Paris Committee on Capacity-building

Capacity-building Knowledge to Action Day

19 August 2019

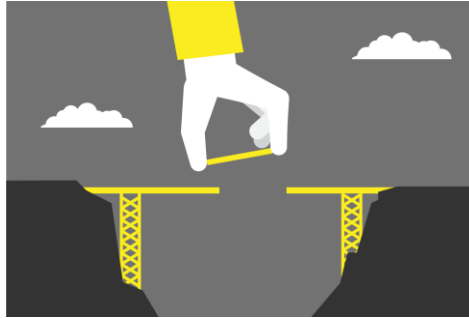

Salvador da Bahía, Brazil

The Paris Committee on Capacity-building aims

*“... to address **gaps and needs**, both current and emerging, in implementing **capacity-building** in developing country Parties and further enhance capacity-building efforts, including with regard to **coherence and coordination** in capacity-building activities under the Convention.”*

(1/CP.21, paragraph 71)

Work plan

- ▶ The PCCB has been tasked with overseeing and managing the **2016-2020 capacity-building workplan** launched by COP 21
- ▶ Based on its aim and mandates, the PCCB adopted a **rolling work plan for the period 2017-2019**;
- ▶ Implemented through the lens of the **PCCB's annual focus area or theme** (2017-2019 focus area: Capacity-building activities for the implementation of NDCs);
- ▶ Supported through **four thematic PCCB working groups** focused on:

Coherence and coordination

on capacity-building under and outside the convention

Cross-cutting issues

such as gender responsiveness, human rights, and indigenous peoples' knowledge

Awareness-raising, communications and stakeholder engagement

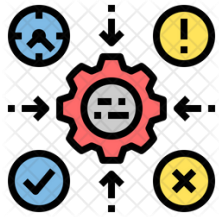

Identifying capacity gaps and needs

How will these events contribute to PCCBs work?

These events will support work of PCCB, especially on:

Identifying context-driven responses to capacity gaps and needs at the local and national level

Bridging the gap between the theory and practice of climate action.

8th Durban Forum

20 June 2019

Key messages:

