensure the inclusion of the most marginalized groups, including women and youth across East, Central, and Southern Africa. How have we cultivated an environment where the views of various key stakeholders including NGOs, governments, CSOs, and the private sector complement rather than substitute community beliefs and practices? We share our lessons harvested with the aim to catalyze the integration of indigenous knowledge into development initiatives to accelerate Africa's progress on achieving smallholder farmers' resilience to climate change.	Open	ACW-SE077

30-Aug	16:45	17:45	PNUE; CGLU Afrique; Ministère de l'Environnement du Gabon	Dialogue structuré sur les priorités des Gouvernements locaux à la COP27 : Mise en œuvre de la Déclaration de Kisumu	Ce Side Event, structuré autour d'un dialogue multi niveau, se penchera sur la déclinaison opérationnelle émanant des 5 priorités mises en avant par les élus locaux à savoir: La gouvernance multi niveau; L'adaptation / la résilience; L'atténuation; Le renforcement des capacités; L'accès à la Finance Climat y compris à travers la compensation Carbone	Open	ACW-SE089
30-Aug	17:00	18:00	Lusophone Cluster by the Partnership on Transparency in the Paris Agreement (PATPA); Germany; Belgium; CBIT Global Support	From a zero BUR today to a first BTR in 2024 – reflections with Lusophone countries which steps to take	Despite 1st Biennial Update Report (BUR) should be submitted by 2014, around 70% of Lusophone countries did not submit one yet. Under Paris Agreement developing countries may submit their first Biennial Transparency Report (BTR). What do concerned countries need to plan for the relevant next steps, required capacity and data and which technical and financial support is at their disposal? The Cluster Lusophone invites managerial and technical staff involved in NDC implementation and reporting to the UNFCCC to exchange views and solutions. This session will be held in Portuguese.	Open	ACW-SE118
30-Aug	17:45	18:45	Mohammed VI Foundation for Environmental Protection	Showcases initiatives for addressing climate change in Africa	<p>Recognizing the transformative role of universities, youth, private sector, the Mohammed VI Foundation for Environmental Protection will facilitate a side event at the Africa Climate Week 2022 through It's African Green Universities and Youth Education Network as well as the African Youth Climate Hub initiative. This side event will provide a platform for regional dialogue to promote effective resilience building amongst young people at local, national, and regional levels in Africa. It will also explore and promote the role of African stakeholders in building community resilience to climate change impacts through capacity building, concrete initiatives, and start-ups.</p> <p>The side event will feature a panel discussion, projects presentations and an open Q&A discussion session. It is a space for African stakeholders where they will have the opportunity to share their experiences and exchange knowledge and best practices engaging in resilience building.</p>	Open	ACW-SE080

30-Aug	17:45	18:45	International Renewable Energy Agency, Egypt Ministry of Electricity and Renewable Energy, European Union, USA (USAID)	Ratcheting up the Energy Transition for Climate Action in Africa	The realisation of climate and development priorities in Africa requires widespread action, along with a careful assessment of progress made against the set targets. Stocktaking of regional and local initiatives is a pre-requisite for ratcheting up multi-sectoral energy transitions with a view to boosting climate ambition to align with a 1.5°C pathway, consistent with the Paris Agreement. The GST outcome should provide policy direction within the global climate process to course-correct in areas of insufficient ambition. In line with this, and with a view to supporting ambition that feeds into the overall GST process under the UNFCCC, as well as COP27 preparations in the short-term, IRENA and the Ministry of Electricity and Renewable Energy (Egypt) are co-hosting a side event at the Africa Climate Week to translate African climate pledges and multi-sectoral ambitions into urgent actions.	Open	ACW-SE117
31-Aug	9:30	10:30	Climate Finance Accelerator (CFA Nigeria); High-Level Champions	Climate Finance Accelerator (CFA) Nigeria: Crowding-in private finance at scale to deliver Nigeria's low-carbon, resilient and just transition	Convening African and global financial institutions and policymakers to raise awareness of the CFA Nigeria platform and understanding of the requirements for mobilizing climate finance in Nigeria and for accelerating the investment transition.	Open	ACW-SE065
31-Aug	9:30	10:30	Global Center on Adaptation; Africa Adaptation Initiative (Chaired by Gabon); African Development Bank	Africa Adaptation Dialogue: implementing the vision	Despite contributing the least to global warming, Africa finds itself on the frontline of the climate emergency, with the impacts of external shocks exacerbating these vulnerabilities. Indeed, large portions of Africa—particularly the drylands that cover three-fifths of the continent—are warming at a rate twice the global average, putting half a billion people at risk. Chaired by Gabon, the Africa Adaptation Initiative (AAI) aims to strengthen collaboration on adaptation across the continent. To implement this vision, the Global Center on Adaptation and the African Development Bank have jointly developed the Africa Adaptation Acceleration Program – AAAP. This Africa-led, Africa-owned response is mobilizing US\$25 billion for climate adaptation investments in the continent over five years. This event will review progress of the AAAP and how it is contributing to narrowing the finance gap, thus accelerating the implementation of AAI.	Open	ACW-SE093
31-Aug	10:30	11:30	Citi Bank Gabon; UNDP	ESG & Sustainable Finance Capacity Building	The last few years have witnessed a seismic shift in investors' attitudes and demand for climate-related investments in emerging markets. Impact investing, ESG (Environment, Social & Governance), Green Finance and SDGs are among many of the words that have recently populated investment committees and investor conferences as well as boardrooms. Leveraging Cit's resources, experience and research as well as those of third party entities including UNDP, this side event will address the origin, evolution and outlook of climate finance resources being mobilised through the international capital markets. The session will provide the opportunity to evaluate the progress of climate financing and to appraise the degree of mobilization of private sector capital in support of the climate mitigation and adaptation measures. The event will allow a deep dive of market participants – issuers, investors, Development Financial Institutions (DFIs) and donors – and the means and instruments to access private sector capital. The session will also emphasise the importance of data capture and disclosure as it relates to the impact and outcomes of the climate-related investments.	Open	ACW-SE204
31-Aug	10:30	11:30	Paris Committee on Capacity-building (PCCB)	Capacities needed for the horizontal and vertical integration of Nationally Determined Contributions (NDCs)	The horizontal and vertical integration of Nationally Determined Contributions (NDCs) provide opportunities for greater policy synergies, efficiency, and coherence, at the same time, there is also a need to build capacities to mobilize such opportunities related to different integration approaches. Aligning climate and development agendas and integrating NDCs across the board could enhance horizontal policy coherence. Integration of NDCs at different levels of governance, namely regional, national, and local, could enhance vertical policy coherence. To discuss such approaches, through this side event series the PCCB in collaboration with the PCCB Network seeks to facilitate the exploration of what capacities are needed for horizontal and vertical integration of NDCs. The series seeks to provide a space to share experiences and exchange knowledge, case studies, and best practices related to policy coherence and specifically to the role of capacity-building in the horizontal and vertical integration of NDCs.	Open	ACW-SE212
31-Aug	11:30	12:30	GI2 Global Carbon Markets Program	Setting Article 6 of the Paris Agreement into motion: How ready are countries in East Africa?	Most Eastern African countries have updated their NDCs and anticipate the use of carbon market instruments. With the finalisation of the Article 6 rule book, countries are ready or getting ready to implement different carbon market projects and programs to foster the implementation of their Nationally Determined Contributions (NDCs). The Article 6 rule book provided an impetus for countries to implement carbon markets to not only transition from the CDM but also to design and implement approaches to foster carbon market frameworks. These COP26 outcomes define carbon market practices until 2030 and potentially even beyond. Therefore, both governments and carbon market participations have begun to analyse the practical implications and how to put elaborate these in their countries. The session will discuss and analyse how countries in the East Africa region are ready or getting ready to implement the rules of the Article 6 framework, noting that the different countries are at varying levels of preparedness. The session will foster the sharing of experiences between the different countries with the ultimate purpose being a peer-to-peer learning. The session will increase the understanding of these crucial carbon market developments amongst Eastern Africa's public and private sector stakeholders so that they can proactively design and participate in the emerging Article 6 landscape and work towards navigating the transition from the CDM to Article 6 of the Paris Agreement (PA).	Open	ACW-SE099
