

ACW 2022 - List of Climate Week Events (version 5 as of 29/08/2022)
29 August - 02 September

AFRICA

Date	Start time	End time	Room	Organizer(s)	Title	Description	Event type	Code	Links
29-Aug	9:45	10:45	Libreville - Mezzanine	Host country; UN Climate Change; Partners	ACW Official Opening	Opening remarks from high-level dignitaries and a welcome message from the host government of Gabon	Open	ACW-Open	French: https://youtu.be/EnkvK5QduJ0 Floor language: https://youtu.be/Adp1-euDe English: https://youtu.be/X327owW16NE
29-Aug	9:00	18:00	Akanda- Big tent	UNFCCC	Striving for 1.5oC Lounge	The Striving for 1.5 Degrees lounge is the space in the Thematic Network Hub (Akanda Tent) dedicated for discussion of mitigation topics such as net-zero emissions, energy transition, new and existing policy, market-based approaches, and more.	Open	ACW-NH01	Not available
29-Aug	9:00	18:00	Akanda- Big tent	UNFCCC	Scaling Adaptation Lounge	The Scaling Adaptation lounge is the space in the Thematic Network Hub (Akanda Tent) dedicated for discussion of adaptation topics such vulnerability, resilience, access to water, food and energy, nature based solutions, indigenous practices and rights, and more.	Open	ACW-NH02	Not available
29-Aug	9:00	18:00	Akanda- Big tent	UNFCCC	Enabling Implementation Lounge	The Enabling Implementation lounge is the space in the Thematic Network Hub (Akanda Tent) dedicated for discussion of capacity building, climate finance, technology needs, and more.	Open	ACW-NH03	Not available
29-Aug	9:00	18:00	Akanda- Big tent	UNFCCC	Increasing Transparency Lounge	The Increasing Transparency lounge is the space in the Thematic Network Hub (Akanda Tent) dedicated for discussion of biennial reviews, gender equality, national contributions, GHG inventories, capacity needs, and more.	Open	ACW-NH04	Not available
29-Aug	9:00	18:00	Eben - 8th floor	UNFCCC Transparency Division	Technical analysis of biennial update reports submitted by Parties not included in Annex I to the Convention	Technical analysis of biennial update reports submitted by Eritrea, Morocco and Rwanda by a team of technical experts. It is aimed at increasing the transparency of mitigation actions and their effects. It will also involve a virtual consultation with the Parties being analyzed	Closed	ACW-AE003-1	Not available
29-Aug	11:30	12:40	Libreville - Mezzanine	UNFCCC and HC	Ministerial Roundtable on Finance (panel 1)	Main Programme	Open	ACW-HLmin1.1	https://www.youtube.com/playlist?list=PLBcZ72cUjY9RKNjVYqGc41Yx0ik3d1Rnk
29-Aug	11:30	12:30	La Terre - Tent	Global Green Growth Institute	Towards a greener building sector	Ggpi to present the ongoing initiative on green building and energy efficiency in cote d ivoire > Develop a Green Building minimum compliance system for the country, > Develop a national financial vehicle to increase private sector investment in green building and infrastructure. > And finally, elaboration of the green city strategy for Abidjan district.	Open	ACW-SE196	https://teams.microsoft.com/j/teams/j933ameeting_9W61N20hT1y4y4003131YVQV2hJG5V485Tg2k40thread_v2/0?context=%7b%22id%22%3a%22a6c42a6-4f33-b686-f78ff5822208%22%2c%220id%22%3a%22e16c72af-31ba-4049-5807-609e4a24c206%22%7d
29-Aug	12:00	13:00	L'eau - Tent	WRI Africa; UNECA (to be confirmed); FSD Africa (tbc)	Accelerating financial flows for nature-based solutions for adaptation	Although investments for NBS for adaptation have been gaining traction at a global level, more work is needed to inspire and scale up NBS adoption in Sub-Saharan Africa. In addition to being one of the most vulnerable regions to climate change, Sub-Saharan Africa's infrastructure deficit is estimated to reach \$350 billion by 2040. Despite initial progress on increasing finance for NBS in Sub-Saharan Africa, adaptation finance is still scaling too slowly to narrow the gap while the costs of climate impact rise. This event will examine the current trends in financing NBS for adaptation on the continent. It will highlight investments and alliances that are overcoming the challenges of investing in NBS for adaptation – and what more needs to be done to leverage its potential. The event will bring together perspectives from critical actors, including the private sector.	Open	ACW-SE174	https://teams.microsoft.com/j/teams/j933ameeting_21CwT1Uy8MjMg5N5002V31TcxNWMHmMzUy84z72MfZk40thread_v2/0?context=%7b%22id%22%3a%22a6c42a6-4f33-b686-f78ff5822208%22%2c%220id%22%3a%22e16c72af-31ba-4049-5807-609e4a24c206%22%7d
29-Aug	12:00	13:00	Le Vent - Tent	CGLU Afrique	Vers le renforcement du cadre opérationnel de l'initiative BCURP	Ce Side Event, sera structuré autour de trois thèmes à savoir : L'état d'avancement de l'initiative et l'identification des leviers pour renforcer l'engagement des partenaires ; Quel cadre de gouvernance pour améliorer l'opérationnalisation de l'initiative BCURP ; Quel cadre de partenariat pour structurer les synergies avec les autres initiatives climatiques.	Open	ACW-SE208	https://teams.microsoft.com/j/teams/j933ameeting_AmN7F4YmCqZT1V2500Tg1Th7WmMzDQhMf8Mv4TTE1640thread_v2/0?context=%7b%22id%22%3a%22a6c42a6-4f33-b686-f78ff5822208%22%2c%220id%22%3a%22e16c72af-31ba-4049-5807-609e4a24c206%22%7d
29-Aug	12:45	13:45	La Terre - Tent	UNDP GABON ; YOUTHCONNECT GABON	Regards croisés - artistiques & politiques - sur la crise climatique et le rôle de la jeunesse dans l'adaptation au changement climatique.	Crossed views - artistic & political - on the climate crisis and the role of youth in the fight & adaptation to climate change : A round table composed of a government official, a conscious artist and two young leaders around the importance of youth representation in climate governance and how they can participate and influence discussions on climate action. This event will be accompanied by a series of poignant photographs on the impact of climate change on people in the South.	Open	ACW-SE213	https://teams.microsoft.com/j/teams/j933ameeting_WkVfT0T1E1Mf8Qc00D2u1W60V2U1N7HfMT4MAMvBMT3h640thread_v2/0?context=%7b%22id%22%3a%22a6c42a6-4f33-b686-f78ff5822208%22%2c%220id%22%3a%22e16c72af-31ba-4049-5807-609e4a24c206%22%7d
29-Aug	12:45	13:45	Franceville - Ground Floor	The Mary Robinson Centre for Climate Justice, Glasgow Caledonian University; FEMNET; Life Concerns Malawi; Mzuzu University Malawi; Pan-African Climate Justice Alliance	Climate Just Solutions to Tackling Emergent GBV and Mental Health Crisis Due to Climate Change	The links between climate change, gender based violence & mental health are profound and deep. There is no doubt that women's health and well-being is being affected by climate change and extreme weather events; these impacts are compounded by existing structural socio-economic inequalities. There is currently little research that explores the inter-relationship between climate change, mental health and gender-based violence in developing countries and in determining what is required to help build resilience of people. This event will be a far reaching a deep conversation on justice, equity, human rights to decent quality of life and building resilience. It will be used to i) share new breakthroughs in terms of providing new evidence of the increasing incidence of GBV and mental health of women and ii) will allow for rich discussion in a panel of 'potential solutions' for the provision of recovery & resilience support services required by women.	Open	ACW-SE051	https://teams.microsoft.com/j/teams/j933ameeting_WkVfT0T1E1Mf8Qc00D2u1W60V2U1N7HfMT4MAMvBMT3h640thread_v2/0?context=%7b%22id%22%3a%22a6c42a6-4f33-b686-f78ff5822208%22%2c%220id%22%3a%22e16c72af-31ba-4049-5807-609e4a24c206%22%7d
29-Aug	12:45	13:45	Libreville - Mezzanine	UNFCCC and HC	Ministerial Roundtable on Finance (panel 2)	Main Programme	Open	ACW-HLmin1.2	https://www.youtube.com/playlist?list=PLBcZ72cUjY9RKNjVYqGc41Yx0ik3d1Rnk
29-Aug	13:15	14:15	L'eau - Tent	Blue Forest	Coastal resilience through mangrove restoration	There are 38 countries in Africa that live along the coast. Most of them are blessed with mangrove forests. Yet those same forests are being rapidly degraded due to commercial and industrial activities. Thanks to the rise of carbon markets, those forests now hold huge potential. They can help protect coastlines and make communities more resilient against climate change. They can also generate revenues which can be used to improve livelihoods. This workshop will outline the 4-step process for local communities to leverage their mangrove forests to improve the lives of their communities and make them more climate resilient.	Open	ACW-SE190	https://teams.microsoft.com/j/teams/j933ameeting_1NDEkMmNk40thread_v2/0?context=%7b%22id%22%3a%22a6c42a6-4f33-b686-f78ff5822208%22%2c%220id%22%3a%22e16c72af-31ba-4049-5807-609e4a24c206%22%7d
29-Aug	14:00	14:30	Akanda- Big tent	University of Ilorin, Ilorin, Nigeria (UNILORIN); The Ohio State University, Columbus, USA (OSU); and International Institute for Tropical Agriculture (IITA).	Building Women's Resilience to Climate Shocks through Stress Tolerant Maize in Africa: Constraints and Prospects	To promote sustainable economic development, there is a need to pay more attention to solutions to environmental and climate risks through inclusive innovation technologies that are gender-sensitive, growth and resilience oriented. In view of this a USAID-funded project under Advancing Local Leadership, Innovation and Networks (ALL-IN) Research Programme with the collaboration of International Institute for Tropical Agriculture is addressing the power of advanced agricultural innovation technologies, such as Stress Tolerant Maize varieties (STM), in building the economic resilience of smallholder farmers. This action hubs showcases some of the documentaries from the field experiences, revealing the constraints and the potentials of the STM technology in improving the resilience of the rural smallholder farmers. Special attention is given to female farmers and a gender-disaggregated experimental subjects of random controlled trials were conceptualized and implemented to reveal the social, cultural and economic norms of the Africa economy.	Open	ACW-AH064	https://teams.microsoft.com/j/teams/j933ameeting_YTBjOGM2ODU2Y24Z00YzRiLWEXNWMzTjKjNjA2YkYkVWQ1%40thread_v2/0?context=%7b%22id%22%3a%22a6c42a6-4f33-b686-f78ff5822208%22%2c%220id%22%3a%22e16c72af-31ba-4049-5807-609e4a24c206%22%7d

