

## Template for non-Party stakeholders' inputs for the Talanoa Dialogue

### Question 2 – How do we get there?

*The World Farmers' Organisation (WFO) is a farmers' organisation which represents approximately 1.5 billion farmers from 54 countries all over the world<sup>1</sup>. It brings together national farmers' organisations and agricultural cooperatives from all over the world to strengthen and represent the voice of agricultural producers.*

*The WFO is committed to supporting the implementation of the Paris Agreement and we therefore appreciate the COP presidency's leadership on the Talanoa Dialogue as a critical step to take stock of progress towards long-term goals.*

#### **2. Where do we want to go?**

*Vision of the future for your organization and/or sector in terms of its possible role in achieving the 1.5/2 degrees' goal and a net-zero emission world by this mid-century [Maximum 300 words]*

*WFO's vision is for a new ambitious paradigm on agriculture and climate change, one that applies an authentic bottom up approach which puts farmers at the centre of the decision-making process at local, national and international levels.*

*Possible and potential new commitments and pledges of to achieve the 1.5/2 degrees' goal and a net-zero emission world by this mid-century [Maximum 300 words]*

*This farmers' driven climate change agenda will lead to*

- *the implementation of practical solutions identified by farmers and their partners as contributing to climate change mitigation and adaptation. Solutions will be science-based, measurable and site specific. This ambitious new approach will strongly support Parties in developing and delivering their Nationally Determined Contributions, and the Action Agenda;*
- *establishment of a global Climate Change Agricultural Alliance in partnership with other farmers' organisations, science and research, multi-lateral agencies, funders, civil society and the private sector;*
- *reporting on progress.*

*Foreseen positive impact of these commitments once they are realized, including contributions to the sustainable development agenda [Maximum 300 words]*

*A transformed agricultural sector producing food, fuel, fodder and fibre with lower emissions and greater resilience and delivering on many sustainable development goals including but not restricted to No Poverty (1), Zero Hunger (2), Gender Equality (5), Life on Land (12) and Climate Action (13).*
