

Facilitated E-learning Course on **Climate Transparency** and the **Enhanced Transparency Framework**

ABOUT THE COURSE

This course aims to support developing countries to boost national capacity to implement the Enhanced Transparency Framework (ETF) under the Paris Agreement. In particular, this course will help countries to assess and develop mitigation policies, in a way that will advance domestic and international climate objectives and enable the realization of national priorities and Sustainable Development Goals.

TARGET AUDIENCE

Applicants from Anglophone and Lusophone African countries, who have an advanced level of English and that are either:

- 1 Senior government officials** working in ministries/national bodies relevant to national climate change actions, with some responsibility in supporting policy development.
- 2 Technical practitioners** working in the domain of climate reporting, data collection, and climate action transparency.

**April – June 2025
(7 weeks)**

Online

English

**Free of charge.
The fee is covered
by ICAT**

COURSE OBJECTIVES

Participants who complete this course will get:

- Insights and strategies for how to implement the ETF in a way that advances both domestic and international priorities;
- An enhanced understanding of the data needs and methods for assessing and reporting on mitigation actions, to facilitate the development of effective climate policies for the design, implementation and tracking of NDCs;
- An overview of where to access good practice guidance, knowledge resources, methodologies, guide and tools related to climate transparency; and
- Background to facilitate the development of effective national transparency frameworks and institutional arrangements, which support the mobilization of resources and support for the implementation of the ETF.

The deadline for registration is the 3rd of March 2025. Click [here](#) for more information on the registration process.