29-Aug	14:00	15:00	Le Soleil - Ground floor	Center for Development Research ZEF, Bonn University; Council for Scientific and Industrial Research (CSIR), South Africa	Transformative climate adaptation, land use, and human health in Africa, a NEXUS approach	Improper land use is one of the key contributors to climate change. On the other hand, a total shift in land use is a consequence of transformative adaptation measures for climate change. Human health, another tenet of this link, is instantly harmed. Understanding this node is a key factor in adopting long-term adaptation and resilience strategies for better human health and well-being. In Africa, climate adaptation plans and land planning are more random and misdirected in vulnerable communities, although they are mostly done to seek immediate, short-term benefits. This is accompanied by concurrent effects that have a variety of negative or positive implications for human health. Direct and indirect effects on human health are likely under various climate and land-use scenarios. Therefore, it is necessary to evaluate synergies and trade-offs between various climate measures in terms of land use from one perspective and the effect on human health from another perspective. At this event, a NEXUS approach to understanding the relationship between transformative climate adaptation, land use, and human health in Africa will be discussed.	Open	ACW-SE167	https://teams.microsoft.com/j/9933a6e0-3100-4211-9000-000000000000?context=927069272646226345&22a6c12ad-406a-4f33-b686&7f8f5822208b229c29c220d6e2263a6227568867-70eb-4d77-b385-b0554ac39e4b27676
29-Aug	14:00	15:00	Planète Résiliente - Outside tents	High-Level Champions; 2XCollaborative; UN Climate Change; Gender Smart Investing; She Leads Climate Action;	Gender Considerations in Climate Investment	The climate crisis is not "gender neutral". Women and girls experience the greatest impacts of climate change, which amplifies existing gender inequalities and poses unique threats to their livelihoods, health, and safety. Yet there is not much traction around mobilising resources towards gender adaptation and resilience building. A gender perspective needs to be taken into account when developing resource mobilization strategies, applying climate finance instruments, and ensuring equal participation in the deployment of financial resources, particularly at the local level. The aim of the session is to put gender considerations front and centre in investment in climate action by unlocking the potential of applying a gender lens to climate finance and vice versa. Integrating these two investment agendas is a powerful lever for amplifying both impacts and returns, thus supporting the case for their widespread adoption in the financial mainstream and driving positive outcomes for women and the world.	Open	ACW-AE014	https://teams.microsoft.com/j/9933a6e0-3100-4211-9000-000000000000?context=927069272646226345&22a6c12ad-406a-4f33-b686&7f8f5822208b229c29c220d6e2263a6227568867-70eb-4d77-b385-b0554ac39e4b27676
29-Aug	14:00	15:00	La Terre - Tent	UNFCCC (RCC Dubai, Kampala, Lomé / AGYLE); Fundación Avina; IDRC; UN University	Capacity Building for Youth Climate Action and Entrepreneurial Leadership in Africa	This is the second session of an event series (LACCW, ACW, COP27) that aims to provide a platform for youth and youth-related stakeholders to share recommendations and views on capacity building efforts to enhance youth leadership in climate action. By so doing, taking the pulse for youth capacity, exploring challenges and showcase solutions across Africa and Latin America. Focusing on the role played by young leaders through research, training and green innovation. This session will present a stock on youth leadership in Africa. It will consist of a series of short presentations on good practices and approaches across the region related to building capacities for engaging youth in green entrepreneurship and climate processes at the national and local level – both as capacity builders and recipients. Followed by a discussion on how to better support actions required to strengthen youth leadership.	Open	ACW-SE102	https://teams.microsoft.com/j/9933a6e0-3100-4211-9000-000000000000?context=927069272646226345&22a6c12ad-406a-4f33-b686&7f8f5822208b229c29c220d6e2263a6227568867-70eb-4d77-b385-b0554ac39e4b27676
29-Aug	14:00	18:00	Franceville - Ground Floor	UN Climate Technology Centre and Network, UNEP	CTCN NDE REGIONAL FORUM FOR AFRICA	The main objectives of CTCN NDE Regional Forum for Africa 2022 is to engage and empower stakeholders to drive climate action across countries, communities, and economies. Working together opens opportunity to advance climate action, address social inequalities and invest in development that is good for humanity and nature.	Open	ACW-AE034-1	https://teams.microsoft.com/j/9933a6e0-3100-4211-9000-000000000000?context=927069272646226345&22a6c12ad-406a-4f33-b686&7f8f5822208b229c29c220d6e2263a6227568867-70eb-4d77-b385-b0554ac39e4b27676
29-Aug	14:30	15:30	Le Vent - Tent	GIZ	Climate economy modelling to inform policymaking	Macro-economic models are widely used tools to inform policy making by simulating the impacts of specific policy measures on the economy. However, the integration of climate change into economic models in planning by Ministries, Government Departments and Agencies (MDAs) has not received enough attention. To ensure coherent planning and strategic decision making, it is necessary to include the effects of climate change and the impacts of specific climate policies on the economy into modelling frameworks. Experiences from finance, planning or environment Ministries on integrating climate change into macro-economic models for political planning from Nigeria, Rwanda and Uganda will be shared. Additionally, the challenges and experiences of effective dialogue between science and policy will be discussed with members of the international Climate Economy Energy Modelling Network ("CIEEN").	Open	ACW-SE107	https://teams.microsoft.com/j/9933a6e0-3100-4211-9000-000000000000?context=927069272646226345&22a6c12ad-406a-4f33-b686&7f8f5822208b229c29c220d6e2263a6227568867-70eb-4d77-b385-b0554ac39e4b27676
29-Aug	14:30	15:30	L'eau - Tent	UNDP - United Nations Development Programme	Accelerating and scaling up climate action through National Climate Funds	Tackling the complex challenges exacerbated by climate change requires significant financial resources, innovative tools, and strategies. Based on the latest NDC submissions, African countries will need to mobilize 2.8 trillion USD between 2020 and 2030, where 2.5 trillion USD should come from external sources. Considering the significant amount of finance needed and the complexity in accessing existing resources, a mechanism that has been gaining in prominence is the establishment of National Climate Change Funds as vehicles to engage in accessing, mobilizing, pooling, and coordinating. In this vein, the Climate Promise provided support to several countries to develop NDC financing strategies, many of which recommend the establishment of national climate funds. This event aims to bring together countries to showcase examples of nationally established climate funds, discuss and share building blocks to develop institutional and legal arrangements, financial instruments and approaches conducive to mobilizing funding, discuss challenges, and the ways forward.	Open	ACW-AE026-s	https://teams.microsoft.com/j/9933a6e0-3100-4211-9000-000000000000?context=927069272646226345&22a6c12ad-406a-4f33-b686&7f8f5822208b229c29c220d6e2263a6227568867-70eb-4d77-b385-b0554ac39e4b27676
29-Aug	14:45	15:15	Akanda - Big tent	Youth Go Green Network Liberia (YUGNET-LIBERIA)	Building a Sustainable future for a Healthy, Green and Safe Environment for All	"Building a Sustainable Future for a Healthy, Green and Safe Environment" is an Innovation that seeks to promote recycling of waste materials into usable and sustainable produce. We want to invite expert to educate young people on how they can get involved into the Green-Entrepreneurship which will not only reduce our emissions to 1.5°C but also it will help to tackle poverty thereby creating some means of employability for many across the country and Africa beyond. This initiative when supported will help us transform waste materials into replace fossil fuels and be used to provide solar and mechanical energy without the use of fossil fuels which will significantly contribute to the emissions target of 1.5°C before 2030.	Open	ACW-AH013	https://teams.microsoft.com/j/9933a6e0-3100-4211-9000-000000000000?context=927069272646226345&22a6c12ad-406a-4f33-b686&7f8f5822208b229c29c220d6e2263a6227568867-70eb-4d77-b385-b0554ac39e4b27676
29-Aug	15:15	16:15	Planète Résiliente - Outside tents	High-Level Champions; UN Climate Change	Unlocking Trade and Finance for Ambitious Climate Action	Explore a holistic approach to mobilizing climate capital into nature positive and sustainable African businesses, people, and projects, including considering the role the African Continental Free Trade Agreement can play in amplifying the impacts.	Open	ACW-AE015	https://teams.microsoft.com/j/9933a6e0-3100-4211-9000-000000000000?context=927069272646226345&22a6c12ad-406a-4f33-b686&7f8f5822208b229c29c220d6e2263a6227568867-70eb-4d77-b385-b0554ac39e4b27676
29-Aug	15:15	16:15	La Terre - Tent	United Nations Office for Disaster Risk Reduction (UNDRR); Global Network of Civil Society Organizations for Disaster Reduction (GNDR); The Deutsche Gesellschaft für Internationale Zusammenarbeit GmbH (GIZ)	Road to COP27: Scaling up Joint Action for Comprehensive Disaster and Climate Risk Management	The Bali Agenda for Resilience, key outcome of the recent 7th Session of the Global Platform for Disaster Risk Reduction, calls for adopting integrated approaches to climate change adaptation and disaster risk reduction. To be ahead of the growing climate and disaster impacts and risks, we need to ensure connectivity and interoperability of interventions and synergize initiatives, sectors and approaches at all levels and scales. For this to be effective, we must take a whole of society approach and meaningfully create space to listen to local voices and lived experiences from those living on the frontline of risk. The proposed event aims to generate actionable, replicable, and scalable integrated DRR and CCA approaches that will contribute to long-term resilience building. This will build on identified good practices from African countries and communities on integrated approaches and comprehensive disaster and climate risk management.	Open	ACW-SE131	https://teams.microsoft.com/j/9933a6e0-3100-4211-9000-000000000000?context=927069272646226345&22a6c12ad-406a-4f33-b686&7f8f5822208b229c29c220d6e2263a6227568867-70eb-4d77-b385-b0554ac39e4b27676
29-Aug	15:15	16:15	Le Soleil - Ground floor	Ajemalebu Self Help (AJESH)	Integrating Nature-based Solution (Nbs) for Natural Resources management	The event aims at showcasing how Nature-Based Solutions contributes to biodiversity protection in the Littoral Region of Cameroon. Discussions will centre around the following elements: 1. approaches to zero deforestation agricultural production (cocoa, cassava and plantains) of small and medium-sized farms and the related value chains as well as the technical capacities of farmers, including youth and women and resilience to climate change; 2. community participatory maps and land use plans integrating biodiversity footprint restoration opportunities, involving the city of Douala in their food supply chains while taking into account the management of natural resources, 3. the implementation of the Douala III Communal Development Plan (CDP) and land use plan underpinning the restoration of degraded landscapes (farms) and sustainable management of the ecosystems.	Open	ACW-SE030	https://teams.microsoft.com/j/9933a6e0-3100-4211-9000-000000000000?context=927069272646226345&22a6c12ad-406a-4f33-b686&7f8f5822208b229c29c220d6e2263a6227568867-70eb-4d77-b385-b0554ac39e4b27676

