# NDC relevant capacity building initiatives in Bonn

By UNU-EHS, University of Bonn and UNFCCC, and other partners

-- Bringing together students from all over the world --

- UNU-EHS – University of Bonn **Joint Master Course “The Geography of Environmental Risks and Human Security”** – since 2013, 25 students p.a., joint degree from UNU and University of Bonn
- UNU-EHS – UNFCCC **“Early Career Fellowship Programme”** – since 2018, 12 mostly female fellows from LDCs (855 applications!), sharing their time between UNU-EHS and UNFCCC
- UNU-EHS – University of the Free State – University of Bonn – **PhD block course on vulnerability and risk**, since 2012 (and before in other formats), in South Africa and Germany, around 40 participants
- UNU-EHS – MunichRe Foundation - UNFCCC – **Summer Academy “World Risk and Adaptation Futures”**, since 2018, 20 participants p.a.
- UNU-EHS – University of Bonn, since 2016, cooperation with **Pan African University** (PAUWES, Tlemcen/Algeria)
- Diverse project related capacity building activities

# Assets...

- **Numerous ideas / activities** for capacity building are around in the academic space (not only in Bonn!)
- UNFCCC provides **portals** on capacity building, showing what is **offered**, and NDCs, showing what is **needed**

## ...and room(s) for improvement

The above elements should be extended and brought together

- **More systematic entries** UNFCCC portal on capacity building (e.g. Germany has more than Bonn!)
- **Supplement the portal on capacity building by country-relevant needs**, extracted e.g. from NDC portal (universities are not always aware where their degree course and project-related might be of direct relevance!)
- Seek opportunity for **medium- and long cooperation with academic sector** (a stable partner)
