FIJI WOMEN DEFENDERS OF THE COMMONS

"For over 10 years, I have been fighting on my own on the extraction of sand from the Sigatoka sand dunes. I have even been ridiculed for my activism. We do not have a reef to protect us. If there ever was a tsunami we will not survive if we continue to extract the dunes. There is a purpose for the sand dunes, it protects us and keeps us safe.

We must value and protect nature, there is a reason why its there. Money cannot replace lives. I will continue this fight empowered with other defenders, to protect the commons".