29-Aug	15:15	16:15	Franceville - Ground Floor	UNDP; UNFCCC; NDC Partnership	Africa Regional Monitoring Reporting and Verification (MRV) Experience sharing dialogue	The objective of the event is to enhance sharing of experiences among countries regarding the use of the existing MRV tools, how these tools can be aligned with Article 6 reporting requirements and identify the capacity support required for functional MRV tools to be utilized. Specific objectives include the following: 1. Share experiences on the use of existing MRV tools that have been developed to enhance reporting on NDCs and overall climate actions 2. Create a platform to share experiences among countries on MRV and the alignment of the MRV to article 6 reporting requirements under the Paris agreement 3. Identify the capacity support available for developing functional MRV systems at national level	Open	ACW-SE200	https://teams.microsoft.com/j/19933a6e7e101929zgvMzE1M2IkMj00Y7ZlThlOGMI2WE1MTMzWUWz222a6c12ad406a-4f33-b686-f78f5822208b2292c220d9f2223a3e22e33b40d-85b3-445a-ba83-d1a63f9785f5e2297d
29-Aug	15:45	16:45	L'eau - Tent	Eastern Africa Alliance on Carbon Markets and Climate Finance	Implementing carbon markets and mobilizing private sector finance through nature-based solutions in Africa	COP26 was successful in delivering decisions on Article 6 of the Paris Agreement, ushering in new carbon market opportunities under cooperative approaches and the new mechanism under article 6.4. There is, however, much to be done at the international and national level on operationalizing it to enable countries to implement carbon market activities that contribute to Nationally Determined Contributions. For countries to participate, significant capacity building is required on institutional arrangements, legal frameworks, and infrastructure around registries to track Article 6 activities. Further to this, country interests in developing activities on the ground is going beyond the low-hanging fruit of energy access projects to having large-scale nature-based solutions, an area that the private sector is keen on supporting. This event aims to discuss capacity building needs and initiatives taken by governments toward implementing carbon market activities and how private sector finance can be mobilized to facilitate this.	Open	ACW-SE097	https://teams.microsoft.com/j/19933a6e7e101929zgvMzE1M2IkMj00Y7ZlThlOGMI2WE1MTMzWUWz222a6c12ad406a-4f33-b686-f78f5822208b2292c220d9f2223a3e22e33b40d-85b3-445a-ba83-d1a63f9785f5e2297d
29-Aug	15:45	16:45	Le Vent - Tent	Stop Ecocide Foundation; Stop Ecocide International; Rebalance Earth; Republic of Vanuatu	Strategic legal initiatives to protect the climate and our common future	We are witnessing a rising frustration globally with the failure to implement the multilateral environmental agreements and pledges which already exist. Legal parameters would hold government and corporate actors to account, acting as a creative constraint and provoking the urgent new thinking and innovation we know is needed. Making "ecocide" - severe and either widespread or long-term harm to nature - a crime could provide a legal guardrail to steer us back from the precipice by setting an outer boundary to deter, prevent and sanction the worst threats to ecosystems and keystone species. Meanwhile, a clear legal advisory opinion on the responsibilities of states with respect to climate change could set out what citizens should expect from their policy-makers and why. Together these avenues can frame the duties and responsibilities that could bridge to a liveable world for the children of all species, including our own.	Open	ACW-SE202	https://teams.microsoft.com/j/19933a6e7e101929zgvMzE1M2IkMj00Y7ZlThlOGMI2WE1MTMzWUWz222a6c12ad406a-4f33-b686-f78f5822208b2292c220d9f2223a3e22e33b40d-85b3-445a-ba83-d1a63f9785f5e2297d
29-Aug	16:30	17:30	La Terre - Tent	UN Centre of Excellence on Climate and Disaster Resilience	Moving back from the edge: climate and disaster risk reduction in highly vulnerable and fragile contexts	Growing risks, largely fueled by climate change, are pushing many communities in fragile and highly vulnerable countries to the edge of tipping into recurring or protracted states of crisis, where they would require humanitarian assistance. With a scale up in adaptation finance and increased efforts to "avert and minimise" loss and damage, how do we ensure that the right actions or interventions occur at the right time in these high-risk settings? How do we need to adjust our disaster risk reduction and adaptation approaches so that they are suited to contexts where vulnerability is high, coping capacities are low, resources are often constrained and other factors such as conflict or fragility come into play? This session will seek feedback on emerging findings from a flagship case-study report that examines evidence from the field.	Open	ACW-SE068	https://teams.microsoft.com/j/19933a6e7e101929zgvMzE1M2IkMj00Y7ZlThlOGMI2WE1MTMzWUWz222a6c12ad406a-4f33-b686-f78f5822208b2292c220d9f2223a3e22e33b40d-85b3-445a-ba83-d1a63f9785f5e2297d
29-Aug	16:30	17:30	Le Soleil - Ground Floor	Mbororo Social and Cultural Development Association MBOSCUDA; Game Changer Yaounde; IFAD Yaounde; CORECT Confederation of Traditional Headers Organisation Nigeria; INDES Formation Cameroon	Pastoralist the impact of Climate Change prospect and resilience to challenges.	The Side Event shall be organise and hosted by The Mbororo Social and Cultural Development Association (MBOSCUDA) together with its Partners as mention above. The side event will show case the impact of the climate change on pastoralist community, and as well as the potential for the pastoralist contribution for the adaptation and mitigation of climate change through traditional practices. And also the resilience of the pastoralist to cope with climate change. This will take the form of presentation and sharing experience use PPP. 29-Aug	17:00	18:00	L'eau - Tent	The Global Energy Alliance for People and Planet; High-Level Champions	Accelerating Voluntary Carbon Markets in Africa to Unlock Progress for SDG7	Producing carbon credits could be a transformational opportunity for Africa. Voluntary carbon markets have seen strong growth in the last 5 years and are poised for even faster growth over the next decade. However, the carbon market opportunity in Africa is significantly under-realised with only roughly 14% of carbon credits issued between 2002 and 2020 stemming from African countries. Accelerating voluntary carbon markets in Africa could help to bolster nature conservation and restoration, cookstove deployment, renewables build-out and fossil fuel displacement. This would not only support climate goals but also provide finance for economic development, expand energy access and protect biodiversity. This session will explore how governments, philanthropy, multilateral development banks, development finance institutions, international institutions and the private sector can come together to accelerate voluntary carbon markets in Africa while unlocking critical development benefits such as expanding energy access and supporting job creation. 29-Aug	17:45	18:45	La Terre - Tent	Centre for 21st Century Issues; Pan African Climate Justice Alliance PACJA; Women Development Organisation WEDO; BOTHENDS	Access to Climate Finance and Structuring a Gender-Responsive Loss and Damage Finance: The Role of African Women	It is crystal clear that the poorest countries, majorly in Africa and especially the women, who contribute the least to global climate change, are bearing the bulk of climate-induced losses and damages. These populations are also marginalized in accessing climate finance. This amounts to gross climate injustice and undermines the fundamental rights of the poorest and vulnerable populations on the planet. This side event will showcase the efforts and work of the Centre for 21st Century Issues and its partners in mobilising the active participation of African women for gender-responsive climate finance and access to the Green Climate Fund through the GCF African Gender Monitors Program as well as the advocacy to actualize Loss and damage finance in UNFCCC Climate Negotiations. The side event will also highlight entry points and opportunities available for African women to access climate finance to scale up their locally-led solutions and the proposed Glasgow Loss and Damage Finance to respond and recover from climate shocks. Furthermore, the side event will come out with a position paper on the local women accessing climate finance across Africa as an advocacy statement to COP27 in Egypt. 30-Aug	9:00	10:30	Avenir Durable - Outside tents	UNFCCC; AfDB; UNDP; RCC Lome; RCC Kampala	Track 1. Connecting Nationally Determined Contributions, Long-term Strategies, and immediate action on the ground	Long-term low GHG emission development strategies (LTLEDS) are an important tool in setting out the vision, policies and pathways to achieving net zero emissions. Alongside the NDCs, LTLEDS can help provide important signals to investors, businesses, civil society and the international community on the direction of travel towards low GHG emission development and facilitate the development of aligned policies while accelerating immediate action on the ground. Developing these strategies can ensure that pathways to achieve development and climate goals are consistent and mutually beneficial, helping countries to make sound development choices today and putting in place the foundations for sustainable, resilient growth. In this session government and non-government stakeholders will share their efforts to prepare the grounds for developing LTLEDS, NDCs and aligned policies, explore the regional challenges and opportunities in these efforts, and consider good practices towards the effective translation of long-term strategies into short- and medium-term actions. 30-Aug	10:15	10:45	Akanda- Big tent	ONG TERRE VERTE	Le bocage sahélier: une solution pour une agriculture sahélienne durable et résiliente	Le bocage sahélier est un milieu équilibré créé par l'homme où il associe l'arbre, la culture et l'élevage et où l'homme et la nature vivent en harmonie. Au Sahel, la première vocation du bocage est de garder l'eau là où elle tombe par des aménagements de diguettes, de mares et de haies vives, afin d'atténuer l'action érosive des eaux de la mousson et de maintenir la biodiversité d'un milieu extrêmement fragile. Les périmètres bocagers permettent ainsi de résoudre les problèmes liés à la dégradation de l'environnement. Dans le bocage, les champs sont entourés d'une double protection : une diguette en terre doublée d'une haie vive. Au point bas du champ est aménagée une petite mare d'infiltration des eaux excédentaires du ruissellement. Le résultat est la récupération de toutes les eaux pluviales sans érosion et une hausse des rendements agricoles ce qui permet de développer une résilience solide. 