

CGE hands-on training workshop for the African Region on institutionalization of data management for national GHG inventory

16 to 18 September 2019

Algiers, Algeria

Agenda version: 16 September 2019

DAY 1		
Time	Agenda items	Session Chair
08:00-09:00	Registration	
09:25-10:00	Opening session of the workshop <ul style="list-style-type: none"> - Welcome remarks (<i>Mr. Jigme, UNFCCC secretariat</i>) - Workshop opening remarks (<i>Mr. Gervais MADZOUS, CGE Chair</i>) - Welcome remarks (<i>Mr. Eric OVERVEST, UN Resident Coordinator in Algeria</i>) - Key note address (<i>Mr. Lazhar SOUALEM, Director General, Ministry of Foreign Affairs, Government of Algeria</i>) 	
10:00-10:30	Coffee break	
10:30-11:00	Introductory session <ul style="list-style-type: none"> A. Introduction – workshop participants B. Overview of workshop – Objectives, agenda and expectations (<i>Ms. Jihye CHOI, UNFCCC secretariat</i>) 	<i>Mr. Jigme, UNFCCC secretariat</i>
11:00-12:30	Technical Session I: Scene-setting – Recap of the pre-workshop webinar <i>This session will cover a recap of the materials covered during the pre-workshop webinar and provide space for the participants to ask questions that they may have as a result of further reflection on the topic covered.</i> <ul style="list-style-type: none"> A. Recap of the existing MRV arrangements under the Convention and the enhanced transparency framework under Paris Agreement (<i>Ms. Sandra Motshwanedi, CGE member – South Africa</i>) B. Recap of national GHG inventories: key data types to include in the inventory and their sources (<i>Ms. Olia GLADE, GHGMI</i>) 	<i>Mr. Gervais MADZOUS, CGE Chair</i>
12:30-13:00	Technical Session II: Institutional arrangements and data management – techniques, approaches and tools <i>This session provides overview of key components of national institutional arrangements for preparing and submitting national reports. It also includes examples of institutional arrangements put in place by some developing countries, which managed to support the increased frequency of the preparation of national reports. The session uses the following logic: good practices and key requirements for IAs → approaches and tools to implement good practices → how others are doing it.</i> <ul style="list-style-type: none"> A. Presentation (20 min): Institutional arrangements: compilation and documentation (<i>Ms. Olia GLADE, GHGMI</i>) 	<i>Mr. Komlan Edou, CGE member – Togo</i>

Time	Agenda items	Session Chair
13:00-14:00	Lunch break (and DSA disbursement)	
14:00-15:50	<p>Continued technical Session II</p> <p>B. Presentation (20 min): Institutional arrangements: good practices and lessons learned (<i>Mr. Athmane Mehdaji, CGE member – Algeria</i>)</p> <p>C. Presentation (20 min): Overview of IA techniques, approaches and tools (<i>Ms. Olia GLADE, GHGMI</i>)</p> <p>D. Small Group/Table Discussion (30 min): Review and answer discussion questions related to the Ghana case-study example of a developing country's IAs (<i>Ms. Olia GLADE/Ms. Danielle VAUGHAN-GRIFF, GHGMI</i>)</p>	<i>Mr. Komlan Edou, CGE member – Togo</i>
15:50-16:20	Coffee break	
16:20-17:30	<p>Technical Session III: Group baseline mapping exercise</p> <p><i>Summarize and update how data is managed under the current institutional arrangements (based on homework submissions), including software tools, processing procedures, stakeholder engagement, challenges, experiences, and lessons learned. (Ms. Olia GLADE/Ms. Danielle VAUGHAN-GRIFF, GHGMI)</i></p> <p>A. Small Group Discussion (60 min):</p> <ol style="list-style-type: none"> a. Break into sector groups and briefly present your homework data maps. b. Discuss your map similarities, differences? After seeing other data maps, how would you revise your map? c. Discuss the major input-output data flows for the whole sector and identify data/process gaps for the next sessions: <ul style="list-style-type: none"> • Where are the data associated with different emission sources coming from? • Who does the data processing? • Which tools/software are used to process the data? • What happens to the processed data? 	<i>Ms. Rehab Hassan, CGE member – Sudan</i>
End of day 1		

