INITIAL REPORT

Challenges on reporting
specific elements of
cooperative approaches

Challenges for each report vs cooperative approach

**Initial
Report**

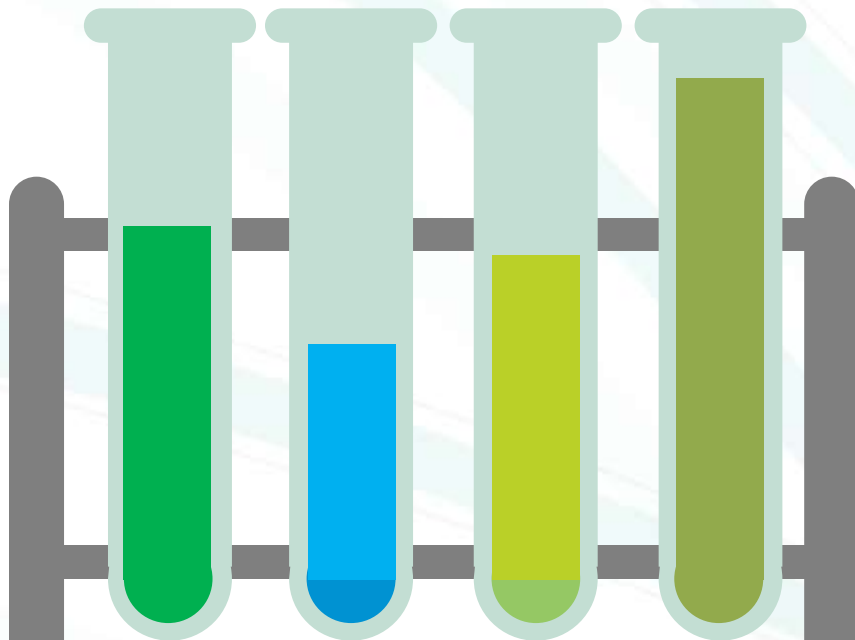

What is a cooperative approach?

- Activity vs Agreement
- Can we define a middle ground?

**Updated
Initial
report**

**Update in
the BTR**

Avoid duplication of information between the updated initial report and the information updated in the BTR.

Additional reflections

Parties involved in a cooperative approach must establish criteria on which compliance with environmental integrity is nationally assessed?

National regulations and institutional arrangements must minimize impacts, and to demonstrate that the activities are aligned with the NDC and long-term objectives

Protocols or manuals must be created for activities developers to help them to comply with the main principles