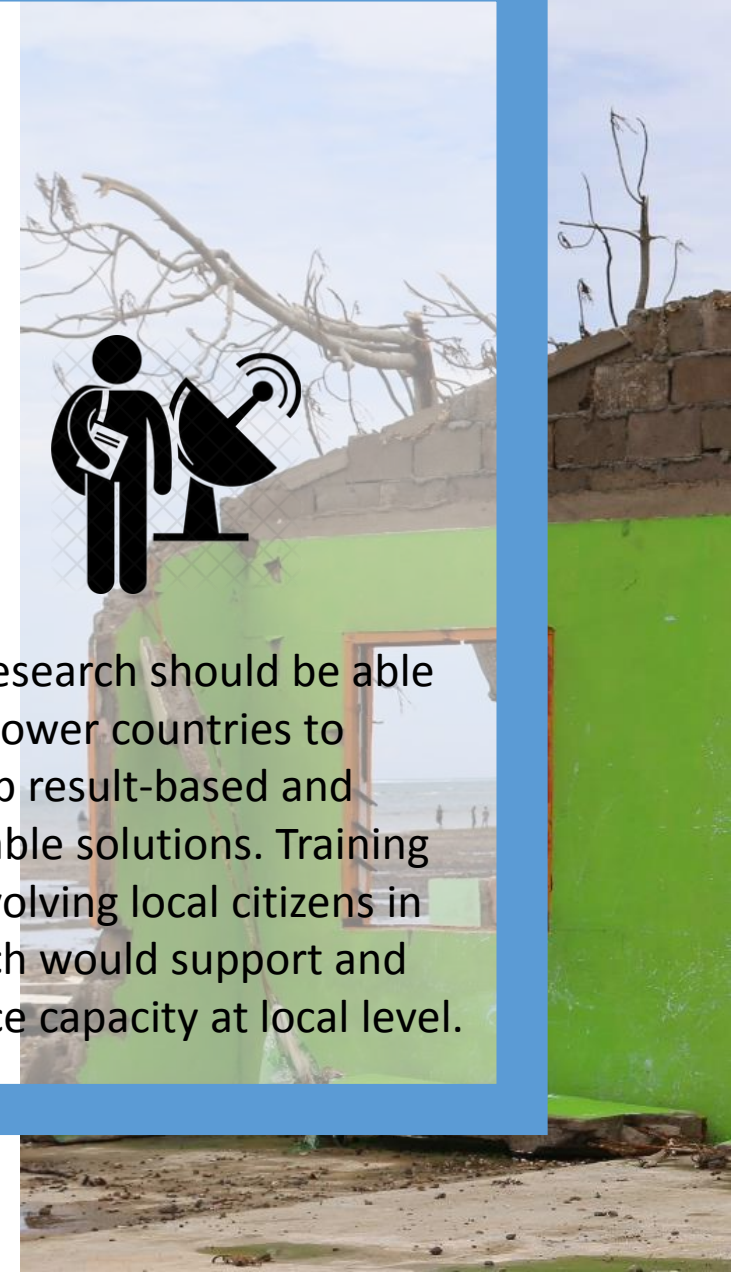

Participants highlighted the important role played by academia in retaining capacities within developing countries.

It is extremely important to understand the role and relevance of local, national and regional research institutions and universities in providing effective capacity-building and context-driven solutions, even more in the context of NDC implementation

Local research should be able to empower countries to develop result-based and actionable solutions. Training and involving local citizens in research would support and enhance capacity at local level.

Capacity-building Knowledge to Action Days

The Paris Committee on Capacity-building seeks to promote capacity-building initiatives that are embedded in longer-term locally owned plans:

Pursue medium-term impacts rather than short-term outputs

Involve support to beneficiary countries for institutional strengthening

Facilitate peer-to-peer learning and experience-sharing

Promote the engagement of national and regional experts and researchers as well as subnational, national and regional institutions supporting capacity-building

GENERACIÓN DE ACTIVIDAD ACADÉMICA Y REDES PARA LA CREACIÓN DE CAPACIDADES EN EL MARCO DE LA ADAPTACIÓN Y MITIGACIÓN DEL CAMBIO CLIMÁTICO, ENTRE ACTORES COORDINADOS Y REPRESENTANTES INTERNACIONALES ACREDITADOS, ANTE LA REPÚBLICA DE COLOMBIA.

EJE DE COOPERACIÓN

Objetivo

- 1 Generar talleres prácticos, constructivos y motivados, en los que se fomente el aprendizaje autodidacta y el trabajo en equipo, así como el trabajo creativo, en el ámbito del emprendimiento, liderazgo y ciudadanía.

Metodología

Generar espacios de discusión académica y aprendizaje práctico, aprovechando las experiencias de los participantes, así como el aprendizaje por pares, el intercambio de conocimientos y el trabajo en equipo.

Acciones emprendidas (actores)

Realización de los talleres de capacitación por representantes de la ciudad de Bogotá, Colombia, con el apoyo de la Fundación de Estudios y Políticas Públicas de Bogotá, Colombia, y la Universidad de los Andes, Colombia.

Actividades a generar febrero-mayo 2019

- 1 Realización de talleres de capacitación en la ciudad de Bogotá, Colombia.
- 2 Realización de talleres de capacitación en la ciudad de Bogotá, Colombia.
- 3 Realización de talleres de capacitación en la ciudad de Bogotá, Colombia.
- 4 Realización de talleres de capacitación en la ciudad de Bogotá, Colombia.
- 5 Realización de talleres de capacitación en la ciudad de Bogotá, Colombia.

Estructura propuesta para el evento

El evento se llevará a cabo en la ciudad de Bogotá, Colombia, en el mes de febrero de 2019. El evento se llevará a cabo en la ciudad de Bogotá, Colombia, en el mes de febrero de 2019.

Productos finales

- 1 Se generará un informe final de los resultados de los talleres de capacitación.
- 2 Se generará un informe final de los resultados de los talleres de capacitación.

PROYECTO DE VULNERABILIDAD

FORTALECIMIENTO LAS CAPACIDADES DE MUJERES LIDERES PARA UNA PARTICIPACIÓN EFECTIVA Y SEGURA EN LA CONSERVACIÓN DE ECOSISTEMAS FRÍAS DE LOS ANDES EN LIMA

Ciudad Lima | Población: 84 millones | Ubicación: Perú

OBJETIVOS

Fortalecer en los líderes de las comunidades de las mujeres líderes en el conocimiento de los ecosistemas fríos de los Andes, sus servicios ecosistémicos y su importancia para la participación más equitativa y segura en la gestión de sus territorios y ecosistemas, así como el conocimiento de los ecosistemas fríos de los Andes y sus servicios ecosistémicos.

