

BLUEPRINT FOR SETTING VIRTUAL TECH HUBS SERVICES TO SUPPORT INNOVATORS AND ENTREPRENEURS IN THE GREEN SECTOR

UN Climate Change Global Innovation Hub Pavilion

Event Description

The Greenovation project, implemented by the United Nations University and a consortium of partners, seeks to strengthen the entrepreneurial community to meet global challenges. This session will showcase the concept of a blueprint for tech hubs services, as a tool to set up and implement virtual tech hubs services, and contribute to strengthen the development of an effective enabling environment to support youth and women innovation and entrepreneurship in the African Region and beyond. Learn more about the project here: <https://greenovations-africa.org>.