DAY 2		
Time	Agenda items	Session Chair
09:00-10:30	<p>Technical Session IV: Group functional design exercise – <i>Brainstorm the system scope, functions and capabilities that would be desired for a national MRV data management system. (Ms. Olia GLADE/ Ms. Danielle VAUGHAN-GRIFF, GHGMI)</i></p> <p>A. Presentation (30 min): Data management system and their overview; what is meant by functional, non-functional elements; decision tools in prioritization of design elements (i.e. how-to ID needs, scoping levels, reporting outputs)</p> <p>B. Small Group Discussion (60 min): What functional and non-functional elements or capabilities would you design for a national MRV data management system, identifying minimum requirements. Then categorize them as “must-have”, “do without”, etc. (i.e. the “MoSCoW rules”)</p>	<p><i>Ms. Sandra Motshwanedi, CGE member – South Africa</i></p>
10:30-11:00	Coffee break	
11:00-13:00	<p>Technical Session V: Quality control/quality assurance of data in-line with the TACCC quality standards and IPCC good practices on QA/QC and verification <i>This session will address the QA/QC requirements associated with IPCC good practices and the inventory quality standards (TACCC = transparency, accuracy, completeness, comparability, consistency) and explain commonly used and recommended techniques, approaches and tools to implement these practices. This will be followed by the hands-on exercise aiming to identify and categorize the QA/QC issues in the given case study and discuss how they best could be mitigated using the suggested techniques, approaches and tools. (Ms. Olia GLADE/ Ms. Danielle VAUGHAN-GRIFF, GHGMI)</i></p> <p>A. Presentation (30 min): Techniques, approaches and tools to address QA/QC</p> <p>B. Hands-on exercise in small groups (60 min): Do a QC of an example case-study report and flag issues, based on the principles and procedures described in part A and linking each issue with the TACCC principle assigned to your small group. Work through other TACC principles as time allows.</p>	<p><i>Mr. Athmane Mehdaji, CGE member – Algeria</i></p>
13:00-14:00	Lunch break	

Time	Agenda items	Session Chair
14:00-15:30	<p>Technical Session VI: Data documentation and archiving <i>This session will explain the IPCC good practices in archiving and documentation associated with GHG data collection and processing and include a practical exercise to identify issues associated with archiving and documentation in a given case study. (Ms. Olia GLADE/ Ms. Danielle VAUGHAN-GRIFF, GHGMI)</i></p> <p>A. Presentation (30 min): Data collection and documentation to ensure transparency principle, introduction to example data collection exercise</p> <p>B. Hands-on Exercise (60 min):</p> <p>d. Small Groups: Document a particular data type to resolve a selected data documentation issue:</p> <ul style="list-style-type: none"> • Identify 1-2 issues associated with data collection and processing in the case study and discuss how these could be resolved (10 min) • Identify the data attributes so that data documentation is transparent (10 min) • Design a simple template reflecting identified data attributes and record relevant data values in the template (20 min) • Draft a simple questionnaire/form that would allow a person to populate the designed template correctly based on the list of the data attributes (20 min) 	<p><i>Ms. Rehab Hassan, CGE member – Sudan</i></p>
15:30-16:00	<p>Coffee break</p>	
16:00-17:30	<p>Technical Session VII: Data gaps <i>This session will explain practical ways to resolve issues associated with missing data for some/most years of the time series in-line with the inventory guidelines and international good practices followed by the hands-on exercise to apply different data splicing techniques to fill-in data gaps using in a given case study. (Ms. Olia GLADE/ Ms. Danielle VAUGHAN-GRIFF, GHGMI)</i></p> <p>A. Presentation (30 min): Techniques, approaches and tools to address data gap in terms of coverage and time-series</p> <p>B. Hands-on exercise in small groups (60 min): Work with provided case study to remedy gaps in the time-series:</p> <ul style="list-style-type: none"> • Following the guidance provided in part A and the supplementary materials, identify most appropriate way(s) to remedy the lack of data. Justify your choice of method. • Apply the selected splicing technique (use the supplementary materials for external data sets as required) and resolve the issues with time-series consistency 	<p><i>Mr. Komlan Edou, CGE member – Togo</i></p>
<p>End of day 2</p>		

