<sup>a</sup> Parties should fill in a separate table for each year, namely 2015 and 2016, where 2018 is the reporting year.

<sup>b</sup> Parties should explain, in their biennial reports, the methodologies used to specify the funds as disbursed and committed. Parties will provide the information for as many status categories as appropriate in the following order of priority: disbursed and committed.

<sup>c</sup> Parties may select several applicable sectors. Parties may report sectoral distribution, as applicable, under "Other".

<sup>d</sup> This refers to support to multilateral institutions that Parties cannot specify as being climate-specific.

<sup>e</sup> Parties should explain in their biennial reports how they define funds as being climate-specific.

<sup>f</sup> Please specify.

<sup>g</sup> This refers to funding for activities that are cross-cutting across mitigation and adaptation.

Table 9 Description of selected projects or programmes that promoted practicable steps to facilitate and/or finance the transfer of, or access to, environmentally sound technologies

<p><b>Project/programme title:</b> 61000983 - DemoEnvironment III 2015-19</p> <p><b>Purpose:</b> Sida has provided funding to DemoEnvironment, a challenge fund with the purpose of increasing technology transfers to a selection of developing countries in order to improve living conditions and health of people in poverty, enhance the ability to adapt in the cooperation countries, and decrease negative impact on the environment and climate. Activities are undertaken by public and private entities, including companies and NGOs.</p> <p><b>Recipient country:</b> Developing countries, unspecified (calls open for Kenya, Mozambique, Tanzania, Zambia, Bangladesh, Cambodia, Bosnia &amp; Hercegovina, Serbia, Georgia, Moldova, Ukraine, Bolivia, Colombia and Guatemala)</p> <p><b>Description:</b> DemoEnvironment is a challenge fund with the purpose of increasing technology transfers to a selection of developing countries in order to improve living conditions and health of people in poverty, enhance the ability to adapt in the cooperation countries, and decrease negative impact on the</p>
---

environment and climate. The dissemination of the solutions is also expected to contribute to a more gender equal society. The programme is financed by the Swedish International Development Cooperation Agency (Sida) and operated by the Swedish Agency for Economic and Regional Growth (Tillväxtverket).

**Factors that led to project/programme's success:**

Early support for feasibility studies (planning grant) and support for a demonstration facility (demonstration grant) created opportunities for new business opportunities and for knowledge and skills related to new cleantech to spread beyond the project partners (meeting the needs and priorities of both suppliers and buyers).

**Technology transferred:**

The fund has been able to provide relevant technology in order to solve local issues to the benefit of a broad target group, including the more poor proportion of the population in the implementing countries. In 2020, it was concluded that a majority of the projects carried out with support from the DemoEnvironment challenge fund have successfully implemented new technologies, which in turn can be established in the recipient countries in the future. DemoEnvironment has for example i) supported the implementation of technology enabling the production of roof tiles made from sand and recycled plastic in Kenya, while creating employment opportunities for local women; ii) enabled technology transfer for sustainable forestry in Mozambique; and iii) financed technology for the production of briquettes from faecal waste in Kenya, which has created employment opportunities and improved sanitation practices

**Technology transferred:**

The fund has been able to provide relevant technology in order to solve local issues to the benefit of a broad target group, including the more poor proportion of the population in the implementing countries. In 2020, it was concluded that a majority of the projects carried out with support from the DemoEnvironment challenge fund have successfully implemented new technologies, which in turn can be established in the recipient countries in the future. DemoEnvironment has for example i) supported the implementation of technology enabling the production of roof tiles made from sand and recycled plastic in Kenya, while creating employment opportunities for local women; ii) enabled technology transfer for sustainable forestry in Mozambique; and iii) financed technology for the production of briquettes from faecal waste in Kenya, which has created employment opportunities and improved sanitation practices.

