

CLIMATE NEUTRAL NOW PLEDGE APPENDIX

Thank you for making a pledge to Climate Neutral Now. To validate your pledge, please complete the form below by answering each one of the following questions and send this document to the UNFCCC secretariat at ClimateNeutralNow@unfccc.int

Please refer to the [explanatory document](#) for further information on how to complete this appendix.

STEP 1: MEASURE YOUR GREENHOUSE GAS EMISSIONS

1. What is the reporting period for this appendix? (please indicate the calendar or fiscal year, or another period as applicable)

☒ 01/01/2019 – 31/12/2019

☐ One-off initiative

2. What standard or methodology are you using when quantifying your GHG emissions?

Other

The approach used is based on the French methodology for GHG Accounting with the use of national emission factors from ADEME. The methodology has been adapted to facilitate the annual update and the tracking with our internal tools.

3. Which categories are included in your estimation of emissions?

- ☒ Electricity generation
- ☒ Heat generation
- ☒ Heat consumption
- ☒ Electricity consumption
- ☒ Fuel consumption for purposes other than heat or electricity generation
- ☒ Air travel
- ☒ Transport by car
- ☒ Public transport by bus
- ☒ Public transport by taxi
- ☒ Public transport by train
- ☒ Other modes of public land transport

- ☒ Waste
- ☒ Water consumption

Please use the following space to provide more details as required, or to indicate **other** categories not listed above, such as Scopes 1, 2 and 3 according to the GHG Protocol:

We have decided to include as many categories as possible in our emissions estimates, within the limits of the information and emission factors available to us.

That is why, in addition to the categories listed in the previous question, we have also estimated other SCOPE 3 categories in order to include emissions resulting from the purchase of goods (electronic equipment, meals, protective equipment, etc.) and services (mailing, banking, insurance, etc.), from our digital activities (sending e-mails, downloading data, internet queries, videoconferencing, etc.).

Concerning the uncertainty related to the emission factors and the data, we have opted for the high uncertainty in the total calculation to be as safe as possible (i.e for an emission factor with $\pm 50\%$ of uncertainty, we choose to estimate the emission with the $+50\%$). Therefore, our carbon footprint is likely to be overestimated.

4. Is your GHG data publicly available? If yes, please provide a web link or a copy of the report.

- ☒ No
- ☐ Yes

If yes, please specify here.

5. Which GHGs are included in your estimation?

- ☒ Carbon dioxide (CO₂)
- ☒ Methane (CH₄)
- ☒ Nitrous oxide (N₂O)
- ☒ Hydrofluorocarbons (HFCs)
- ☒ Perfluorocarbons (PFCs)
- ☒ Sulphur hexafluoride (SF₆)

The emission factors from the base we used for our estimation ("Base Carbone ADEME") includes all the GHGs mentioned above.

6. What is the amount of total emissions?

53

Tons of CO₂ equivalent

STEP 2: REDUCE YOUR EMISSIONS

1. Do you have a greenhouse gas emissions reduction target? If yes, please indicate it.

☐ No

☒ Yes

We aim to base our reduction target on the recommendations of IPCC scientists to limit the rise in the global average temperature below 2°C (Science Based Targets).

In accordance to this principle, our goal for 2020 is to reduce our emission by 7% (49 tons) in order to cope with the goals of -55% by 2030 that we derived from the Science Based Target tool for our activity.

2. Please list your greenhouse gas emissions reduction actions here.

We try to reduce our emissions as much as possible by:

- Choosing a renewable energy supplier in our office and for our website
- Promoting home-to-work trips in soft mobility (walking, cycling...)
- Promoting "home-office"
- Preferring videoconferencing to physical travel when it is possible
- Preferring travel in train and other public transportation instead of using cars
- Limiting water consumption and waste production in our workplace
- Making our equipment last as long as possible
- Buying equipment (screens, laptops...) which have been repackaged (re-employment) instead of new one
- Working on reducing our digital emissions
 - Avoiding the printing of document, trying to reduce the number of requests made on internet (internally hosted server, direct requests...), limiting the number and weight of emails sent, and more generally by adopting good digital practices in order to respect the principle of "digital sobriety"...
- Trying to raise awareness of our client, partners on those subject...
- Etc...

STEP 3: OFFSET YOUR UNAVOIDABLE EMISSIONS

1. Which categories are being compensated with offsets?

☒ All measured categories

☐ Some of the measured categories, please select from below

☐ Electricity consumption

- ☐ Electricity generation
- ☐ Heat generation
- ☐ Fuel consumption for purposes other than heat or electricity generation
- ☐ Air travel
- ☐ Transport by car
- ☐ Public transport by bus
- ☐ Public transport by taxi
- ☐ Public transport by train
- ☐ Other modes of land transport
- ☐ Waste
- ☐ Water consumption

Please use the following space to provide more details as required, or to indicate **other** scopes not listed above, such as Scopes 1, 2 and 3 according to the GHG Protocol::

[Please enter any comments here.](#)

2. If you are using other offsets in addition to UN Certified Emissions Reductions (CERs), please indicate which ones.

☒ No

☐ Yes

[If yes, please specify here.](#)

3. How many tons of CO2 equivalent are you offsetting during this period?

53

tons of CO2 equivalent

4. How many CERs are you using during this period?

53

CERs

5. Which platform did you use to purchase the CERs?

☒ United Nations Carbon offset platform

☐ Others

[If others, please specify here.](#)

6. Please provide proof of purchase/cancellation of the CERs here or attach it to your e-mail or provide a link to a relevant public registry/website.

We bought 5 CER in 2019 (5 finalized projects). Then in 2020, after calculating 2019 emissions, we bought 48 additional credits to compensate all our (measured) emissions.

Climate Change

DATE: 14 JUNE 2019
REFERENCE: VC8877/2019

VOLUNTARY CANCELLATION CERTIFICATE

Presented to

ATMOTERRA

Reason for cancellation

I am offsetting greenhouse gas emissions for my company

Number of units
cancelled

1 CERs

Equivalent to 1 tonne(s) of CO₂

Start serial number: TH-5-9063741-1-1-0-5098
End serial number: TH-5-9063741-1-1-0-5098

The certificate is issued in accordance with the procedure for voluntary cancellation in the CDM Registry. The reason included in this certificate is provided by the cancellor.
