2	13:00-13:30	Engajamundo	Together We Are One	This action is about the need of constructing a better world together. To do this, the first thing we need is to get everyone involved and show how strong we are when we are united. This action will be happening in four moments. The first part is a dynamic where we are going to get together and one person is going to try to

				<p>raise a girl. It won't be possible to do it alone so, we are going to invite more people to help us out. When we get people enough to raise the girl we are going to show everyone that if we do it together it is possible to raise each other. Together we are stronger. After that we'll have a speech. The speech will embrace the importance of doing things together and how the world functions well when we work as community. After the speech, the third moment begins with a puzzle. This puzzle will show that some goals can only work - as the world - if they are together. We'll use examples like this: indigenous people will only accomplish their part if they have a land for their own (cuz indigenous land helps on the carbon sequestro of the atmosphere). It will be literally drawn what we talked on the previous speech. The last moment, will be a last speech, complementing the first one, saying that the youth is ready to work as a team with all different youths around the world specially with our government and negotiators to show how we could make a better world together as we face those moments of questions and doubts about the environmental future in Brazil. We are counting with the youths and the parts to help us achieve the goals of Paris agreement.</p>
