

# **Objectives**

- Examine how infrastructure conditions vary across countries in Asia
- Update ADB estimates of infrastructure investment needs for developing Asia over 2016-2030
- Discuss policy actions for meeting infrastructure investment needs

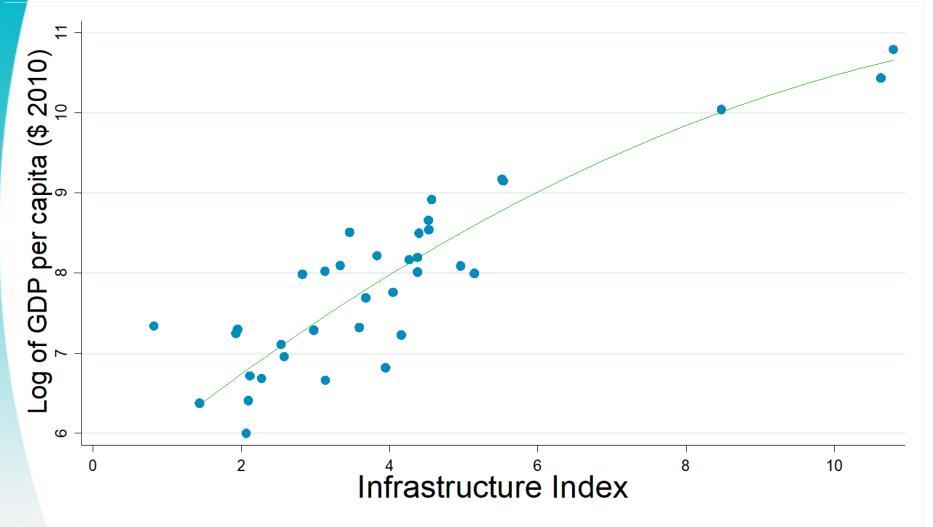

### Key messages

- Developing Asia needs \$26 trillion (in 2015 prices), or \$1.7 trillion per year, for infrastructure investment in 2016-2030
- Without climate change mitigation and adaptation, the needs are \$22.5 trillion, or \$1.5 trillion per year
- These are more than double ADB 2009 estimates
- The infrastructure investment gap varies across countries
  - For 25 countries in 2016-2020, the gap is 2.4% of projected GDP; excluding PRC, this gap rises to 5% of projected GDP.
- Both public and private sectors must increase infrastructure finance—reforms are key

### Infrastructure associated with development

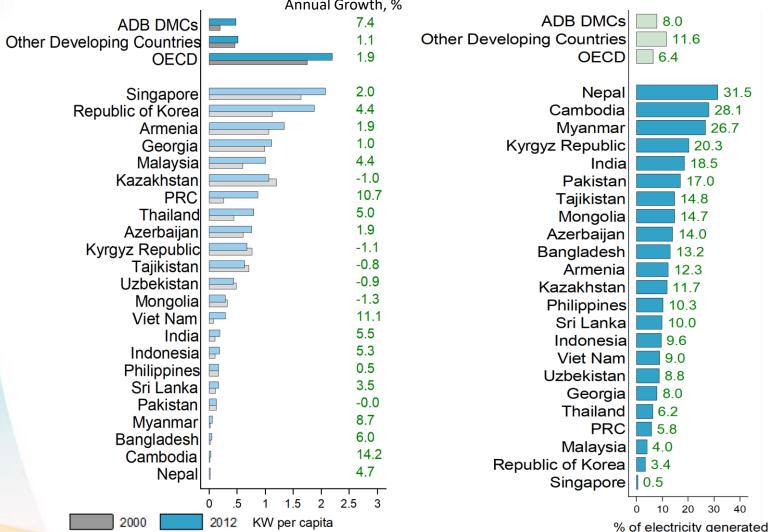

Note: Infrastructure index is computed based on first principal component of infrastructure stocks in roads, airport, electricity, telephone, mobile, broadband, water and sanitation. Higher values represent greater infrastructure availability.

Source: ADB estimates based on data from World Development Indicators, World Bank.