31-Aug	11:30	12:30	CGLU Afrique	Placer les autorités locales au cœur de l'adaptation et de la résolution des problèmes d'eau des villes africaines	Cette session, qui s'inscrit dans le prolongement des travaux de la Table ronde des Maires Africains pour la sécurité de l'eau, initiative lancée par CGLU Afrique et l'OCDE lors du 9ème Forum Mondial de l'eau à Dakar, se penchera sur les dispositions et moyens à mettre en œuvre pour accélérer la mise en œuvre du plan d'action de la Table ronde. Pour se faire, 4 questions clés encadreront le débat à savoir: Comment favoriser la résilience de l'eau dans les villes africaines et lutter contre l'impact du changement climatique, grâce à des instruments économiques et réglementaires; Comment améliorer la justice en matière d'eau, en protégeant les personnes vulnérables contre les catastrophes liées à l'eau?; Comment mettre en œuvre des solutions innovantes basées sur la nature pour l'adaptation au climat?; Quel cadre partenarial financier pour accélérer le plan d'action de la Table ronde des maires pour la Sécurité de l'eau ?	Open	ACW-SE210
31-Aug	12:00	13:00	SouthSouthNorth	Solutions to unlock finance for locally-led climate action in Africa	Locally-Led Adaptation (LLA) is crucial to progressing transformative, inclusive resilience, and requires cross-sectoral and multi-stakeholder approaches to bring to fruition. In addition, locally-led climate action requires a significant increase in finance and changes to available delivery mechanisms and instruments. Evidence shows that less than 10% of finance reaches the local level, despite the opportunities that LLA present. This action-orientated dialogue explores new strategies and solutions for increasing finance to where it is needed most. The multi-stakeholder dialogue will act as a kick-off event for the Africa Regional Hub under the COP27 Resilience Hub. The COP27 Resilience Hub is home to the Race to Resilience, with regionally contextualised actions and solutions elucidated in this event being amplified to a global audience at COP27.	Open	ACW-SE124

31-Aug	12:30	13:30	Konrad-Adenauer-Stiftung (KAS); Africa Development Bank (AfDB); United Nations Economic Commission for Africa (UNECA)	Limiting loss and damage through enhanced adaptation action in Africa: exploring mechanisms and opportunities	Africa will be confronted with most severe detrimental effects of climate change due to adverse impacts and low adaptive capacities. Existing evidence indicate that considerable adverse effects of climate change will still be experienced under all global emission reduction scenarios, causing loss and damage. This justifies the need for strengthened adaptation action, which has also been indicated to contribute to reducing loss and damage. In this relation, it becomes necessary to enhance understanding of the link between adaptation and loss and damage including complementary benefits that can be realized from investing in them. This side event will facilitate discussions on the role of adaptation in addressing (future) loss and damage and explore opportunities, mechanisms and scalable practices for advancing and sustaining such adaptation co-benefits among African countries. It will also discuss the needed support for aligning actions and investments for enhancing adaptation and addressing loss and damage in Africa.	Open	ACW-SE116
31-Aug	13:15	14:15	African Centre for a Green Economy (AfriCGE) and International Research Development Centre (IDRC)	Accelerating just transition through green entrepreneurship: Lessons from Eastern & Southern Africa	The imperative for a low carbon transition is well underway, however, for some stakeholders and communities, a move away from fossil fuels might entail significant job losses and a potential loss of livelihoods. Considering the high levels of unemployment in most African countries, any transition plans that do not include significant job creation are guaranteed to fail. An effective just transition pathway should promote the creation of decent jobs, anticipating impacts on employment, adequate and sustainable social protection for job losses and displacement. This event will showcase best practices in East and Southern Africa, where green entrepreneurship has emerged as a key approach to building inclusive local economies. Green entrepreneurs across the continent are at the forefront of accelerating the transition, through innovations which address systemic challenges related to food, water and energy security. The event will also highlight how innovative financing could be used to scale up green innovations.	Open	ACW-SE181
31-Aug	13:30	14:30	Igugu Global; The Nature Conservancy	Green Finance: From Niche to Resurgence, Resilience, & Results	The "Green Finance: From Niche to Resurgence, Resilience, & Results" dialogue is being hosted by Igugu Global, Africa's Green Deal Room. The objective of the series is to map climate transition paths in Africa's trade, infrastructure, and the financial markets, and facilitate greater engagement on this topic between project owners and developers, and institutional investors. This dialogue is focused on articulating the rapidly changing global green finance landscape and Africa's position in it. Panelists are requested to discuss the following issues: - The green finance market growth - The political economy of green finance: incentives accelerating deal flow in sectors with high points of climate leverage - The inevitable policy response and driving consistent climate disclosures to tap Africa's green financial markets	Open	ACW-SE085
31-Aug	13:30	14:30	Food and Agriculture Organization of the United Nations (FAO); UN Environment – Abidjan Convention; African Union - Inter-African Bureau for Animal Resources (AU-IBAR); African Development Bank* (tentative)	Aquatic food as a climate solution in African countries	Fisheries and aquaculture hold enormous potential for increasing food security and economic growth in Africa. However, the sector relies on highly climate-sensitive living resources and critical habitats (e.g. mangroves, lakes), and its dependent communities are among the most vulnerable, especially small-scale producers. Adaptation for fisheries and aquaculture is thus urgently needed, in line with the Paris Agreement that calls for increasing adaptation without threatening food production. Solutions are available - including the FAO Adaptation Toolbox - but need to be translated into on-the-ground actions suitable for local specificities and benefiting small-scale fishers and fish farmers who are stewards of resources. Building on outcomes of the Glasgow Climate Pact that urges countries to scale-up adaptation including ocean-based action, this panel will gather a wide range of stakeholders, to discuss responses and opportunities to address climate vulnerabilities of fisheries and aquaculture in Africa, both in marine and freshwater systems.	Open	ACW-SE138
31-Aug	14:15	15:15	the International Organization for Migration (IOM); the United Nations Framework Convention on Climate Change (UNFCCC)'s, East African Development Bank (EADB)'s and Banque Ouest Africaine de Développement (BOAD)'s Regional Collaboration Centres (RCC) in Kampala and Lomé	Human Mobility and Green Economy Development in a Changing Climate in West and East Africa	The event seeks to advance understanding on the links between climate change, inclusivity in climate action and enablers for green economy. Specific attention is given to how climate resilient economic development and green economy opportunities could both reduce the need to migrate, as well as provide opportunities for migrants and how this can be achieved. The side event is organized to enhance dialogue and action among stakeholders addressing the challenges and opportunities raising from climate change related migration and regional green economy transition. The event aims to accelerate the development of regular migration pathways, promote sustainable development and improve inclusion of vulnerable groups in the green economy transition in the context of changing climate by offering information for data-driven policy development and facilitating knowledge exchange between different actors.	Open	ACW-SE091
31-Aug	14:15	15:15	the International Organization for Migration (IOM); the United Nations Framework Convention on Climate Change (UNFCCC)'s, East African Development Bank (EADB)'s and Banque Ouest Africaine de Développement (BOAD)'s Regional Collaboration Centres (RCC) in Kampala and Lomé	Human Mobility and Green Economy Development in a Changing Climate in West and East Africa	The event seeks to advance understanding on the links between climate change, inclusivity in climate action and enablers for green economy. Specific attention is given to how climate resilient economic development and green economy opportunities could both reduce the need to migrate, as well as provide opportunities for migrants and how this can be achieved. The side event is organized to enhance dialogue and action among stakeholders addressing the challenges and opportunities raising from climate change related migration and regional green economy transition. The event aims to accelerate the development of regular migration pathways, promote sustainable development and improve inclusion of vulnerable groups in the green economy transition in the context of changing climate by offering information for data-driven policy development and facilitating knowledge exchange between different actors. 31-Aug	14:30	15:30	WRI Africa; UNECA (to be confirmed); FSD Africa (tbc)	Accelerating financial flows for nature-based solutions for adaptation	Although investments for NBS for adaptation have been gaining traction at a global level, more work is needed to inspire and scale up NBS adoption in Sub-Saharan Africa. In addition to being one of the most vulnerable regions to climate change, Sub-Saharan Africa's infrastructure deficit is estimated to reach \$350 billion by 2040. Despite initial progress on increasing finance for NBS in Sub-Saharan Africa, adaptation finance is still scaling too slowly to narrow the gap while the costs of climate impact rise. This event will examine the current trends in financing Nbs for adaptation on the continent. It will highlight investments and alliances that are overcoming the challenges of investing in Nbs for adaptation – and what more needs to be done to leverage its potential. The event will bring together perspectives from critical actors, including the private sector.	Open	ACW-SE174

