

Statement by Grenada

1 September 2025

Grenada echo's the sentiments of those already expressed to the Government of Ethiopia, the Secretariate & Facilitators ... Grenada as a Small Island Developing State emphasizes that a just transition must address the specific vulnerabilities of SIDS, ensuring that climate finance is accessible, grant-based, and supports adaptation and social well-being alongside emissions reduction.

Just transition must be inclusive of topics such as fair burden-sharing, worker support, even community empowerment. Crucial to these is the role of finance and capacity-building for SIDS, to navigate the transition, secure resilience, and to avoid being left behind against the backdrop of our existing national development realities.
