## *Why Open Space?*

Over the past two days, we have:

- Reflected on ACE implementation
- Explored visions for ACE in 2031 and beyond
- Reviewed existing activities
- Discussed potential new elements

Now it's your turn.

***You are invited to propose Activities, Deliverables, Ideas that could inspire thinking around potential elements for a new action plan***

## Four simple principles

- Whoever comes are the right people
- Whenever it starts is the right time
- Whatever happens is the only thing that could have happened
- When it is over, it is over

## The Law of Two Feet

- If at any point you feel that you are neither contributing to nor benefiting from a conversation, you are encouraged to move to another discussion.
- You do not need permission to do so.
- In fact, your responsibility is to use your time where you can learn the most or contribute the most.

## Two Helpful Roles

### Bumblebees

- Move between group
- Share ideas
- Connect conversations

### Butterflies

- Reflect
- Observe
- Create space for unexpected conversations
- Both are valuable

# OPEN SPACE TECHNOLOGY

---

Possible new activities: Group work

**United Nations**  
Climate Change Secretariat

## Objective:

- Collective reflection on potential elements for a new action plan under the Glasgow work programme on ACE, with the aim of developing an improved understanding of what constitutes an effective, impactful, and implementable activity and deliverable.

## Guiding questions:

- *Based on the potential new activities presented, are there any gaps or missing elements? What should be added or strengthened?*
- *What are the intended outcomes of the proposed activities, and which deliverables would best support their achievement?*

## Template:

- Fill this out for each session – include activity, deliverable, who
- Indicate if you would like a second session - we will vote on that

*Share your  
input online*