31-Aug	15:30	16:30	Covenant of Mayors in Sub-Saharan Africa; ICLEI - Local Governments for Sustainability; GIZ; AECID; AFD; Expertise France	Harnessing renewable energy for the just energy transition in African cities	Africa contributes just 8.8% to global greenhouse gas emissions, but is the continent most vulnerable to climate change. In Africa, 35% of total emissions come from the energy sector; thus renewable energy policies and technologies can significantly reduce these emissions from African cities, which have significant levels of development still to undergo, including overcoming the major inequity of 568 million and 923 million people without access to electricity and clean cooking respectively.	This session aims to bring together Renewable Energy experts, government officials, Development Finance Institutions and private sector partners to discuss the roles of the public and private sector in enabling the Renewable Energy transition. It will also focus on what African cities should be doing to create an enabling environment for funding/investment, provide recommendations for enhancing the uptake of Renewable Energy, and present the innovative approaches and lessons learnt from the work done through the Covenant of Mayors in Sub-Saharan Africa*, a network of 300+ cities committed to taking climate action. * Covenant of Mayors in Sub-Saharan Africa is a network of 300+ cities, co-funded by the European Union (EU), the German Federal Ministry for Economic Cooperation and Development (BMZ) and the Spanish Agency for International Development Cooperation (AECID),	Open	ACW-SE143
31-Aug	15:30	16:30	High-Level Champion; Dalberg	Nature and carbon markets: stimulating financial market innovation in Africa	This session will discuss the lessons learnt from carbon credit markets and the potential for credit mechanisms to play a role in financing beyond carbon. We will explore various efforts to value ecosystem services, biodiversity, resilience and co-benefits, and how credit markets might play a future role in financing nature-based solutions.		Open	ACW-SE149
31-Aug	16:30	17:30	UNEP; Government of Eswatini; The Commonwealth Finance Hub; IIED	Debt-for-Climate Swaps Innovative Financial Instruments for Public Debt Management	The world is facing a triple crisis of debt, climate change and biodiversity loss. The impacts of the COVID-19 pandemic on the economic system have increased volatility in developing country markets, particularly in Africa, where high levels of debt make them vulnerable.	Several countries in Africa are now considering debt for climate swaps as an innovative solution to manage mounting public debts, climate change challenges – particularly underfunded adaptation action - and COVID-19 recovery. Traditionally, these instruments represent an exchange of the existing debt contract with a new one, where the previous contract is normally discounted. The discount or foregone debt service proceeds would then be used in an agreed upon manner to fund climate projects.	Open	ACW-SE044
31-Aug	16:30	17:30	UN Climate change; RCC Kampala; RCC Lome	Carbon pricing as an NDC/LT-LEDs implementation tool: the experience of CIACA in Africa	To solve the climate crisis, economists agree on the need to price carbon. This event intends to give an insight into what is being done in Africa and beyond in the field of carbon pricing and carbon markets.		Open	ACW-SE100
31-Aug	17:30	18:30	UNECA; Government of Kenya (National Treasury & Planning)	Africa Green Finance Coalition; accelerating investment in Africa through green finance.	Mobilizing the \$trillions Africa needs to finance the NDCs requires transformational collaboration across sectors and borders. The Africa Green Finance Coalition is a platform that bolsters pan-African collaboration and provides African Governments with the necessary resources, expertise, and services to harness the opportunities linked to achieving the Paris agreement, SDGs and AU Agenda 2063. Announced at COP26 jointly by the Kenyan government and the Africa Adaptation Initiative, the AGFC will convene African governments, green and climate finance organisations, and investors to design and implement future-proof green policies and institutions.	This first AGFC roundtable will connect leading organisations to share their learnings from mobilising investments for a climate-neutral and resilient Africa. Discussions will aim to surface the main skills and capabilities green finance institutions need to scale, to identify investment opportunities in youth and women-led projects, and to uncover key success factors of realised investments, showcasing the power of peer-to-peer learning.	Open	ACW-SE092
31-Aug	17:30	18:30	Climate Change Africa Opportunities- CCAO	Promoting Indigenous knowledge, practices and innovations resilient to climate change in Africa	Even though indigenous peoples are among those who have contributed the least to climate change, they are the ones who suffer its most serious consequences. If these peoples are much more vulnerable to climate change, it is because many of them depend on ecosystems that are particularly exposed to the effects of climate change and extreme weather events such as floods, droughts, waves of heat, forest fires and cyclones. Small islands, high altitude regions, humid tropics, coastlines, deserts and polar areas are some of the most affected regions. Indigenous peoples make an essential contribution to the conservation of biodiversity and the protection of forests and other natural resources, and their traditional environmental knowledge can greatly enrich scientific knowledge and adaptation activities at the time of the decision-making related to climate change.		Open	ACW-SE006
31-Aug	17:30	18:30	Standard Chartered Bank Cameroon	To be confirmed later	Standard Chartered is at the forefront of the carbon market debate globally and has led many initiatives looking to both deliver scale and improve quality. High integrity carbon credits can unlock urgently-needed finance that wouldn't otherwise be available to reduce and remove billions of tons of emissions. By scaling voluntary carbon markets and allowing a global price for carbon to emerge, companies will have the right tools and incentives to reduce emissions at least cost. To stay on the 1.5°C pathway, all businesses must firstly take deep and urgent cuts in their energy and land based emissions associated to their value chain but this will not be sufficient. Climate Change is a major threat in Africa as it is impacting all sectors, ecosystems and the ability of people to cope. The urgency of the climate crisis requires that businesses go a step further and invest in mitigation of emissions beyond their value chains. High quality nature based carbon credits can provide a ready available solution to reduce and remove CO2 emissions, benefit local people and generate net biodiversity gain. Many countries desire to achieve emission reduction targets and attract climate finance through the carbon markets and while investments in Africa have been gaining traction, more work is needed to improve quality, consistency and understanding across the globe. We need every tool available working at full speed to channel investment towards a just transition to 1.5°C. This event will explain how carbon markets work and how they support the goals of the Paris Agreement to unlock finance needed to reduce and remove emissions that wouldn't otherwise happen. It will be an opportunity for businesses, governments and NGOs to learn about what defined a high quality carbon credit and how finance can be mobilised to support a just transition to net zero.		Open	ACW-SE052
1-Sep	9:00	10:00	African Development Bank	Mobilizing private sector finance for adaptation through certifying the benefits of adaptation action – Presentation on the Adaptation Benefits Mechanism (ABM) piloted by the African Development Bank	The current levels of adaptation finance are insufficient to meet the adaptation needs of developing countries. According to the 2021 UNEP's Adaptation Gap Report, the adaptation costs in developing countries are five to ten times greater than the current public finance flows and the adaptation finance gap is widening. At COP26, developed countries committed to double their adaptation finance by 2025. The involvement of the private sector to overcome the adaptation finance and implementation gap for adaptation is crucial. The Adaptation Benefits Mechanism (ABM) is a non-market results-based financing mechanism for mobilizing public and private sector finance for enhanced resilience of vulnerable communities and ecosystems. It also contributes to closing the methodological gap for robust and environmentally sound adaptation metrics. This side-event/workshop will bring together diverse stakeholders to share the best practices and lessons learned so far from the ABM Pilot Phase of the African Development Bank and discuss the first proposed ABM methodologies, including through interactions with the audience.		Open	ACW-AE027-s

