SECTION 3: YOUR COMMUNICATION	
Title/Subject <i>Maximum 250 characters</i>	Exemption on the Timing of Consultation rule for the Local Stakeholder consultation for projects that had it's start date prior to the entry into force of the Article 6.4 activity standard for projects
Communication Text <i>Include background, details, and conclusion</i>	Dear Chair and Members of the Article 6.4 Supervisory Body, We submit this communication in our capacity as consultants/activity participants to the projects identified in this communication. We respectfully request the Supervisory Body to consider, on a case-by-case basis, an exemption under Appendix 2, paragraph 5 of A6.4-STAN-AC-002 in relation to the timing of the local stakeholder consultation ("LSC"). Basis for the request Appendix 2, paragraph 4, requires the LSC to be completed at the time required by Host Party rules, where such rules exist. Where they do not, the LSC must be completed before the earlier of (a) the project start date or (b) submission of the PDD to a designated operational entity ("DOE") for validation. Paragraph 5 allows projects that do not meet this timing requirement to request an exemption on a case-by-case basis. Version 01.0 of A6.4-STAN-AC-002 was initially adopted on 2 November 2023. All projects in this communication have an actual or planned start date before that date. It is therefore no longer possible for those projects to comply retrospectively with paragraph 4(a). To the best of our knowledge, no specific Host Party rules governing the timing of the Article 6.4 LSC apply to these projects. Proposed approach We are not requesting an exemption from conducting the LSC. We propose only that the historical timing requirement under paragraph 4(a) be exempted and that each project complete its LSC before submission of the respective PDD to a DOE for validation. All substantive LSC requirements and applicable Sustainable Development Tool requirements would remain fully applicable. This would preserve meaningful stakeholder participation: comments can still be considered in the PDD, any relevant changes can be reflected before validation, and the DOE can assess the consultation as part of the validation process. Request to the Supervisory Body 1. Grant an exemption from paragraph 4(a) for each qualifying project whose start date occurred before 2 November 2023.

	2. Confirm that the LSC may be completed after the historical start date, provided that it is fully completed before submission of the PDD to a DOE for validation. The relevant prior consideration notifications and start dates are provided in this communication. Yours sincerely, Nuno Barbosa UniCarbo Energia e Biogás Ltda Consultant/Activity Participants to the projects identified in this communication All projects below have an actual or planned start date before 2 November 2023.
