Clarification on the Table 2: Actions

- Definition of **“Article 6 database record ID”** (column B) should be provided with indication of whether it should be filled by reporting Parties or by the secretariat.

Clarification on the Table 2: Actions

- It is not clear about the differences between “First unique identifier” and “Underlying unit block start ID” and “Last unique identifier” and “Underlying unit last block end” (column D-G).

Clarification on the Table 2: Actions

- New terminologies such as **“Action type”** (column Z) and **“First transfer definition”** (column W) are difficult to understand.

Clarification on the Table 3: Holdings

- Explanation of “Holdings” could be added** (e.g., whether it refers to ITMOs, which the Acquiring Party keeps without taking any actions or any other status).

Table3: Holdings																		
Article 6 database record ID	Cooperative approach ^a	Unique identifier				Metric and quantity				ITMO details			Authorization

Area of further improvements

- It is suggested to include examples with dummy numbers to enhance understanding of reporting items.
- More explanation on each terminology such as “Underlying unit block start ID” is helpful (column D-G).
- “Purposes for authorization” (column U) and options for “First transfer definition” (column W) could be improved.
- List of options for “Action type” (column Z) with clear definitions such as transfer, cancellation etc., could also be helpful.