1-Sep	9:00	11:00	UNDP, UNFCCC, ILO	Integrating the principle and process of just transition into NDC/LTS planning to accelerate climate ambition	A green transition is at the heart of meeting the Paris Agreement goals. Nonetheless, if not managed well, it also runs the risk of increasing social inequality, civil unrest and reduced productivity or less competitive businesses, sectors and markets. The preamble of the Paris Agreement on climate change, adopted in 2015, underscores close links between climate action, sustainable development and a just transition, with Parties to the Agreement "taking into account the imperatives of a just transition of the workforce and the creation of decent work and quality jobs in accordance with nationally defined development priorities". We are seeing a growing recognition of the need for a just transition in the context of Paris Implementation. In Africa, 10 countries directly and indirectly referenced just transition in their revised NDCs, demonstrating a strong political will to incorporate a social dimension into their climate action.	Open	ACW-AE031-s
1-Sep	9:45	10:45	Kenya Government, State Department of Livestock; CGIAR (represented by International Livestock Research Institute (ILRI) &	Livestock: from villain to hero for climate resilience in Africa	This event aims present key conceptual framework and guidelines for just transition and its enabling role in The livestock sector is often cited as the most intensive emitter of greenhouse gases within agriculture production systems. However, all too often, climate change discussions focus only on the negative impacts of GHGs from livestock on climate while ignoring the numerous benefits that sustainable livestock systems bring to the environment and rural livelihoods. For almost a billion families in Africa, livestock are a crucial	Open	ACW-SE125
1-Sep	10:45	11:45	Christian Aid; CAN International	The Loss and Damage Finance Facility. Why and How?	This session will discuss achieving the establishment and operationalization of a Loss and Damage Finance Facility (LDFF) that delivers on the needs of African countries at speed and scale by explaining the why and how. The session will launch the LDFF report by CAN International, Christian Aid; Heinrich Böll Stiftung (Washington, DC); Practical Action & Stamp Out Poverty explaining why the LDFF is necessary before turning to an analysis of the governing arrangements and core operational functions for the LDFF. This session will finish off with recommendations and a way forward to COP27 and beyond with the Glasgow Dialogue delivering concrete actions.	Open	ACW-SE087
1-Sep	11:45	12:45	UNEP; World Bank; UNFCCC	The Future Climate Leadership	We will finally shed the light on how we as youth will lead the tomorrow while building an ecofriendly journey if fighting challenges and tackling the global concerns, finally we will open the floor for more predictions to be made, solutions and the possibilities that we are eagerly excited to see them happening in the world	Open	ACW-SE056
1-Sep	12:45	14:45	AfDB; UNECA; AUC; GGGI; NDC-P; UNDP; UNFPA; UNEP; IFAD; The Commonwealth Secretariat	Enabling faster and efficient NDC support through Advocacy and Partnerships	At COP26 the Africa NDC Hub Partners launched a report on Africa's NDCs journey and the imperative for climate finance innovation. At COP27 the partners will launch a follow-up report to inform decision makers on crucial actions and opportunities for climate action and development on the continent. This will expand on the findings of the previous report and be informed by outcomes of COP26, and the African Union's African Climate Strategy and Green Recovery Action Plan within the border context of the priority areas set by the COP27 Presidency. It will be based on nine thematic areas: resilience and adaptation; LT-LEDs; green recovery; climate finance; translating NDCs into investment plans; private sector engagement; energy transition; inclusion; and nature-based solutions. The side event will (i) take stock of Africa's updated NDCs and their challenges and opportunities, and (ii) garner stakeholders' views on the proposed priority areas of the report.	Open	ACW-AE021-s
1-Sep	12:45	13:45	UNDP, UNFCCC, NDC Partnership	Africa Regional Monitoring Reporting and Verification (MRV) Experience sharing dialogue	The objective of the event is to enhance sharing of experiences among countries regarding the use of the existing MRV tools, how these tools can be aligned with Article 6 reporting requirements and identify the capacity support required for functional MRV tools to be utilized. Specific objectives include the following; 1.Share experiences on the use of existing MRV tools that have been developed to enhance reporting on NDCs and overall climate actions 2.Create a platform to share experiences among countries on MRV and the alignment of the MRV to article 6 reporting requirements under the Paris agreement 3.Identify the capacity support available for developing functional MRV systems at national level	Open	ACW-SE200
1-Sep	13:45	14:45	Landscape Resilience Fund; WWF; South Pole; Chanel; Koa Ghana; Switzerland	Landscape and community first approaches to climate finance: case studies from Ghana, Mozambique and Zimbabwe	The urgency to address the causes and impacts of climate change is stronger than ever. Although the completion of the Paris rulebook at COP26 marks a crucial step in global climate action, the finance and implementation gaps remain important for both mitigation and, especially, adaptation. African communities and ecosystems are disproportionately impacted by climate change, despite bearing the least responsibility for the problem. Our continent's development and environmental protection are strongly linked to the global clean energy transition and coordinated action on climate resilience and capacity building. In the Landscape and community first approaches to climate finance event, representatives from the Landscape Resilience Fund, South Pole, Carbon Sink and partners will discuss multistakeholder, concrete approaches to addressing the climate finance gap in Africa. Crucially the panelists will outline how each of their work streams center around local communities as the primary drivers of building resilience, protecting ecosystems and ramping up climate mitigation action. The event features initiatives from community-based climate projects, adaptation finance through Climate Funds, and public-private partnerships to deliver multiple benefits beyond mitigation (e.g. jurisdictional and community-owned REDD+).	Open	ACW-SE126
1-Sep	14:45	15:45	Conservation International	REDD+ Nesting: How will different Forest Carbon Standards support nested approaches?	Establishment of a well defined and comprehensive nesting framework will be critical in ensuring that different actors can engage in REDD+ processes and investments at different scales within a jurisdiction. Various countries are in the process of setting up frameworks/systems that will ensure implementation of REDD+ in their jurisdictions. They are also striving to balance between meeting their NDC targets, attracting climate finance and implementing their national REDD+ strategies/action plans. Furthermore, some have existing REDD+ projects that are not aligned to the national framework. Many countries desire to achieve emission reduction targets and attract climate finance from multiple sources through REDD+. This will be realized by application of forest carbon standards. How these standards will interplay with each other whether in a jurisdictional or nested programme is unclear. This side event will seek to bring together experts from the forest carbon standards that support nested approaches, government officials with experience in building nesting frameworks and other practitioners with relevant experience.	Open	ACW-SE127
1-Sep	15:15	16:15	The World Wide Fund for Nature (WWF); The African Development Bank (AfDB)	Building a Resilient Africa: Creating enabling conditions for NDC Implementation	Enabling conditions - finance, technological innovation, strengthening policy instruments, institutional capacity, multi-level governance, and changes in human behavior and lifestyles - are as relevant for adapting to climate change as to mitigation. African countries, having contributed the least to the climate crisis, are already facing the brunt of climate impacts. Challenges posed by limited institutional capacity, perennially constrained resource context will be exacerbated by squeezing out of international support due to multiple global crises. This will constrain NDC implementation and undermine efforts to build a resilient Africa.	Open	ACW-SE109
1-Sep	15:45	16:45	UNDP - United Nations Development Programme	Strengthening adaptation and climate resilience in Africa through NDCs: Empowering countries to raise climate ambition	With its adverse effects, climate change is impacting all regions worldwide, especially the most vulnerable. Among others, the African region is one of the most affected by this phenomenon. As a response, UNDP's ambitious Climate Promise provided financial and technical support to 120 countries globally, including 44 Sub-Saharan African countries, to revise or update their Nationally Determined Contributions (NDCs). This support helped build capacity for planning and preparing the ground for implementing the countries' NDCs and submitting their revised NDCs under the Paris Agreement. The objective of this event is to showcase UNDP's service offer to support the NDC revision/update process and how that helped leverage national efforts to raise climate ambition in Africa and support climate planning and investment processes CP phase 1. On the other hand, we could highlight UNDP's offer to provide countries with continuous support for enhanced NDC implementation to move from pledge to impact (CP2).	Open	ACW-AE024-s