30-Aug	11:15	12:15	Le Soleil - Ground floor	ICLEI Sustainability for Local Governments, African Development Bank, Development Bank of Southern Africa; United Cities and Local Governments of Africa; Alliance for Subnational Development Banks; Global Fund for Cities Development; UN Cities Development Fund	Transformative climate finance for cities: The time is now	Transformative finance for cities to effectively seize climate solutions: The UNFCCC estimates that globally, between US\$1.6 and 3.8 trillion in funding is needed annually to transition to low carbon and climate-resilient economies, and the African Development Bank estimates Africa needs between \$7 to 15 billion per year to mitigate the impacts of climate change. Amidst a flurry of global climate finance pledges, the transformative role of local governments in Africa to effectively access finance flows for climate change mitigation- and adaptation-based service delivery and project development is increasingly highlighted. In light of this challenge, multi-stakeholder alliances emerge as a key mechanism to support subnational finance entities and local governments to work together to scale up transformative subnational urban investment for climate action. This enabling role is essential in supporting cities to seize unprecedented finance flows for climate action in African cities. Join ICLEI Africa and partners – African Development Bank, Development Bank of Southern Africa, United Cities and Local Governments of Africa and the Alliance for Subnational Development Banks – in this event as we share innovative practices, tested solutions and lessons learnt, in enabling cities to take climate action by accessing climate finance. 30-Aug	14:00	15:00	Le Vent - Tent	Nature4Climate; Global Commons Alliance; High-level Climate Champions.	Africa leadership at COP27 on a transition to a Nature Positive Net Zero Future	Investments in nature are profitable and help deliver a net-zero & nature-positive future – with tremendous benefits for people - jobs, resilience and the wider economy. There is demand for NBS and public and private sectors are increasing investment. However, to unlock Nature-based Solutions (NBS) potential (in line with 1.5C), public & private actors need to scale up annual investments four times over the next three decades. This session will look at African leadership on NBS across the continent and discuss how to ensure COP27 delivers for Africa in ambition, investment and accelerated implementation on the ground. The aim of this workshop is to bring together leaders at the critical intersection of Biodiversity, Adaptation, Water, Agriculture and the Ocean at Africa Climate Week to share inspirational examples of NBS from across Africa and take forward ideas and collaboration opportunities into our collective COP27 preparations. One key outcome would be planning for adaptation, biodiversity, food, finance and water days at the Summit in November this year. This session will be interactive and have an element of 'Speed networking' to create connections and facilitate new conversations across the community. 30-Aug	15:15	16:15	Le Soleil - Ground floor	Ministry of Finance, Planning and Economic Development (MOFPED)	Greening Uganda's Public Financial Management Policies for a Resilient Future: Macroeconomic Modelling/Forecasting and fiscal planning	Climate Change is one of the biggest challenges of our time. At macroeconomic level planning, the dire effects have been; reducing domestic revenue and economic growth rate while increasing government expenditure. As a result, many economies in Africa are having a high debt burden with very minimal fiscal space. Accordingly, as we strive for 1.5 degrees there is need for national actions and economy-wide approaches which itself requires effective involvement of Ministries of Finance and pertinent agencies. The ultimate goal is to have well evaluated actions that advance climate action while minimizing future economic shocks, provided for in the budget. Uganda's Ministry of Finance has attempted to integrate climate change impacts and actions into macroeconomic reports, budgets and procurement processes. We intend to share this experience. During the time slot we shall have presentations on; Climate change parameters in economic models, Budget tagging, Natural capital accounting and Green procurement procedures.	Open	ACW-SE119	https://teams.microsoft.com/j/19/3ameeting-ZDUxMDY0NkVhZDZiY000MIBLW1LMGtMDA1N2U1WUyZ2Y%40thread.v2/0?context=%7b%222id%22%3a%222a6c12ad-406a-4f33-b686-788f5822208%22%2c%220id%22%3a%22275688d57-70eb-4d77-b385-0d554fac39ed%22%27d
30-Aug	15:30	16:00	Akanda- Big tent	BLACKCAMEL ENERGY LTD	Towards NetZero; Timber products and its sustainable trade	Timber product trading is considered as an environmentally unfriendly business by most people globally. Timber utilization is being ranked as a high risk to climatic change due to its unregulated practice, false beliefs and wrong teachings. It is being constituted as a threat for sustainability of forest management high carbon emission and the climate. In timber production-supply-consumption cycle, the fear of guilt is written on the producer and the consumer faces. Illegal logging is also a huge part and can hardly be digitally controlled in the phase of forest felling, where it is difficult to identify and control all possible cases. The self-belief that the percentage of carbon emission is calculated as the total number of harvested timber and their products is hugely alarming. Data capturing is also a huge problem due to extreme technicalities and bogus training. Seeking to correct all the ills regarding timber harvest and timber products. BlackCamel Energy Ltd is working on establishing a platform that will correct all this misinformation and also create an atmosphere that will make both the producer and the consumer of the timber and her products free of guilt. The platform which will work in tandem with sustainable forest management will make sure NetZero's aim is being achieved without undermining the economy of the forest. 30-Aug	17:00	18:00	Andok - 8th floor	Lusophone Cluster by the Partnership on Transparency in the Paris Agreement (PATPA); Germany; Belgium; CBIT Global Support Programme; UNDP / Climate Promise	De zero BUR ao primeiro BTR em 2024 - reflexões sobre passos a tomar pelos países lusófonos	O ETF (Enhanced Transparency Framework; Regra de Transparência do Acordo de Paris) prevê que os países apresentem um Relatório Bienal de Transparência (BTR) a cada dois anos a partir de dezembro de 2024. Isto significa que os países passarão do atual Relatório de Atualização Bienal (BUR) para um novo formato. Entretanto, cerca de 70% dos países lusófonos ainda não apresentaram o primeiro Relatório Bienal de Atualização (BUR). A questão-chave é como esses países se prepararão para atender às novas exigências, sem ter a experiência anterior de produção bienal de relatórios. Durante esta sessão, serão apresentadas e discutidas as oportunidades de financiamento para elaborar os BTR via mecanismos do GEF, partilhando em particular as preocupações dos países lusófonos. Todos os países que desejarem podem solicitar um financiamento do GEF para desenvolver um BTR e são convidados a aproveitar a atual rodada da janela de financiamento GEF. Aqueles que não apresentaram previamente um BUR são elegíveis para a primeira modalidade (BTR apenas) ou para a segunda se desejarem fazer uma comunicação nacional (NC) em conjunto com o BTR. O Núcleo Lusófono convida principalmente técnicos envolvidos na implementação das NDC e na apresentação de relatórios	Open	ACW-SE118	https://teams.microsoft.com/j/meetup-join/19%3ameeting_YTUzWQwOQGVYVW3Y50ONDZhlTIIOWYtMzg1ZDAyMzYzMyZl%40thread_v2/0?context=%7b%22Tid%22%3a%222a6c12ad406a-4f33-b686- 78ff5822208%22%2c%220id%22%3a%22245ced1f5-63bc-431c-acc-7484e8ab0c0e%22%7d
30-Aug	17:00	18:00	L'eau - Tent	Development Reimagined (DR); African Climate Foundation (ACF); Environmental Defense Fund (EDF)	Green Banking in Africa – the Reality and the Need	The AfDB's African Economic Outlook 2022 estimated that African countries require between \$1.3-\$1.6 trillion until 2030 to implement climate commitments and Nationally Determined Contributions (NDCs). However, Africa receives just 3% of global climate funding. The lack of climate finance tends to be blamed on Africans – lack of “bankable projects”, lack of transparency, ESG or other requirements. Our joint event will convene key stakeholders in Africa's climate finance and banking community to explore the reality of green banking in Africa, with case studies of projects that have been successful. The event will draw on lessons learnt to clarify what is needed from international climate financing mechanisms to unlock quality financing for green energy transitions and to achieve development goals such as Agenda 2063. The aim will be to also help shift the narrative away from Africa as a “risky” environment for large-scale climate investment and towards one brimming with green potential.	Open	ACW-SE130	https://teams.microsoft.com/j/meetup-join/19%3ameeting_MDNjNGEOMjUzTY3ZCO0ZUxLWES5mtYtGjMDcMDCmDU4YVFN%40thread_v2/0?context=%7b%22Tid%22%3a%222a6c12ad406a-4f33-b686- 78ff5822208%22%2c%220id%22%3a%22216c7af-31ba-4049-9807-609e4a2efc20%22%7d
30-Aug	17:45	18:45	Le Vent - Tent	Mohammed VI Foundation for Environmental Protection	Showcases initiatives for addressing climate change in Africa	Recognizing the transformative role of universities, youth, private sector, the Mohammed VI Foundation for Environmental Protection will facilitate a side event at the Africa Climate Week 2022 through its African Green Universities and Youth Education Network as well as the African Youth Climate Hub initiative. This side event will provide a platform for regional dialogue to promote effective resilience building amongst young people at local, national, and regional levels in Africa. It will also explore and promote the role of African stakeholders in building community resilience to climate change impacts through capacity building, concrete initiatives, and start-ups. The side event will feature a panel discussion, projects presentations and an open Q&A discussion session. It is a space for African stakeholders where they will have the opportunity to share their experiences and exchange knowledge and best practices engaging in resilience building. 30-Aug	17:45	18:45	L'eau - Tent	International Renewable Energy Agency, Egypt Ministry of Electricity and Renewable Energy	Ratcheting up the Energy Transition for Climate Action in Africa	The realisation of climate and development priorities in Africa requires widespread action, along with a careful assessment of progress made against the set targets. Stocktaking of regional and local initiatives is a pre-requisite for ratcheting up multi-sectoral energy transitions with a view to boosting climate ambition to align with a 1.5°C pathway, consistent with the Paris Agreement. The GST outcome should provide policy direction within the global climate process to course-correct in areas of insufficient ambition. In line with this, and with a view to supporting ambition that feeds into the overall GST process under the UNFCCC, as well as COP27 preparations in the short-term, IRENA and the Ministry of Electricity and Renewable Energy (Egypt) are co-hosting a side event at the Africa Climate Week to translate African climate pledges and multi-sectoral ambitions into urgent actions. 