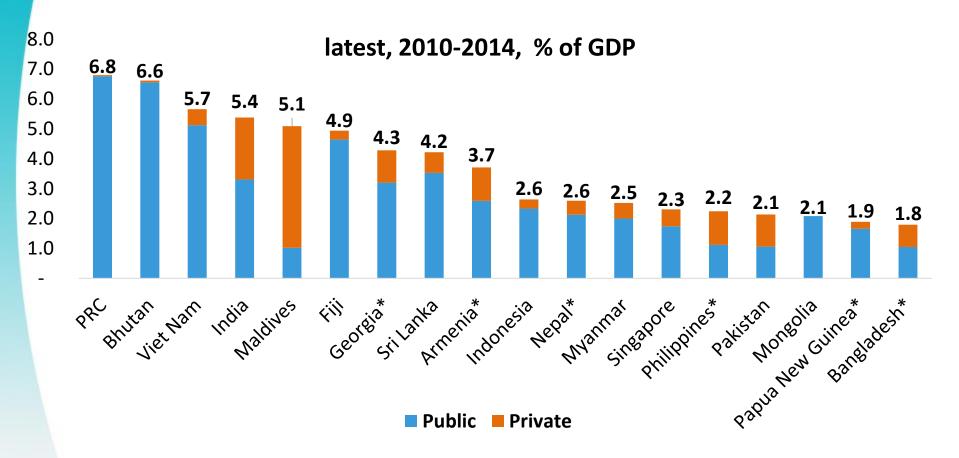

#### More and better infrastructure is needed

# Infrastructure investment varies across countries

GDP = gross domestic product; PRC = People's Republic of China.

Note: Based on BUDGET + PPI measure. Actual budget investments except Armenia, Bhutan, Georgia, Maldives, Myanmar, and Thailand, which are planned or estimated budget investments.

Sources: Country sources for public sector investments; Private Participation in Infrastructure Database, World Bank;

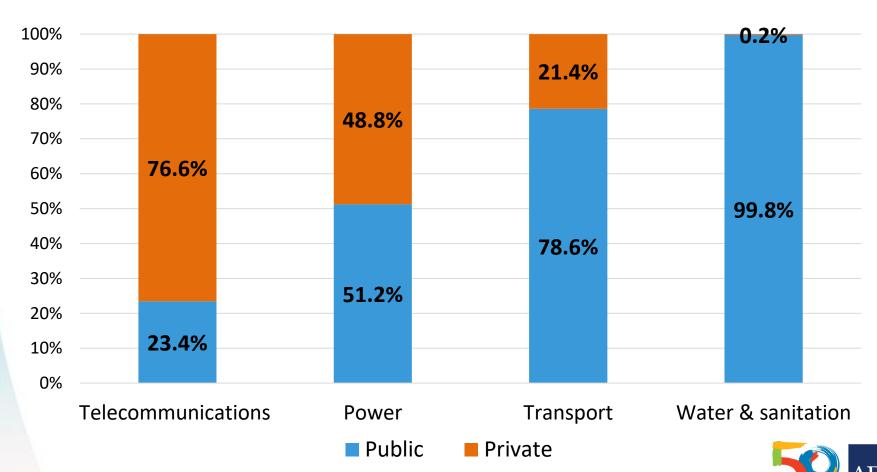

World Bank (2015); World Development Indicators, World Bank; ADB estimates.

<sup>\*</sup> Public sector includes central government budget only.

# Telecom and power more attractive to private finance

Public/Private share of infrastructure investment, 2011

## Assessing infrastructure needs

- Baseline estimates: Based on relationship between each type of infrastructure and economic/demographic factors
- Climate-adjusted estimates: Add climate mitigation and proofing costs
  - Climate mitigation to meet 2°C global climate goal
  - Climate proofing: ADB experience or existing studies

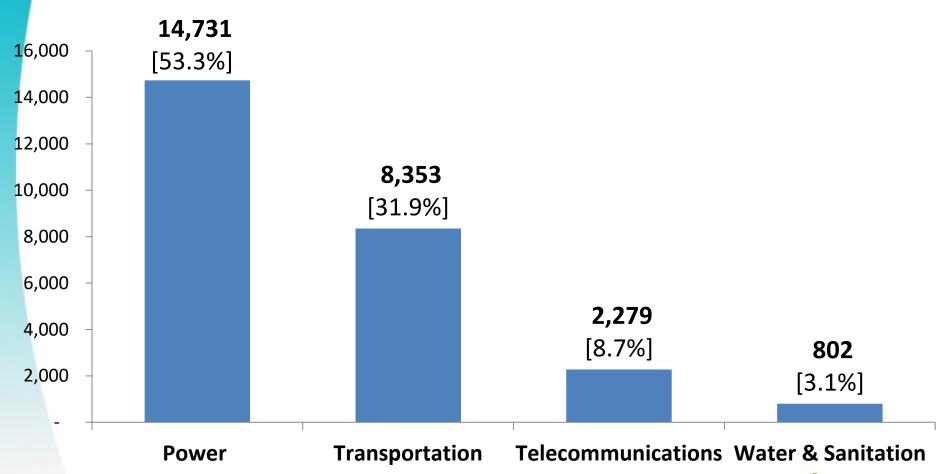

# Infrastructure investment needs, 2016–2030 (\$ billion in 2015 prices)

	Baseline		Climate adjusted	
	Total	% of GDP	Total	% of GDP
Central Asia	492	6.8	565	7.8
East Asia	13,781	4.5	16,062	5.2
South Asia	5,477	7.6	6,347	8.8
Southeast Asia	2,759	5	3,147	5.7
The Pacific	42	8.2	46	9.1
Asia and the Pacific	22,551	5.1	26,166	5.9
Annual Average	1,503		1,744	

# Infrastructure investment needs by sector, 2016–2030 (\$ billion in 2015 prices)

Note: Figure s inside the brackets are percentage shares of total. Source: ADB estimates.

