

Agenda item 5: Focus area or theme of the PCCB for 2018

Activities:

During its 2nd meeting and based on the outcomes of the 7th Durban Forum the PCCB agreed:

- a) in order to better collect and analyse information, and diffuse lessons learned and experiences, to enhance its collaboration with the operating entities of the Financial Mechanism, the constituted bodies of the Convention as well as other organizations and initiatives promoting capacity-building support for NDC implementation;
- b) To recognize and continue to address capacity-building gaps related to cross-cutting issues, such as human rights, just transition, gender responsiveness and indigenous people's knowledge, in the context of NDC implementation;
- c) To pursue the organization of activities (e.g. a side event at COP 24 or a workshop) on the issue of human rights and climate change, in order to better understand capacity gaps and to identify actions to fill those gaps.
- d) To create an area in the capacity-building portal dedicated to the integration of cross-cutting issues in climate change plans, such as Action for Climate Empowerment, gender responsiveness, indigenous people knowledge and human rights, subject to availability of resources.