31-Aug	9:30	10:30	La Terre - Tent	Global Center on Adaptation; Africa Adaptation Initiative (Chaired by Gabon); African Development Bank	Africa Adaptation Dialogue: implementing the vision	Despite contributing the least to global warming, Africa finds itself on the frontline of the climate emergency, with the impacts of external shocks exacerbating these vulnerabilities. Indeed, large portions of Africa—particularly the drylands that cover three-fifths of the continent—are warming at a rate twice the global average, putting half a billion people at risk. Chaired by Gabon, the Africa Adaptation Initiative (AAI) aims to strengthen collaboration on adaptation across the continent. To implement this vision, the Global Center on Adaptation and the African Development Bank have jointly developed the Africa Adaptation Acceleration Program – AAAP. This Africa-led, Africa-owned response is mobilizing US\$25 billion for climate adaptation investments in the continent over five years. This event will review progress of the AAAP and how it is contributing to narrowing the finance gap, thus accelerating the implementation of AAL.	Open	ACW-SE093	https://teams.microsoft.com/j/meetup-join/19%3ameeting_YzJlYmM2QGIHMGzMy00NGQ5LTg3ZjJlMDEzNzYyODk%40threadd.v2/0?context=%7b%22Tid%22%3a%222a6c12ad-406a-4f33-b686-f78ff5822208%22%2c%22Oid%22%3a%222e16cf2af-31ba-4049-9807-609e4a2efc20%22%7d
31-Aug	10:00	11:15	Franceville - Ground Floor	BMW, Perspectives, Climate Focus, GFA, Mexico2, IETA	Programmatic Activities (PoAs) Under Article 6	With this meeting we want to achieve a stronger regional awareness of the programmatic aspects of the Art. 6 as well as a kind of stock-taking of still ongoing PoAs under the CDM and the experiences of public and private stakeholder in the region. The underlying project activity will not be limited to Africa, but the ACW is a good chance to get with relevant stakeholders in contact directly. For us it is important (in this phase of the project activity) that we speak with persons which are really experienced with the approach or having responsibilities in Art. 6. The 2022 edition will be focused on temporary measures under the CDM, transition of CDM activities, and Article 6 and readiness to implement Article 6, including capacity-building needs for the Africa region in implementing Article 6.</p>	Closed	ACW-AE011-1	Not available
31-Aug	14:15	15:15	Le Vent - Tent	the International Organization for Migration (IOM); the United Nations Framework Convention on Climate Change (UNFCCC)'s, East African Development Bank (EADB)'s and Banque Ouest Africaine de Développement (BOAD)'s Regional Collaboration Centres (RCC) in Kampala and Lomé	Human Mobility and Green Economy Development in a Changing Climate in West and East Africa	<p>The event seeks to advance understanding on the links between climate change, inclusivity in climate action and enablers for green economy. Specific attention is given to how climate resilient economic development and green economy opportunities could both reduce the need to migrate, as well as provide opportunities for migrants and how this can be achieved.</p> <p>The side event is organized to enhance dialogue and action among stakeholders addressing the challenges and opportunities arising from climate change related migration and regional green economy transition. The event aims to accelerate the development of regular migration pathways, promote sustainable development and improve inclusion of vulnerable groups in the green economy transition in the context of changing climate by offering information for data-driven policy development and facilitating knowledge exchange between different actors.</p>	Open	ACW-SE091	https://teams.microsoft.com/j/19933ameeting_NjUyZjE2OTQ0ZDQ1ZC00MzIzThmZlTQ0ND05NjE3YU0yMmU4YjE5NTM3z40thred.v2/0?context=%7b%22Tid%22%3a%22a6c12ad-406a-4f33-b686-f78ff5822208%22%2c%220id%22%3a%22537831a6-44a7-4556-9910-7a87774d57aF%22%7d
31-Aug	14:30	15:30	L'eau - Tent	Global Wind Energy Council (GWEC)	Sunset to sunrise: Transforming the workforce to achieve a just and equitable energy transition	<p>As we look to the future and the significant acceleration of renewables required to carry this energy transition out, workforce must be considered. Ensuring a just and inclusive transition in Africa is essential as the energy sector deals with the phase out of coal and the growth of wind and other renewable industries. Looking at how vulnerable or marginalised stakeholders can be supported in the transition as well as looking at workforce specifics will help Africa drive a Just Transition to net zero. At subnational levels, communities will be affected by the energy transition to renewables and so through effective stakeholder engagement and social dialogue these challenges can be faced with a more holistic view to ensuring the socioeconomic welfare of all those involved.</p>	Open	ACW-SE045	https://teams.microsoft.com/j/19933ameeting_Mz05NmUwMmU4YjE5NTM3z40thred.v2/0?context=%7b%22Tid%22%3a%22a6c12ad-406a-4f33-b686-f78ff5822208%22%2c%220id%22%3a%2253783426-5ff2-4121-8683-8b30b1e418a2%22%7d
31-Aug	14:45	15:15	Akanda- Big tent	Rockefeller Foundation; International Centre of Insect Physiology and Ecology; The Food and Agricultural Organization of the United Nations.	Insect farming for a climate-resilient Africa	<p>Africa's population will reach 2.5 billion by 2050 increasing the food and protein demand by 60%. Rapid urbanization in Africa has resulted in accumulation of >125 million tonnes of urban waste every year, but less than 5% of it is recycled, leaving the rest as major sources of greenhouse gases. Insect farming can effectively recycle this organic waste into rich proteins for food and feed and produce nutrient rich insect frass fertilizers for crop productivity. Insect farming is environmentally sustainable, with very low ecological footprints and water requirements. Insect proteins are an excellent substitute for conventional plant-based proteins such as soybean, which are cultivated in large tracts of arable land, which otherwise could contribute to global food security. Hence, insect farming has enormous potential towards our goal for a climate-resilient Africa. The event will showcase how this potential is harnessed through public-private partnership under the 17 Rooms Partnership Initiative.</p>	Open	ACW-AH067	https://teams.microsoft.com/j/19933ameeting_NTEwODUxYTMtMDA4OC00MjIxLWJkZmZlYjE0OWNlMTUwZTRh%40thred.v2/0?context=%7b%22Tid%22%3a%22a6c12ad-406a-4f33-b686-f78ff5822208%22%2c%220id%22%3a%2253783426-5ff2-4121-8683-8b30b1e418a2%22%7d
31-Aug	15:00	16:00	Okoume - 8th floor	Covenant of Mayors in Sub-Saharan Africa; ICLEI - Local Governments for Sustainability; GIZ; AECID; AFD; Expertise France	Harnessing renewable energy for the just energy transition in African cities	<p>Africa contributes just 8.8% to global greenhouse gas emissions, but is the continent most vulnerable to climate change. In Africa, 35% of total emissions come from the energy sector; thus renewable energy policies and technologies can significantly reduce these emissions from African cities, which have significant levels of development still to undergo, including overcoming the major inequality of 568 million and 923 million people without access to electricity and clean cooking respectively.</p> <p>This session aims to bring together Renewable Energy experts, government officials, Development Finance Institutions and private sector partners to discuss the roles of the public and private sector in enabling the Renewable Energy transition. It will also focus on what African cities should be doing to create an enabling environment for funding/investment, provide recommendations for enhancing the uptake of Renewable Energy, and present the innovative approaches and lessons learnt from the work done through the Covenant of Mayors in Sub-Saharan Africa*, a network of 300+ cities committed to taking climate action.</p> <p>* Covenant of Mayors in Sub-Saharan Africa is a network of 300+ cities, co-funded by the European Union (EU), the German Federal Ministry for Economic Cooperation and Development (BMZ) and the Spanish Agency for International Development Cooperation (AECID).</p>	Open	ACW-SE143	https://teams.microsoft.com/j/19933ameeting_MDMzNzFhMDU0MmU4YjE5NTM3z40thred.v2/0?context=%7b%22Tid%22%3a%22a6c12ad-406a-4f33-b686-f78ff5822208%22%2c%220id%22%3a%22537831d3-9723-42f2-8be7-200c8880576b%22%7d

31-Aug	15:30	16:00	Akanda- Big tent	Ethiopian Institute of Agricultural research; Somali Pastoral Agro-pastoral Research Institute; kebridahar University	Animal impact tool to rehabilitate degraded areas	This is to show how animal impact tool plays a role in rehabilitating degraded areas by improving the soil physico-chemical status (soil structure, soil fertility, water retention and infiltration) and enhance the coming back of the vegetation cover from the existing soil seed bank. This at the end will ameliorate both environmental and livelihood resilience. Moreover, the carbon sequestration in the soil and in the vegetation biomass is worth mentioning to show how vegetation cover contributes to the existing global climate change we are facing now. The species composition and diversity is also to be a point of discussion as far as the pastoral arid and semi-arid areas are concerned. This is a very efficient and effective means that we need to adopt in the tropics as far as rehabilitating of degraded areas and managing of grazing areas of the pastoral communities is concerned. 31-Aug	16:15	17:15	Okoume - 8th floor	UNECA; Government of Kenya (National Treasury & Planning)	Africa Green Finance Coalition; accelerating investment in Africa through green finance.	Mobilizing the Strillions Africa needs to finance the NDCs requires transformational collaboration across sectors and borders. The Africa Green Finance Coalition is a platform that bolsters pan-African collaboration and provides African Governments with the necessary resources, expertise, and services to harness the opportunities linked to achieving the Paris agreement, SDGs and AU Agenda 2063. Announced at COP26 jointly by the Kenyan government and the Africa Adaptation Initiative, the AGFC will convene African governments, green and climate finance organisations, and investors to design and implement future-proof green policies and institutions. This first AGFC roundtable will connect leading organisations to share their learnings from mobilising investments for a climate-neutral and resilient Africa. Discussions will aim to surface the main skills and capabilities green finance institutions need to scale, to identify investment opportunities in youth and women-led projects, and to uncover key success factors of realised investments, showcasing the power of peer-to-peer learning. 31-Aug	16:45	17:45	Le Soleil - Ground floor	UNEP; Government of Eswatini; The Commonweath Finance Hub; IIED	Debt-for-Climate Swaps Innovative Financial Instruments for Public Debt Management	The world is facing a triple crisis of debt, climate change and biodiversity loss. The impacts of the COVID-19 pandemic on the economic system have increased volatility in developing country markets, particularly in Africa, where high levels of debt make them vulnerable. Several countries in Africa are now considering debt for climate swaps as an innovative solution to manage mounting public debts, climate change challenges – particularly underfunded adaptation action - and COVID-19 recovery. Traditionally, these instruments represent an exchange of the existing debt contract with a new one, where the previous contract is normally discounted. The discount or foregone debt service proceeds would then be used in an agreed upon manner to fund climate projects. This side event brings together Country Governments and experts to exchanges in-country experiences to design effective Debt for Climate Swaps, including learnings and advantages of this innovative financing instrument to advance action for climate adaptation.	Open	ACW-SE044	https://teams.microsoft.com/j/meetup-join/19%3ameeting_YTczMVRlOTctNk1kM00N TlHlTgYzktNW30GE1ZWE3NzA0%40thre ad.v2/0?context=%7b%22id%22%3a%222a6c12ad-406a-4f33-b686-f78ff5822208%22%2c%22oid%22%3a%2275688d57-70eb-4d77-b385-0d554fac39ed%22%7d