Soclos y actores

Mujeres líderes de las comunidades de los Andes, Perú. Organizaciones de mujeres líderes de las comunidades de los Andes, Perú. Organizaciones de mujeres líderes de las comunidades de los Andes, Perú.

Actividades

- 1 Realización de talleres de capacitación en la ciudad de Lima, Perú.
- 2 Realización de talleres de capacitación en la ciudad de Lima, Perú.
- 3 Realización de talleres de capacitación en la ciudad de Lima, Perú.
- 4 Realización de talleres de capacitación en la ciudad de Lima, Perú.
- 5 Realización de talleres de capacitación en la ciudad de Lima, Perú.

ECOSISTEMAS DE LOS ANDES

3 tipos de ecosistemas seleccionados en el estudio de caso de los Andes de las mujeres líderes de las comunidades de los Andes.

Los 3 tipos seleccionados de ecosistemas de los Andes de las mujeres líderes de las comunidades de los Andes.

Acciones emprendidas por el estudio de caso de los Andes de las mujeres líderes de las comunidades de los Andes.

PARTICIPACIÓN Y GOBERNANZA EN LA CONSTRUCCIÓN DE AGENDAS CLIMÁTICAS EN EL ECUADOR

Un documento de trabajo para el desarrollo de las agendas climáticas en el Ecuador.

CARACTERÍSTICAS COMUNES

Intervención pública

- El proceso de construcción de agendas climáticas en el Ecuador es un proceso de participación pública.
- El proceso de construcción de agendas climáticas en el Ecuador es un proceso de participación pública.

Sectores involucrados

- Múltiples actores.
- Múltiples actores.

Temas clave

- El Cambio Climático está en el centro de las agendas climáticas en el Ecuador.
- El Cambio Climático está en el centro de las agendas climáticas en el Ecuador.

Elementos clave en el diseño e implementación de agendas climáticas

- El diseño de agendas climáticas en el Ecuador es un proceso de participación pública.
- El diseño de agendas climáticas en el Ecuador es un proceso de participación pública.

AGENDAS CLIMÁTICAS

El diseño de agendas climáticas en el Ecuador es un proceso de participación pública.

CAMPAÑA ESTRATÉGICA DE RECICLAJE Y EDUCACIÓN PARA PREVENIR EL CC

Medidas de Adaptación y mitigación

La Conciencia por el reciclaje en nuestros hogares, al igual que mantener un buen plan de tratamiento de residuos en las empresas que lo requieren.

108 MIL HABITANTES

Aumentar la resiliencia en el ámbito urbano a través de una campaña salidas de concientización ambiental para prevenir consecuencias ambientales.

ACCIONES CONJUNTAS

Desarrollar una campaña mediática sobre concientización ambiental y reciclaje. Difundir y capacitar a la ciudadanía en general sobre el proyecto de concientización ambiental para que sea replicado en los hogares del Cantón Romiñahu.

CAMBIO CLIMÁTICO EN EL PLAN DE DESARROLLO Y ORDENAMIENTO TERRITORIAL

PLAN DE ORDENAMIENTO TERRITORIAL PARA EL CANTÓN ROMIÑAHU

CIUDADES Y CAMBIO CLIMÁTICO

El cambio climático en las ciudades y en los territorios urbanos es un desafío que requiere de acciones de adaptación y mitigación.

ENERGÍA Y EDIFICACIÓN

Se requiere de acciones de adaptación y mitigación en el sector de energía y edificación.

EL TRANSPORTE Y MOVILIDAD

Se requiere de acciones de adaptación y mitigación en el sector de transporte y movilidad.

GOBERNANZA Y PARTICIPACIÓN CIUDADANA

Se requiere de acciones de adaptación y mitigación en el sector de gobernanza y participación ciudadana.