**Total funding (SEK):** 4224000

**Years in operation:** 2015-2019

**Project/programme title:**

51190121 - Power Africa - Beyond the Grid Fund Zambia (REEEP)

**Purpose:**

As part of Power Africa, the Beyond the Grid Fund, aims to allow for clean energy access and accelerate private-sector growth in energy generation and distribution. The approach was to stimulate the emergence of new business models while demonstrating sustainability over time. Envisioned eligible ventures include power generation (from clean and renewable sources), distribution and service provision, equipment supply, utility approaches, consumer financing (e.g. pay-as-you-go and rent-to-own) models as well as investments in the efficient use of energy. The Fund is administered by the Renewable Energy and Efficiency Partnership (REEEP) on behalf of the Swedish Embassy in Zambia and with the (non-financial) support of Zambian partners such as the Rural Electrification Authority (REA) and the Energy Regulation Board (ERB).

**Recipient country:**

Zambia

**Description:**

The contribution includes support and advise to contracted companies, and advisory support to the Zambian government in managing a coordination platform for off-grid energy, the "Off-Grid Task Force". Since 2017, the Beyond the Grid Fund has brought clean, affordable off-grid energy access to over 800,000 Zambians, and in 2020 the project expanded to four new countries, with an expanded partnership managed by Nordic Environment Finance Corporation. Beyond the Grid Fund has also won the prestigious Ashden Award for Innovative Finance, and the 2019 UN Climate Action Award.

**Factors that led to project/programme's success:**

Beyond the Grid Fund for Zambia (BGFZ) was launched in 2016 by the Swedish Embassy in Lusaka with the aim to radically expand access to clean off-grid energy, such a home solar systems and mini-grids, in rural and peri-urban Zambia. BGFZ was co-designed by the Renewable Energy and Energy Efficiency Partnership (REEEP), and Sweden. In Zambia, BGFZ has kick-started a market for affordable, reliable and clean energy services provided by the private sector. Using an innovative results-based financing and risk-sharing approach called Social Impact Procurement, the Beyond the Grid Fund for Zambia (BGFZ) has awarded results-based contracts to four companies with pro-poor business models deemed ready for rapid scale-up. In two years these companies have connected nearly 800 000 people to basic electricity services. This is in all Zambian provinces, even the most remote areas. The Fund's companies have also created 1500 new jobs and raised USD 24 million in co-financing. In addition, the fund works closely with the government, the renewable energy industry and other development partners in its efforts to build a thriving market for off-grid energy services. The fund is now being expanded to more countries in Sub-Saharan Africa. BGFZ has exceeded the expectations regarding access to basic electricity services. This contribution is specifically for the services provided by REEEP during the first phase of the BGFZ. REEEPs role in the programme has been essential. Sida kept overall control of the programme development while REEEP provided competent support in key areas such as monitoring and follow up of the contracted companies, as well as market scoping, and dialogue with market actors, public and private. The services covered the design of the procurement round (in dialogue with Sida and with support from e.g. the USAID Power Africa); support to the embassy in the due diligence and contract award process and during implementation and follow up of the contracts. REEEPs assignment also included support to the off grid energy coordination platform in Zambia (Off Grid Task Force).

**Technology transferred:** Clean, affordable off-grid energy access to over 800,000 Zambians.

**Sector:** Energy

**Sector: Total funding (SEK):** 21 247 914

**Years in operation:** 2016-2019

**Project/programme title:**

Business Accelerator Program Indonesia (BAPI)

**Purpose:**

The program facilitates technology transfer from Sweden to Indonesia within the renewable energy and energy efficiency sector.

**Recipient country:**

Indonesia

**Description:**

The Business Accelerator Program Indonesia (BAPI) provides support to Swedish small and medium sized enterprises (SMEs) to enter the Indonesian market through the means of matchmaking with Indonesian stakeholders and market knowledge support. The SMEs offer technologies within renewable energy, energy efficiency and smart grid solutions. The BAPI program is a cooperation between the Swedish Energy Agency, Business Sweden Jakarta and a number of Indonesian stakeholders: the Indonesian Energy Efficiency Society (MASKEEI), the Indonesian Renewables Energy Society (METI) and the Indonesian Employers Association (APINDO), among others. Over 20 Swedish companies have been introduced to the Indonesian market through the BAPI program.