31-Aug	17:00	17:30	Akanda- Big tent	Union of Ethiopia Women and Children Association(UJWCA), Farm Africa and SIDA	Strengthening Climate Change Resilient Economic Capacity and Environmental Protection Role of Ethiopian Women through Integrated approaches	Project Description: The project "Building Climate Change Resilient Economic Capacity and Environmental Protection role of Ethiopian Women through integrated approach" is carried out from December 2016 to December 2020 in 12 Woredas of Five Region of Ethiopia in partnership with 12 member Organizations. The intervention is executed with the financial (SEK 27,000,000 or 80.6 Million ETB) and technical support obtained from Swedish International Development Agency (Sida)/ Embassy of Sweden in Ethiopia and Farm Africa respectively. Major Project Accomplishments and Results are: Awareness of the Community on the causes of climate change, adaptation and mitigation mechanisms (Knowledge on the cause and impacts of Climate Change and knowledge on Climate change manifestations), Livelihoods Diversification (Increasing production and productivity, Promotion of Small-scale irrigation, Village Level Saving and Loan Association (VSLA), Fuel saving stoves and biogas plants, Integrated watershed management, Increased Production and Productivity of Crops, Change in Annual Income of the Beneficiaries). Though the project finalized recently, the evaluation found evidence of its contribution to longer term processes that were triggered as a consequence of the assets creations for women and poor community members, the mentality changes on Climate Change, Adaptation Mitigation and CSA influenced by the activities promoted by the project. There are evidences that the project (mainly the discussions with government partners and the case story above) contributed to improve ownership of project activities and government experts and officials decision making capabilities. 31-Aug	17:30	18:30	Le Vent - Tent	Climate Change Africa Opportunities- CCAO	Promoting Indigenous knowledge, practices and innovations resilient to climate change in Africa	Even though indigenous peoples are among those who have contributed the least to climate change, they are the ones who suffer its most serious consequences. If these peoples are much more vulnerable to climate change. It is because many of them depend on ecosystems that are particularly exposed to the effects of climate change and extreme weather events such as floods, droughts, waves of heat, forest fires and cyclones. Small islands, high altitude regions, humid tropics, coastlines, deserts and polar areas are some of the most affected regions. Indigenous peoples make an essential contribution to the conservation of biodiversity and the protection of forests and other natural resources, and their traditional environmental knowledge can greatly enrich scientific knowledge and adaptation activities at the time of the decision-making related to climate change.	Open	ACW-SE06	https://teams.microsoft.com/j/1/meetup-join/19%3ameeting_M2E2MDk0ZGEtNTdiY000DQwLWl4N2Q1NkFkOTthNDgzNzc%40thread.v2/0?context=%7b%22Tid%22%3a%222a6c12ad-406a-4f33-b686-178ff5822208%22%2c%22Oid%22%3a%2223cb71a6-44a7-4556-9910-7a87774d57a7%22%7d
31-Aug	17:30	18:30	Okoume - 8th floor	Standard Chartered Bank Cameroon	Unlocking Finance through Carbon Markets in Africa to support the goals of the Paris Agreement	Standard Chartered is at the forefront of the carbon market debate globally and has led many initiatives looking to both deliver scale and improve quality. High integrity carbon credits can unlock urgently-needed finance that wouldn't otherwise be available to reduce and remove billions of tons of emissions. By scaling voluntary carbon markets and allowing a global price for carbon to emerge, companies will have the right tools and incentives to reduce emissions at least cost. To stay on the 1.5°C pathway, all businesses must firstly take deep and urgent cuts in their energy and land based emissions associated to their value chain but this will not be sufficient. Climate Change is a major threat in Africa as it is impacting all sectors, ecosystems and the ability of people to cope. The urgency of the climate crisis requires that businesses go a step further and invest in mitigation of emissions beyond their value chains. High quality nature based carbon credits can provide a ready available solution to reduce and remove CO2 emissions, benefit local people and generate net biodiversity gain. Many countries desire to achieve emission reduction targets and attract climate finance through the carbon markets and while investments in Africa have been gaining traction, more work is needed to improve quality, consistency and understanding across the globe. We need every tool available working at full speed to channel investment towards a just transition to 1.5°C. This event will explain how carbon markets work and how they support the goals of the Paris Agreement to unlock finance needed to reduce and remove emissions that wouldn't otherwise happen. It will be an opportunity for businesses, governments and NGOs to learn about what defined a high quality carbon credit and how finance can be mobilised to support a just transition to net zero.	Open	ACW-SE052	https://teams.microsoft.com/j/1/meetup-join/19%3ameeting_MWY3NWFiZTQID0S2C00MzRmLlR1M2UNmFwZU3ZDYyZTk%40thread.v2/0?context=%7b%22Tid%22%3a%222a6c12ad-406a-4f33-b686-178ff5822208%22%2c%22Oid%22%3a%2223ca1d3-9723-42f2-b0e7-200c8880576b%22%7d
1-Sep	9:00	10:00	L'eau - Tent	African Development Bank	Mobilizing private sector finance for adaptation through certifying the benefits of adaptation action – Presentation on the Adaptation Benefits Mechanism (ABM) piloted by the African Development Bank	The current levels of adaptation finance are insufficient to meet the adaptation needs of developing countries. According to the 2021 UNEP's Adaptation Gap Report, the adaptation costs in developing countries are five to ten times greater than the current public finance flows and the adaptation finance gap is widening. At COP26, developed countries committed to double their adaptation finance by 2025. The involvement of the private sector to overcome the adaptation finance and implementation gap for adaptation is crucial. The Adaptation Benefits Mechanism (ABM) is a non-market results-based financing mechanism for mobilizing public and private sector finance for enhanced resilience of vulnerable communities and ecosystems. It also contributes to closing the methodological gap for robust and environmentally sound adaptation metrics. This side-event/workshop will bring together diverse stakeholders to share the best practices and lessons learned so far from the ABM Pilot Phase of the African Development Bank and discuss the first proposed ABM methodologies, including through interactions with the audience. 1-Sep	9:00	11:00	Franceville - Ground Floor	UNDP, UNFCCC, ILO	Integrating the principle and process of just transition into NDC/LTS planning to accelerate climate ambition	A green transition is at the heart of meeting the Paris Agreement goals. Nonetheless, if not managed well, it also runs the risk of increasing social inequality, civil unrest and reduced productivity or less competitive businesses, sectors and markets. The preamble of the Paris Agreement on climate change, adopted in 2015, underscores close links between climate action, sustainable development and a just transition, with Parties to the Agreement "taking into account the imperatives of a just transition of the workforce and the creation of decent work and quality jobs in accordance with nationally defined development priorities". We are seeing a growing recognition of the need for a just transition in the context of Paris Implementation. In Africa, 10 countries directly and indirectly referenced just transition in their revised NDCs, demonstrating a strong political will to incorporate a social dimension into their climate action. This event aims present key conceptual framework and guidelines for just transition and its enabling role in accelerating ambitious climate action. The event will bring together countries to share experience of integrating the principle and process of just transition into NDC/LTS, discuss challenges, and the ways forward.	Open	ACW-AE031-s	https://teams.microsoft.com/j/1/meetup-join/19%3ameeting_NDIjMDVjNjAtMTYxMjQ0ZG9kMTk1MmZmctMwMjN2UNmFwZU3ZDYyZTk%40thread.v2/0?context=%7b%22Tid%22%3a%222a6c12ad-406a-4f33-b686-178ff5822208%22%2c%22Oid%22%3a%2201537467-1f59-4900-9fcb-299e865a5fad%22%7d