1-Sep	16:30	17:30	African Development Bank; Global Green Growth Institute	Aligning NDCs, LTS And SDGs Implementation for Green Growth and Climate Action in Africa	Aligning NDCs, LTS And SDGs Implementation for Green Growth and Climate Action in Africa	Open	ACW-AE028-s

1-Sep	16:45	17:45	International Fund for Agricultural Development (IFAD)	Inclusive green finance and climate resilient value chains in the smallholder sector	Advancing towards climate resilience in Africa! IFAD will host a side event featuring two climate resilience-focused initiatives in Africa targeted toward the rural poor. Panel debates will spotlight successful, innovative solutions designed through the Inclusive Green Finance Initiative (IGREENFIN) to mobilize climate finance (green loans at 0 percent with longer tenors) and provide technical assistance that is expected to accelerate the adoption of climate change adaptation practices and enhance mitigation by investing in gender-sensitive agricultural value chains of the Great Green Wall (GGW). Alongside the GGW initiative, the Adaptation for Smallholder Agriculture Programme (ASAP) provides grant resources for developing innovative adaptation methods through efficient water, resilient infrastructure, renewable energy, climate-resilient food production systems, and knowledge dissemination. The event will provide an opportunity to identify synergies for collaboration with other organizations and underline the need for increased private investments in Africa channelled towards profitable and climate-resilient value chains.	Open	ACW-SE147
1-Sep	17:45	18:45	USDA forest service	US Forest Service supporting Congo Basin Countries efforts to report GHG emissions and removals under the Enhanced Transparency Framework of the Paris Accord	The Paris Agreement requires countries to report biennially on a range of information relating to their emissions/removals and on progress with meeting their nationally determined contributions (NDCs) under the enhanced transparency framework (ETF) through biennial transparency report (BTR). To support efficient reporting and decision making on climate action, countries need to have operational institutional arrangements and systems to measure, report and verify GHG emissions and removals and measures to reduce emissions and enhance removals. The countries of the Congo basin have been working on putting in place institutional arrangements to support their transparency (MRV) system (primarily focusing on GHG inventory activities). The advent of the REDD+ process, coupled with REDD+ readiness funds, has seen countries make significant progress in measurement and reporting in the forest sector but much needs to be done to ensure comprehensive MRV in all sectors of primary sources of GHG emissions.	Open	ACW-SE207
2-Sep	9:00	10:00	Clean Cooking Alliance (CCA); United States Environmental Protection Agency (US EPA), Climate & Clean Air Coalition (CCAC), Berkeley Air Monitoring Group	Achieving NDC targets through clean cooking action	Congo basin countries face specific challenges with regard to the development of sustainable long-term This panel session will highlight the work of the Clean Cooking & Climate Consortium (4C), specifically 4C's work to provide technical support to countries seeking to achieve their climate goals as articulated in their NDCs through clean cooking action. The session will feature members of 4C as well as country representatives that have benefited from 4C's technical support for implementation planning and MRV in the past several months.	Open	ACW-SE180
2-Sep	9:00	10:00	Akina Mama wa Afrika; Hivos; Community Technology Development Trust	Assessing the viability of the current global climate finance landscape in the realization of gender and climate justice	The session will be structured in two parts. In the first part, the panel will assess the global climate finance landscape from a gender perspective. In the second part, using evidence from experiences in the global South, particularly women and indigenous groups, the panel will discuss the political economic factors, both visible and invisible, that influence access to climate finance. The goal is to unpack the pragmatic needs of rural women, indigenous peoples, and local communities who are at the frontline of the climate crisis, and to share actionable and regenerative solutions grounded in nature, communities' lived experiences, and Global South women's perspectives. We believe that by locating a Global South perspective in the global climate finance governance landscape, then climate actors, both state and non-state, public and private will better center the needs of the most marginalized in defining the New Collectively Quantified Goal on climate finance.	Open	ACW-SE188
2-Sep	10:00	11:00	Rethinking Removals (which includes many organisations like Valence Solutions, SouthPole, CarbonGap); Climate Action Platform for Africa (CAP-A); potentially energy stakeholders in Kenya (tbc - could include a range of business and parastatal players)	Carbon Valley in Africa - at scale engineered removals to drive continental and global change	The world collective needs removals at scale to avert catastrophe. Africa not only offers some of the most attractive locations and cost structures available, but also needs energy-intensive anchor demand to accelerate and expand investment into expanding renewable energy capacity, which in turn can kick-start broader green industrial development and universal energy access. In this side event, we will put a spotlight on the potential in Africa, share exciting progress and lessons learned from ongoing work in this direction and jointly explore what needs to happen, locally, regionally and globally for Africa to fully capture this potential and contribute at scale to global removal activity.	Open	ACW-SE183
2-Sep	10:00	11:00	Groupeement Agro-Pastoral pour un Développement Durable de Yongoro GADY ACTION CONTRE LE CLIMAT	Lutte contre le changement climatique	Notre action consiste a lutter contre la gestion des risques du changement climatique et la protection de l'environnement a travers les activités des rétablissement économiques.	Open	ACW-SE026
2-Sep	10:00	11:00	Met Office plus partners (organisations listed with speakers below)	Gaps and opportunities for weather and climate services to enhance resilience in Africa	The Weather and Climate Information Services (WISER) programme has been delivering transformational change in the quality, accessibility and use of weather and climate information services in Africa since 2015. WISER will be expanding in East, West, Southern and North Africa to support improved resilience of people, and the adaptive capacity of countries to prepare for and respond to the effects of climate change. The programme is currently in its inception phase. Panelists would share insights such as the needs and opportunities for weather and climate services in Africa, and how working collaboratively across the weather and climate system is needed to improve the resilience of the most vulnerable. Integrating co-production, gender, equity and social inclusion in project and programme design would be explored as areas of focus. Audience participation is encouraged to foster new partnerships to collectively address the climate risks in the region.	Open	ACW-SE175
2-Sep	11:00	13:00	African Union, Africa Centre of Meteorological Application for Development (ACMAD), World Meteorological Organisation, and European Union, UNDRR	Enhancing Climate Change Resilience in Africa: Exploring African Union Climate Policies and programmatic initiatives	Africa contributes less than 4% of global greenhouse gas emissions but is one of the most vulnerable to climate variability and change. The continent's vulnerability to climate change is exacerbated by multiple natural and meteorological hazards such as floods, droughts, extreme heat and cyclones. To enhance Africa's capacity to better plan and implement climate actions, the Assembly of Africa Heads of States and Government, in February 2022, adopted a 10-year Climate Change and Resilience Development Strategy and Action Plan to address climate change challenges in Africa. The AU climate strategy has underscored programmatic response to the urgent climate crises. This event will build a discussion around current policy and programmatic efforts to address climate change impacts in Africa, mainly from Africa Multi-hazard Early Warning and Early Action Systems (AMHEWAS) Programme, Urban Resilience Programme, and CLIMSA Program, highlighting the 2021 state of climate report for Africa.	Open	ACW-AE018-s
2-Sep	11:00	12:00	Women for a Change, Cameroon: GenEgaliteECCAS	TechYou: A Greener Future for Our Planet	With young people essential in the fight against climate change, it is worth noting that only together, can we safeguard our environment and protect our planet from harmful pollutions, extractivism and climate change. It starts with you, me and us all; we are the change we want, so I stand with you today to say Yes we can make climate action a priority. TechYou focuses on the role and impact technology has on our day to day lives, and how through social e-learning and exchange, we can all build and enhance on our knowledge, skills and information on and about climate change, and the various ways and opportunities we can connect, support and empower our selves and our communities to stand together for climate action and fight against further degradation and unwanted pollution and extractivism of our lands, water and air.	Open	ACW-SE015

