

## Agenda item 3.2.

Paragraph 6 of the annotated agenda

# A6.4-AMM-001: Flaring or use of landfill gas

**Methodological Expert Panel – 13<sup>th</sup> meeting**

13 to 17 April 2026

Bonn, Germany

## Background

---

- AMM-001: specific footnotes were included to indicate that the methodology would be revised to include the calculation of baseline emissions and project emissions from electricity generated and consumed once the revision of ACM0002, AMS-I.D. and the “Methodological Tool: Emission factor for an electricity system” is concluded and the respective standard(s) are adopted by the Supervisory Body;
- SBM020: adopted the “Methodological tool: Emissions from electricity generation and consumption” (A6.4-AMT-007)

## Background and next steps

---

- MEP013: initiate the work to revise the methodology to cover the requirements of the electricity emissions tool and to address other issues (mainly to align with the style guide);
- MEP014: consider the revision and publish the draft revised methodology for call for public inputs;