1-Sep	9:00	13:00	Akanda- Big tent	UN Climate Change; NDC Partnership	Regional Exchange on Long-term Climate Ambition and Implementation at the Africa Climate Week 2022	The Africa Regional Exchange on Long-term Climate Ambition and Implementation will bring together key policymakers and key stakeholders from the region to discuss, deliberate and share information, good practices, and the challenges and opportunities specific to the region to transition towards low GHG development and ambitious climate action in the context of LT-LEDS, NDCs and sectoral policies to support the achievement of the Paris Agreement, aligned with green economy principles. Through a week-long, iterative programme, participants will engage around common learning objectives – sharing good practices and lessons learned to strengthen mitigation and adaptation ambition raising efforts and ground them in realistic and actionable implementation plans. These learning exchanges will draw the links between the NDC update cycle, Long-Term Low Development Strategies (LT-LEDS), implementation and finance – to help enhance ambition and accelerate implementation. 1-Sep	13:45	14:45	Le Soleil - Ground floor	Landscape Resilience Fund; South Pole, Carbonsink	Landscape and community first approaches to climate finance: case studies from Ghana, Mozambique and Zimbabwe	The urgency to address the causes and impacts of climate change is stronger than ever. Although the completion of the Paris rulebook at COP26 marks a crucial step in global climate action, the finance and implementation gaps remain important for both mitigation and especially, adaptation. African communities and ecosystems are disproportionately impacted by climate change, despite bearing the least responsibility for the problem. Our continent's development and environmental protections are strongly linked to the global clean energy transition and coordinated action on climate resilience and capacity building. In the Landscape and community first approaches to climate finance event, representatives from the Landscape Resilience Fund, South Pole, Carbon Sink and partners will discuss with stakeholders, concrete approaches to addressing the climate finance gap in Africa. Crucially the panelists will outline how each of their work streams center around local communities as the primary drivers of building resilience, protecting ecosystems and ramping up climate mitigation action. The event features initiatives from community-based climate projects, adaptation finance through Climate Funds, and public-private partnerships to deliver multiple benefits beyond mitigation (e.g. jurisdictional and community-owned REDD+). 1-Sep	14:00	18:00	Franceville - Ground floor	UNFCCC secretariat and Foundation "Future of the Carbon Market"	Enabling and fast tracking PoAs under Article 6.4	The operationalization Art. 6.4 mechanism requires the availability of GHG mitigation methodologies. The broad set of existing CDM methodologies may provide a good basis for a prompt start. However, an important technical work, for instance on baselines, additionality and the contribution to sustainable development is needed to adapt them to the Art. 6.4 requirements. Without a significant effort put urgently on this work stream, the entire process of operationalizing Article 6, especially Article 6.4, could be delayed. An integral component of this work would involve exchange with host countries to understand their perspectives as Art 6 mechanisms envisage enhanced involvement of host countries. The Foundation Future of the Carbon Market, established in 2011 by KfW Development Bank with funds provided by Germany's Federal Ministry of the Environment (BMU) through its International Climate Initiative is supporting the work on selected CDM methodologies that include aspects of programming, standardization, and upscaling for alignment with the Paris Agreement. 1-Sep	14:45	15:15	La Terre - Tent	Access Partnership; Fair Tech Institute.	The Role of Satellite Communications in Disaster Management: Resilience and Climate Action	As the Intergovernmental Panel on Climate Change (IPCC) showed in its report from August 2021, the immediate effects of global climate change are widespread, rapid, and getting worse. In the context of strengthening the global response to the threat of climate change, policymakers are encouraged to increase investment in physical and social infrastructure as a key enabling condition to enhance the resilience of societies. The event will shed light on the various economic consequences of increasing global natural disasters and present the state of current disaster communication systems in Africa. The adoption of new strategies and technological solutions – as a crucial component of disaster preparedness – would allow the less connected to communicate during emergency situations, ensuring that emergency communications are more accessible for better rescue responses. 1-Sep	14:45	15:45	Le Soleil - Ground floor	Conservation International	REDD+ Nesting: How will different Forest Carbon Standards support nested approaches?	Establishment of a well defined and comprehensive nesting framework will be critical in ensuring that different actors can engage in REDD+ processes and investments at different scales within a jurisdiction. Various countries are in the process of setting up frameworks/systems that will ensure implementation of REDD+ in their jurisdictions. They are also striving to balance between meeting their NDC targets, attracting climate finance and implementing their national REDD+ strategies/action plans. Furthermore, some have existing REDD+ projects that are not aligned to the national framework. Many countries desire to achieve emission reduction targets and attract climate finance from multiple sources through REDD+. This will be realized by application of forest carbon standards. How these standards will interact with each other whether in a jurisdictional or nested programme is unclear. This side event will seek to bring together experts from the forest carbon standards that support nested approaches, government officials with experience in building nesting frameworks and other practitioners with relevant experience.	Open	ACW-SE127	https://teams.microsoft.com/j/meetup-join/19%3ameeting_NDk1ZDhhWmVhZDZ0Y2C00ZJWJlWwO0ctmWwM2hmMTEYV2Nk%40thred.v2/0?context=%7b%22Title%22%3a%222a6c12ad-406a-4f33-b686-78ff5822208%22%2c%220id%22%3a%22275688d57-70eb-4d77-b385-0d554fac39ed%22%7d
1-Sep	15:00	16:00	Le Vent - Tent	UNESCO; UNOCA; BAD	Rôles de la forêt tropicale du Bassin du Congo, des réserves de biosphère, et sites du patrimoine mondial dans la résilience au changement climatique et la mise en œuvre des ODD en Afrique centrale	La Semaine Africaine du climat sera l'occasion pour l'UNOCA, l'UNESCO et la BAD de renforcer, en vue de la COP 27, le dialogue et la coopération avec diverses institutions afin de faire progresser l'action climatique, lutter contre les inégalités sociales et investir dans un développement qui soit bon pour l'humanité et la nature. 1-Sep	15:15	16:15	Le Soleil - Ground floor	The World Wide Fund for Nature (WWF); The African Development Bank (AFDB)	Building a Resilient Africa: Creating enabling conditions for NDC Implementation	Enabling conditions - finance, technological innovation, strengthening policy instruments, institutional capacity, multi-level governance, and changes in human behavior and lifestyles - are as relevant for adapting to climate change as to mitigation. African countries, having contributed the least to the climate crisis, are already facing the brunt of climate impacts. Challenges posed by limited institutional capacity, perennially constrained resource contest will be exacerbated by squeezing out of international support due to multiple global crises. This will constrain NDC implementation and undermine efforts to build a resilient Africa. Through this event, WWF and the AFDB will showcase partnerships and interventions currently underway on the continent to build a resilient Africa and the role that enabling conditions play in successful delivery of NDC implementation for supporting climate resilient development. The session will come up with recommendations and interventions to create and realize the enabling conditions to leverage the integrated approaches for achieving multiple objectives simultaneously.	Open	ACW-SE109	https://teams.microsoft.com/j/meetup-join/19%3ameeting_YjFhODUzOGI2DA5YV00MkzLTA4ZjQNDmVhMjY1MzZ0Y2C00ZJWJlWwO0ctmWwM2hmMTEYV2Nk%40thred.v2/0?context=%7b%22Title%22%3a%222a6c12ad-406a-4f33-b686-78ff5822208%22%2c%220id%22%3a%22275688d57-70eb-4d77-b385-0d554fac39ed%22%7d
1-Sep	15:30	16:00	La Terre - Tent	KQ Hub Africa with support from Africa-Europe Foundation	The Climate Africa Now Podcast	African activists are frequently excluded from speaking on international platforms about global issues such as climate change, despite Africa being disproportionately affected. For instance, a common case is the erasure of Ugandan activist Vanessa Nakate at the COP26 UN climate summit another classic example of how western media portrays 'white saviour' solutions to the problem, reinforcing the need for real global South involvement. The Climate Africa Now Podcast: Climate Africa Now Podcast is a weekly audio-visual podcast series highlighting, engaging young climate advocates, influencers and policymakers in empowering conversations that connect all aspects of the climate emergency in Africa. The podcast seeks to explore in dialogue issues around - the individual and the systemic, the scary and the exciting – to deepen communities understanding of the most critical issue of our time as told by African Climate Champions and Activists.	Open	ACW-AH003	https://teams.microsoft.com/j/meetup-join/19%3ameeting_MjY1MzZ0Y2C00ZJWJlWwO0ctmWwM2hmMTEYV2Nk%40thred.v2/0?context=%7b%22Title%22%3a%222a6c12ad-406a-4f33-b686-78ff5822208%22%2c%220id%22%3a%222a6c16cf2af-31ba-4049-9807-609e4a2efc20%22%7d
1-Sep	16:15	16:45	La Terre - Tent	Food and Agriculture Organization of the United Nations (FAO)	Attaining a resilient world through the institutionalization of the Livestock Early Warning System (EWS)	The Livestock EWS combines field forage and livestock body condition monitoring data, remote sensing data, and simulation modeling to produce livestock forage availability and body conditions status of the herd monthly. Livestock body conditions have a direct link to milk and meat availability, good body conditions are associated with improved livestock production while poor condition is the reverse. The livestock body condition has a direct correlation with the household food availability and income hence a key determinant of the food security status of pastoral communities. 1-Sep	16:30	17:30	Le Vent - Tent	African Development Bank; Global Green Growth Institute	Aligning NDCs, LTS And SDGs Implementation for Green Growth and Climate Action in Africa	Aligning NDCs, LTS And SDGs Implementation for Green Growth and Climate Action in Africa	Open	ACW-AE028-s	https://teams.microsoft.com/join/1933ameeting_VjZjYjAzNTktNzE4Z002TM4LTIIM2MNIhYVxYU5NzVn%40thread.v2/0?context=%7b%22id%22%3a%22a6c12ad-406a-4f33-b686-78ff5822208%22%2c%22oid%22%3a%2223cb71a6-44a7-4556-9910-7a8774d57af%22%7d