2-Sep	11:30	13:30	UNDP	Water – Energy and Food: A Nexus Approach to Accelerating Climate and Sustainable Development Goals in West Africa	<p>The importance of agriculture cannot be understated for West African economies providing jobs for over 60% of the population and 35% of gross domestic product (GDP). The region has million hectares of available cultivable land, million hectares of pasture, and a large workforce with women playing a major role in the production, processing and marketing of agricultural produce. However, the agriculture sector is characterized by low yields and pays less than other economic sectors.</p> <p>According to ECOWAP, climate change is exacerbating this situation with a decline in rainfall over the last fifty years. Farmers are still employing rainfed agriculture. With technologies in the off-grid solar, bioenergy and digital applications, the region can transform its agricultural sector, from being predominately rain-fed to a globally competitive one increased productivity, and viable post-harvest capacities.</p>	Open	ACW-AE032-s
2-Sep	12:00	13:00	APCOP Worldwide LLC	Women led climate-smart projects for a resilient future	<p>In this context, the UNDP is organizing this event to showcase the potential of an integrated approach to The side event will look at how gender-sensitive finance is contributing to uplifting resilient communities and enhanced climate mitigation. It is well documented that investing in women, is the smartest investment a country can do. This is because of the multiplier effect that investing in gender equity will have not only on economic growth but also on social development en environmental conservation. Based on that, this event goes a step further and looks at how financial resources are being spent by women, particularly young entrepreneurs; the importance of disaggregated data by gender; as well as showcases relevant examples of the impact of women-led climate-smart projects.</p>	Open	ACW-SE195
2-Sep	12:00	13:00	CGLU Afrique	Vers la valorisation énergétique des déchets solides en Afrique	<p>Ce Side Event, sera une occasion pour lancer le débat autour de trois questions centrales sur les déchets en Afrique, à savoir La valorisation énergétique; La valorisation matière; La valorisation organique. Il permettra ainsi, de structurer l'engagement des collectivités locales dans l'initiative sur les déchets 50% de réduction à l'horizon 2050.</p>	Open	ACW-SE211
2-Sep	13:00	14:00	Pan African Youth Union (a Federation of African 54 Youth Councils); Gabon National Youth Council (GNYC)-State Host; UNECA Youth (Youth Sounding Board, Sub regional Office-Eastern Africa); International Interdisciplinary Innovation Center Of Life-Alliance of the People's Of the World-Africa Office (IPAOW); Vijana Think Tank-Tanzania (VTT); Global Youth Parliament-East Africa (GYP);	Africa youth actions to attaining a resilient world in the final decade of Action.	<p>60% of the African population is below age of 35, extreme weather events continue to disrupt lives and livelihood at scale, young people are an untapped resource and largely misunderstood.</p> <p>The Africa youth climate convention at ACW to bring together Africa wide youths through national youth councils with the aim to collectively gather the voice of Africa's young people on climate actions, to protect and conserve environments and to commit to the frameworks of sustainability and its-precautionary and human-rights based approach, discuss youth-driven regional climate action solutions and forge partnerships that seeks to galvanize young Africans to meaningfully join forces to address climate crisis.</p> <p>Young people shall (i) Review and reflect on current climate action pacts (ii) Draw entry points for continental youth meaningful engagement in exploring and implementing practical solutions that take into account youths' unique strengths and challenges (iii)Engage African policy makers to raise ambitions and incorporate youth at all levels of decision making as equal stakeholders (iv) Declare and commit to a Africa Youth Climate Action Plan & Priorities 2022-2030.</p>	Open	ACW-SE043
2-Sep	13:00	14:00	AMREF; Global Emerging Patogent Treatment Consortium (GET); Centre for 21st Century Issues (C21st); Lagos State Ministry of Health ; Lagos State ministry of The Environment	Towards a Multi-sectoral approach in addressing impact of Climate Change on Health	<p>Climate change affects the social and environmental determinants of health – clean air, safe drinking water, food sufficiency and secure shelter. It is thus generally agreed that countries with weak health infrastructure – mostly in developing countries – will be least able to cope without assistance to plan and respond to prevailing as well as potential health concerns. The climate crisis also threatens to deepen existing health vulnerabilities and create new ones including the geographic spread of climate-sensitive communicable and non-communicable diseases. The impacts of climate change are also evident at the systems level, particularly within health services and the provision of universal Health Coverage (UHC), eroding progress towards its three dimensions of (i) coverage of the people in need of care, (ii) cost of treatment, and (iii) the care services available.</p> <p>The side event will initiate a multi-sectoral dialogue on climate change and health in Africa as well as discuss finance to address the impacts of climate change on health with a focus on one health and universal health coverage.</p>	Open	ACW-SE201
2-Sep	14:00	15:00	Global Wind Energy Council (GWEC)	Sunset to sunrise: Transforming the workforce to achieve a just and equitable energy transition	<p>As we look to the future and the significant acceleration of renewables required to carry this energy transition out, workforce must be considered. Ensuring a just and inclusive transition in Africa is essential as the energy sector deals with the phase out of coal and the growth of wind and other renewable industries. Looking at how vulnerable or marginalised stakeholders can be supported in the transition as well as looking at workforce specifics will help Africa drive a Just Transition to net zero. At subnational levels, communities will be affected by the energy transition to renewables and so through effective stakeholder engagement and social dialogue these challenges can be faced with a more holistic view to ensuring the socioeconomic welfare of all those involved.</p>	Open	ACW-SE045
2-Sep	14:00	15:00	VNV Advisory Services; Bôndy Earth .	Financing the Blue transition: Mangrove restoration for Africa.	<p>Mangroves have proven to help combat the effects of storm surges and sea-level rise, improving coastal resilience and the adverse impact of climate change. This discussion will touch upon utilising innovative financing mechanisms that can accelerate mangrove restoration and reforestation at scale in Africa. Mangrove ecosystems offer a high sequestration capacity with the potential to create substantial and sustainable development benefits in the region. By involving local communities, and unlocking sizeable capital investment would enable more opportunities for Blue Carbon sequestration in the continent.</p>	Open	ACW-SE064

<div> <div> Regional Climate Weeks 2022 29 Aug - 02 Sep </div> <div> Africa Climate Week 2022 - List of Action Hub Events (version 2 as of 03/08/2022) 29 August - 02 September </div> </div>							
Date	Start time	End time	Organizer(s)	Title	Description	Event type	Code
29-Aug	14:00	14:30	University of Ilorin, Ilorin, Nigeria (UNILORIN); The Ohio State University, Columbus, USA (OSU); and International Institute for Tropical Agriculture (IITA).	Building Women's Resilience to Climate Shocks through Stress Tolerant Maize for Africa: Constraints and Prospects	<p>To promote sustainable economic development, there is a need to pay more attention to solutions to environmental and climate risks through inclusive innovation technologies that are gender-sensitive, growth and resilience oriented. In view of this a USAID-funded project under Advancing Local Leadership, Innovation and Networks (ALL-IN) Research Programme with the collaboration of International Institute of Tropical Agriculture is addressing the power of advanced agricultural innovation technologies, such as Stress Tolerant Maize for Africa (STMA), in building the economic resilience of smallholder farmers. This action hubs showcases some of the documentaries from the field experiences, revealing the constraints and the potentials of the STMA technology in improving the resilience of the rural smallholder farmers. Special attention is given to female farmers and a gender-disaggregated experimental subjects of random controlled trials were conceptualized and implemented to reveal the social, cultural and economic norms of the Africa economy.</p>	Open	ACW-AH064