**Factors that led to project/programme's success:**

Excellent network in Indonesia established through the cooperation between Swedish and Indonesian government entities and local Indonesian industry organisations, such as e.g. the energy efficiency and renewables energy societies respectively.

**Technology transferred:**

Technology within energy efficiency and renewable energy. Swedish companies that have penetrated the Indonesian market provide e.g. wind turbine technology, technologies for solar PV, geothermal renewable energy systems, and biogas technologies.

**Sector:** Energy

**Sector: Total funding (SEK):** 7800000

**Years in operation:** 2015-2020

Table 10 Provision of support for technology development and transfer

Recipient country and/or region	Targeted area	Measures and activities related to technology transfer	Sector*	Source of funding for technology transfer (public and/or private)	Activities undertaken by (public and/or private)	Status (Implemented; Planned)	Additional information
China	Mitigation and Adaptation	Memorandum of Understanding between the energy ministers in China and Sweden	Energy	Private and Public	Private and Public	Implemented	In 2017, a Memorandum of Understanding (MoU) was signed by the energy ministers on Swedish-Chinese cooperation in the energy area. The Swedish Energy Agency's efforts to promote collaboration and sustainability include setting up a Cleantech Hub program in Shanghai, which was inaugurated by the energy minister of Sweden in 2017. The program's long-term vision is to accelerate the expansion of cleantech innovations in order to decrease CO2-emissions and increase energy efficiency and security. In 2019, a focused effort to promote Swedish sustainable techniques within district heating was initiated. The aim is to mitigate emissions of greenhouse gases through the uptake of Swedish innovative heating and cooling technologies.
Indonesia	Mitigation and Adaptation	Memorandum of Understanding between the energy ministers in Sweden and Indonesia and the Business Accelerator Program Indonesia	Energy	Private and Public	Private and Public	Implemented	There is a Memorandum of Understanding (MoU) on energy cooperation between the governments of Sweden and Indonesia since 2017. A prioritized area within the Joint Working Group under the MoU is waste management and waste-to-energy. In 2018, the Swedish Energy Agency supported the city of Probolinggo to develop an action plan for their waste management. Since 2020, Sweden and the Province of West Java is exploring the possibility for technology transfer on energy recovery from waste. Already in 2015, the Swedish Energy Agency set up the program Business Accelerator Program Indonesia (BAPI), supporting Swedish SMEs to enter the Indonesian market through

							the means of matchmaking with Indonesian stakeholders and market knowledge support. In 2017-2020, 15 Swedish companies were introduced to the Indonesian market through the BAPI program, offering technologies within energy efficiency, renewable energy and smart grid solutions.
Global	Mitigation	Mission Innovation - Avoided Emissions Framework (AEF)	Other: General Environment Protection	Private and Public	Private and Public	Implemented	The Avoided Emission Framework is a part of the Mission Innovation action plan and is led by Sweden. The framework aims to support investors and funders to identify system solutions and technologies that have significant ability or potential to contribute to avoided emissions. In 2017-2020, the Avoided Emissions Framework assessed 275 solutions with the potential of avoiding 7,8 Gigaaton of emissions.
India	Mitigation and Adaptation	India-Sweden Innovations Accelerator and Sustainability by Sweden – Showroom India	Energy	Private and Public	Private and Public	Implemented	The Swedish Energy Agency has participated in the program India-Sweden Innovations Accelerator (ISIA) since 2013. The program supports business-oriented innovation and dissemination of technologies for sustainable energy systems by promoting networking and knowledge sharing between Swedish and Indian actors. In 2017-2020, 15 new Swedish innovations were introduced to the Indian market through the ISIA. Throughout the program, more than 50 Swedish small and medium-sized enterprises (SMEs) have been introduced to the Indian market. In December 2018, the cleantech showroom Sustainability by Sweden – Showroom India was established as a part of ISIA at The Trade Commissioner’s office at the Embassy of Sweden in New Delhi, India. The showroom has organised several digital workshops to showcase Swedish innovative green energy solutions with a focus on how these can be implemented to the context in India.