DAY 3		
Time	Agenda items	Session Chair
09:00-10:30	<p>Session VIII - Clinic: Brainstorming session in smaller groups (<i>Mr. Jigme/Ms. Jihye CHOI, UNFCCC secretariat</i>)</p> <p><i>This is an interactive session whereby problems and challenges shared during the course of the workshop will be discussed by the participants and critical or most common problems and challenges will be taken-up within groups in order to share experiences, lessons learned and identify possible solutions or alternatives to the problems or challenges to further share with the rest of the participants at plenary.</i></p> <p>Format of Clinic: Participants will form smaller groups and assign a theme to each group and work through their own country cases following one of the following themes:</p> <ol style="list-style-type: none"> a. Institutional arrangements b. Data collection c. QA/QC <ol style="list-style-type: none"> 1. In each group, the participant will take a case study of one or two countries, which are represented by the group members. 2. Using the chosen case study and the given theme, each group will: <ul style="list-style-type: none"> • Identify a case owner to present the details of its current data management arrangements and the gap with its design needs; • Other group members provide their reflection on how the gap may be addressed; • Discuss how regional cooperative expert communities could help resolving these issues. • Response from the case owner, including potential next steps that could help address the issue. 	<p><i>Ms. Sandra Motshwanedi, CGE member – South Africa</i></p>
10:30-11:00	Coffee break	
11:00-12:30	<p>Session VIII continued: Revisit group functional design exercise – Using combined work from Day 1 as a starting place. Working as individuals review the group results and tailor for your own country's circumstances. This may involve adjusting ranking or categories. The goal is to walk away from this week's workshop with your own starting place for a data management system for your country. (<i>Ms. Olia GLADE/Ms. Danielle VAUGHAN-GRIFF, GHGMI</i>)</p> <ul style="list-style-type: none"> • Use Excel file circulated from Day 1 on functional and non-functional attributes 	<p><i>Mr. Athmane Mehdaji, CGE member – Algeria</i></p>
12:30-13:30	Lunch break	
13:30-15:00	<p>Session IX: Opportunities for synergy: (<i>Ms. Jihye CHOI, UNFCCC secretariat</i>)</p> <p><i>This session will identify and highlight areas where possible synergies exists, at the national level, between MRV/transparency, including national GHG inventories and tracking progress of NDCs, and indicators to monitoring the UN sustainable development goals.</i></p> <p>A. Presentation (30 min): Opportunities for synergy between implementing MRV/ETF and monitoring progress towards SDGs</p>	<p><i>Mr. Gervais MADZOUS, CGE Chair</i></p>

	B. Hands-on exercise in small groups (60 min): Identifying potential synergy in the SDG monitoring process and reporting process under MRV/ETF at the national level	
15:00-15:30	Coffee break	
15:30-16:45	Closing session: <ul style="list-style-type: none">• Information on other training and capacity-building opportunities (<i>Ms. Jihye CHOI, UNFCCC secretariat</i>)• Workshop evaluation and feedback, including identifying topics, if necessary, for the post-workshop webinar (<i>Mr. Jigme, UNFCCC secretariat</i>) Closing remarks <i>Host country</i> <i>Mr. Gervais MADZOUS, CGE Chair</i>	<i>Mr. Jigme, UNFCCC secretariat</i>
End of day 3