29-Aug	14:45	15:15	Youth Go Green Network Liberia (YUGNET-LIBERIA)	Building a Sustainable future for a Healthy, Green and Safe Environment for All	"Building a Sustainable Future For a Healthy, Green and Safe Environment" is an Innovation that seeks to promote recycling of waste materials into usable and sustainable produce. We want to invite expert to educate young people on how they can get involved into the Green-Entrepreneurship which will not only reduce our emissions to 1.5°C but also it will help to tackle poverty thereby creating some means of employability for many across the country and Africa beyond. This initiative when supported will help us transform waste materials into replace fossil fuels and be used to provide solar and mechanical energy without the use of fossil fuels which will significantly contribute to the emissions target of 1.5°C before 2030.	Open	ACW-AH013
29-Aug	15:30	16:00	ONG AVES (Association des Volontaires pour l'Environnement Sain)	Initiatives climat comme l'une des meilleures capitalisations des actions de résilience en Afrique	Il est remarqué que souvent il y a des bonnes initiatives de résilience et d'adaptation qui sont portées par les jeunes, les femmes, les associations voire les collectivités, mais faute d'un manque de stratégie de cartographie de ces initiatives, il semble toujours comme si rien ne se fait sur terrain. Ainsi les financements qui peuvent soutenir ces initiatives locales ne parviennent pas aux vrais acteurs ou porteurs de changement à la base. C'est dans cette perspective que l'Initiatives Climat est née comme un programme qui essaie de desceller les initiatives de résilience porteurs des visions d'adaptation et d'atténuation aux changements climatiques dans les pays francophones africains. Il s'agit d'identifier les initiatives résilientes, les mettre dans une base de données, d'organiser des rencontres collaboratives, des actions de recherche et développement et de créer des tutoriels des bonnes pratiques pour leur mise en ligne à travers les trois clusters créés sur le charbon vert ; l'agro écologie et la foresterie.	Open	ACW-AH020
29-Aug	16:15	16:45	SLOCAT Partnership on Sustainable, Low Carbon Transport	Sustainable Transport in Africa: Amplifying Regional Voices	This action-oriented event will highlight actions, innovations and perspectives on sustainable, low carbon transport and mobility from the African region. It will feature the voices of actors from the throughout the continent and channel their ideas and unique perspectives into the wider climate process.	Open	ACW-AH045
30-Aug	9:30	10:00	UE Searious Business & ASMAPEC& Departement Developpement durable	Reduction of plastic pollution and reduce CO2 emission , preserving Nature from pollution by domestic rubbish and promote environmental education public awariness. Eleminate plastic from water ressources and ocean to avoid harming marine species and fresh water species. Prevent domestic farm animal from swallowing plastic bags and chewing PET bolttes in filed pasture	The event will be slides projection and video film of the case study in 2 cities of Morocco followed by Q&A	Open	ACW-AH004
30-Aug	10:15	10:45	ONG TERRE VERTE	Le bocage sahélien: une solution pour une agriculture sahélienne durable et résiliente	Le bocage sahélien est un milieu équilibré créé par l'Homme où il associe l'arbre, la culture et l'élevage et où l'Homme et la Nature vivent en harmonie. Au Sahel, la première vocation du bocage est de garder l'eau là où elle tombe par des aménagements de diguettes, de mares et de haies vives, afin d'atténuer l'action érosive des eaux de la mousson et de maintenir la biodiversité d'un milieu extrêmement fragile. Les périmètres bocagers permettent ainsi de résoudre les problèmes liés à la dégradation de l'environnement. Dans le bocage, les champs sont entourés d'une double protection : une diguette en terre doublée d'une haie vive. Au point bas du champ est aménagée une petite mare d'infiltration des eaux excédentaires du ruissellement Le résultat est la récupération de toutes les eaux pluviales sans érosion et une hausse des rendements agricoles ce qui permet de développer une résilience solide.	Open	ACW-AH031
30-Aug	11:00	11:30	Africa Adaptation Initiative; United Nations Development Programme	The State of Adaptation in Africa – Showcasing preliminary key findings of the AAI State of Adaptation in Africa Report	The proposed event will aim to present preliminary key findings of the State of Adaptation in Africa Report which builds on the findings from previous adaptation synthesis reports to achieve the overall goal of identifying lessons learned from the implementation of adaptation actions. It will provide specific recommendations for different stakeholders on how to build on these successes and lessons to advance the implementation of adaptation. The report will take a sectoral and thematic deep-dive analysis and highlight emerging areas and enablers that provide the potentiality of strengthening the continent's adaptation capacity for increased resilience. It will respond to the following questions: •What is the level of scientific knowledge of climate, climate change, and variability in Africa? •What is the existing thematic and sectoral evidence on the state of adaptation in Africa? •What are the drivers of successes and gaps in adaptation in Africa?	Open	ACW-AH042
30-Aug	13:15	13:45	International Renewable Energy Agency	Planning for a Just and Inclusive Energy Transition in Africa	An energy system centred on renewable energy can help resolve many of Africa's social, economic, health and environmental challenges. A profound energy transition is not only feasible, it is essential for a climate-safe future in which sustainable development prerogatives are met. Renewables are key to overcoming energy poverty, providing needed energy services without damaging human health or ecosystems, and enabling a transformation of economies in support of development and industrialisation. IRENA will showcase how it supports countries in Africa achieve a just and inclusive energy transition that promises substantial gains in GDP, employment, and human welfare in each region of the continent.	Open	ACW-AH054
30-Aug	14:00	14:30	Union of Ethiopia Women and Children Association(UEWCA), Farm Africa and SIDA	Strengthening Climate Change Resilient Economic Capacity and Environmental Protection Role of Ethiopian Women through Integrated approaches	1. Background Union of Ethiopian Women and Children Associations (UEWCA) is a nongovernmental; non-political, non-religious consortium of 80 CSOs. It is a consortium of women; children and girls focused CSOs engaged on gender equality and empowerment in all regional states and city administrations of the country. It is established in 2010 as a platform to voice the voice of its members and beneficiaries as well as to capacitate and coordinate the efforts of its member CSOs towards women, girls and children empowerment; and realization of gender equality. To this end UEWCA has been implementing different programs and projects with the support it obtained from different donor organizations. Gender and Climate Change is one of the thematic areas on which it is exerting its effort and contribute for the attainment of building resilient economy and Climate Justice. 2. Project Description The project "Building Climate Change Resilient Economic Capacity and Environmental Protection role of Ethiopian Women through Integrated approach" is carried out from December 2016 to December 2020 in 12 Woredas of Five Region of Ethiopia in partnership with 12 member Organizations. The intervention is executed with the financial (SEK 27,000,000 or 80.6 Million ETB) and technical support obtained from Swedish International Development Agency (Sida)/ Embassy of Sweden in Ethiopia and Farm Africa respectively. Major Project Accomplishments and Results 3.1. Awareness of the Community on the causes of climate change, adaptation and mitigation mechanisms a) Knowledge on the cause and impacts of Climate Change b) knowledge on Climate change manifestations 3.2. Livelihoods Diversification a) Increasing production and productivity	Open	ACW-AH007
31-Aug	9:30	10:00	International Union of Railways (UIC); Ministry of Water and Forests, the Sea and the Environment of Gabon; SETRAG (Société d'exploitation du Transgabonais (SETRAG)	Green Corridors of Gabon: the role of railways in protecting and enhancing biodiversity in Africa	The railway plays a vital role in connecting people, businesses but can also play a role in connecting wildlife. The Trans-Gabon Railway serves as a vital link in the Gabonese economy, with its trains spanning more than a kilometer to carry manganese to Owendo for export. It is built on difficult terrain, with waterlogged embankments causing numerous derailments. In this session, the Minister of Water and Forests, the Sea and the Environment of Gabon and a railway operator will speak to the importance of the Trans-Gabon Railway and the efforts being made to respect nature and its ambition to let the local fauna and flora flourish.	Open	ACW-AH056

31-Aug	10:15	10:45	International Fund for Agricultural Development (IFAD)	Investments in climate resilient infrastructure and value chains: Case for Smallholder farmers	The Adaptation for Smallholder Agriculture Programme (ASAP) channels climate finance to small-scale farmers, empowering them to invest in much-needed climate change adaptation measures. ASAP is a flagship Programme and a multi-donor trust fund managed by the International Fund for Agricultural Development (IFAD). ASAP investments cover over 20 countries in Africa, aiming to increase adaptive capacity and resilience of rural populations. Through the Action Hub, IFAD and partners will showcase innovative and successful gender-sensitive approaches to increase resilience for the rural poor with case studies from Mozambique, Rwanda, and Niger. Success stories and innovations in building resilience against climate shocks along agricultural value chains, sustainable watershed management, efficient water utilization, and climate-proofing infrastructure initiatives will be showcased through videos and short interviews. The event will provide an opportunity to share lessons, identify synergies for collaboration and partnerships to increase climate finance flows to smallholders, and build their resilience against climate risks.	Open	ACW-AH069