1-Sep	16:30	17:30	L'eau - Tent	UNDP - United Nations Development Programme	Strengthening adaptation and climate resilience in Africa through NDCs: Empowering countries to raise climate ambition	With its adverse effects, climate change is impacting all regions worldwide, especially the most vulnerable. Among others, the African region is one of the most affected by this phenomenon. As a response, UNDP's ambitious Climate Promise provided financial and technical support to 120 countries globally, including 44 Sub-Saharan African countries, to revise or update their Nationally Determined Contributions (NDCs). This support helped build capacity for planning and preparing the ground for implementing the countries' NDCs and submitting their revised NDCs under the Paris Agreement. The objective of this event is to showcase UNDP's service offer to support the NDC revision/update process and how that helped leverage national efforts to raise climate ambition in Africa and support climate planning and investment processes CP phase 1. On the other hand, we could highlight UNDP's offer to provide countries with continuous support for enhanced NDC implementation to move from pledge to impact (CP2). 1-Sep	17:30	18:30	Andok - 8th floor	USDA forest service	US Forest Service supporting Congo Basin Countries efforts to report GHG emissions and removals under the Enhanced Transparency Framework of the Paris Accord	The Paris Agreement requires countries to report biennially on a range of information relating to their emissions/removals and on progress with meeting their nationally determined contributions (NDCs) under the enhanced transparency framework (ETF) through biennial transparency report (BTR). To support efficient reporting and decision making on climate action, countries need to have operational institutional arrangements and systems to measure, report and verify GHG emissions and removals and measures to reduce emissions and enhance removals. The countries of the Congo basin have been working on putting in place institutional arrangements to support their transparency (MRV) system (primarily focusing on GHG inventory activities). The advent of the REDD+ process, coupled with REDD+ readiness funds, has seen countries make significant progress in measurement and reporting in the forest sector but much needs to be done to ensure comprehensive MRV in all sectors of primary sources of GHG emissions. Congo basin countries face specific challenges with regard to the development of sustainable long-term transparency systems to support climate action – mainly sustainable institutional set-ups, data availability and technical capacity. Countries have struggled with 4-year reporting cycle of national communications (NCs) and 2-year reporting cycle of biennial update reports (BURs) as evidenced by the fact that most of the Congo basin countries are still in the process of preparing their third NCs and first BUR. The enhanced transparency framework (ETF) involves greater detail and frequency of reporting. The ETF requires reporting every two years, providing at minimum a complete inventory of greenhouse gases, tracking key indicators for NDC progress, with additional options to also report on progress with and barriers to adaptation, as appropriate, and on support needed and received. The work involves more resources and more complex methodological standards than countries have faced previously. Conversant of these challenges, the US Forest Service through various programs (SilvaCarbon, Climate Fellows, CARPE) have been supporting countries in the Congo basin in setting up robust monitoring systems to track emissions and removals, and build institutional and human resource capacities to ensure sustainability. The proposed session will review and share lessons learned from the different US Forest Service initiatives in the Congo basin aimed at supporting countries to improve on their reporting under the Enhance Transparency Framework (ETF) of the Paris Agreement. 2-Sep	9:30	10:30	Andok - 8th floor	International Committee of the Red Cross; International Federation of the Red Cross and Red Crescent Societies; Red Cross Red Crescent Climate Centre; Gabon Red Cross; African Union	Overcoming converging risks: Enhancing resilience in the face of Climate change, armed conflict and pandemics	Increasing climate shocks intersect with prevailing risks like armed conflict and COVID 19 to degrade the resilience of communities. The current food crisis in Africa; largely linked to climate change, throws these dynamics into sharp focus. This crisis calls for short-term efforts focussed on emergency relief and early recovery, and also long-term efforts relating to disaster risk reduction, anticipatory action and legal preparedness to bolster community resilience relating to disaster and climate risks. Additionally, a coordinated approach from national authorities, humanitarian and development organizations is needed to upscale efforts focussed on overcoming these converging risks. This session will highlight the increased vulnerability of communities in the context of conflict, climate change and COVID 19. It will also emphasize how partnerships and coordination can enhance community resilience, policy and institutional coherence between climate change adaptation and disaster risk reduction, and support effective anticipatory action and financing aimed at building climate resilience in vulnerable communities in Africa. 2-Sep	11:00	13:00	Franceville - Ground Floor	African Union, Africa Centre of Meteorological Application for Development (ACMAD), World Meteorological Organisation, and European Union, UNDRR	Enhancing Climate Change Resilience in Africa: Exploring African Union Climate Policies and programmatic initiatives	Africa contributes less than 4% of global greenhouse gas emissions but is one of the most vulnerable to climate variability and change. The continent's vulnerability to climate change is exacerbated by multiple natural and meteorological hazards such as floods, droughts, extreme heat and cyclones. To enhance Africa's capacity to better plan and implement climate actions, the Assembly of Africa Heads of States and Government, in February 2022, adopted a 10-year Climate Change and Resilience Development Strategy and Action Plan to address climate change challenges in Africa. The AU climate strategy has underscored programmatic response to the urgent climate crises. This event will build a discussion around current policy and programmatic efforts to address climate change impacts in Africa, mainly from Africa Multi-hazard Early Warning and Early Action Systems (AMHEWAS) Programme, Urban Resilience Programme, and ClimSA Program, highlighting the 2021 state of climate report for Africa.	Open	ACW-AE018-s	https://teams.microsoft.com/join/1993ameeting_MmXNzNzE1MwY0OGY5MTYzOGM3%40thre ad.v2/0?context=%7b%22id%22%3a%22a2a6c12ad-406a-4f33-b686-178ff5822208%22%2c%22oid%22%3a%2201537467-1f59-4900-9fcb-299e865a5fad%22%7d
2-Sep	11:00	13:00	Andok - 8th floor	Coalition for Rainforest Nations	Financing for REDD+ Sovereign Carbon Credits	Forest preservation efforts are measured and reported on a national scale to the United Nations Framework Convention on Climate Change (UNFCCC), which verifies and publishes the reductions in emissions. Businesses and individuals can access these national emissions reductions and enhancement of removals through the REDD.plus platform. This side event will introduce the CRN REDD.plus Platform that rainforest countries could use to meet Art 6.2 Compliance. The REDD+ Mechanism is critical for a sustainable future, and the REDD.plus platform contains answers to frequently asked questions about purchasing emissions reductions that count toward the Paris Agreement. Article 6.2 establishes an accounting framework for the international transfer of mitigation outcomes in order to meet the respective NDCs, based on cooperative approaches between Parties. This side event will cover how CRN countries can benefit from the REDD.plus platform, as well as how Article 5 fits into the requirements for the Article 6.2 Review Report's consistency review. 2-Sep	12:15	13:15	L'eau - Tent	APCOP Worldwide LLC	Women led climate-smart projects for a resilient future	The side event will look at how gender-sensitive finance is contributing to resilient communities and enhanced climate mitigation. It is well documented that investing in women, is the smartest investment a country can do. This is because of the multiplier effect that investing in gender equity will have not only on economic growth but also on social development and environmental conservation. Based on that, this event goes a step further and looks at how financial resources are being spent by women, particularly young entrepreneurs; the importance of disaggregated data by gender; as well as showcases relevant examples of the impact of women-led climate-smart projects. 2-Sep	11:00	12:00	Le Vent - Tent	<p>AMREF; Global Emerging Patogent Treatment Consortium (GET); Centre for 21st Century Issues (CZ1st); Lagos State Ministry of Health ; Lagos State ministry of The Environment</p>	<p>Towards a Multi-sectoral approach in addressing Impact of Climate Change on Health</p>	<p>Climate change affects the social and environmental determinants of health – clean air, safe drinking water, food sufficiency and secure shelter. It is thus generally agreed that countries with weak health infrastructure – mostly in developing countries – will be least able to cope without assistance to plan and respond to prevailing as well as potential health concerns. The climate crisis also threatens to deepen existing health vulnerabilities and create new ones including the geographic spread of climate-sensitive communicable and non-communicable diseases. The impacts of climate change are also evident at the systems level, particularly within health services and the provision of universal Health Coverage (UHC), eroding progress towards its three dimensions of (i) coverage of the people in need of care, (ii) cost of treatment, and (iii) the care services available. The side event will initiate a multi-sectoral dialogue on climate change and health in Africa as well as discuss finance to address the impacts of climate change on health with a focus on one health and universal health coverage.</p>	Open	ACW-SE201	<p>https://teams.microsoft.com/join/19%3ameeting_YTgzYTA2ODQZDUZ2S00ZDdkLTk0MzMtNzkwYTUzYTMyZjly%40thread_v2/0?context=%7b%22Tid%22%3a%222a6c12ad-406a-4f33-b686-f78f5822208%22%2c%22Oid%22%3a%2223cb71a6-44a7-4556-9910-7a8774d57a9f%22%7d</p>
2-Sep	14:00	15:00	L'eau - Tent	<p>West African Alliance on Carbon Markets and Climate Finance (WAA)</p>	<p>Addressing barriers to NDC implementation and Article 6 readiness: Insights from West Africa</p>	<p>As West African countries implement mitigation actions and mobilize the private sector to achieve their NDCs, barriers for mitigation activities become apparent: Insufficient technical capacities, lack of access to finance, and institutional/political barriers impede the rapid implementation of mitigation activities. To address them, countries are dealing with questions, such as: What capacity is needed at the national level to integrate climate finance and market mechanisms to achieve the NDC objectives? How can countries create an enabling institutional and political framework for carbon market activities? What improvements are needed on both the supply and demand side of climate finance to facilitate access to it? This side event will show examples of how East and West African countries approach these questions. Particular attention will be given to how regional and international capacity building efforts can help countries to address them.</p>	Open	ACW-SE155	<p>https://teams.microsoft.com/join/19%3ameeting_NllwMGJhYzMTNDg0Z00MWlZlTlNGMtM2RhZlQ0MzgzYmJh%40thread_v2/0?context=%7b%22Tid%22%3a%222a6c12ad-406a-4f33-b686-f78f5822208%22%2c%22Oid%22%3a%222ec33b40d-85b3-445a-ba83-d1a63f9785f5%22%7d</p>