Developing countries, unspecified	Mitigation	61050900 - ESMAP 2017-2020 Energifund WB	Energy	Public	Public	Implemented	<p>ESMAP is a World Bank Umbrella Trust Fund that aims to contribute to i) achieving universal energy access by 2030, in line with SDG 7, and ii) advancing decarbonisation, in support of international commitments on climate change. The program is implemented within the framework of the WB's mission of ending extreme poverty and boosting shared prosperity. The program is divided into six program areas that together contribute to achieving the program's two overarching development goals. Four of the six program areas are thematic, focusing on increased access to clean cooking (a fund that is new to the program) and electricity, promoting investments in renewable energy, and accelerating decarbonisation. In addition, there are two cross-cutting program areas: strengthening the foundation for the energy transition, and energy data and analytics. The six program areas relate to each other and are connected to varying degrees. In addition to the new clean cooking fund, the structure of parts of the cross-cutting program areas has also changed compared to the previous program period. For example, closing gender gaps in energy has been lifted as a cross-cutting theme. The relative size of each program area has also changed. Progress in all six of the program areas is measured through indicators defined in the program's Results Framework, such as mobilization of external capital, number of individuals who have gained access to renewable energy and that have been reached by the results of the program, anticipated annual greenhouse-gas emission reductions, and anticipated energy and fuel savings. ESMAP is intended to play a critical role in forming the WB's efforts to achieve the goals of its International Development Association (IDA) and its Climate Change Action Plan. Supporting the WB's regional advisory and analytical functions, being a global center for knowledge</p>
-----------------------------------	------------	--	--------	--------	--------	-------------	--

							creation and management as well as expertise, and influencing and informing the WB's investments are key parts of ESMAP's mandate.
Burkina Faso	Adaptation	11847 - Weoog Paani pro-poor forestry in Burkina Faso 2019-2023	Forestry	Public	Public and private	Implemented	The project Weoog Paani supports local communities, municipalities and small-scale enterprises in (i) putting in place democratic and equitable management systems for local forests, (ii) improving the quality (bio-diversity, species composition, growth rates, etc.) of the forests and (iii) strengthening value chains (including small-scale enterprises) for non-timber forest products. Innovative methodologies and techniques are used in all three components. Small-scale producers as well as small-scale entrepreneurs are trained in managing the forests, the production, the processing and the marketing either by themselves or through their organizations.
Burkina Faso	Adaptation	11406 - Beog-Puuto family farming Burkina Faso	Agriculture	Public	Public and private	Implemented	The project aims at restoring eroded abandoned farmland, increasing productivity in family farms and strengthening resilience of 50,000 vulnerable households in dry areas in northern and eastern Burkina Faso. The impact is expected to be increased productivity in family farms through a positive systems change, stronger resilience of vulnerable households to climate change, higher income, improved situation for women and strengthened incentives to young men to refuse militant extremism. The project aims to (i) recover eroded farmland and increase productivity and to (ii) sustainably improve the soil status and increase productivity in family farms through a broad application of traditional water and soil conservation techniques. Groups of farmers are trained in running the agro-ecology pilot farms as well as farmer schools on their own.

Asia, regional	Adaptation	10774 - ADPC Disaster risk reduction 2017-2022	Other: Other multisector	Public	Public	Implemented	Asia Disaster Preparedness Center (ADPC) is carrying out a programme focusing on building resilience through inclusive and climate-adaptive disaster risk reduction. The aim is to enhance regional capacity for cooperation on disaster and climate risk management with an overall objective of building resilience of people in the Asia-Pacific region. This will be achieved by building on current good practices and providing technical assistance to selected governments, CSOs and regional bodies. Key focus areas include: emergency preparedness and humanitarian response management; facilitating the use of risk information and sex-age-disability-disaggregated data by policy makers and disaster managers; integrating disaster and climate change concerns into development policy and programs; promoting inclusion and protection-sensitive approaches in risk reduction and disaster preparedness, promoting gender equality and women leadership for risk resilience; and enhancing the role of the Regional Consultative Committee on Disaster Management (RCC) to support member countries on implementing global frameworks and serving as a conduit for south-south learning, transboundary risk reduction and knowledge sharing. ADPC is implementing the intervention together with the Swedish Contingency Agency, MSB, Stockholm Environment Institute, and the Raoul Wallenberg Institute.
Eastern Africa, regional	Adaptation	51050080 - BecA 2017-2022	Other: General environmental protection	Public	Public	Implemented	The support to the research center Biosciences for eastern and central Africa (BecA) aims at increased food production and security in Africa using advanced biotechnology, including training, research and application. Through strategic partnerships with national, regional and international partners, scientific results are communicated and applied in innovations for the benefit of universities and research institutions but

