Thinking of institutional arrangements in the broad sense and with a focus on which departments are involved in which processes (e.g. GEF and GCF processes or consultations for policy formulation) – Can you think of examples from the region (or beyond) where institutional arrangements were conducive to gender integration in national climate policy, plans, strategies and action? Please share your experience

Status quo and plans Group 1-4

Burkina Faso In the Central African Republic, the institutional framework concress the establishment of a National Gilmate coordination group. Burkina Faso In the Central African Republic, the institutional framework concress the establishment of a National Gilmate coordination with his within the Director in charge of Adaptation which the WRCCFP. This Coordination of the Collect woods and cook. Allows, when the WRCCFP center of Adaptation is not revised the NDC and the delaboration of the REDD + project in the update of the NDC, creation of synergic between the luxur of counts which thas within NDC and Made recoils with the wood scuentists which as within the account. 	Mall has put focal points in key departments: agriculture, forestry and energy. New since the gender action plan: The sustainable development department has set up a climate change focal point which works with the department's focal point. The main mission is the development of a gender and climate change plan. Collaboration in the development of the second			
		Issues of gender have been mainstreamed in main government polices, strategies and plans.		NGOs have mainstreamsed gender, climate change action and promotion.
	action plan, coordinating with Mininistry of Environment, regional organisations, UNDP. Issues of gender have been at the forefront.	Trying to align national policies and revising the NDC/		The participant's NGO produced a song and put gender in perspective featuring women, youth and children.
		Before National budget approvals, gender issues are incorporated and gender budget statements and tools are used in planning	There is a gender monitoring office in Rwanda	While developing Climate Change and Environment budgets gender issues are integrated.
	in Rwanda, the Min. gender and family promotion has worked on policies on gender issues. Gender and Climate change are considered as cross cutting issues and all sectors to mainstream them in thier national plans. Before	Before National budget approvals, gender issues are incorporated and	Also mentioned that there is a Gender monitoring office in Rwanda	
	planning. Moreover,			issues are integrated.
	At the Ministerial level there is one gender focal point. There is also a cooperation with UN Women. FAO also supports gender and climate action, also on the Coronovia platform. Institutionalization: Collaboration with the Ministry of the Environment with the CTCN			Also an initiative by a partner in Senegal which is working with the Designated National Entity (END) for the CTCN. A civil society organization can offer technical assistance from the CTCN for a sector local agro-food solar equipment especially for small female businesses.
South Africa			small state interventions is necessary. In some states, conscious efforts to bring to the fore issues of land tenure and women's rights will be beneficial in the long-term. Women in the region have been known to constitute more than half of the farmers.	Promote access to resources and basic services; underlying vulnerabilities of small states is the lack of access to productive resources and basic services such as land, health, education, employment, transport, finance and credit. The right balance needs to be established between investment in direct climate change response efforts and general provision of necessary day to day and long-term basic social, physical, and economic needs of citizens in small states
	Water for all: Chair (Master) for senior executive in water treatment plants were only 9% women in 2009 but are now at 33% of women. The objective of sustainable water development is important, and the objective is to increase the number of women in management.			
	2020-2025 action plan takes gender into account. strategy adopted by the Council of Ministers, to support states in gender issues for sectoral policy.	Translation, dissemination of modules to build capacities at national level