31-Aug	14:45	15:15	Rockefeller Foundation; International Centre of Insect Physiology and Ecology; The Food and Agricultural Organization of the United Nations.	Insect farming for a climate-resilient Africa	Africa's population will reach 2.5 billion by 2050 increasing the food and protein demand by 60%. Rapid urbanization in Africa has resulted in accumulation of >125 million tonnes of urban waste every year, but less than 5% of it is recycled, leaving the rest as major sources of green-house gases. Insect farming can effectively recycle this organic waste into rich proteins for food and feed and produce nutrient rich insect frass fertilizers for crop productivity. Insect farming is environmentally sustainable, with very low ecological footprints and water requirements. Insect proteins are an excellent substitute for conventional plant-based proteins such as soybean, which are cultivated in large tracts of arable land, which otherwise could contribute to global food security. Hence, Insect farming has enormous potential towards our goal for a climate-resilient Africa. The event will showcase how this potential is harnessed through public-private partnership under the 17 Rooms Partnership Initiative.	Open	ACW-AH067
31-Aug	15:30	16:00	Ethiopian Institute of Agricultural research; Somali Pastoral Agro-pastoral Research Institute; kebridahar University	Animal impact tool to rehabilitate degraded areas	This is to show how animal impact tool plays a role in rehabilitating degraded areas by improving the soil physico- chemical status (soil structure, soil fertility, water retention and infiltration) and enhance the coming back of the vegetation cover from the existing soil seed bank. This at the end will ameliorate both environmental and livelihood resilience. Moreover, the carbon sequestration in the soil and in the vegetation biomass is worth mentioning to show how vegetation cover contributes to the existing global climate change we are facing now. The species composition and diversity is also to be a point of discussion as far as the pastoral arid and semi-arid areas are concerned. This is a very efficient and effective means that we need to adopt in the tropics as far as rehabilitating of degraded areas and managing of grazing areas of the pastoral communities is concerned.	Open	ACW-AH044
1-Sep	9:15	9:45	Innovea Development Foundation; UNDESA; SEforAll; UN-Energy; UNDP	Scaling Climate Finance Impact for Social Benefits	This session would highlight the various opportunities for financing climate change and sustainable development in a social inclusive approach. Expected to bring experts from development finance; both public and private sector Institutions.	Open	ACW-AH025
1-Sep	10:15	10:45	ONG Plus de SIDA dans les Familles et coalition nationale des organisations féministes pour la génération égalité du Gabon	Place de la femme africaine dans la lutte contre le changement climatique	La femme et la fille africaines dans leurs différentes diversités ont été et continuent d'être touchées de manière disproportionnée. Le changement climatique est un recul important dans la réalisation des objectifs du développement durable. Les 70% des femmes vivant dans le milieu rural sont pauvres. Ces femmes sont les plus liées à la production alimentaire et agricole, sont les mieux informées sur la terre, les ressources en eau et la conservation de la biodiversité. Par conséquent, elles sont les plus vulnérables aux effets du changement climatique en raison de leur dépendance à l'égard des activités de subsistance basées sur la terre, la forêt et les ressources en eau. Elles sont aussi confrontées à la plupart des risques induits par la santé, tels que la santé sexuelle et reproductive, le paludisme, le VIH, les maladies non transmissibles, les catastrophes naturelles, les épidémies, ... en raison du changement climatique. Les femmes et filles africaines sont largement sous-représentées dans les postes de décision sur le climat lors des négociations internationales des Nations Unies à tous les niveaux. Sur 196 chefs de délégation présents lors de la COP de 2019, 80% étaient des hommes soit 155. Reconnaisant que la représentation des femmes dans ces espaces amène les pays à adopter des politiques plus strictes en matière de changement climatique et à développer des approches intergénérationnelles : le leadership politique des femmes et des féministes est donc essentiel à la réalisation des objectifs de gouvernance climatique mondiale et à la mise en place d'une action et d'une justice climatiques significative au sein de cette génération.	Open	ACW-AH017
1-Sep	13:15	13:45	ONG les Acteurs de l'Environnement	Présentation de l'album musical un geste pour la nature. Une approche de sensibilisation par la musique afin de rendre résiliente les communautés.	L'événement se déroulera sous forme de concert live. Notre album comprends 9 titres au total, mais seulement 5 seront chanter car les autres n'ont pas encore été produit. Parmi les titres qui seront chantés, nous aurons: 1. Les espèces intégralement protégées au Gabon 2. Évitez la saleté 3. Une seule terre 4. Les éléphants 5. Protégeons notre environnement.	Open	ACW-AH034
1-Sep	14:00	14:30	AJESH (AJEMALEBU SELF HELP)	Enforcing Community- Led Conservation Leadership around Ebo forest within the Guinean Forest of West Africa Hotspot.	The overall aim of the project is to contribute to the amelioration of land governance and natural resources management across the Yabassi Key Biodiversity Area (YKBA). To achieve this, the project will undertake a key stakeholder analysis within the concerned communities, to underpin their engagement in the management stream and make each, a specific actor in the delivery of project activities. The project will follow a Participatory approach thus allowing communities make contribution in mapping and planning on use of their lands. This will help reinforce the process of community conservation initiatives that will enhance the conservation of the Ebo forest massif specifically and the Yabassi KBA in general.	Open	ACW-AH029
1-Sep	14:45	15:15	Access Partnership; Fair Tech Institute.	The Role of Satellite Communications in Disaster Management: Resilience and Climate Action	As the Intergovernmental Panel on Climate Change (IPCC) showed in its report from August 2021, the immediate effects of global climate change are widespread, rapid, and getting worse. In the context of strengthening the global response to the threat of climate change, policymakers are encouraged to increase investment in physical and social infrastructure as a key enabling condition to enhance the resilience of societies. The event will shed light on the various economic consequences of increasing global natural disasters and present the state of current disaster communication systems in Africa. The adoption of new strategies and technological solutions – as a crucial component of disaster preparedness – would allow the less connected to communicate during emergency situations, ensuring that emergency communications are more accessible for better rescue responses.	Open	ACW-AH048
1-Sep	15:30	16:00	Our Climate	Climate and Water in Africa	The event will address the main challenges of water resources that are related to climate change in Africa. Chances and alternatives for environmental solutions that could be applied in the future would be discussed. Suggestions and real projects as climate action for water sector either for rural areas, industry and agriculture.	Open	ACW-AH040
1-Sep	16:15	16:45	Food and Agriculture Organization of the United Nations (FAO)	Attaining a resilient world through the institutionalization of the Livestock Early Warning System (EWS)	The Livestock EWS combines field forage and livestock body condition monitoring data, remote sensing data, and simulation modeling to produce livestock forage availability and body conditions status of the herd monthly. Livestock body conditions have a direct link to milk and meat availability, good body conditions are associated with improved livestock production while poor condition is the reverse. The livestock body condition has a direct correlation with the household food availability and income hence a key determinant of the food security status of pastoral communities.	Open	ACW-AH057

1-Sep	17:00	17:30	Food and Agriculture Organization of the United Nations (FAO)	One Million Cisterns for the Sahel Initiative	<p>The communities of the Sahel Suffer from a protracted climate crisis with a decreasing availability of water. Lack of infrastructures, salty and inaccessible groundwater in some areas add to the difficulties. The ambition of 'One Million Cisterns for the Sahel' Initiative is to promote and facilitate the introduction of rainwater harvesting and storage systems for vulnerable communities, especially women.</p> <p>The objective is to enable millions of people in the Ssahel access to water, have a surplus to enhance their family agricultural production and domestic use , improve their food and nutrition security and srengthen their resilience.</p> <p>The initiative promotes an integrated approach and is currently in 8 countries of West Africa/Sahel: Burkina Faso, Chad, Gambia, Bissau Guinea, Mali, Niger, Senegal and Togo.</p> <p>This space will highlight the approach description, results, impacts and success points of the initiative.</p>	Open	ACW-AH065
-------	-------	-------	---	---	---	------	-----------