							also in the end for small scale farming and the private sector.
Europe, regional	Mitigation	55030134 - E5P Eastern Europe Energy Efficiency and Environment Partnership - Regional	Other: General environmental protection	Public	Public and private	Implemented	The objectives of E5P are to improve energy efficiency, reduce CO2 and green house gas emissions, and reduce impact on environment from i.a. waste. The contribution concerns the extension of the E5P to include (beside Ukraine) also Moldova, Georgia och Armenia.

Table 11 Provision of capacity-building support<sup>1</sup>

<i>Recipient country/ region</i>	<i>Targeted area</i>	<i>Programme or project title</i>	<i>Description of programme or project</i>	<i>Additional information</i>
Bangladesh	Adaptation	51060057 - Local Government Initiative on Climate Change (LoGIC)	The project goal is improved and inclusive local level planning and a strengthened financing mechanism for community-based climate change adaptation solutions through local governments. The project is expected to result in i) strengthened capacity of local governments, households and other local stakeholders to develop local plans that integrate climate change adaptation measures and disaster risk management; ii) established financing mechanism to fund local governments and communities for implementing climate change adaptation measures; and iii) experience and evidence inform and contribute to further improvements in policies and practices for Union Parishads and national systems in relation to climate change adaptation.	
Developing countries, unspecified	Adaptation	10470 - GFDRR-WB 2016/17-2019/20	The Global Facility for Disaster Reduction and Recovery (GFDRR) is a global partnership that helps developing countries better	<a href="https://www.gfdr.org/en">https://www.gfdr.org/en</a>

<sup>1</sup> Note that this is not a complete list

			<p>understand and reduce their vulnerability to natural hazards and climate change. GFDRR is a grant-funding mechanism, managed by the World Bank, that supports disaster risk management projects worldwide. Working on the ground with over 400 local, national, regional, and international partners, GFDRR provides knowledge, funding, and technical assistance in order to build capacity and to help vulnerable nations improve resilience and reduce risk. E.g. in FY20 more than 130 countries were supported for improved government institutional capacity in disaster and climate risk-informed policy design and analysis.</p>	
Developing countries, unspecified	Cross-cutting	11675 - UNCDF LMF-Booster 2019-2022	<p>LoCAL strengthens climate change-resilience in communities and economies by increasing financing for, and investment in, climate change adaptation at the local level in developing least developed countries (LDCs). LoCAL supports local governments in mainstreaming climate change adaptation into regular decision-making processes, development planning and resource allocation through performance-based climate resilience grants. The LoCAL</p>	<p><a href="#">Homepage - UN Capital Development Fund (UNCDF)</a></p>

			<p>Secretariat, based in UNCDF headquarters and regional offices, provides technical advice, in-country support and seed capital or initial financing for performance-based climate resilience grants to prove concept and lay the groundwork for scaling up with governments' own fiscal resources and other sources of climate finance. Capacity has also been built enabling three national entities from Benin, Cambodia and Bhutan to be accredited to the GCF, and another three are currently being accompanied through the GCF accreditation process. Twelve LoCAL countries are also being supported in preparing GCF project proposals building on the LoCAL mechanism.</p>	
Developing countries, unspecified	Mitigation	54120227 - Renewable Energy	<p>The programme is aimed at strengthening capacity at strategically selected institutions to develop policies, regulatory frameworks and other conditions for investments in renewable energy technologies and sustainable energy systems by providing energy infrastructure, taking into account the rights perspective as well as the needs and demands of people living in poverty.</p>	-

