Nepal Climate Information Integrity Initiative

Climate Information Integrity: The Issue

During discussions, we identified following issues:

- Limited access of climate information
- Complex scientific language
- Lack of localization and contextual relevance
- Insufficient translation and communication formats

What we are doing?

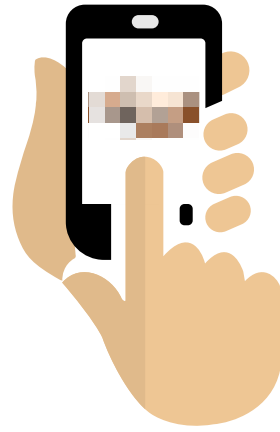

Among other activities, we are

Training climate journalists to produce evidence-based reporting and **fellowship** to field-reporting

Fact-checking climate misinformation and **explainers** on identified misinformation topics in Nepali

Data Journalism & Fact-Checking for Climate Reporting

नेपाल: तथ्यजाँच
.....
NepalFactCheck.org

6 Climate fact-checks
8 Climate explainers

in Nepali

Ensuring that credible, Nepali-language climate content exists online is important because visibility in search and digital platforms determines what people know, (mis)understand or act upon.
