

ANNUAL REPORT

Thank you for participating in the Climate Neutral Now initiative. As committed in your pledge, you must report annually on your climate actions. To do so, please fill in this Report and send it back to us via email (climateneutralnow@unfccc.int). If you report to CDP, this report is not necessary and in this case, please advise us via email.

GENERAL

1. What is the name of the reporting organization?

LINKCO Inc

2. Please indicate the reporting period correspondent to this Report

Starting date – dd/mm/yyyy

Ending date – dd/mm/yyyy

01/01/2020

31/12/2020

3. What are the challenges and opportunities to climate action that might affect the financial or strategic plans of your business?

Please describe here.

The challenge for our business is that many companies are "walking the walk" but when it comes to actual strategic change, well that as we all know is difficult. Since our company broadcasts our commitment to climate change and a circular economy front and center, we sometimes get ignored. The business moved out of a office building prepandemic and we do not plan to move back in, thus saving significantly on our Carbon impact.

4. Have climate-related risks and opportunities been considered in your organization's strategy and/or financial planning? *Please describe here.*

Yes, the risks are everpresent if we do not convince the broader business community to take charge of their GHG emissions. The opportunities are becoming a leader in our field and inspiring other businesses to follow our lead.

5. Did your organization's operations substantively change in the reporting period, affecting your GHG emissions?

☐ Yes

☒ No

6. Do you engage with your value chain on climate-related issues? Please advise who with.

Suppliers

Customers

Other partners in the value chain

Do no engage

7. Please indicate any awareness raising or advocacy initiatives that were active within the reporting year. *Note that this can include those in the planning and/or implementation phases.*

My company is currently running a webinar series that have included several significant webinars dealing with climate change related issues. One was on the Circular Economy, one was on Climate Change related to business risk, one was a Water Tech that helps improve monitoring and cleanup of tainted water sources and the current two part series is on ESG reporting.

15.How much of the total emissions (metric tons of CO2 equivalent) correspond to Scope 1?

2

16.How much of the total emissions (tons of CO2 equivalent) are corresponding to Scope 2 using the Market Approach?

A market-based method reflects emissions from electricity that companies have purposefully chosen (or their lack of choice).

17. How much of the total emissions (tons of CO2 equivalent) are corresponding to Scope 2 using the Location Approach?

A location-based method reflects the average emissions intensity of grids on which energy consumption occurs (using mostly grid-average emission factor data).

3

18. How much of the total emissions (tons of CO2 equivalent) are corresponding to Scope 3?

Scope 3 includes indirect emissions that occur in your organization's value chain. If you are not measuring this scope, answer with "0", please.

0

19. Please select the categories included in your Scope 3, and their status

You can find a detailed description of the categories on the Corporate Value Chain (Scope 3) Accounting and Reporting Standard, p. 34 (<https://ghgprotocol.org/standards/scope-3-standard>)
