

Mr. Peter Graham

Executive Director of the Global Buildings Performance Network (www.gbpn.org), a global network of local policy experts dedicated to achieving the mitigation of greenhouse gas emissions from the buildings sector. He has more than 20 years' experience in international advocacy, research and education in sustainable building design, construction, evaluation and policy. Peter is also Associate Professor of Architectural Performance at Monash University, Melbourne Australia and a Technical Advisor to the U.N. Environment Global Alliance on Buildings and Construction.