### How big are infrastructure investment gaps?

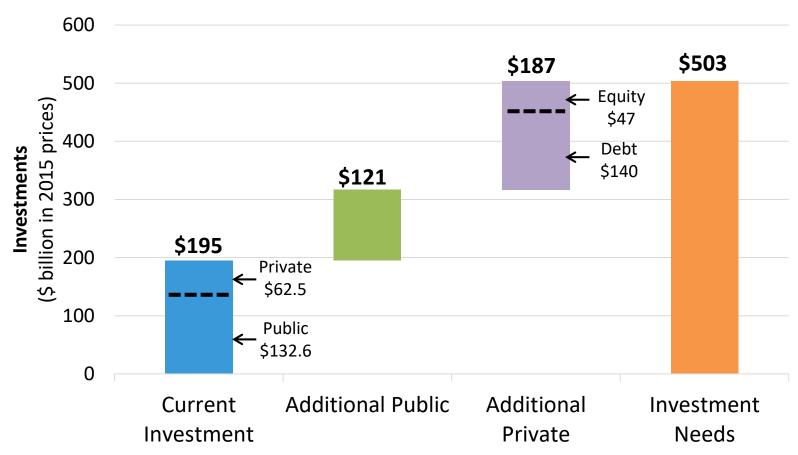

Infrastructure investments and gaps, 2016–2020 (\$ billion in 2015 prices)

	Estimated	Climate adjusted		
	current investment (2015)	Annual needs	Gap	Gap as % of GDP
Total	881	1,340	459	2.4
Total without PRC	195	503	308	5.0
PRC	686	837	151	1.2

## Bridging the gap

Infrastructure investment by financing source, <u>excluding PRC</u>,\* 2016–2020, (annual average, \$ billion in 2015 prices)

<sup>\* 25</sup> countries minus the PRC

Note: Numbers may not add up to total due to rounding.

Source: ADB estimates based on data from country budget documents, NAS data from national statistic offices, IMF Investment and Capital Stock Dataset, Asian Development Bank Key Indicators 2016, World Bank World Development Indicators, World Bank Private Participation in Infrastructure Database.

### Policies to close the gap

- Fiscal reforms
  - Tax reforms
  - Spending reorientation
  - Prudent borrowing
  - Nontax revenues
- Promoting private participation
  - Create conducive investment climate
  - Make greater use of pubic-private partnerships (PPPs)
  - Deepen capital markets
- Better planning, design and execution

#### Role for MDBs

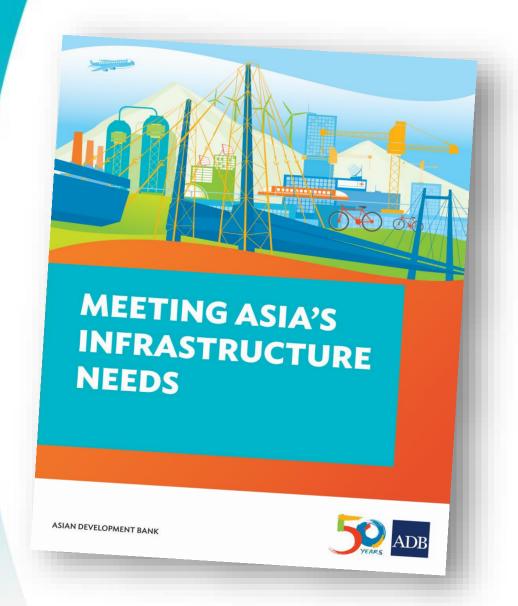

- MDB infrastructure financing in Asia is 2.5% of current investment
  - Without PRC and India: MDB share > 10%
- MDB finance for infrastructure will rise. For ADB
  - Scale up annual loan and grant approvals from \$17.5 billion in 2016 to more than \$20 billion by 2020
  - Growing share for the private sector
- Blending finance with expertise and knowledge, support policy reform, promoting regional cooperation

### Key messages

- Developing Asia needs \$26 trillion (in 2015 prices), or \$1.7 trillion per year, for infrastructure investment in 2016-2030
- Without climate change mitigation and adaptation, the needs are \$22.5 trillion, or \$1.5 trillion per year
- These are more than double ADB 2009 estimates
- The infrastructure infrastructure gap varies across countries
  - For 25 countries in 2016-2020, the gap is 2.4% of projected GDP; excluding PRC, this gap rises to 5% of projected GDP.
- Both public and private sectors must increase infrastructure finance—reforms are key