ESTRATEGIAS CONCRETAS PARA EL DESARROLLO TERRITORIAL DEL CANTÓN ROMIÑAHU

El desarrollo territorial del cantón Romiñahu requiere de acciones de adaptación y mitigación.

gaston@newhumanism.org

Capacity-building Knowledge to Action Day

Latin America and the Caribbean Climate Week 2019

19 August 2019, Salvador de Bahia, Brazil

Context of engagement

- The Global Research NGO constituency (RINGOs - <http://www.ringos.net>)
- The New Humanism Project (<http://www.newhumanism.org>)

The work on capacity building of The Global Research NGO constituency (RINGOs)

- Liaison between the scientific organisations (research centres, universities, consultancies, ...) and the United Nations Climate Change Secretariat

Established in 2003 on request of the UNFCCC

Representing ~900 organisations worldwide

Embodied in the form of a steering committee (of volunteers)

tasks

- **service provider** to scientific organisations (information hub, advice, networking, ...) at conferences, through websites and mail;
- **coordination of the representation of the global scientific world** in negotiation processes and working groups and towards the other NGO groups;
- **meetings** with ministers, conference presidents and coordinators of the parallel negotiation processes;
- **research and critical evaluation** of processes and policy issues;
- **the voice of the global scientific world** on research-related climate change issues (plenary statements, participation in working groups, letters to the climate change secretariat, ...).

The work on capacity building of The Global Research NGO constituency (RINGOs)

■ My engagement:

Member of the Steering Committee since 2010
Chair (2016 – 2018)

■ Our main topics of concern:

- science as / for policy advice;
- research capacity building (knowledge, expertise, funding, infrastructure), especially in developing countries;
- partnerships with the private sector;
- education and training policies and capacities;
- the spirit of scientific research and advice:

holism – transdisciplinarity - inclusion

The work on capacity building of The Global Research NGO constituency (RINGOs)

Since Marrakech 2016, our message became more critical:

... science as policy advice cannot longer be seen as the collection of disciplinary knowledges from which one can pick the preferred piece of 'evidence' supporting the own case ...

... science as policy advice is about generating holistic insight into complexity, integrating natural, technical, social, political and ethical aspects of the problem and of the possible solutions ...

The work on capacity building of The Global Research NGO constituency (RINGOs)

for your information:

- The Universities Network for Climate Capacity (UNCC) <https://www.unccclimate.com/>

→ At the COP in Marrakech, representatives from more than twenty-five universities met to discuss what universities and colleges could contribute to climate policy generally and implementing the Paris Agreement specifically. This led to the idea to establish a 'network for climate capacity'.

→ The UNCC is a global organization of higher education faculty and institutions committed to working on capacity building and climate change policy.

→ The UNCC's mission is to employ university resources to build capacities to deal with climate-related challenges, particularly in developing countries. Its core principles include diversity, inclusion, engagement, sharing, and problem-solving.

- An analogous capacity building initiative centered around universities in developing countries was also set up: The Least Developed Countries Universities Consortium on Climate Change (LUCCC - <http://www.luccc.org/>)

The work on capacity building within The New Humanism Project

■ The New Humanism Project is a privately-funded initiative, but with important support from a (growing) number of institutions

■ Main ideas

- We cannot solve our societal problems with the same methods that (facilitate to) create them.
- Climate change is a **complex social problem** among many others. They are **interlinked** and troubled by **uncertainties** and **value pluralism**. And our **responsibilities** towards them are **interdependent**.
- Taking this complexity serious, the idea is that the **traditional governing methods** of international politics, representative democracy, the market and science **are not longer able to grasp the complexity of these social problems**.
- The vision is that **inspiration and motivation for 'new methods'** need to come **from deeper thinking about who we are** as individuals and groups and about how to deliberate these problems with each other.

The work on capacity building within The New Humanism Project

- There is a need for

new methods for	that stimulate	instead of those that 'by design'
democracy	Deliberation	provoke conflict between competing ideologies
science (as policy advice)	Emancipation and (compassionate) confrontation	provoke conflict between competing truths
education	Reflexivity	shape our children as instruments for political conflict and the neoliberal market

- Capacity building as intellectual capacity building

In this, **education is essential**. We should care for an education that enables and stimulates (young) people **to become (self)critical cosmopolitans or 'world citizens'** and **to develop ethical competence**.

The work on capacity building within The New Humanism Project

■ Pilot workshop
(education for a) Cosmopolitanism beyond Comfort Zones

Friday 27 September 2019, New York

in cooperation with the World Council of Peoples for the United Nations, UNITY EARTH,
The Interspiritual Network and the Forum 21 Institute.

questions What is ethical competence?

What kind of education do our children need in order to make them more resilient to all kinds of capitalist, conformist and fundamentalist manipulations of our co-existence and to help them to live better with each other in our complex society?