Developing countries, unspecified	Cross-cutting	13855 - The Public - Private Infrastructure Advisory Facility (PPIAF) WB 2019-2022	<p>The Public Private Infrastructure Advisory Facility (PPIAF), a multi-donor trust fund under the World Bank, aims to increase private sector investments in emerging markets by strengthening public sector capacity and thereby increase access and quality of infrastructure services to reduce poverty and achieve sustainable development. Through the initiative Climate Resilience and Environmental Sustainability Technical Advisory (CREST), Sida is supporting PPIAF and the World Bank to respond to the need that exists in the public sector institutions to better understand the climate and environmental consequences of various decisions and build the capacity to engage the private sector in a way that supports climate resilience and environmental sustainability in infrastructure and community service development. With the Sida financing, PPIAF plans to achieve a climate target of at least 70 percent of all projects in three years, which is a doubling of the World Bank and PPIAF's current strategic target of 35 percent. In addition to integration of climate aspects, the Sida financing aims to ensure that the fulfillment of the</p>	
-----------------------------------	---------------	--	--	--

			NDCs of developing countries are taken into consideration.	
Asia, regional	Cross-cutting	52190016 - International Centre for Integrated Mountain Dev. (ICIMOD), 2017-2022	Sweden provides program support to ICIMOD, an intergovernmental organisation with eight member countries in the Hindu Kush Himalayan region. The overall objective of ICIMOD's work is that men, women, and children in the region enjoy improved well-being in a healthy mountain environment. The programme aims to contribute to reduced poverty, reduced physical and social vulnerability and improvement of ecosystem services. Activities and results include development and dissemination of flood early warning systems, climate change adapted value chains, measurement, monitoring and management of air pollution,	

			strengthening of women's capacity and leadership roles in agriculture and local decision making bodies, strengthening the regional cooperation through technical exchanges and management of transboundary natural resources and increasing the global awareness of the importance of mountain areas for resilient living conditions and ecosystems. ICIMOD coordinated the HKH assessment which was published in 2020 and yielded great interest. With more than 2 000 media mentions, 580k downloads, 715 native tweets and 82 citations, the publication has the widest reach of any ICIMOD publication in the institution's history. In 2020, ICIMOD was accredited by the Adaptation Fund, the only regional organisation in Asia.	
Burkina Faso	Adaptation	12310 - FAO resilience rapid respons Burkina Faso 2018-2020	FAO has tested a combination of classic emergency humanitarian support (unconditional cash, cash for work, food aid, etc.) and activities that will rapidly strengthen vulnerable households own production capacity in agriculture, vegetable growing and animal husbandry. This project provides valuable experience for developing good practices in the "nexus" area. Vulnerable	

			households are trained in more efficient production techniques and in nutrition in order to become more resilient to external shocks.	
Burkina Faso	Cross-cutting	51200044 - ProValAB/Agricultural valorization of small dams in Burkina Faso	In Burkina Faso, 80% of the population of the population is rural and depends on rain-fed agriculture. As climate change makes the rains more erratic and increases the number and of the length of dry spells during the rainy season, small-scale irrigation has become increasingly important. The project - implemented by the Ministry of Agriculture with support from NIRAS - is creating a model for good management of small rainwater dams for production of vegetables, fruits and fish at village level but also to be used for small-scale irrigation during dry spells in the rainy season and for cattle. Burkina Faso is the country in Africa having the highest number of small rainwater dams. Small-scale producers as well as small-scale entrepreneurs are trained in managing the dams, the production, the processing and the marketing either by	-

			themselves or through their organizations.	
Rwanda	Cross-cutting	51160128 - FONERWA 2018-2021	Sida supports the Rwandan national climate and environment fund (FONERWA). The Fund has the objective to mobilise domestic and international climate finance, and secure sustainable financing to support projects that contribute to environmental sustainability, resilience to climate change and green growth. The Fund is open to line ministries and districts, civil society organisations, private entities and research institutions. The support is expected to i) provide access to sustainable and equitable finance that enables public and private entities to address climate and environment priorities; ii) improve skills of national stakeholders and CSOs in the design of project proposals; iii) result in bankable projects approved for funding by	

