

PRESSING 'RECORD' ON CLIMATE ACTION

CAMDA workshop on tracking progress 2020-23

OVERVIEW

When: 5 December

Where: COP25, Madrid

Ahead of the next **Global Stock Take** in 2023, monitoring progress towards the Paris Agreement and the Sustainable Development Goals will aid implementation, bolster credibility, and inform future strategies.

The objective of this two-day workshop is to put into motion a framework towards establishing metrics for tracking progress. This will enable cooperative and individual climate actions to be tracked from going forward in such a way that they will ultimately appear on the Global Climate Action portal and be utilized by the broader analytical and research community.

It will result in a clear plan for 2020 and beyond – and an accompanying statement to be presented to the Presidency – on CAMDA's commitment to track progress, enabling the world to essentially hit the 'record' button on climate action and assess whether it is in line with 1.5°C.

Date: 5 December

Timing: 10.00-13.00

Venue: Meeting Room 10, Hall 9

Participants: Data community, including Parties

AGENDA

Morning

Opening Remarks

Gonzalo Munoz, High-Level Climate Champion for Chile

Special Envoy of the Secretary-General for the 2019 Climate Action Summit, **Luis Alfonso de Alba** or Deputy to the Special Envoy of the Secretary-General for the 2019 Climate Action Summit, Anne-Sophie Cerisola

Presentation of Statement on Tracking Progress:

Paul Simpson, CEO, CDP

James Grabert, Director, UNFCCC

John Christiansen, Director, UNEP DTU Partnership

Amanda Eichel, CEO, Global Covenant of Mayors (video link)

Presidency Responses to the Statement:

Iván José Véjar Pardo, COP25 Presidency

COP26 Presidency Representative: (tbc)

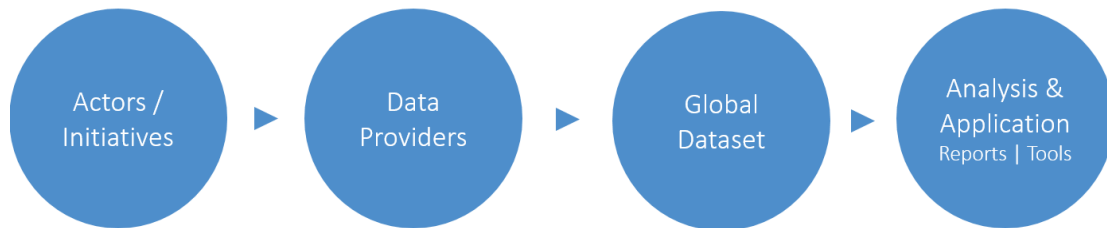

Feedback from Breakout Sessions

1. Aligned plan/guidelines on tracking cooperative actions to be presented by Breakout 1
2. Aligned plan/guidelines on tracking individual actions to be presented by Breakout 2

Closing & Next Steps

Alignment of workflows on how progress data could be harvested through annual disclosure cycles and how global dataset could facilitate sharing of information

Surabi Menon, ClimateWorks (Co-Chair)
Todd Edwards, Mission 2020 (Co-Chair)
Matthew Phillips, UNFCCC (Co-Chair)
Ivan Jose Vejar Pardo, COP 25 Presidency
