Experience and Lessons Learned from existing MRV

- The existing MRV system and the ICA process serve as the basis to transit to ETF
 - ✓ Existing MRV and ETF are not fundamentally different
 - ✓ Domestic system already established need to be further enhanced
 - ✓ The ICA process strengthens the rigor of the domestic system.
- The ICA process has a strong capacity building element built in the process
 - It helps to identify and prioritize capacity building needs by Parties
 - ✓ It helps with better targeting of financial support, technology transfer, and capacity building activities
 - ✓ Technical analysis of BURs represents a one-to-one capacity building opportunity
- The ICA process (BUR analysis and facilitative sharing of views) facilitates mutual learning