			<p>FONERWA board; and iv) enable implementation of projects and dissemination of lessons learned. These outcomes will be achieved by activities such as training of national CSOs by international NGOs in developing proposals and increased participation of national CSOs in addressing climate change and environmental challenges. The support from Sida specifically provides technical assistance to environmental CSOs, capacity building of FONERWA and tools for improved gender integration. The projects supported by FONERWA are often pilots, in which new innovative methods are applied, such as climate-smart production of vegetables or clean cooking. In a newly completed project, electric motorcycle taxis were introduced and recommendations were provided to the Rwandan government for continued development of electric transport.</p>

Rwanda	Cross-cutting	10058 - Capacity Development in Land Administration Lantmäteriet/RLMUA	The Swedish Mapping, Cadastral and Land Registration Authority and Rwanda Land Management and Use Authority (RLMUA) collaborate to strengthen the capacity of RLMUA to deliver efficient land administration services in accordance with the Rwanda Land Sub Sector Strategic Plan (LSSSP). The intervention contributes to enhanced environmental management by providing improved and more accessible and reliable information on land use, land rights and land use planning. This information is used for enhanced planning and policy development in order to improve environmental conditions and readiness to handle natural disasters, as well as sustainable management of natural resources. The collaboration has among other things contributed to the implementation of the new national mapping strategy, including training in information management and new technical systems aimed at delivering quality spatial information.

Kenya	Adaptation	11798 - WFP Capacity Strengthening for DRR and resilience	The programme is expected to strengthen capacity of national and county institutions in Kenya to assist food-insecure and nutritionally vulnerable populations. This is done by developing technical capacities, know-how and experience for evidence-based design and planning of resilient livelihoods and emergency preparedness and response programmes. The programme also provides technology support, including supporting operational structures for emergency preparedness and response at county level with systems and equipment, e.g. remote data collection, analysis and dissemination of early warning information.	
Bosnia-Herzegovina	Cross-cutting	13717 - Environmental strategy of Bosnia and Herzegovina	The main objective of the intervention is developing the Environmental Strategy and Action Plans for Bosnia and Herzegovina (BiH ESAP) for period 2030+. The expected long-term impacts of this project is to improve the state of the environment in BiH and progress in the process of BiH approximation to the EU. Consequently, project will contribute to improving country's resilience to natural disasters. The implementing partner, Stockholm	

			Environment Institute (SEI), has extensive experience in supporting public actors from the municipal to the international level with the development and implementation of their environment and sustainable development policies.	
Europe, regional	Adaptation	14237 - Regional Environmental Programme WB Prestudie	Air pollution is one of the main environmental problems in Western Balkans. In the region, there are 16 outdated coal powerplants that threaten public health. Air quality is transboundary and air pollution has negative consequences locally, regionally and globally. Inferior air quality affects even more already disadvantaged groups of people and children are uniquely vulnerable to air pollution. The Swedish Environmental Protection Agency is receiving support ahead of a joint regional programme together with UNICEF with a focus on air quality and children/youth's health in Albania, Bosnia and Herzegovina, Kosovo, Montenegro, North Macedonia and Serbia. The regional programme is expected to contribute to increased support for transition from fossil fuel to	-

			<p>renewable energy and enhance dialogue between the countries in the region. The EU integration process is one of the main political drivers of change in the region, also in the environment sector. The regional programme will conduct activities that will take into consideration international programmes and initiatives like the New Green Deal, IPA 3 and other relevant multilateral agreements effecting the environmental work in the Western Balkans, e.g. Paris Agreement, Convention on Biodiversity and Convention on Long-Range Transboundary Air Pollution. The inception phase is expected to contribute to a regional platform for improving environmental cooperation between different actors in Western Balkans and the development of a programme proposal for the full-scale programme.</p>
